The Sex Offender Register - Terry Thomas 2021-04-12

The Sex Offender Register examines the origins, history, structure and legalities of the UK sex offender register, and explores how political and public opinion has influenced the direction the policy of registration has taken. Delving into the origins of the UK sex offender register and how the registration policy has evolved, this book provides an understanding of the register and its contribution to public protection while attempting to see the register as a policy that has grown and developed and as having an organic life of its own. The sex offender register is designed as a form of public protection rather than a punishment, requiring offenders to notify the police of their circumstances and to accept a degree of offender management from the police. The book:

- puts the development of the register in its political, social and ethical context
- considers the position of children and young people as offenders
- outlines the movement of registered offenders across international borders
- analyses how offenders can be removed from the register
- explores how other countries in the UK manage sex offenders through registers
- asks questions about the efficacy of the register and what contribution it makes to public protection
- looks at specific aspects of registration including the management of information
- delves into the experience of life on the register
- examines the influence of public opinion
- discusses the role of the police as custodians of the register and as offender managers.

Exploring the different pressures brought to bear on the register, this book provides an authoritative starting point for police officers, social workers, probation officers, magistrates, students of Criminology, Criminal Justice and Policing, and the general reader wanting to understand where the UK sex offender register originated from and how it operates today.

Evidence-Based Policing and Community Crime Prevention - James McGuire 2021-09-01

This book addresses and reviews progress in a major innovative development within police work known as evidence-based policing. It involves a significant extension and strengthening of links between research and practice and is directed to the task of increasing police effectiveness in the field of community crime prevention. This volume provides an international perspective that synthesizes recent research results from the United States and other countries - including systematic reviews of large bodies of evidence - to illuminate several of the most challenging issues currently confronting police departments. It examines recent advances in research-based models of policing and the expanding base in outcome evaluation. Key areas of coverage include: Managing the nighttime economy. Supervising sex offenders. Tackling domestic/intimate partner violence. Addressing school violence and the formation of gangs. Reducing victim and witness retraction and disengagement. Responding to mental disorders, safeguarding vulnerable adults, and providing victim support. Leveraging public awareness campaigns. In addition, each chapter presents an overview of key issues within a designated area, synthesizes existing reviews, and examines the most recent research. The book clearly and concisely presents major concepts, theories, and research findings, thereby providing both conceptual and analytic tools alongside an integrated presentation of principal findings and messages. The volume concludes with a discussion of current directions in research, key developments in policing strategies, and identification of effective operational structures for facilitating and sustaining research-practice links. Evidence-Based Policing and Community Crime Prevention is a must-have resource for researchers, clinicians and other professionals, and graduate students in forensic psychology, criminology and criminal justice, public health, developmental psychology, psychotherapy and counseling, psychiatry, social work, educational policy and politics, health psychology, nursing, and behavioral therapy/rehabilitation.

Social Control of Sex Offenders - D. Richard Laws 2016-05-11

This book surveys the history, current status, and critical issues regarding the various mechanisms designed to control sex offenders. It shows that the social problem of sex offending is not apparently resolvable by any of the means currently employed. A large array of procedures are used in the attempt to control the difficult population of sex offenders, including: imprisonment, institutional and community treatment, community monitoring by probation and parole, electronic

monitoring, registration as a sex offender, community notification of an offender's status, strict limits on behavioral movement in the community, and residence restrictions. However, these constraints on behavior are almost completely the result of public outrage regarding sensational sex crimes, overreaction of media coverage that produce inaccurate statements of potential community risk, and the efforts of the legal profession and politicians to quell this anger and foreboding by enacting legislation that supposedly confronts the risk. This book demonstrates that we have constructed a massive edifice of community control that is socially and politically driven and which has largely failed to contain sex crime.

Sexual Violence - Elizabeth L. Jeglic 2016-10-24

The purpose of this edited volume is to examine the disconnect in the sexual violence prevention field between legislation, research and practice. The work is focused primarily on United States policies and initiatives, with key case studies internationally. Contributions show that current policies are mainly based on repeat offenders: residence restrictions, registration and notification statutes, and post-sentence initiatives. While these initiatives address public fears, they are not evidence-based and do not necessarily reduce offending. Research shows that post-sentence policies may destabilize offenders and limit their ability to reintegrate with society at a critical period, therefore increasing the chances of recidivism. Furthermore, the majority of sex crimes (95%) are committed by first time offenders. This innovative book is divided into two parts juxtaposing what is currently being done legislatively with what the research evidence suggests would be best practice.

Contemporary Sex Offender Risk Management, Volume I - Kieran McCartan 2017-12-05

This book, the first of two volumes edited by McCartan and Kemshall, focusses on perceptions of sexual offenders, and how risk is used by policy makers, stakeholders, academics and practitioners to both construct and respond to unknown and known sex offenders within the contexts of criminal justice, health and social policy. The chapters provide an oversight of contemporary policies, practices and debates within the area to help both professionals and researchers. The collection focuses on emerging areas (public health approaches, prevention, public perceptions of sexual abuse, and social constructionism), as well as more traditional topics (media, preventative and exceptional sentencing, resilience, and work force development). The authors examine public and professional engagement on sex offender management, and the changing socio-political landscape of sexual offender management. A bold and engaging volume, this edited collection will be of great importance to scholars and practitioners interested in perceptions of sexual offending.

Sex Crime and the Media - Chris Greer 2012-12-06

Sex crime has become one of the most intense areas of public and political concern in recent decades. This book explores the complex influences that shape its construction in the press. Media representations give important clues as to how we should perceive the nature and extent of sex crime, how we should think and feel about it, how we should respond to it, and the measures that might be taken to reduce risk. Understanding the media construction of sex crime is central to understanding its meaning and place in our everyday lives. Unlike much of the existing research, this book explores the construction of sex crime at every stage of the news production process. It then locates the findings within a wider context of cultural, economic and political change in late modernity. The book; shows how increased market competition and tabloidisation has altered fundamentally the way in which news is produced, communicated and consumed discusses representations of the full range of sex crimes from consensual homosexual offences and prostitution to serial rape and sex murder draws upon extensive empirical research in Northern Ireland, while addressing issues relevant to advance capitalist societies across the globe

The Registration and Monitoring of Sex Offenders - Terry Thomas 2012-03-29

This book seeks to track the origins of sex offender registers, their purpose and the law and policy that underpins them in various parts of the world. Sex offender registers are not really registers at all but a set of 'legal requirements' that fall automatically on a person convicted or cautioned for a designated sexual offence; the term 'register' is a form of shorthand for these requirements, designed to be a contribution to greater public protection and community safety. This book provides the first serious and detailed narrative of the conception and implementation of the sex offender registers. It seeks to do so in a clear and easy-to-follow text that will be both informed and critical and will also serve as a resource book for those wanting to make further study of the process of registration and monitoring. It looks in detail at the practice of implementing registers and considers questions about their effectiveness in monitoring sex offenders and the implications of someone being on a sex offender register. The book examines the legal challenges to registers and monitoring and the position of registrants in the context of human rights and seeks to place registers and monitoring in the wider context of what is being called the surveillance society. *The Registration and Monitoring of Sex Offenders* will be key reading for students of criminology and criminal justice, surveillance and human rights and practitioners in criminal justice fields of policing, probation, social work, children's services, the judiciary, prison work and others.

Balancing Privacy and Free Speech - Mark Tunick 2014-08-21

In an age of smartphones, Facebook and YouTube, privacy may seem to be a norm of the past. This book addresses ethical and legal questions that arise when media technologies are used to give individuals unwanted attention. Drawing from a broad range of cases within the US, UK, Australia, Europe, and elsewhere, Mark Tunick asks whether privacy interests can ever be weightier than society's interest in free speech and access to information. Taking a comparative and interdisciplinary approach, and drawing on the work of political theorist Jeremy Waldron concerning toleration, the book argues that we can still have a legitimate interest in controlling the extent to which information about us is disseminated. The book begins by exploring why privacy and free speech are valuable, before developing a framework for weighing these conflicting values. By taking up key cases in the US and Europe, and the debate about a 'right to be forgotten', Tunick discusses the potential costs of limiting free speech, and points to legal remedies and other ways to develop new social attitudes to privacy in an age of instant information sharing. This book will be of great interest to students of privacy law, legal ethics, internet governance and media law in general.

The Shaming of Sexual Offenders - Anne-Marie McAlinden 2007-04-05

Winner of the 2008 British Society of Criminology Book Prize Sex offenders, particularly those who offend against children, feature prominently in contemporary law and order debates. Child sexual abuse is a small component of the broader category of 'gendered and sexualised violence' which causes significant trauma for victims yet continues to evade conventional approaches to justice. This is evidenced not only by the low number of prosecutions, due mostly to low levels of reporting and evidential difficulties at trial, but also by the failure of the justice system to prevent re-offending, largely due to the limited availability and effectiveness of prison treatment programmes. Following Braithwaite's dichotomy of 'reintegrative' and 'disintegrative' shaming, this book argues that contemporary popular and state-led responses to the risk posed by sex offenders are largely disintegrative in nature. At best, the offender may be labelled, stigmatised and ostracised from the community, while at worst, he may be subjected to violence and vigilante action and ultimately return to offending behaviour. The failure of these retributive responses means there is considerable scope for exploring alternative forms of justice and their potential for improving the outcome for victims, offenders and communities affected by sexual offences. This book examines the controversy of whether restorative justice can be applied to child sexual abuse as one of the most intractable of contemporary societal problems, and if so, what special considerations might apply. Although restorative schemes with sex offenders are in short supply, a few initiatives have developed in Canada and parts of the

United States which have effected significant benefits in 'reintegrative shaming.' The book examines whether such ad hoc schemes may be of general application with child sexual abuse and whether they may be implemented on a more holistic basis.

Oxford Handbook of Child Protection Systems - Jill Duerr Berrick
2023-02-14

"cross the spectrum of political ideologies there is, in principle, widespread agreement that the state has a legitimate role in protecting children from harm. Even the Nobel Prize winning economist Milton Friedman (1962), among the most ardent liberal supporters of the laissez faire philosophy, recognized this "paternalistic" function of government. At the same time, the traditional view of children, that they are the property of the father (pater) or the parents, is under pressure (Zelizer, 1994; James & Prout, 1997; Archard 2004). Societies are at an intersection when it comes to how children are treated and how their rights are respected, which creates tensions in the traditional relationship between the family and the state. Children are a focus of government responsibility under certain state-defined norms relating to harm and need. And parents are sometimes constrained by the state from exercising their (familial or property) rights under state-defined criteria of harm and need"--

The Sex Offender Housing Dilemma - Monica Williams 2018-05-08

"When a South Carolina couple killed a registered sex offender and his wife after they moved into their neighborhood in 2013, the story exposed an extreme and relatively rare instance of violence against sex offenders. While media accounts would have us believe that vigilantes across the country lie in wait for predators who move into their neighborhoods, responses to sex offenders more often involve collective campaigns that direct outrage toward political and criminal justice systems. No community wants a sex offender in its midst, but instead of vigilantism, [the author] argues, citizens often leverage moral, political, and/or legal authority to keep these offenders out of local neighborhoods. Her book, the culmination of four years of research, 70 in-depth interviews, participant observations, and studies of numerous media sources, reveals the origins and characteristics of community responses to sexually violent predators (SVP) in the U.S. Specifically, [this book] examines the placement process for released SVPs in California and the communities' responses to those placements. Taking the reader into the center of these related issues, [the author] provokes debate on the role of communities in the execution of criminal justice policies, while also addressing the responsibility of government institutions to both groups of citizens."--
