*The Social Life of Greylag Geese* - Isabella B. R. Scheiber 2013-08-29

The flock of greylag geese established by Konrad Lorenz in Austria in 1973 has become an influential model animal system and one of the few worldwide with complete life-history data spanning several decades. Based on the unique records of nearly 1000 free-living greylag geese, this is a synthesis of more than twenty years of behavioural research. It provides a comprehensive overview of a complex bird society, placing it in an evolutionary framework and drawing on a range of approaches, including behavioural (personality, aggression, pair bonding and clan formation), physiological, cognitive and genetic. With contributions from leading researchers, the chapters provide valuable insight into historic and recent research on the social behaviour of geese. All aspects of goose and bird sociality are discussed in the context of parallels with mammalian social organisation, making this a fascinating resource for anyone interested in integrative approaches to vertebrate social systems.

**RSPB Spotlight Ducks and Geese** - Marianne Taylor 2020-05-28

This will be a detailed 'biography' of ducks and geese that breed in or regularly visit the UK - covering 30 species in all. It will include chapters on the evolution of ducks and geese, their place in the natural world, their anatomy and physiology, various feeding methods, spectacular courtship displays and diverse breeding behaviour. Marianne Taylor will reveal their often epic migrations and examine their social interactions with their own and other species, including their unusual readiness to hybridise. She will also detail their relationships with humankind over the centuries, including their presence in folklore and literature and their role in our lives as both prey and pets. She will also explore their presence as feral and sometimes invasive species outside their natural ranges, and their current status within their native wild ranges as the group includes several species recognised as being of global conservation concern.

**Man and Wildfowl** - Janet Kear 2010-10-30

The involvement of humans with ducks, geese and swans has probably been closer than with any other group of birds, today and for several millenia past. This involvement, in its many aspects, is the theme of this compelling and readable account by an Assistant Director of the Wildfowl and Wetlands Trust. Dr Kear ranges widely, from a summary of the taxonomy and natural history of wildfowl, through a history of domestication world wide, to wildfowling, decoys, conservation and captive breeding, conflicts with agriculture, and wildfowl in legend and literature. Throughout, the text abounds with little-known facts and insights to intrigue the general reader and expert alike - a reflection of the author's wide reading and affection for her subject. Jacket illustrations by Joe Blossom

*The Warriors Part 1 The Wetzels* - Norbert Aubrey 2020-12-12

The Warriors Part 1 The Wetzels is the backstory for a trilogy, telling how tone of the most unusual and controversial true life characters in American Revolutionary War history was created. Knotche and his small band of native warriors capture two scrappy young boys, sons of a settler. Even though Knotche was seeking to avenge the murder of his father by taking white scalps, he spares their lives with plans for another member of his band to adopt them into their declining numbers.

**Similar but Different in the Animal Kingdom** - Martina Nicolls 2017-05-08

Similar but Different in the Animal Kingdom is an educational science book for children, youth, schools, libraries, and anyone interested in animals. Learn about the similarities and differences between twenty-five sets of animals: bees and wasps, frogs and toads, gophers and hamsters, falcons and hawks, herons and storks, ants and termites, donkeys and mules, and more. What are the similarities and differences between alligators and crocodiles? Which one has a U-shaped snout, and which one has a V-shaped snout? What are the similarities and differences between fleas and ticks? Which one is not an insect? Are wallabies just small kangaroos? Emus and ostriches are similar because they can't fly, but they have different feet. Which one has two toes and which one has three? Salmon and tuna have different tails, whereas octopuses and squids have the same number of hearts. Butterflies and moths have different antennae. Which one has club-shaped antennae and which one has feathery antennae? Can cheetahs or leopards climb trees, and which one can't roar? Do dolphins and porpoises have similar dorsal fins? Do foxes and wolves have more similarities or more differences? Similar but Different in the Animal Kingdom has the answers! This intriguing look at the animal kingdom provides "Fast Facts" with an instant list of the animals' main similarities and differences, as well as their scientific classifications, descriptions, habitats, diets, breeding habits, and much more. There are interesting facts, fallacies, phrases, singular and plural animal words, collective nouns, and a glossary of scientific terms.

A beginner's field guide to birds of the mountains, valleys, and deserts of the Southwest. Ages 10 and up.

[The Calls of Ducks & Geese](#) - Lang Elliott 2008-08-21

Unique book and audio CD package Features sounds of 50 North American waterfowl species A full-color photograph complements each bird's description Learn the songs and calls of 50 waterfowl species found across North America. An audio soundtrack combined with detailed text and beautiful color photographs make this a useful guide for any birder. From the distinctive quack of the American black duck and whistled "peep" of the cinnamon teal to the cuckoolike call of the pied-billed grebe and yodel of the yellow-billed loon, this package covers waterfowl species in an easy-to-use format. Includes dabblers, sea ducks, geese, and other waterfowl.

**The Hawaiian Goose** - Janet Kear 2010-09-30

Dr Janet Kear, Assistant Director of the Wildfowl Trust and Curator of its Martin Mere Reserve, and Professor Andrew Berger of the University of Hawaii, have written a timely and absorbing account of the recent history of the Hawaiian Goose, or Nene, its descent to near extinction, its eleventh hour rescue and current restoration to the wild. The species declined from an estimated population of 25,000 in Hawaii in the 18th century to less than fifty birds in the 1940s. Today, thanks largely to the extended breeding programmes at Slimbridge and Pohakuloa, there are probably more than 2000 Hawaiian Geese in the world. The achievement is justly applauded and well-known, but whether this impressive experiment in conservation has been truly successful will not be clear until it becomes evident that the released birds can maintain a breeding population in the wild. As the authors explain, the outcome is far from predictable. The causes which led to the species' decline and the hazards and difficulties faced by the reintroduced

population are discussed at length, but the core of the book is the propagation programmes at Slimbridge and Pohakuloa, and the problems and successes they brought during many years of patient work. For the conservationist and aviculturist the accounts of captive breeding under headings such as infertility, diet, longevity, mortality and the effects of foster mothers, geographical latitude and genetic strain, will be essential reading. Appropriately, Sir Peter Scott, whose interest and involvement in the rescue of the Hawaiian Goose was of prime importance, is one of the artists whose drawings supplement the text. There is also a colour frontispiece and 24 monochrome plates. !--EndFragment--

**A Beginner's Guide To Poultry Farming** - Susma Singh 2022-07-15

This book is for them who wants to start poultry farming in India. A Beginner's Guide To Poultry Farming is surely going to help you.
