**Non-wood Forest Products from Temperate Broad-leaved Trees** William M. Ciesla 2002 Temperate broadleaved trees grow in very different ecosystems in the northern and southern hemispheres, but are also found extensively in many tropical and subtropical mountain areas. A wide range of non-wood products are derived from temperate broadleaved trees, and their description is organized in this volume according to the part of the tree from which they are obtained (whole tree, foliage, flowers, etc.). This information is presented in order to raise awareness on, and assist in identifying, opportunities for the management and production of non-wood products from temperate broadleaved trees. The intended audience of this publication ranges from interest groups in the forest, agriculture and rural development sectors to conservation agencies in developed and developing countries.

**Wild Sheep and Goats and Their Relatives** David M. Shackleton 1997 Wild caprinae, including sheep and goats, are an extremely valuable group of mammals. While most live in mountains, some inhabit desert grasslands, tropical forests or even arctic tundra. They range in size from the 30kg goral to the 350kg musk ox and display a variety of horn shapes and sizes as well as coat and body coloration. They are highly prized by hunters on account of their horns and their coats. Today, despite their important domestic relations, many wild caprinae are in danger of being lost forever: over 70 of caprinae taxa are threatened and over 30 endangered or critical. The main threats to them are over-harvesting, habitat loss and resource competition from livestock. Some face an additional threat from trophy hunters. Despite this, however, conservation legislation is either absent or, more often, poorly enforced. This action plan explores the value of caprinae to biodiversity, the threats facing

the members of the species, and makes recommendations to reverse current trends. It also emphasizes the importance to carpinæ conservation and survival of close collaboration among all parties involved in wildlife conservation including local peoples and hunting organizations, governments, scientists and academic institutions.

**Hebrew Myths** Robert Graves 2014-05-15 The I, Claudius author's "lightning sharp interpretations and insights . . . are here brought to bear with equal effectiveness on the Book of Genesis" (Kirkus Reviews). This is a comprehensive look at the stories that make up the Old Testament and the Jewish religion, including the folk tales, apocryphal texts, midrashes, and other little-known documents that the Old Testament and the Torah do not include. In this exhaustive study, Robert Graves provides a fascinating account of pre-Biblical texts that have been censored, suppressed, and hidden for centuries, and which now emerge to give us a clearer view of Hebrew myth and religion than ever. Venerable classicist and historian Robert Graves recounts the ancient Hebrew stories, both obscure and familiar, with a rich sense of storytelling, culture, and spirituality. This book is sure to be riveting to students of Jewish or Judeo-Christian history, culture, and religion.

several species have disappeared altogether. Threats include hunting, loss of habitat, population fragmentation, inadequate protected area coverage, poorly-developed administrative structures, under-resourcing of conservation programmes, and lack of enforcement of existing legislation. Rising human population growth and economic development constantly increases pressure on land and natural resources. There is a consequent need for integrated rural development, and community-based conservation projects, which have the full participation of local people at the planning and execution stages. This publication, Part 4 of the Global Antelope Survey, covers 37 countries in the region, and actions to conserve antelope populations are listed in each country report.

experts from various methodological fields, *Transforming Research Methods in the Social Sciences* is a comprehensive collation of original essays and cutting-edge research that demonstrates the variety of novel techniques and research methods available to researchers responding to these context-bound issues. It is particularly relevant for study and research in the fields of applied psychology, sociology, ethnography, biography and anthropology. In addition to their unique combination of conceptual and application issues, the chapters also include discussions on ethical considerations relevant to the method in similar global South contexts. *Transforming Research Methods in the Social Sciences* has much to offer to researchers, professionals and others involved in social science research both locally and internationally.

**Meta-topolin: A Growth Regulator for Plant Biotechnology and Agriculture** Naseem Ahmad 2021-05-02 Plant tissue culture (PTC) technology has gained unassailable success for its various commercial and research applications in plant sciences. Plant growth regulators (PGRs) are an essential part of any plant tissue culture intervention for propagation or modification of plants. A wide range of PGRs are available, including aromatic compounds that show cytokinin activities, promote cell division and micropropagation, viz. kinetin, N6-benzyladenine and topolins. Topolins are naturally occurring aromatic compounds that have gained popularity as an effective alternative for other frequently used cytokinins in in vitro culture of plants. Among them, meta-topolin [6-(3-hydroxybenzylamino) purine] is the most popular and its use in plant tissue culture has amplified swiftly. During the last few decades, there have been numerous reports highlighting the effectiveness of meta-topolin in micropropagation and alleviation of various physiological disorders, rooting and acclimatization of tissue culture raised plants.

**Criminally Queer** Jens Rydström 2007 This book provides a coherent history of criminal law and homosexuality in Scandinavia from 1842 to 1999, a period during which same-sex love was outlawed or subject to severe legal restrictions in the Scandinavian penal codes. This was the case in most countries in Northern Europe, but the book argues that the development in Scandinavia was different, partly determined by the structure of the welfare state. Five experienced scholars of the history of homosexuality describe how same-sex desire has been regulated in their respective countries during the past 160 years. With backgrounds in history, sociology, and gender studies, the contributors represent an interdisciplinary approach. Their contributions present for the first time a comprehensive history of

homosexuality in Scandinavia. Among other things, it includes the most extensive study yet written in any language about Iceland's gay and lesbian history. Also for the first time, the book discusses in detail same-sex sexuality between women. Female homosexuality was outlawed in Eastern Scandinavia, but not in the Western parts of this region. It also analyzes the modern tendency to include lesbian women in the criminal aspect of the medicalization of homosexuality and the growing influence of medical discourse on the law. Jens Rydström is lecturer in history, particularly gender history, at Stockholm University (Sweden) and the author of *Sinners and Citizens: Bestiality and Homosexuality in Sweden, 1880-1950*. He is currently working on the history of laws on registered partnership in the Nordic countries. She is currently involved in research on the situation of lesbians, gays, bisexuals, and transgender people in the workplace. She also specializes in Finnish lesbian and gay history. She has edited several books in lesbian and gay studies and for many years was responsible for the teaching of lesbian studies at the Christina Institute for Women's Studies at the University of Helsinki.

*The Ecology of Urban Habitats* Oliver Gilbert 2012-12-06 This book is about the plants and animals of urban areas, not the urban fringe, not encapsulated countryside but those parts of towns where man's impact is greatest. The powerful anthropogenic influences that operate in cities have, until recently, rendered them unattractive to ecologists who find the high proportion of exotics and mixtures of planted and spontaneous vegetation bewildering. They are also unused to considering fashion, taste, mowing machines and the behaviour of dog owners as habitat factors. I have always maintained, however, and I hope this book demonstrates, that there are as many interrelationships to be uncovered in a flower bed as in a field, in a cemetery as on a sand dune; and due to the well

documented history of urban sites, together with the strong effects of management, they are frequently easier to interpret than those operating in more natural areas. The potential of these communities as rewarding areas for study is revealed in the literature on the pests of stored products, urban foxes and birds. The journals of local natural history societies have also provided a rich source of material as amateurs have never been averse to following the fortunes of their favourite groups into the heart of our cities. It is predictable that among the few professionals to specialize in this discipline have been those enclosed in West Berlin, who must be regarded as among the leading exponents of urban ecology.

It makes it even more difficult for young homosexuals to find positive role models in fiction either written or published expressly for them or - if published for adults - relevant to them and their lives. This book examines these issues and critically evaluates the body of literature published for young adults that offers homosexual themes and characters.

fields to attend to their dead. One casualty in particular commands attention: Aeneas' protégé Pallas, killed and despoiled by Turnus in the previous book. His death plunges his father Evander and his surrogate father Aeneas into heart-rending despair - and helps set up the foundational act of sacrificial brutality that caps the poem, when Aeneas seeks to avenge Pallas by slaying Turnus in wrathful fury. Turnus' departure from the living is prefigured by that of his ally Camilla, a maiden schooled in the martial arts, who sets the mold for warrior princesses such as Xena and Wonder Woman. In the final third of Aeneid 11, she wreaks havoc not just on the battlefield but on gender stereotypes and the conventions of the epic genre, before she too succumbs to a premature death. In the portions of the book selected for discussion here, Virgil offers some of his most emotive (and disturbing) meditations on the tragic nature of human existence - but also knows how to lighten the mood with a bit of drag. This course book offers the original Latin text, vocabulary aids, study questions, and an extensive commentary. Designed to stretch and stimulate readers, Ingo Gildenhard's volume will be of particular interest to students of Latin studying for A-Level or on undergraduate courses. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and the most recent scholarly thought. **Sinners and Citizens** Jens Rydström 2003-11-15 Sinners and Citizens explores how sexual habits changed in Sweden during its development from an agrarian society into a modern welfare state. Jens Rydström examines the history of homosexuality and bestiality in that country to consider why these sexual practices have been so closely linked in virtually all Western societies. He limns sharply the distinctive experience of rural life, showing that to regularly witness farm animals stirred passions and sparked ideas, especially among young farmhands. Based on medical journals, psychiatric reports, and court records from the period, as well as testimonies from men in diaries, letters, and interviews, Sinners and Citizens reveals that bestiality was once a dreaded crime in Sweden. But in time, mention of the practice disappeared completely from legal and medical debates. This, Rydström contends, is because models of penetrative sodomy shifted from bestiality to homosexuality as Sweden transformed from a rural society into a more urban one. As the nation's economy and culture became less identified with the countryside, so too did its idea of deviant sexual behavior.

From Shtetl to Stardom Michael Renov 2016-12-15 The influence of Jews in American entertainment from the early days of Hollywood to the present has proved an endlessly fascinating and controversial topic, for Jews and non-Jews alike. *From Shtetl to Stardom: Jews and Hollywood* takes an exciting and innovative approach to this rich and complex material. Exploring the subject from a scholarly perspective as well as up close and personal, the book combines historical and theoretical analysis by leading academics in the field with inside information from prominent entertainment professionals. Essays range from Vincent Brook's survey of the stubbornly persistent canard of Jewish industry "control" to Lawrence Baron and Joel Rosenberg's panel presentations on the recent brouhaha over Ben Urwand's book alleging collaboration between Hollywood and Hitler. Case studies by Howard Rodman and Joshua Louis Moss examine a key Coen brothers film, *A Serious Man* (Rodman), and Jill Soloway's groundbreaking television series, *Transparent* (Moss). Jeffrey Shandler and Shaina Hamermann train their respective lenses on popular satirical comedians of yesteryear (Allan Sherman) and those currently all the rage (Amy Schumer, Lena Dunham, and Sarah Silverman). David Isaacs relates his years of agony and hilarity in the television comedy writers' room, and interviews include in-depth discussions by Ross Melnick with Laemmle Theatres owner Greg Laemmle (relative of Universal Studios founder Carl Laemmle) and by Michael Renov with *Mad Men* creator Matthew Weiner. In all, *From Shtetl to Stardom* offers a uniquely multifaceted, multimediated, and up-to-the-minute account of the remarkable role Jews have played in American movie and TV culture.

Dollimore describes it as "one of the most fundamental antagonisms within sexual dissidence over the past century." By focusing on fiction by Edmund White, Andrew Holleran, David Leavitt, Michael Cunningham, Alan Hollinghurst, Dennis Cooper, Adam Mars-Jones and others, Brookes argues that gay fiction is torn between assimilative and radical impulses. He posits the existence of two distinct strands of gay fiction, but also aims to show the conflict as an internal one, a struggle in which opposing impulses are at work within individual texts. This book places post-Stonewall gay fiction in context by linking it to theoretical and historical developments since the late nineteenth century, and tracing the conflict back to the fiction of Wilde, Forster, Genet, Vidal, Burroughs and Isherwood. Other relevant topics discussed include gay fiction of the 1970s; gays and the family; sexual transgression; gay fiction and the AIDS epidemic.

**Making Open Development Inclusive** Matthew L. Smith  
2020-08-25 Drawing on ten years of empirical work and research, analyses of how open development has played out in practice. A decade ago, a significant trend toward openness emerged in international development. "Open development" can describe initiatives as disparate as open government, open health data, open science, open education, and open innovation. The theory was that open systems related to data, science, and innovation would enable more inclusive processes of human development. This volume, drawing on ten years of empirical work and research, analyzes how open development has played out in practice.

**The School of Franz Brentano** L. Albertazzi 2013-04-17 The central idea developed by the contributions to this book is that the split between analytic philosophy and phenomenology - perhaps the most important schism in twentieth-century philosophy - resulted from a radicalization of reciprocal partialities. Both schools of thought share, in fact, the same cultural background and their same initial stimulus in the thought

of Franz Brentano. And one outcome of the subsequent rift between them was the oblivion into which the figure and thought of Brentano have fallen. The first step to take in remedying this split is to return to Brentano and to reconstruct the 'map' of Brentano's thought. The second task (which has been addressed by this book) is to revive interest in the theoretical complexity of Brentano's thought and of his pupils and to revitalize those aspects that have been neglected by subsequent debate within the various movements of Brentanian inspiration. We have accordingly decided to organize the book into two introductory essays followed by two sections (Parts 1 and 2) which systematically examine Brentano's thought and that of his followers. The two introductory essays reconstruct the reasons for the 'invisibility', so to speak, of Brentano and set out of his philosophical doctrine. Part 1 of the book then examines the essential features of six of Brentano's most outstanding pupils (Marty, Stumpf, Meinong, Ehrenfels, Husserl and Twardowski). Part 2 contains nine essays concentrating on the principal topics addressed by the Brentanians.

E-Cigarette Use Among Youth and Young Adults: a Report of the

Surgeon General Centers for Disease Control and Prevention

2019-07-26 Tobacco use among youth and young adults in any form, including e-cigarettes, is not safe. In recent years, e-cigarette use by youth and young adults has increased at an alarming rate. E-cigarettes are now the most commonly used tobacco product among youth in the United States. This timely report highlights the rapidly changing patterns of e-cigarette use among youth and young adults, assesses what we know about the health effects of using these products, and describes strategies that tobacco companies use to recruit our nation's youth and young adults to try and continue using e-cigarettes. The report also outlines interventions that can be adopted to minimize the harm these products cause to our nation's youth. E-cigarettes are tobacco products that deliver nicotine. Nicotine is a highly addictive substance, and many of today's youth who are using e-cigarettes could become tomorrow's cigarette smokers. Nicotine exposure can also harm brain development in ways that may affect the health and mental health of our kids. E-cigarette use among youth and young adults is associated with the use of other tobacco products, including conventional cigarettes. Because most tobacco use is established during adolescence, actions to prevent our nation's young people from the potential of a lifetime of nicotine addiction are critical. E-cigarette companies appear to be using many of the advertising tactics the tobacco industry used to persuade a new generation of young people to use their products. Companies are promoting their products through television and radio advertisements that use celebrities, sexual content, and claims of independence to glamorize these addictive products and make them appealing to young people.

science of economic botany. The coverage is of economic botany in its broadest sense. I was delighted to find such topics as ecophysiology, plant breeding, the environment and conservation are included in the text. This gives the book a much more comprehensive coverage than most other texts on the subject. I was also glad to see that the book covers the use of various organisms that are no longer considered part of the plant kingdom such as various species of fungi and algae. It is indeed a broad ranging book that will be of use to many people interested in the uses of plants and fungi. Economic botany is once again being given more prominence as a discipline because of its enormous relevance to both conservation and sustainable development. Those people involved in those topics should find this a most useful resource.

Providing the common ground on which to analyze the coming out process, Koponen uses gay male relationships portrayed in six important American novels-- Falconer by John Cheever, City of the Night by John Rechy, Giovanni's Room by James Baldwin, The Beautiful Room Is Empty by Edmund White, Dancer from the Dance by Andrew Holleran, and Taking Care of Mrs. Carroll by Paul Monette. This book not only is literary study, but also is intended to help gay men reflect on their shared lived experiences. Self-help exercises on identifying and examining the stages of coming out are provided throughout the analysis.

**Teaching Classics with Technology** 2019-06-13 The impact of ICT on the teaching of classical languages, literature and culture has not until now been extensively described and evaluated. Nevertheless, educational technology has made a huge difference to the ways in which Classics is taught at junior, senior and college level. The book brings together twenty major approaches to the use of technology in the classroom and presents them for a wide, international audience. It thus forms a record of current and developing practice, promotes further discussion and use among practitioners (teachers, learners and trainers) and offers suggestions for changes in pedagogical practices in the teaching of Classics for the better. The many examples of practice from both UK and US perspectives are applicable to countries throughout the world where Classics is being taught. The more traditional curricula of high-school education in the UK and Europe are drawing more and more on edutech, whereas educational jurisdictions in the US are increasingly expecting high-school students to use ICT in all lessons, with some actively dissuading schools from using traditional printed textbooks. This book presents school teachers with a vital resource as they adapt to this use of educational technology in Classics teaching. This is

no less pertinent at university level, in the UK and US, where pedagogy tends to follow traditionalist paradigms: this book offers lecturers frameworks for understanding and assimilating the models of teaching and learning which are prevalent in schools and experienced by their students.

*The Barbary Macaque* John E. Fa 2012-12-06 The Barbary macaque (all too often mistakenly called an ape) was first brought to the attention of the Conservation Working Party of the Primate Society of Great Britain late 1979 when John Fa reported that 'surplus' animals were being sent from Gibraltar to dubious locations, such as an Italian safari park. Since there had been no scientific input into the Army's management of the monkey colony on Gibraltar, and there was concern about inbreeding, nutrition and health - about the long-term viability of the colony, it was felt that the Society could help. The Gibraltar Scientific Authority and the Army were very receptive to our offer and ideas, and this topic occupied successive chairmen over the last few years - Robin Dunbar and Richard Wrangham, myself and now Miranda Stevenson - with constant prompting and help from John Fa. Considerations soon extended to the status of the species as a whole, so that there have been three main aspects:- (1) the improved health of a larger self-sustaining population on Gibraltar, (2) the status and behavioural biology of natural populations in North Africa (Morocco and Algeria), and (3) the breeding achievements in European parks and zoos, and their potential for reintroduction to suitable areas in North Africa, along with other possibilities. Robin Dunbar organized the compilation of recommendations for managing the Gibraltar colony with regard to numbers, age-sex structure and behavioural relationships, with some observations on diet to avoid obesity and infertility.

plesiosaurs, pterosaurs and their kin - makes exciting reading and has caught the attention of palaeontologists, historians of science and the general public alike. The papers in this collection go beyond the familiar tales about famous fossil hunters and focus on relatively little-known episodes in the discovery and interpretation (from both a scientific and an artistic point of view) of dinosaurs and other inhabitants of the Mesozoic world. They cover a long time span, from the beginnings of modern scientific palaeontology in the 1700s to the present, and deal with many parts of the world, from the Yorkshire coast to Central India, from Bavaria to the Sahara. The characters in these stories include professional palaeontologists and geologists (some of them well-known, others quite obscure), explorers, amateur fossil collectors, and artists, linked together by their interest in Mesozoic creatures.
