God Is a Coleman Lantern - Connie Darlene Stewart 2010-02

For anyone who has ever wanted to become a better person, this book will truly inspire. *God Is a Coleman Lantern* is the autobiography of Connie Darlene Stewart, a woman who has dedicated her life to following in the footsteps of Mother Teresa, helping the homeless and poor in the Phoenix area. From collecting outdated canned goods from a local supermarket, to oily rags and blankets from a local mechanic, Stewart helped the homeless in her community one donation at a time. She later created a "ministry on wheels" and traveled the California Coast, providing food, clothing, and supplies to the poor. The book details Stewart's spiritual journey over the 61 years of her life. When she set in motion her own process of self-discovery, she realized that God's love lives in everyone. In the author's own words: "My relationship to God has been a very personal one. He has protected me, loved me, put stones of learning in my way and angels on my shoulder. The journey of spirituality is a lifelong process.

Mathematics and Humor - John Allen Paulos 2008-08-04

John Allen Paulos cleverly scrutinizes the mathematical structures of jokes, puns, paradoxes, spoonerisms, riddles, and other forms of humor, drawing examples from such sources as Rabelais, Shakespeare, James Beattie, René Thom, Lewis Carroll, Arthur Koestler, W. C. Fields, and Woody Allen. "Jokes, paradoxes, riddles, and the art of non-sequitur are revealed with great perception and insight in this illuminating account of the relationship between humor and mathematics."—Joseph Williams, *New York Times* "'Leave your mind alone,' said a Thurber cartoon, and a really complete and convincing analysis of what humour is might spoil all jokes forever. This book avoids that danger. What it does. . .is describe broadly several kinds of mathematical theory and apply them to throw sidelights on how many kinds of jokes work."—*New Scientist* "Many scholars nowadays write seriously about the ludicrous. Some merely manage to be dull. A few—like Paulos—are brilliant in an odd endeavor."—*Los Angeles Times Book Review*

The Simpsons and Their Mathematical Secrets - Simon Singh

2013-10-29

You may have watched hundreds of episodes of The Simpsons (and its sister show Futurama) without ever realising that they contain enough maths to form an entire university course. In *The Simpsons and Their Mathematical Secrets*, Simon Singh explains how the brilliant writers, some of the mathematicians, have smuggled in mathematical jokes throughout the cartoon's twenty-five year history, exploring everything from Mersenne primes, from Euler's equation to the unsolved riddle of P vs. NP, from perfect numbers to narcissistic numbers, and much more. With wit, clarity and a true fan's zeal, Singh analyses such memorable episodes as 'Bart the Genius' and 'Homer3' to offer an entirely new insight into the most successful show in television history.

The Man who Loved Only Numbers - Paul Hoffman 1999

The biography of a mathematical genius. Paul Erdos was the most prolific pure mathematician in history and, arguably, the strangest too. 'A mathematical genius of the first order, Paul Erdos was totally obsessed with his subject -- he thought and wrote mathematics for nineteen hours a day until he died. He travelled constantly, living out of a plastic bag and had no interest in food, sex, companionship, art -- all that is usually indispensable to a human life. Paul Hoffman, in this marvellous biography, gives us a vivid and strangely moving portrait of this singular creature, one that brings out not only Erdos's genius and his oddness, but his warmth and sense of fun, the joyfulness of his strange life.' Oliver Sacks For six decades Erdos had no job, no hobbies, no wife, no home; he never learnt to cook, do laundry, drive a car and died a virgin. Instead he travelled the world with his mother in tow, arriving at the doorstep of esteemed mathematicians declaring 'My brain is open'. He travelled until his death at 83, racing across four continents to prove as many theorems as possible, fuelled by a diet of espresso and amphetamines. With more than 1,500 papers written or co-written,

[Gender Consciousness and Privilege](#) - Celeste Brody 2005-08-12

Develops a new framework for working in schools that helps educators make informed decisions about change at individual, classroom, curricular and school levels on behalf of gender equity. Addresses the issue of understanding the impact of education on the two sexes, and looks at responsibility for creating gender-fair environments, organising work and creating environments for learning. The book draws on a two-year study into the role that gender played as three Catholic high schools prepared to move from single sex to coeducation. It does not weigh the advantages of single sex against coeducative approaches, but studies gender in a setting where the participants' consciousness of gender issues was heightened: faculty and administration were formally and informally discussing gender concepts and students were talking about male and female issues. The book shows that the combination of leadership, staff and curricular awareness, and an understanding of gender fair and gender affirmative practices can serve to improve institutional effectiveness and lead to higher levels of student achievement.
