**The Midas Murders** - Pieter Aspe 2013-12-03

DI In the second novel by the international bestselling Pieter Aspe, Inspector Van In races against the clock to thwart a series of terrorist plots One quiet snow-covered Sunday morning in Bruges, a prominent business executive is found dead in the streets, apparently due to an alcoholic hemorrhage, but for Inspector Van In, there is something about the autopsy that does not add up. When he questions the businessman's friend, a Dutchman, he too is found dead the next morning, burned to death in a house fire. When there is an explosion in the middle of a popular tourist area in downtown Bruges, Van In strives to find the connection between the three incidents, but no one is coming forward to claim responsibility for this terrorist attack. Just an anonymous letter to the police, threatening more bombings—unless they cooperate with a series of demands that would undermine the entire city government. Aided by the spunky and beautiful assistant DA, Hannelore Martens, Inspector Van In finds himself enmeshed in the case that threatens not just the lives of countless innocent people, but the heart of the city he loves. /div

**The Map of Bones** - Francesca Haig 2016-12-06

"Book Two in the critically acclaimed The Fire Sermon trilogy--The Hunger Games meets Cormac McCarthy's The Road in this richly imagined post-apocalyptic series by award-winning poet Francesca Haig. Four hundred years in the future, the Earth has turned primitive following a nuclear fire that has laid waste to civilization and nature. Though the radiation fallout has ended, for some unknowable reason every person is born with a twin. Of each pair, one is an Alpha--physically perfect in every way; and the other an

Omega--burdened with deformity, small or large. With the Council ruling an apartheid-like society, Omegas are branded and ostracized while the Alphas have gathered the world's sparse resources for themselves. Though proclaiming their superiority, for all their effort, Alphas cannot escape one harsh fact: whenever one twin dies, so does the other. Cass is a rare Omega, one burdened with psychic foresight. While her twin, Zach, gains power on the Alpha Council, she dares to dream the most dangerous dream of all: equality. For daring to envision a world in which Alphas and Omegas live side-by-side as equals, both the Council and the Resistance have her in their sights"--

**A Short History of the Netherlands** - P. J. A. N. Rietbergen 1998

The development of the Netherlands over the centuries has been a remarkable one. Situated at "the end of Europe," between land and water, its people have, for more than three thousand years, fought to make the best of a country unfavoured by nature. They have shaped it into one of the world's foremost economic powers but also, and even more importantly, into a society that prides itself on having reached a fair balance between material and social well-being. The history of this achievement is a fascinating one. Since time immemorial, it is the history of the struggle against the sea, of man seeking to dominate the forces of water. It is the history of the early medieval Dutch traders, who travelled all over Europe to sell their wares. It is the history of the activities of the world's first multinationals, the Dutch East and West India

Companies, that spanned the entire globe. It is also the history of the loss of colonial empire and of the triumphant rebuilding of a mainly commercial economy into a mainly industrial one, whose activities, once again, span the globe. It is, of course, also the history of a culture to match, of commonsense and realism, of the wonderful works of art produced by the Dutch "Golden Age" of the seventeenth century and of the many attainments of Dutch civilization in more recent years. For all those who are often amazed at the industry and achievements of this small nation, the "Short History of the Netherlands" offers a succinct historical tale that goes a long way to elucidate the country's past and, thus, explain its present.
