Marital Therapy - Neil S. Jacobson 1979

First published in 1986.

Routledge is an imprint of Taylor & Francis, an information company.

Sourcebook of Social Support and Personality - Gregory R. Pierce 2013-11-11

The work of 47 contributors from the U.S., Canada, and Israel, the Sourcebook gives special attention to the complexity of the social support construct, expanding the field's theoretical base by seriously reappraising social support research in the context of findings from other fields of psychology and related disciplines. Personality processes are specified to account for observed associations between social

support and physical well-being. Several new studies are included which illustrate empirical approaches to exploring these processes. And key contributions highlight the great strides made in understanding the links among personal dispositions, situational contexts, and potentially supportive transactions.

Visible Learning - John Hattie 2008-11-19

This unique and groundbreaking book is the result of 15 years research and syntheses over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding.

Support Processes In Intimate Relationships Kieran T Sullivan

The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers - an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in

teaching and schools.

Support Processes in Intimate Relationships -

Kieran T. Sullivan 2010-06-11

In the past twenty years or so, research on support processes in relationships has emerged as a distinct development in the field. Researchers have drawn from studies in the fields of communication, social support, and intimate relationships to conduct research examining support processes in relationships on micro and macro levels. Theoretical models of support processes in intimate relationships have been developed and increasingly sophisticated methodologies and data analytic techniques are being used to accumulate considerable and convincing evidence of the importance and complexity of support processes in intimate relationships. This edited book offers a broad yet coherent view of the field, showcasing novel, state-of-the-art research and theory on support processes in intimate relationships. Cutting-edge

Support Processes In Intimate Relationships Kieran T Sullivan

scholarly work is compiled in one accessible volume, which is designed to provoke and guide new research on social support. The book is divided into five sections designed to reflect emerging themes in the literature on support processes and intimate relationships.

"Getting What One Wants: Perceived Support in Intimate Relationships" highlights the importance of offering support that is consistent with the needs of the recipient.

"Providing What Partners Need: Interpersonal Aspects of Support" focuses on the importance of empathic understanding, validation of support seekers' needs, attachment styles, and the emotional context for effective support provision.

"Complexities of Support Processes in Individual and Couple Well Being" highlights the complex nature of support, presenting research on the effects of partner support on coping with stress, differential responses to daily support, and the importance of providing support for positive events.

"Support in the Context of Health-related Problems and Behaviors" is comprised of chapters describing the effects of support on health, illness, and injury. Finally, "Culture and Gender" presents research that explores the role of gender and culture in support processes in couples.

The Case for Marriage -

Linda Waite 2002-03-05

A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that

Support Procebes In Intimate Relationships Kieran T Sullivan

divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well

written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of The Book of Virtues "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- The Wall Street Journal

Who Divorces? - Barbara Thornes 2023-07-05

The divorce rate in England and Wales increased nearly four-fold between 1950 and 1976; in the five years following the implementation of the 1969 Divorce Reform Act in January 1971, it more than doubled. Despite the plethora of public comment about the rising divorce rates, there was at the time very little objective data in our society about either those who chose to resolve their marital unhappiness by divorce, or the possible causes and consequences of such divorce. Originally published in 1979, this book, the first published study from the Marriage Research Centre, represented an important landmark in a relatively unexplored field. **Who Divorces?** Presents the findings of a large-scale study into the

characteristics of those who divorce. Certain childhood, adolescent, pre-marital and marital characteristics and experiences of a random sample of men and women who divorced are considered and compared with the characteristics and experiences of a random sample of men and women whose marriages were still intact. Additionally, research findings relating to the causes and consequences of divorce, both for the individual and for society, are discussed with particular reference to the wide range of prevailing opinion on these matters.

Social Exclusion in Later Life - Kieran Walsh 2021-03-30

Drawing on interdisciplinary, cross-national perspectives, this open access book contributes to the development of a coherent scientific discourse on social exclusion of older people. The book considers five domains of exclusion (services; economic; social relations; civic and socio-cultural; and community and spatial domains), with three

Support Procebes In Intimate Relationships Kieran T

Sullivan

chapters dedicated to analysing different dimensions of each exclusion domain. The book also examines the interrelationships between different forms of exclusion, and how outcomes and processes of different kinds of exclusion can be related to one another. In doing so, major cross-cutting themes, such as rights and identity, inclusive service infrastructures, and displacement of marginalised older adult groups, are considered. Finally, in a series of chapters written by international policy stakeholders and policy researchers, the book analyses key policies relevant to social exclusion and older people, including debates linked to sustainable development, EU policy and social rights, welfare and pensions systems, and planning and development. The book's approach helps to illuminate the comprehensive multidimensionality of social exclusion, and provides insight into the relative nature of disadvantage in later life. With 77 contributors working across

28 nations, the book presents a forward-looking research agenda for social exclusion amongst older people, and will be an important resource for students, researchers and policy stakeholders working on ageing.

Task Design In Mathematics Education - Anne Watson
2015-10-26

THIS BOOK IS AVAILABLE AS OPEN ACCESS BOOK ON SPRINGERLINK This open access book is the product of ICMI Study 22 Task Design in Mathematics Education. The study offers a state-of-the-art summary of relevant research and goes beyond that to develop new insights and new areas of knowledge and study about task design. The authors represent a wide range of countries and cultures and are leading researchers, teachers and designers. In particular, the authors develop explicit understandings of the opportunities and difficulties involved in designing and implementing tasks and of the interfaces between the teaching, researching and

designing roles – recognising that these might be undertaken by the same person or by completely separate teams.

Tasks generate the activity through which learners meet mathematical concepts, ideas, strategies and learn to use and develop mathematical thinking and modes of enquiry.

Teaching includes the selection, modification, design, sequencing, installation, observation and evaluation of tasks. The book illustrates how task design is core to effective teaching, whether the task is a complex, extended, investigation or a small part of a lesson; whether it is part of a curriculum system, such as a textbook, or promotes free standing activity; whether the task comes from published source or is devised by the teacher or the student.

The Oxford Handbook of Relationship Science and Couple Interventions - Kieran Terese Sullivan 2016

Marriage and other long-term committed relationships are an integral part of our lives and confer many benefits. People in

satisfying marriages report greater life happiness, live longer, and are less vulnerable to mental and physical illness. Unfortunately, many couples experience significant relationship distress and about half of marriages end in divorce. Among those who stay married, a notable number of couples remain in unstable, severely distressed marriages for years or even decades. Given the serious physical and psychological consequences of relationship distress and divorce for spouses and their children, it is clear that relationship science-the basic and applied study of relationship development, maintenance, and dysfunction-is of critical importance. The Oxford Handbook of Relationship Science and Couple Interventions showcases cutting-edge research in relationship science, including couple functioning, relationship education, and couple therapy. The book presents the most current definitions of and classifications for relationship

dysfunction and discusses the latest research on the biological, psychological, and interpersonal causes and correlates of couple dysfunction and subsequent treatment implications. The latest findings regarding empirically supported prevention and treatment interventions for couple dysfunction are highlighted, as well as diversity and cultural issues in the context of working with couples. This Handbook will appeal to researchers who seek to understand the development of relationship distress and design interventions to prevent and treat couple distress and clinicians who are diagnosing, assessing, and treating couple dysfunction.

Aspiration - Agnes Callard
2018

Becoming someone is a learning process; and what we learn is the new values around which, if we succeed, our lives will come to turn. Agents transform themselves in the process of, for example, becoming parents, embarking

on careers, or acquiring a passion for music or politics. How can such activity be rational, if the reason for engaging in the relevant pursuit is only available to the person one will become? How is it psychologically possible to feel the attraction of a form of concern that is not yet one's own? How can the work done to arrive at the finish line be ascribed to one who doesn't (really) know what one is doing, or why one is doing it? In *Aspiration*, Agnes Callard asserts that these questions belong to the theory of aspiration. Aspirants are motivated by proleptic reasons, acknowledged defective versions of the reasons they expect to eventually grasp. The psychology of such a transformation is marked by intrinsic conflict between their old point of view on value and the one they are trying to acquire. They cannot adjudicate this conflict by deliberating or choosing or deciding—rather, they resolve it by working to see the world in a new way. This work has a

Support Procebes In Intimate Relationships Kieran T Sullivan

teleological structure: by modeling oneself on the person he or she is trying to be, the aspirant brings that person into being. Because it is open to us to engage in an activity of self-creation, we are responsible for having become the kinds of people we are.

Handbook of Restorative Justice - Dennis Sullivan
2007-05-07

Handbook of Restorative Justice is a collection of original, cutting-edge essays that offer an insightful and critical assessment of the theory, principles and practices of restorative justice around the globe. This much-awaited volume is a response to the cry of students, scholars and practitioners of restorative justice, for a comprehensive resource about a practice that is radically transforming the way the human community responds to loss, trauma and harm. Its diverse essays not only explore the various methods of responding nonviolently to harms-done by persons, groups, global corporations and nation-states,

but also examine the dimensions of restorative justice in relation to criminology, victimology, traumatology and feminist studies. In addition. They contain prescriptions for how communities might re-structure their family, school and workplace life according to restorative values. This Handbook is an essential tool for every serious student of criminal, social and restorative justice.

Cognition in Close Relationships - Garth J.O. Fletcher
2013-05-13

The past decade has witnessed an explosion of interest and research on close relationships and social cognition. In both areas, numerous handbooks, textbooks, and journal articles have been published. However, it is the editors' impression that although cognitive theories and concepts have filtered through to research dealing with close relationships, much of this research reflects a relatively untutored understanding of the theoretical and empirical work

Support Procebes In Intimate Relationships Kieran T Sullivan

in social cognition. Conversely, the research literature that provides a more sophisticated perspective on the role of cognition in close relationships typically reveals a relatively limited knowledge of the literature on close relationships. As researchers who have worked in both social cognitive processes and close relationships, Fletcher and Fincham are convinced that each field has much to offer the other. In fact, their book is based on two important postulates: first, that a social cognitive framework offers a valuable resource for developing our understanding of close relationships; and, second, that studying cognition within close relationships has the potential to inform our understanding of basic social cognitive processes.

Jealousy - Gregory L. White
1992-10-01

An old and recurring theme in human relationships, jealousy has been captured in myth, drama, literature, dance, sculpture, and painting, as well as in the popular press.

Jealousy is also a major cause of murder, spousal violence, and marital breakdown. It has been estimated that up to 20% of all murders involve a jealous lover, and, in a nation-wide survey of marriage counselors, jealousy was cited as a (if not the) major focus of treatment for about a third of all couples under 50. However, despite the rich array of commentary, the empirical study of this universal phenomenon is still in its infancy. Providing an important advance, this groundbreaking volume is the first to offer a comprehensive review of modern research on romantic jealousy. It offers a conceptual framework for ordering past research, an up-to-date review of the literature from diverse sources and fields, and useful clinical strategies for practitioners and clinicians in training. This volume concentrates on romantic jealousy, which the authors define as neither an emotion, a state of mind, nor a way of behaving, but rather as a multi-system phenomenon involving personality,

Support Procebes In Intimate Relationships Kieran T Sullivan

relationships, culture, and perhaps biology. This model serves to integrate remaining chapters, yields a richer theory, and engenders a flexible clinical perspective. The book opens by presenting a model of romantic jealousy that integrates research and clinical phenomena. It then offers analyses of several different perspectives including: sociobiological and personality approaches; ways in which relationship characteristics and dynamics contribute to jealousy; gender differences; and cultural and social factors that affect jealousy. Chapters on clinical concerns focus on violence, psychopathology, and the assessment and treatment of normal, reactive, and symptomatic jealousies. Specific strategies are provided with clinical, real-life, and cross-cultural case examples used throughout. Providing both theory and practical suggestions for understanding and treating romantic jealousy from individual and couples

therapeutic approaches, JEALOUSY is an invaluable resource for clinicians and researchers in psychology, psychotherapy, marital and family therapy, psychiatry, and social work. The volume serves as a primary or secondary text in advanced undergraduate and graduate seminars in social psychology of interpersonal relationships, emotions, personality or clinical psychology, couples relationships, and interdisciplinary courses linking culture and the individual. Because it discusses the relationship between violence and jealousy, it also provides insightful reading for lawyers, criminologists, and law enforcement officials. *The Communication of Social Support* - Brant Bureson 1994-04-14 This survey of the nature, problems and outcomes of supportive interactions covers a wide range of contexts and relationships. Exploring social support between friends, spouses, family members and co-workers, both qualitative

and quantitative studies in natural and laboratory settings are discussed. The contributors examine: methods and models for assessing specific messages through which people attempt to provide support; approaches for examining the form and content of specific social support interactions; and how features of social relationships convey and contextualize support.

Social Support in Couples -

Carolyn E. Cutrona 1996-04-11

Expressions of support between partners may be more commonplace than heroic, but their cumulative effects on the growth of trust, enduring love, and commitment can be considerable--even lifesaving in the face of otherwise overwhelming tragedy.

Skillfully weaving together the latest research with engaging case examples and practical applications, author Carolyn E. Cutrona offers an in-depth analysis of how committed partners can serve as resources for each other in stressful scenarios. Beginning with a fresh overview of

definitions and concepts, *Social Support in Couples* articulates the vital components of intimate support systems. This informative volume explores the phenomenon of marital communication through real-life interactions, focusing on gender-related differences, the interplay between supportive and destructive interactions, and stress experienced during chronic/disabling illness. In a concluding chapter, a research agenda for future study opens the topic up to additional serious consideration. A reader-friendly examination of the power of supportive acts, *Social Support in Couples* is recommended for a wide readership, including academics, practitioners, and students in family studies, social psychology, social work, and marriage and family counseling.

Something In The Water: -

Olympic rowers Gary and Paul O'Donovan may be the face of Irish rowing and Skibbereen Rowing Club, and have enormously increased the

popularity of rowing in Ireland, but they're just one piece of a much larger jigsaw. Without their club and the people behind the scenes, they wouldn't be Olympic silver medalists, 2018 world champions, former European champions and, in Paul's case, a three-time world champion. Almost one hundred Skibbereen Rowing Club athletes have represented Ireland at various regattas over the years; a staggering figure when viewed in light of the size of the club. Founded in 1970, it is now the undisputed most successful rowing club in the country, producing five Olympic rowers since 2000 and four world champions between 2016 and 2018. It is the characters involved in the club, the coaches, members and the athletes themselves, who come together to make Skibbereen Rowing Club what it is. *Something in the Water* reveals what goes on behind the scenes to create an environment that allows locals to excel on the national and international stages. The story

is told through the people and families involved, showing how relatable they are to people around the country.
