Black Skin, White Masks Frantz Fanon 2017 Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace. Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation. With an introduction by Paul Gilroy, author of *There Ain't No Black in the Union Jack*.

Games As A Service Oscar Clark 2014-02-05 The games industry is serious business and the role of a games designer has dramatically changed over just the last few years. Developers now have to rethink everything they know about the creative, technical and business challenges to adapt to the transition to games as a service. Games as a Service: How Free to Play Design Can Make Better Games has been written to help designers overcome many of the fears and misconceptions surrounding freemium and social games. It provides a framework to deliver better games rather than the 'evil' or 'manipulative' experiences some designers fear with the move away from wasteful Products to sustainable, trustworthy Services. Oscar Clark is a consultant and Evangelist for Everyplay from Applifier. He has been a pioneer in online, mobile and console social games services since 1998 including Wireplay (British Telecom), Hutchison Whampoa (3UK) and PlayStation@Home. He is a regular columnist on PocketGamer.Biz and is an outspoken speaker and moderator at countless games conferences on Games Design, Discovery, and Monetisation. He is also a notorious hat wearer.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of

adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Calling Family Tanja Ahlin 2023-08-11 How do digital technologies shape both how people care for each other and, through that, who they are? With technological innovation is on the rise and increasing migration introducing vast distances between family members--a situation additionally complicated by the COVID-19 pandemic and the requirements of physical distancing, especially for the most vulnerable - older adults--this is a pertinent question. Through ethnographic fieldwork among families of migrating nurses from Kerala, India, Tanja Ahlin explores how digital technologies shape elder care when adult children and their aging parents live far apart. Coming from a country in which appropriate elder care is closely associated with co-residence, these families tinker with smartphones and social media to establish how care at a distance can and should be done to be considered good. Through the notion of transnational care collectives, *Calling Family* uncovers the subtle workings of digital technologies on care across countries and continents when being physically together is not feasible. *Calling Family* provides a better understanding of technological relationality that can only be expected to further intensify in the future.
