The Wiley Handbook of What Works with Sexual Offenders Jean Proulx 2020-08-24 From a rehabilitation series-what works for those who've sexually offended The Wiley Handbook of What Works with Sexual Offenders is an important addition to the What Works in Offender Rehabilitation handbook series. This handbook specifically looks at the topics of sexual offender theory, assessment, rehabilitation, prevention, policy, and risk management. Current assessment frameworks and intervention programmes are evaluated, with consideration of treatment efficacy. The handbook provides professionals with an evidence-based approach to the management and rehabilitation of individuals who have sexually offended, while presenting ideas on the prevention of sexual abuse. Concepts and theory behind sexual offender rehabilitation are presented with a focus on how this information can be applied in the development of real-world policies that seek to reduce re-offending. The Wiley Handbook of What Works with Sexual Offenders also includes discussions from renowned international researchers and clinicians on the empirical findings of treatment effectiveness. Presents theory, research, policy, and practice related to sexual offenses Addresses a full range of topics, such as sexual aggression, structured risk assessment, sexual offenders with intellectual disabilities, and pharmacological treatment of sexual offenders Discusses how conceptual and theoretical material can be used in establishing policy and practice As an important reference work, this rehabilitation handbook offers material for practitioners, including probation officers, social workers and psychologists. Each handbook within the What Works in Offender Rehabilitation series studies current theory, policy, and practice related to a type of offending.

Violence and Mental Disorders Bernardo Carpiniello 2019-11-30 This book explores the issue of violence in detail, taking into account the role of contextual factors, as well as the epidemiology, risk factors and clinical aspects of violence related to the main mental disorders. It also offers practical information on its management - from prevention to treatment. Covering all aspects of the problem of violence in mental disorders, the

book is divided into four parts: general aspects; risk factors, phenomenology and characteristics of violence in mental disorders; contexts of violence; and prevention and management of violence in mental health. It also discusses violence in the various settings of mental health system, an aspect that has not previously been fully addressed. The volume is intended for all those who are interested in mental health, including scholars, professionals, and students.

BROKEN BONES Vicki L. Wedel 2013-01-01 The editors, along with 15 outstanding contributors, comprehensively explore and provide an overview of the principles behind the interpretation of skeletal blunt force trauma. This expanded second edition provides a discussion on how to train for a career in forensic anthropology and offers guidance on how to complete a thorough trauma analysis. It also provides the labels given to different kinds of fractures and the biomechanical forces required to cause bone to fail and fracture. The text provides a theoretical framework for both evaluating published trauma studies and designing new ones. Experimental trauma research is an area ripe for research, and criteria to consider in choosing which non-human species to use in an actualistic study are offered. Common circumstances in which blunt force trauma is encountered are described. Information is provided on a variety of causes of death due to blunt force trauma. These causes range from accidental deaths to homicides due to blunt force from motor vehicle accidents, falls, strangulation, child and elder abuse, among others. Epidemiological information on whom is most likely affected by these various kinds of blunt force trauma is drawn from both the clinical and forensic literature. The most fundamental elements of the text are offered in four chapters where, bone by bone, fracture by fracture, the authors describe what to call each kind of fracture, what is known about how much force is required to break the bone that way, and fracture specific epidemiological information. This particular section of the text provides an invaluable reference source for forensic anthropologists and other osteologists to consult when looking at and trying to classify a bone fracture. Case studies are included to bring the book full circle back to considering the micro and macro bone changes that are seen when bone fails and fractures. The case studies are illustrative both of the concepts described through the book and of the high quality analyses forensic anthropologists contribute to medicolegal investigations of death every day. The text is further enhanced by 150 illustrations, some in color. This completely updated and expanded new volume is an essential reference for the forensic anthropology professional.

Working with Sex Offenders in Prisons and through Release to the Community Alec Spencer 1999-06-01 Working with Sex Offenders in Prisons and through Release to the Community is the first study of its kind to look at a wide range of issues and problems relating to the management of sexual offenders in prisons and their reintegration into the community. Spencer's analysis of the delivery of prison-based offence-specific programmes, both within the broader context of criminal justice systems and the community provides valuable insight into the relationship between prisons and other agencies dealing with sex offenders. Spencer makes a strong case for implementing treatment for sexual offenders within prisons, as well as the need for support and supervision in the community once released. His multi-agency approach is an innovative and cohesive strategy for effective interventions, and highlights major issues which need to be addressed so that programmes stand a chance of succeeding in a penal setting. The issues involved in the setting up of programmes, the creation of the right environment, and the support and training of staff, are universally applicable; as are discussions of risk assessment, the links between victims and offenders, sex offenders in special hospitals, women as sex abusers, the use of pornography and sexual offender notification. This book is essential reading, not only for specialists in the field, but also for students and professionals working in related areas.

A Review of the Literature on Sexual Assault Perpetrator Characteristics and Behaviors Sarah Michal Greathouse 2015 "Sexual assault continues to be a pervasive problem, both for society in general and within the military community. To assist the Air Force in its continued efforts to combat sexual assault within its ranks, we reviewed the existing empirical literature on the characteristics and behaviors of adult perpetrators who commit sexual assault against other adults. Our search was not limited to studies of military populations. While a vast majority of the existing literature has focused on sole male perpetrators who assault female victims, we identified some research on other types of perpetrators, including female sexual assault perpetrators, men who perpetrate assault against other men, and perpetrators who participate in group sexual assault. This body of research indicates that adult perpetrators are diverse in terms of their demographics, background characteristics, and motivations. Moreover, research indicates that sexual assault perpetration is likely influenced by a combination of factors, including an individual's developmental and family history; his or her personality, including attitudes/cognitions; and environmental factors, including peer attitudes and alcohol consumption. The complexity of factors that influence sexual assault perpetration and the multiple pathways that lead to an attack make it difficult to predict whether an individual is prone to commit sexual assault. While predicting sexual assault perpetration is problematic, we identified a number of factors related to perpetration that may be relevant for intervention efforts and offer recommendations for the Air Force"--Publisher's web site.

Juvenile Justice James Houston 2005 For undergraduate courses in Juvenile Justice and Juvenile Justice Administration. This text integrates

criminological theory, organizational theory and management theory to present a comprehensive introduction to the juvenile justice system and how it interfaces with other institutions in the community. By examining the system in this manner, the text demonstrates how the system sometimes fails to serve youth in need, and presents a framework for working within the system to more effectively serve youth and the community.

Sexual Offending and Mental Health Sarah Galloway 2008-04-15 *Sexual Offending and Mental Health* draws together theoretical, clinical and mental health issues for the range of professionals working in the community and in-patient settings with sex offenders and those who have behaved in sexually inappropriate ways. The contributors describe current influential models of sexual offending and the developmental, psychological and social factors involved. They discuss the prevalence of personality and mental disorders in known sex offenders and the impact these disorders have on their treatment and management. They describe clinical work with individuals, their partners and families, and also consider the impact of this work on professionals. The book includes an outline of current approaches to risk assessment, an overview of the recent changes in legislation in England and Wales, and suggestions for multi-disciplinary management in the community. This book will be essential reading for professionals working in health or criminal justice settings with people who have committed sexual offences or whose sexual behaviour has caused concern for others.

The SAGE Encyclopedia of Criminal Psychology Robert D. Morgan 2019-04-25 The SAGE Encyclopedia of Criminal Psychology will be a modern, interdisciplinary resource aimed at students and professionals interested in the intersection of psychology (e.g., social, forensic, clinical), criminal justice, sociology, and criminology. The interdisciplinary study of human behavior in legal contexts includes numerous topics on criminal behavior, criminal justice policies and legal process, crime detection and prevention, eyewitness identification, prison life, offender assessment and rehabilitation, risk assessment and management, offender mental health, community reintegration, and juvenile offending. The study of these topics has been increasing continually since the late 1800s, with people trained in many legal professions such as policing, social work, law, academia, mental health, and corrections. This will be a comprehensive work that will provide the most current empirical information on those topics of greatest concern to students who desire to work in these fields. This encyclopedia is a unique reference work that looks at criminal behavior primarily through a scientific lens. With over 500 entries the book brings together top empirically driven researchers and clinicians across multiple fields—psychology, criminology, social work, and sociology—to explore the field.

Code of Practice Great Britain. Department of Health 2008 This Code of Practice is a reference tool for those dealing with, and caring for people admitted to hospital and care homes with mental health problems. Authored by the Department of Health and produced following wide consultation with those who provide and receive services under the Mental Health Act, this publication will come into force on 3 November 2008. Through the Mental Health Act 2007, the Government has updated the 1983 Act to ensure it keeps pace with the changes in the way that mental health services are - and need to be - delivered. This publication provides guidance and advice to registered medical practitioners, approved clinicians, managers and staff of hospitals, and approved mental health professionals on how they should proceed when undertaking duties under the Act. It also gives guidance to doctors and other professionals about certain aspects of medical treatment for mental disorder more generally. The Mental Health Act Code of Practice is also aimed at all of those working in primary care, Mental Health Trusts, NHS Foundation Trusts as well as solicitors and attorneys who advise on mental health law. The Code should also be beneficial to the police and ambulance services and others in health and social services (including the independent and voluntary sectors) involved in providing services to people who are, or may become, subject to compulsory measures under the Act. It will also be a guide for those working with people with specific mental health needs such as those in nursing and care homes, and those in prison.

Treating Personality Disorder Naomi Murphy 2010 "This book is a comprehensive, informative, practical and optimistic guide to the establishment and successful maintenance of clinical services for people with personality disorders. It is extremely well-written by a collection of very experienced practitioners û and essential reading for psychologists, psychiatrists, nurses, occupational therapists and prison officers."-Caroline Logan, Greater Manchester West Mental Health NHS Foundation Trust and University of Manchester, UK "Treating Personality Disorder is a welcome addition to the literature in this complex field. It is particularly welcome as its authors are frontline practitioners and the knowledge distilled into this book comes from the real world of day to day interaction with some of the most excluded people in our society. It deserves to be read carefully by frontline staff and policy makers alike."-Professor Eddie Kane, Director, Personality Disorder Institute University of Nottingham, UK This book considers personality disorders and how they are treated within the institutional context of prisons and hospitals and provides practical guidance on assessment, formulation and integrated treatment planning. Treating Personality Disorder offers contributions from professionals in psychiatry,

nursing and psychology as well as prison officers and service managers. Areas of discussion include: delivering integrated treatment to people with personality disorders issues and challenges for the clinical professional the role of the psychiatrist in treating personality disorder Treating Personality Disorder will provide a timely and valuable guide for all professionals involved in the treatment and management of serious personality disorders within an institutional framework. Naomi Murphy is a consultant clinical and forensic psychologist with over fifteen...years' experience of working with clients presenting with complex psychopathology. Naomi has been instrumental in developing services for people with personality disorder in the community, secure services and prisons. Naomi has a particular interest in the development of transdisciplinary teams. Des McVey is a consultant nurse and psychotherapist with over twenty five years' experience of working within and developing forensic services. He is a visiting lecturer at the University of York and regularly teaches on nursing and clinical psychology courses. Des has a particular interest in developing strategies that maintain treatment integrity.

Perpetrators of Intimate Partner Sexual Violence Louise McOrmond-Plummer 2016-12-08 Research shows that intimate partner sexual violence (IPSV) is the most common form of sexual assault. Professional focus is often on the victim, but more information is needed about the perpetrators in order to have a fuller understanding of this crime. The very nature of IPSV - sexual assault within a relationship - means that professionals who work with victims must understand the dynamics of perpetrators as well. This new book will distill the knowledge that exists about perpetrators of IPSV. It includes chapters by authors who have worked directly with IPSV perpetrators and covers important subjects such as addressing IPSV in batterer groups, police management strategies, the danger of IPSV to children, the different types of violence perpetrators use, and prevention approaches for young people. There is also still a widely held view that rapists are strangers in alleyways. This book is intended to educate professionals about who is a perpetrator, as well as to highlight the very real danger these perpetrators represent, including a heightened risk of lethality. The contributors look at the social context of IPSV and the implications for prevention and provide hands-on knowledge to practitioners in a number of fields. The book may also be used within the academic context in fields such as social work, sociology, counseling, psychology, medicine, nursing, criminal justice, and law.

Borderline Personality Disorder National Collaborating Centre for Mental Health (Great Britain) 2009-01-01 This volume sets out clear recommendations for healthcare staff on how to diagnose and manage young people and adults who have borderlin personality disorder, in order to significantly improve their treatment and care. The accompanying CD-ROM contains all of the evidence on which the recommendations are based.
