Honesty - Christian B. Miller 2021
"Honesty is clearly an important virtue. Parents want to develop it in their children. Close relationships typically depend upon it. Employers value it in their employees. Yet philosophers have said almost nothing about the virtue of honesty in the past fifty years. This book aims to draw attention to this surprisingly neglected virtue. Part One looks at the concept

of honesty. It takes up questions such as what does honesty involve, what are the motives of an honest person, how does practical wisdom relate to honesty, and is there anything that connects all the different sides of honesty, including not lying, not stealing, not breaking promises, not misleading others, and not cheating. A central idea is that the honest person reliably does not intentionally distort the facts as she takes them to be. Part Two looks at the empirical psychology of honesty. It takes up the question of whether most people are honest, dishonest, or somewhere in-between. Drawing extensively on recent studies of cheating and lying in particular, the emerging model ends up implying that most of us have a long way to go to reach an honest character"--

Integrity, Honesty, and Truth Seeking - Christian B. Miller 2020-02-17

"Integrity, honesty, and truth seeking are clearly important virtues that most people care about and want to see promoted in society. Yet surprisingly there has been relatively little work among scholars today aimed at helping us better understand this cluster of virtues related to truth. This volume incorporates the insights and perspectives of experts working in a variety of disciplines, including philosophy, law, communication and rhetorical studies, theology,

psychology, history, and education. For each virtue, there is a conceptual chapter, an application chapter, and a developmental chapter. The result is a volume that significantly deepens our knowledge about and appreciation for these central virtues"--

Radical Honesty - Brad Blanton 1996-04-01

At once shocking, entertaining, and profound--Radical Honesty is revolutionary book that takes a fresh look at how we live, love, and attempt to heal ourselves in modern society. Radical Honesty is not a kinder, gentler self-help book. In it Dr. Brad Blanton, a psychotherapist and expert on stress management, explodes the myths, superstitions, and lies by which we live. He shows us how stress comes not from the environment, but from the self-built jail of the mind. What keeps us in our self-built jails is lying. "We all lie like hell," Dr. Blanton says. "It wears us out...it is the major source of all human stress. It kills us." Not telling our friends, lovers, spouses, or bosses about what we do, feel, or think keeps us locked in that jail. The way out is to get good at telling the truth. Dr. Blanton provides the tools we can use to escape the jail of the mind. This book is the cake with the file in it. In Radical Honesty, Dr. Blanton coaches us on how to have lives that work, how to have relationships that are alive and passionate, and how to create intimacy where none exists. As we have been taught by the philosophical and spiritual sources of our culture for thousands of years, from Plato to Nietzsche, from the Bible to Emerson, the truth shall set you free.

The Truth - Neil Strauss 2015-10-13

NO MORE GAMES. IT'S TIME FOR THE TRUTH. Neil Strauss made a name for himself advocating freedom, sex and opportunity as the author of The Game. Then he met the woman who forced him to question everything. Neil's search for answers took him from Viagra-laden free-love

orgies to sex addiction clinics, from cutting-edge science labs to modern-day harems, and, most terrifying of all, to his own mother. What he discovered changed everything he knew about love, sex, relationships and, ultimately, himself. The Truth may have the same effect on you.

Knowing and Not Knowing in Intimate

Relationships - Paul C. Rosenblatt 2013-07-25

In the extensive literature on couples and intimacy, little has been written about knowing and not knowing as people experience and understand them. Based on intensive interviews with thirty-seven adults, this book shows that knowing and not knowing are central to couple relationships. They are entangled in love, sexual attraction, trust, commitment, caring, empathy, decision making, conflict, and many other aspects of couple life. Often the entanglement is paradoxical. For example, many interviewees revealed that they hungered to be known and yet kept secrets from their partner. Many described working hard at knowing their partner well, and yet there were also things about their partner and their partner's past that they wanted not to know. This book's qualitative, phenomenological approach builds on and adds to the largely quantitative social psychological, communications and family field literature to offer a new and accessible insight into the experience of intimacy.

Compulsive Lying in Relationships: The Comprehensive Guide to Building Trust and Emotional Intimacy - David Joseph 2019-02-08

The habit of lying is a toxic practice that can eventually break down a strong relationship. Healthy and vibrant relationships are built on honesty. No relationship can survive, let alone thrive, without openness and integrity. Relationships that are healthy, cheerful and balanced are characterized by real people who are in touch with their authentic selves. It is hard to give what you don't have; honesty begins with you. If you expect the trust of someone, you must come clean and demonstrate honesty and

integrity from the beginning and maintain it throughout the entire relationship. When trust is lost in a relationship, it gives way for distrust and misunderstanding. Deceit can be one of the quickest ways to strip that needed trust from a relationship. It is a common problem with many people nowadays affecting their happiness and choices. The potential damage and complications that surround lying are things to consider when telling lies. For a relationship to work there should be a balance of effort from both parties; they must give an equal commitment to it. This balance of effort creates the feeling of trust and understanding that strengthened a relationship. On the other hand, lying disturbs the flow of this natural equilibrium and causes an imbalance in the relationship. For the victim of a lie, the experience can be devastating and make them feel as though they have put their all their heart on the line, only to be disappointed by a deceptive partner. Lies told in close relationships will cause a great deal of pain, heartache, and undermine the intimacy and ties you have with your partner. Lying does nothing good for a relationship, it only prolongs issues and makes situation get worse in the long run. No matter which way you may try to spin it, lying doesn't solve anything; it causes people to act differently which tend to undermine the bond that holds relationships together. When you lie, you hurt your mind and keep yourself out of touch with reality. You disguise and project deceit and falsehood to your partner. He/she may not know that you are telling lies, but right within, you know the truth because you can only lie to people but not yourself. The guilt of deceit will hang on unless you decide to change and come out clean. If you wish to develop a healthy relationship you have to treat your partner with respect and dignity, you have to stop lying and live uprightly. Lying won't solve problems. It can only provide momentary satisfaction which will fade away with time. It may cover the shame and the guilt for the moment, but will not render a realistic solution to the problem. The moment you realize this vital point the good for you to seek to eradicate lies from your life before it wreaks uncontrollable havoc. Lying hurts the ones we care about the most, sometimes when we lie, we do so to get ourselves out of a sticky situation. We may not mean to harm our

partners. But in reality, lies do hurt. By concealing the truth, you are depriving your partner vital information, and when the truth is known, they will feel betrayed by you. The feeling of betrayal can lead to a breakdown in communication which can create a crack in the cohesiveness of a relation. Love doesn't hurt, but lies do; and the moment you start telling lies, it is no longer love. Honesty improves our vitality, endears us to friends and loved ones. It engenders confidence, strengthens our willpower and represents us in the best way for others to emulate. Being honest with yourself is a great way to build trust, rise above life challenges, gain self-acceptance, and develop genuineness for a healthy relationship. This book offers a sound and reliable roadmap to building trust and emotional intimacy in a relationship. You will learn about what you can do to promote an atmosphere of honesty around you and generate a steady flow of trust in your relationship.

HOW HONESTY, TRUST, AND TEAMWORK CAN TRANSFORM YOUR BUSINESS

Ken Blanchard said, "Leadership is working with people to accomplish their goals and the goals of the organization." It takes a team to grow a successful business and a great culture to sustain that growth. This book is about the journey to make that happen in your organization. I call it the Honest Culture Journey, and my goals are to help you answer these three questions: What are the key actions to building a high performing business and culture? What are the most common barriers to true teamwork, trust, and performance? How do you start shifting your own leadership style so the team around you leads more and you get more time to focus on the things that you love, both inside and outside of work? This book is for leaders who want to build a team that performs at a high level, and develop a culture that will be the glue for continued success. In it, you will discover how to build an Honest Culture through relationships, and how this culture based on honesty, trust, and teamwork will transform your business - and the people in it. In writing this book, I invited a diverse group of six highly successful leaders to share their insights that will help you be successful on your own Honest Culture Journey. The level of transparency, vulnerability, and honesty shared with me during interviews for this book was more than I could ever ask for, and I am excited to share their real-world experience with you.

Truth in Dating - Susan Campbel, PhD
2011-02-08

Millions of single people — whether never married or divorced — put a lot of energy into

meeting and dating new people, but because they don't invest their true selves, their efforts often go nowhere. To counter this trend, Susan M. Campbell presents an approach to dating that many consider radical: Be honest about yourself and ask for what you want, up front. Campbell shows people how to have fun by flirting truthfully; date without getting ahead of the relationship; enjoy the freedom of being themselves; relate to their dates with honesty; realistically examine what a romantic partner can — and can't — offer in the way of fulfillment and happiness; and move forward when the time is right, or say goodbye if it's not working. On the way to finding the love of their lives, readers gain the tools they need to successfully manage the entire process.

Life, Soul & Love - Maha 2017-06-14

The key connectors in all relationships are life, soul, and love. If the soul detaches from life, life ends. And when love departs from the soul, the soul is empty. The soul keeps pain like a prick from a thorn, aching for that love that has departed. Why does the soul feel the pain? Well, because the soul never dies. Once the body dies, then the only thing that remains is the soul. That is the reason why we as human beings have the responsibility of not hurting anyone's soul. That is why when we are really in love, we are to connect soul to soul. Love means to give and trust another soul with your heart and to connect and care unconditionally. Some relationships seem very strong because they have these principles?truth, love, and honesty. These principles in a relationship are attractive. And sometimes, when a relationship comes to an end, it catches numerous people by surprise. It is not because they break up for the same principles, but at times, these principles are what are left in the relationships when the feelings fade away. When there's no truth, love, and honesty in the relationship, it weakens. As the wind blows, it blows away everything with it. And once the wind stops blowing, you realize that there's nothing behind.
