The Path to Tyranny - Michael Newton 2010-05-17

Examines how many free societies have fallen to tyranny and looks at the possibility that the United States could be next.

The International Handbook of Psychology - Kurt Pawlik 2000-11-13

This authoritative resource, comprising 31 chapters, covers all the main areas of psychological science and is written by an outstanding set of authors from around the world.

Total Truth - Nancy Pearcey 2005

In *Total Truth*, Nancy Pearcey offers a razor-sharp analysis of the split between public and private, fact and feelings. She reveals the strategies of secularist gatekeepers who use this division to banish biblical principles from the cultural mainstream, stripping Christianity of its power to challenge and redeem the whole of culture. // How can we overcome this divide? Unify our fragmented lives? Recover authentic spirituality? With compelling examples from the struggles of real people, Pearcey shows how to liberate Christianity from its cultural captivity. She walks readers through practical, hands-on steps for developing a full-orbed Christian worldview. Finally, she makes a passionate case that Christianity is not just religious truth but truth about total reality. It is total truth.

The Evolution of Insect Mating Systems - Randy Thornhill 2013-10-01

Una Historia Natural de la Violación - Distinguished Professor of Biology Randy Thornhill 2007

In this book, Randy Thornhill and Craig Palmer use evolutionary biology to explain the possible origin and causes of rape, and to recommend new methods of prevention. According to the authors, somehow evolutionary adaptation gave rise to rape. The main question is whether it is an adaptation in itself or a byproduct of other adaptations. Whatever the answer, the authors state that rape mocks a fundamental characteristic of the reproductive strategy: partner choice. This is one of the many reasons why rape is so devastating to victims, especially for young women. Although they argue that rape is a biological fact, Thornhill and Palmer do not consider it inevitable. Their proposals to prevent it include educating children, punishing offenders more harshly, studying the effectiveness of "chemical castration," and focusing on the laws on the victims. En este libro, Randy Thornhill y Craig T. Palmer emplean la biología evolutiva para explicar el posible origen y las causas de la violación, y para recomendar nuevos métodos de prevención. Según los autores, de algún modo la adaptación evolutiva dio origen a la violación; la principal pregunta evolutiva es si ésta constituye una adaptación en sí misma o si es un subproducto de otras adaptaciones. Cualquiera que sea la respuesta, observan Thornhill y Palmer, la violación burla una característica fundamental de la estrategia reproductiva femenina: la elección de pareja. Éste es uno de los motivos principales de que la violación sea tan devastadora para las víctimas, en especial para las mujeres jóvenes. Aunque plantean que la violación es un hecho biológico, Thornhill y Palmer no la consideran inevitable. Sus propuestas para prevenirla incluyen educar a los niños, castigar con más rigor a violadores y estudiar la eficacia de la "castración química"; y centrar las leyes en las víctimas.

A Natural History of Rape - Randy Thornhill 2001-02-23

A biologist and an anthropologist use evolutionary biology to explain the causes and inform the prevention of rape. In this controversial book, Randy Thornhill and Craig Palmer use evolutionary biology to explain the causes of rape and to recommend new approaches to its prevention. According to Thornhill and Palmer, evolved adaptation of some sort gives rise to rape; the main evolutionary question is whether rape is an adaptation itself or a by-product of other adaptations. Regardless of the answer, Thornhill and Palmer note, rape circumvents a central feature of women's reproductive strategy: mate choice. This is a primary reason why rape is devastating to its victims, especially young women. Thornhill and Palmer address, and claim to demolish scientifically, many myths about rape bred by social science theory over the past twenty-five years. The popular contention that rapists are not motivated by sexual desire is, they argue, scientifically inaccurate. Although they argue that rape is biological, Thornhill and Palmer do not view it as inevitable. Their

recommendations for rape prevention include teaching young males not to rape, punishing rape more severely, and studying the effectiveness of "chemical castration." They also recommend that young women consider the biological causes of rape when making decisions about dress, appearance, and social activities. Rape could cease to exist, they argue, only in a society knowledgeable about its evolutionary causes. The book includes a useful summary of evolutionary theory and a comparison of evolutionary biology's and social science's explanations of human behavior. The authors argue for the greater explanatory power and practical usefulness of evolutionary biology. The book is sure to stir up discussion both on the specific topic of rape and on the larger issues of how we understand and influence human behavior.

The Ideology of Conduct (Routledge Revivals) - Nancy Armstrong 2014-06-17

In *The Ideology of Conduct*, first published in 1987, scholars from various fields, from the medieval period to the present day, discuss literature in which the sole purpose is to instruct women in how to make themselves desirable. This collection investigates how middle-class writers who had long emulated the behaviour of the aristocracy began to criticise that behaviour by formulating an alternative object of desire. They did so without appearing to breed political controversy because it seemed to concern only the female. But writing for and about women in fact became a powerful instrument of hegemony as it introduced a whole new vocabulary for social relations, induced certain forms of economic behaviour as desirable in men and women respectively, and insured the reproduction of the nuclear family. It is argued, therefore, that the literature of conduct not only recorded but also assisted the production of our contemporary gender-based culture.

Ambiguous Angels - Catherine Jagoe 2023-04-28

The contradictory nature of the work of Benito Pérez Galdós, Spain's greatest modern novelist, is brought to the fore in Catherine Jagoe's innovative and rigorous study. Revising commonly held views of his feminism, she explores the relation of Galdós's novels to the "woman question" in Spain, arguing that after 1892 the muted feminist discourse of his early work largely disappears. While his later novels have been interpreted as celebrations of the emancipated new woman, Jagoe contends that they actually reinforce the conservative, bourgeois model of frugal, virtuous womanhood—the angel of the house. Using primary sources such as periodicals, medical texts, and conduct literature, Jagoe's examination of the evolution of feminism makes *Ambiguous Angels* valuable to anyone interested in gender, culture, and narrative in nineteenth-century Europe.

Twelve Years A Slave, Illustrated Edition - Solomon Northup 2014-04-08

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story

was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

A Shortcut to Paradise - Teresa Solana 2011

A satirical romp and suspenseful mystery set in the literary world of Barcelona.

Realities and Relationships - Kenneth J. Gergen 2009-06-01

Kenneth Gergen's aim in this textbook is to outline the main elements of a social constructionist perspective, to illustrate its potential and to foment debate on the future of constructionist pursuits in psychology and the human sciences.

Aid in Conflict - Matthew Clarke 2006

Conflict is a major cause of suffering for millions of people throughout the world. Conflict inhibits development and fosters displacement, destruction of infrastructure, loss of food and economic security, abuse of human rights, dislocation of families and communities and loss of cultural identity. In the past, provision of aid was unusual in areas conflict. However, recognition of the immediate human needs within periods of conflict has seen an increased provision and role the provision of aid now plays. Aid in conflict is an emerging area interest that has lacked attention and reflection within the aid and development literature. This edited volume will be an opportunity for development practitioners, community members and theorists to address this situation.

The Future of Israel - Devin Sper 2004

GROUND BREAKING VISION FOR THE FUTURE OF ISRAEL: REPLACING THE FALSE PEACE PROCESS OF TODAY WITH A NEW DECISIVE COURSE OF ACTION THAT WILL SECURE ISRAEL'S FUTURE? The Arab-Israeli conflict is of a national and ultimately a religious nature and not a simple land dispute. It cannot be solved by giving away land while the underlying cause of Arab hostility remains unchallenged. In his new book, *THE FUTURE OF ISRAEL* Devin Sper, scholar and passionate Zionist, offers a timely examination of Israel's current crisis and answers the increasingly desperate question, "Where does Israel go from here?" In *THE FUTURE OF ISRAEL*, Sper explains: "Why pursuing the peace process is not in Israel's interest? Why both the cause of, and the solution to, Israel's problems and historical Jewish suffering are one in the same? The three things Israel must do immediately to insure her survival and provide security for her people? How and why a small fringe group hijacked Judaism and led the Jews to one tragedy after another? Sper maintains that Israel is today without a vision of her future, her economy is in shambles and her people in despair. Their hopes for peace have collapsed and there is a complete vacuum of ideas among Israel's leaders on a new direction, which will lead the country out of her seemingly endless tragedy? To end two millennia of Jewish suffering, Sper argues, Israel must reverse the course her leaders chose at Oslo and resume a commitment to the accumulation of Jewish power she began so promisingly in 1948. Sper presents a vision culminating in Israel as a major power and lays out a long-term plan for achieving this goal. Only by making this journey, argues Sper, can a permanent end to Jewish suffering be realized. With its radical new vision for the future of Israel and the Jewish people based on a remarkably realized plan for a country in turmoil, *The Future of Israel* is the rightful heir to Theodore Hertzl's ground-breaking *The Jewish State*. Sper bases his new vision on an ancient and once mainstream Jewish philosophy. It is a dynamic Judaism flowing from the Bible itself, a Judaism unafraid to engage and challenge the world, which the ancient historian Josephus called the "Fourth Philosophy." Sper explains how the abandonment of this genuine form of Judaism has led to centuries of tragedy for the Jewish people and why a return to this authentic Jewish philosophy is the only path to a secure Jewish future. Meticulously researched and compellingly argued, this brilliant and original work boldly reinterprets Jewish history and theology to offer the Jewish people and Israel a strategy to reclaim its place as a great nation.

Khairlanji - Anand Teltumbde 2008

Dancing to 'Almendra' - Mayra Montero 2008

Havana 1957. On the same day that the Mafia capo Umberto Anastasia is assassinated in a barber's chair in New York, a hippopotamus escapes from Havana Zoo. Joaquin Porrata is the young Cuban journalist assigned to cover the latter story but, told by a secretive zookeeper that he 'knows too much', he soon discovers that the two events are not as unconnected as they might initially seem. An ardent and thrilling tale of innocence lost, of Havana's secret one-time world of violence, fantastic characters and extravagant crimes, *Dancing to 'Almendra'* is a triumph of story-

telling from one of Latin America's most impassioned and intoxicating voices. 'Brilliant . . . Montero moves her story along at a lick, but in the giddy swirl of events she leaves plenty of space for absurdist humour. She handles this blend of fact and fiction with brio' Observer 'Combining the dangerous world of violence with the glittering surface of Havana's nightlife, this is an intoxicating tale' Metro 'A sensitive and touching novel' Big Issue 'Brilliant . . . Dancing to 'Almendra' is an exuberant must-read' Observer

The Evolutionary Biology of Human Female Sexuality - Randy Thornhill 2008

This title introduces a theoretical framework for understanding women's sexuality based on comparative female sexuality across all vertebrate animals. It shows that estrus is present in human females, contrary to earlier research.

The Parasite-Stress Theory of Values and Sociality - Randy Thornhill 2014-07-17

This book develops and tests an ecological and evolutionary theory of the causes of human values—the core beliefs that guide people's cognition and behavior—and their variation across time and space around the world. We call this theory the parasite-stress theory of values or the parasite-stress theory of sociality. The evidence we present in our book indicates that both a wide span of human affairs and major aspects of human cultural diversity can be understood in light of variable parasite (infectious disease) stress and the range of value systems evoked by variable parasite stress. The same evidence supports the hypothesis that people have psychological adaptations that function to adopt values dependent upon local infectious-disease adversity. The authors have identified key variables, variation in infectious disease adversity and in the core values it evokes, for understanding these topics and in novel and encompassing ways. Although the human species is the focus in the book, evidence presented in the book shows that the parasite-stress theory of sociality informs other topics in ecology and evolutionary biology such as variable family organization and speciation processes and biological diversity in general in non-human animals.

Writings for a Liberation Psychology - Ignacio Martín-Baró 1996-09-01

"In your country," Ignacio Martín-Baró remarked to a North American colleague, "it's publish or perish. In ours, it's publish and perish." In November 1989 a Salvadoran death squad extinguished his eloquent voice, raised so often and so passionately against oppression in his adopted country. A Spanish-born Jesuit priest trained in psychology at the University of Chicago, Martín-Baró devoted much of his career to making psychology speak to the community as well as to the individual. This collection of his writings, the first in English translation, clarifies Martín-Baró's importance in Latin American psychology and reveals a major force in the field of social theory. Gathering essays from an array of professional journals, this volume introduces readers to the questions and concerns that shaped Martín-Baró's thinking over several decades: the psychological dimensions of political repression, the impact of violence and trauma on child development and mental health, the use of psychology for political ends, religion as a tool of ideology, and defining the "real" and the "normal" under conditions of state-sponsored violence and oppression, among others. Though grounded in the harsh realities of civil conflict in Central America, these essays have broad relevance in a world where political and social turmoil determines the conditions of daily life for so many. In them we encounter Martín-Baró's humane, impassioned voice, reaffirming the essential connections among mental health, human rights, and the struggle against injustice. His analysis of contemporary social problems, and of the failure of the social sciences to address those problems, permits us to understand not only the substance of his contribution to social thought but also his lifelong commitment to the campesinos of El Salvador.

Practice Makes Perfect: Spanish Vocabulary - Dorothy Richmond 2007-05-21

Building on the success of her prior book, *Practice Makes Perfect: Spanish Verb Tenses*, author Dorothy Devney Richmond helps learners attain a strong working vocabulary, no matter if they are absolute beginners or intermediate students of the language. She combines her proven instruction techniques and clear explanations with a plethora of engaging exercises, so students are motivated and hardly notice that they are absorbing so much Spanish. *Practice Makes Perfect: Spanish Vocabulary* also includes basic grammar and structures of the language to complement learners' newly acquired words. "Vocabulary Builders" help students add to their Spanish repertoire by using cognates, roots, suffixes, prefixes, and other "word-building" tools.
