Reproduction by Design - Angus McLaren 2012-02-01

Modernity in interwar Europe frequently took the form of a preoccupation with mechanizing the natural; fears and fantasies revolved around the notion that the boundaries between people and machines were collapsing. Reproduction in particular became a battleground for those debating the merits of the modern world. That debate continues today, and to understand the history of our anxieties about modernity, we can have no better guide than Angus McLaren. In *Reproduction by Design*, McLaren draws on novels, plays, science fiction, and films of the 1920s and '30s, as well as the work of biologists, psychiatrists, and sexologists, to reveal surprisingly early debates on many of the same questions that shape the conversation today: homosexuality, recreational sex, contraception, abortion, euthanasia, sex change operations, and in vitro fertilization. Here, McLaren brings together the experience and perception of modernity with sexuality, technology, and ecological concerns into a cogent discussion of science's place in reproduction in British and American cultural history.

Canadian Perspectives on Advanced Practice Nursing, Second Edition - Eric Staples 2020-12-18

Now in its second edition, *Canadian Perspectives on Advanced Practice Nursing* provides a comprehensive and uniquely Canadian review of the roles of clinical nurse specialists and nurse practitioners, the two streams of advanced practice nursing (APN) in the country. With contributions from notable professionals and academics of the field, the text explores the history and evolution of APN in Canada, from its rural and remote outpost beginnings to the present, and proposes a vision for its future within the health care system. Key issues are examined in relation to economic, educational, legislative, political, regulatory, and social environments that have shaped the continued integration of APN roles across the country. Additionally, the contributors apply the Canadian Nurses Association's pan-Canadian framework and role competencies to real clinical cases. Speciality roles, including geropsychiatry, ambulatory care, and neonatal, are also examined. New to this edition are chapters that focus on the unique challenges of developing APN roles in Quebec; the social determinants of health of Indigenous, inner-city, rural and remote, LGBT2SQ, and refugee and migrant populations in Canada; and other critical issues, such as performance assessment and global perspectives. Thoroughly updated, this second edition of *Canadian Perspectives on Advanced Practice Nursing* is a must-read for those in the nursing profession, especially students in nursing programs.
