The Handbook of Language Variation and Change - J. K. Chambers 2013-06-17
 Reflecting a multitude of developments in the study of language change and variation over the last ten years, this extensively updated second edition features a number of new chapters and remains the

authoritative reference volume on a core research area in linguistics. A fully revised and expanded edition of this acclaimed reference work, which has established its reputation based on its unrivalled scope and depth of analysis in this interdisciplinary field Includes seven new chapters, while the remainder have

undergone thorough revision and updating to incorporate the latest research and reflect numerous developments in the field. Accessibly structured by theme, covering topics including data collection and evaluation, linguistic structure, language and time, language contact, language domains, and social differentiation. Brings together an experienced, international editorial and contributor team to provide an unrivalled learning, teaching and reference tool for researchers and students in sociolinguistics.

Resources in Women's Educational Equity - 1980

Literature cited in AGRICOLA, Dissertations abstracts international, ERIC, ABI/INFORM, MEDLARS, NTIS, Psychological abstracts, and Sociological abstracts. Selection focuses on education, legal aspects, career aspects, sex differences, lifestyle, and health. Common format (bibliographical information, descriptors, and abstracts) and ERIC subject terms used throughout. Contains order information. Subject, author indexes.

Sex Matters for Women - Sallie Foley 2011-12-09

A guide to help women understand how their bodies work and to take charge of their sexuality, discussing anatomy, body image, trauma, overcoming difficulties, and related topics.

Functional Morphologic Changes in Female Sex Organs Induced by Exogenous Hormones - G.

Dallenbach-Hellweg 2012-12-06

Proceedings of the Fourth International Congress on Mathematical Education - M. Zweng

2012-12-06

Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill, New Jersey, USA. The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

The Truth about Sex, a Sex Primer for the 21st Century Volume II - Gloria G. Brame 2013-06

Readers say Dr. Gloria Brame has changed their lives. Find out why in SEX FOR GROWN-UPS. The ultimate sex-positive adult primer, SEX FOR GROWN-UPS, takes a delightfully original and upbeat approach to sex based on three simple rules--that human sexual behavior is complicated, that sex and gender diversity are normal, and that all adults can have pleasurable sex. In a radical departure from institutionalized theories about what sex should be, Brame explains the facts about what sex actually is, and shows you how to use this information to improve your sex life and relationships. Drawing on sex history, scientific data, sex studies, medical studies, and stories from her private practice, SEX FOR GROWN-UPS gives you sex education you never knew you needed and will always be grateful you received. About the Author: GLORIA G. BRAME, Ph.D. in Human Sexuality, is an author, blogger, sex historian, board-certified sexologist, and sex therapist in private practice. Brame is the world's leading authority on fetishes and BDSM, and is a much-quoted expert on mainstream sexual issues, including performance disorders and orgasmic function. In addition to *The Truth About Sex, Volume I: Sex and the Self* and *Volume II: Sex for Grown-Ups*, she is the author of perennial bestsellers *Different Loving: The World of Sexual Dominance and Submission* and *Come Hither: A Commonsense Guide to Kinky Sex*. A full professor of Human Sexuality at the Institute for Advanced Study of Human Sexuality, Brame also sits on the board of the Woodhull Sexual Freedom Alliance. Most recently, Brame was named among the "10 Best Sex and Dating Experts," by DatingAdvice.com. Google Gloria Brame or follow @DrGloriaBrame on Twitter.

Agricultural Development Workers Training Manual: Extension skills - 1982

West's Federal Practice Digest 2d - 1976

Women's Lives - Bernice E. Lott 1987

Based on surveys, laboratory research, formal empirical investigations into women's development, as well as newspaper reports, women's fiction and autobiographical material, Lott examines the lifelong process of gender learning. She describes how girls and women acquire female traits, and how situational and cultural demands affect the gender process. She explains how the process of socialization--from being born a female to becoming a culturally defined woman--affects a woman throughout her life, from prenatal development through old age, shaping her behavior, beliefs, and attitudes, and her relationships with children, men, and other women. Lott also examines women's current multiple roles as well as the wider range of possibilities the women today share with men. ISBN 0-534-07440-5 (pbk.): \$16.00.

Making Sex - Thomas Laqueur 1992-02-01

This is a book about the making and unmaking of sex over the centuries. It tells the astonishing story of sex in the West from the ancients to the moderns in a precise account of developments in reproductive anatomy and physiology. We cannot fail to recognize the players in Thomas Laqueur's story--the human sexual organs and pleasures, food, blood, semen, egg, sperm--but we will be amazed at the plots into which they have been woven by scientists, political activists, literary figures, and theorists of every stripe. Laqueur begins with the question of why, in the late eighteenth century, woman's orgasm came to be regarded as irrelevant to conception, and he then proceeds to retrace the dramatic changes in Western views of sexual characteristics over two millennia. Along the way, two "master plots" emerge. In the one-sex story, woman is an imperfect version of man, and her anatomy and physiology are construed accordingly: the vagina is seen as an interior penis, the womb as a scrotum, the ovaries as testicles. The body is thus a representation, not the foundation, of social gender. The second plot tends to dominate post-Enlightenment thinking while the one-sex model is firmly rooted in classical learning. The two-sex story says that the body determines gender differences, that woman is the opposite of man with incommensurably different organs, functions, and feelings. The two plots overlap; neither ever holds a monopoly. Science may establish many new facts, but even so, Laqueur argues, science was only providing a new way of speaking, a rhetoric and not a key to female liberation or to social progress. *Making Sex* ends with Freud, who denied the neurological evidence to insist that, as a girl becomes a woman, the locus of her sexual pleasure shifts from the clitoris to the vagina; she becomes what culture demands despite, not because of, the body. Turning Freud's famous dictum around, Laqueur posits that destiny is anatomy. Sex, in other words, is an artifice. This is a powerful story, written with verve and a keen sense of telling detail (be it technically rigorous or scabrously fanciful). *Making Sex* will stimulate thought, whether argument or surprised agreement, in a wide range of readers.

Renowned Goddess of Desire - Loriliai Biernacki 2007-10-11

Tantra is a family of rituals modeled on those of the Vedas and their attendant texts and lineages. These rituals typically involve the visualization of a deity, offerings, and the chanting of his or her mantra. Common variations include visualizing the deity in the act of sexual union with a consort, visualizing oneself as the deity, and "transgressive" acts such as token consumption of meat or alcohol. Most notoriously, non-standard or ritualized sex is sometimes practiced. This accounts for Tantra's negative reputation in some quarters and its reception in the West primarily as a collection of sexual practices. Although some today extol Tantra's liberating qualities, the role of women remains controversial. Traditionally there are two views of women and Tantra. Either the feminine is a metaphor and actual women are altogether absent, or Tantra involves the transgressive use of women's bodies to serve male interests. Loriliai Biernacki presents an alternative view, in which women are revered, worshipped, and considered worthy of spiritual attainment. Her primary sources are a collection of eight relatively modern Tantric texts written in Sanskrit from the 15th through the 18th century. Her analysis of these texts reveals a view of women that is generally positive and empowering. She focuses on four topics: 1) the "Kali Practice," in which women appear not only as objects of reverence but as practitioners and gurus; 2) the Tantric sex rite, especially in

the case that, contrary to other Tantric texts, the preference is for wives as ritual consorts; 3) feminine language and the gendered implications of mantra; and 4) images of male violence towards women in tantric myths. Biernacki, by choosing to analyse eight particular Sanskrit texts, argues that within the tradition of Tantra there exists a representation of women in which the female is an authoritative, powerful, equal participant in the Tantric ritual practice.

Exploring the Biological Contributions to Human Health - Institute of Medicine 2001-07-02

It's obvious why only men develop prostate cancer and why only women get ovarian cancer. But it is not obvious why women are more likely to recover language ability after a stroke than men or why women are more apt to develop autoimmune diseases such as lupus. Sex differences in health throughout the lifespan have been documented. Exploring the Biological Contributions to Human Health begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex (being male or female, according to reproductive organs and chromosomes) and gender (one's sense of self as male or female in society). Exploring the Biological Contributions to Human Health discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. Exploring the Biological Contributions to Human Health will be important to health policy makers, basic, applied, and clinical researchers, educators, providers, and journalists-while being very accessible to interested lay readers.

Women in Scripture - Carol Meyers 2000-03-30

"This splendid reference describes every woman in Jewish and Christian scripture . . . monumental" (Library Journal). In recent decades, many biblical scholars have studied the holy text with a new focus on gender. Women in Scripture is a groundbreaking work that provides Jews, Christians, or anyone fascinated by a body of literature that has exerted a singular influence on Western civilization a thorough look at every woman and group of women mentioned in the Bible, whether named or unnamed, well known or heretofore not known at all. They are remarkably varied—from prophets to prostitutes, military heroines to musicians, deacons to dancers, widows to wet nurses, rulers to slaves. There are familiar faces, such as Eve, Judith, and Mary, seen anew with the full benefit of the most up-to-date results of biblical scholarship. But the most innovative aspect of this book is the section devoted to the many females who in the scriptures do not even have names. Combining rigorous research with engaging prose, these articles on women in the Hebrew Bible, the Apocryphal/Deuterocanonical Books, and the New Testament will inform, delight, and challenge readers interested in the Bible, scholars and laypeople alike. Together, these collected histories create a volume that takes the study of women in the Bible to a new level.

Female Sexual Function and Dysfunction - Elisabetta Costantini 2017-06-19

This book discusses all aspects of sexuality in women and in particular explores sexual function and dysfunction in a variety of settings, including the different stages of life and a wide range of major diseases and local conditions. The aim is to refocus attention on the needs and sexual realities of women, providing a fresh point of view that will assist gynecologists, sexual medicine physicians, and urologists in delivery of high-quality care and help women themselves to understand and address sexual problems relating to desire, arousal, orgasm, and sexual pain. Psychological aspects of female sexuality and the impacts of the aging process, pregnancy, and childbirth are carefully examined. Extensive consideration is then given to the effects on sexual function of such conditions as cardiovascular disease, cancer, diabetes, neurological disease, endometriosis, pelvic organ prolapse, urinary incontinence, reproductive disorders, sexual abuse, and drug abuse. Issues of sexual identity and female dysmorphophobia are also considered. The authors are all experts in the field and have a deep understanding of the complexities of female sexuality.

Woman - W. Francis Benedict 1970

Women's Conflicts About Eating and Sexuality - Ellen Cole 2014-06-03

Women's Conflicts About Eating and Sexuality explores the strong relationships food and sex have represented to women over the years. No other book has spelled out so clearly the parallels between sex

and eating nor integrated the relationship of these to women's basic need to be loved. Today's dilemma for women--be fat or go hungry--and the endless variations and unsatisfying solutions to this problem have contributed to the incidence of anorexia, bulimia, and obesity. The pursuit of slimness, the obsession with having the perfect body, excessive aerobicizing, and diet books ad nauseam are all part of this phenomenon. Authors in Women's Conflicts About Eating and Sexuality skillfully discuss the parallel between women's obsession with sex and romance in the fifties and their obsession with food today. An important book for all women, it sheds light on the complex issues facing women and devotes special attention to the career woman and the additional pressures to be slim and stay slim. The woman who reads this potentially life-changing book can examine, question, and change her behavior, using the specific step-by-step program aid included in the book. This book is for every woman who has ever worried about being too fat or too sexual. Women's Conflicts About Eating and Sexuality will appeal to women of all ages--young women and their mothers will be fascinated by the parallels between sexual obsessions of thirty years ago and the eating obsessions of today. This healing book will particularly attract single career women for whom sex and relationships are fraught with complications. Counselors and therapists will find this book an excellent resource in their work with helping women. It is also a good auxiliary text for courses in Women's Studies focusing on psychology and history of women and the sociology of women and eating disorders.

Psychoanalysis of the Sexual Functions of Women - Helene Deutsch 1991

A theoretical psychoanalytic interpretation of the psychological dimension of the processes summed up under the general term of "sexual life of women", written during 1923-24. Translated from the German by Eric Mosbacher, and edited with an introduction by Paul Roazen. Annotation copyrighted by Book News, Inc., Portland, OR

Sex in the Brain - Ameer Baird 2019-09-01

What controls our sex lives? Our brains. Yet there is surprisingly little research into the ways our brains influence our sex drive. Extraordinary insights into how the brain works can be gained when something goes wrong through brain injury or disease. In Sex in the Brain, clinical neuropsychologist Dr Ameer Baird takes readers on an entertaining and informative tour of the sexiest bits of the human brain. Spiced with real case studies, the book reveals pathologies no longer hidden in medical journals or the bedrooms of people whose sex lives are undergoing dramatic change, for better and worse. In the style of popular neurology guru Oliver Sacks, Baird captures the humanity and complexity of patients, even when their neurological challenges have rendered them permanently or temporarily unlikeable. Drawing from true stories, this revealing and sometimes heartbreaking book unfolds a better understanding of the links between brain function and our sexual selves. 'The taboo on talking about changes in sex drive and sexual behaviours following brain damage is over! Neuropsychologist Ameer Baird's engaging case studies exploring this topic will move as well as educate the general reader, and inspire professionals to incorporate this central human need into their patient assessments and treatments.' — Jenni Ogden, author of Fractured Minds and Trouble in Mind

The New Soviet Man and Woman - Lynne Attwood 1990-10-12

An analysis of Soviet writings on sex and gender, the climate and thought around them, and their implications for the development of male and female personality differences. Aspects covered include the sociological and demographic approaches to sex differences.

Psycho-oncology - Jimmie C. Holland 2015

Originally published by Oxford in 1998, Psycho-Oncology was the first comprehensive text in the field and remains the gold standard today. Edited by a team of leading experts in psycho-oncology, spearheaded by Dr. Jimmie C. Holland, the founder of the field, the text reflects the interdisciplinary nature and global reach of this growing field. Thoroughly updated and developed in collaboration with the American Psychosocial Society and the International Psycho-oncology Society, the third edition is a current, comprehensive reference for psychiatrists, psychologists, oncologists, hospice workers, and social workers seeking to understand and manage the psychological issues involved in the care of persons with cancer and the psychological, social, and behavioral factors that contribute to cancer risk and survival. New to this edition are chapters on gender-based and geriatric issues and expanded coverage of underserved populations, community based programs, and caregiver training and education.
