*Handbook of Production Management Methods* - Gideon Halevi 2001-10-22

This unique book provides a guide to the selection of appropriate production and manufacturing methods for postgraduate and professional manufacturing engineers. It starts by helping the reader to identify the required objectives of industrial management for their particular situation. Having identified the objectives an analytical assessment of the available production and management methods is made. The analytical system presents an objective method of production selection. For example, this practical book will help the reader to decide whether or not a local Just-in-Time process is needed or a full chain JIT method is needed. Alternatively the problem may be deciding between set-up time reduction or changeover time reduction. Should TQM be ceded to PCIs? This book covers nearly all methods of production and manufacturing and will prove the most comprehensive guide to choosing and using these methods. Only book of its kind available Widest coverage of methods available Analytical approach to decision making

The 8 Values of Highly Productive Companies - Tim Baker 2009

A must-have in any manager's library. -- Sergio Carlo Maresca, author of BREAKAWAY! If you think you are doing it right, think again and read this book. -- Dr Roxanne Zolin, QUT An excellent read for organisation specialists. -- Hermias C. Hendrikse, Director of Organisation Effectiveness, Etisalat, UAE The employment relationship as we know it is a relic of the last century. Globalisation, competition and financial pressures are challenging organisations to be more adaptable. This book offers managers and professionals a new, research-based employment model that will alter the way employees and employers think about their working relationship, aligning the changing needs and interests of individuals and organisations to produce a sustainable, productive and profitable workplace in any financial climate.

**Surviving Globalism** - Ted Schrecker 2016-07-27

Management consultant Kenichi Ohmae describes the new reality of global economic competition as a 'borderless world'. What is the future of human values, and of environmental quality, in such a world? The authors whose work is collected in *Surviving Globalism* try to answer these questions from the point of view of sociology, social history, philosophy, geography and political theory. Many argue that the gains made over the last few decades in terms of social justice and environmental protection are in grave peril. Others take a somewhat more optimistic note, but all emphasize the importance of dealing with environmental and social policy against the background of a transforming global economy.
