The Global Financial Crisis and its Budget Impacts in OECD Nations John Wanna 2015-09-25 The global financial crisis of 2007-09 constituted the biggest shock to the economies of the OECD nations since the Second World War and caused most of their governments to move into intense crisis mode. They made significant adjustments to their fiscal policy regimes, including massive interventions to stabilize markets and economies. But how they reacted to the crisis, and what measures they took to deal with it, still underpin their economic and budgetary positions. This singular shock provides the editors and authors of this book with an intriguing opportunity to examine how different OECD budgetary systems performed. Chapters cover the EU, North America and Asia, assessing how governments responded to the challenge and how their budget systems evolved in the aftermath.

**Fundamentals of Public Budgeting and Finance** Aman Khan 2019-11-12 Budgeting is probably the single most important function in government, considering the amount of money a government spends each year on various expenditure programs and activities, as well as the time it spends in preparing the budget, appropriating funds for these activities and, finally, executing them. This book integrates the complex theory and practice of public budgeting into a single text. Written in a simple, concise and easy to understand manner, *The Fundamentals of Public Budgeting and Finance* captures the multidimensional perspective of public budgeting that students, as well as practitioners will find useful.

ADDRESSING THE DEFICIT: Updating the Budgetary Implications of Selected GAO Work 1996 This report is part of GAO's continuing effort to help the Congress identify options that could be used to reduce the deficit. It updates GAO's previous work in this area with new information and systematically identifies in a single document the budgetary implications of selected program reforms discussed in their work but not yet implemented or enacted. As in previous reports and testimony, all of the options are based on key findings and issues developed in GAO's reviews and evaluations.

*Addressing the Deficit: Budgetary Implications of Selected GAO Work for Fiscal Year 1998* 1997 This report is divided into four appendixes. Appendix I discusses the conventions used to provide estimates of cost savings or additional revenues. Appendix II provides for congressional consideration an analytical framework of individual options. This framework provides one set of criteria that may be used to assess goals, scope, and approaches for delivering federal programs. It is organized around the following three broad themes: (1) reassess objectives, that is, reconsider whether to terminate or revise services and programs provided; (2) redefine beneficiaries, that is, reconsider who pays for or benefits from a particular program; and, (3) improve efficiency, that is, reconsider how a program or service is provided. Appendix III presents narrative descriptions of the options, organized by budget function and receipts. As mentioned above, appendix IV lists options from last year's report that were not updated for this year's volume. Although the General Accounting Office derived the options from its existing body of work, there are similarities with other deficit reduction proposals. For example, some options contained in this report have also been included in past editions of CBO's annual publication, *Reducing the Deficit: Spending and Revenue Options*, House and Senate Budget Resolution proposals, and the President's annual budget submission.

*Holding Government Bureaucracies Accountable* Bernard Rosen 1998-02-24 For what and to whom are bureaucracies answerable? How are they held accountable? This successful text examines these questions, primarily in the context of the federal bureaucracy. Building upon the second edition, Professor Rosen has updated the entire work to incorporate significant subsequent developments. Among the most important of these are the Chief Financial Officer Act of 1990, the Government Performance and Results Act of 1993, and the Government Management Reform Act of 1993. These three laws, along with the Clinton administration's National Performance Review initiative, have the potential to substantially improve performance and accountability.

**World Bank East Asia and Pacific Economic Update 2011** World Bank 2013-06-26 The World Bank East Asia and Pacific Economic Update is a comprehensive, twice-yearly review of the region's economies prepared by the East Asia and Pacific region of the World Bank. In this edition, the report notes that real GDP growth in East Asia has been moderating after a sharp rebound from the global crisis. Inflation has become the key short-run challenge for the authorities in the region, complicated by a surge in portfolio capital inflows and rapidly increasing food and commodity prices that hit low-income households disproportionately. Over the medium-term, East Asia has the potential to sustain rapid increases in living standards even as the global economy enters a more challenging phase.

**Budget and Economic Outlook: An Update** The Congressional Budget Office (CBO) estimates that the deficit for 2008 will be substantially higher than it was in 2007, rising from \$161 billion last year to \$407 billion this year. Furthermore, CBO's projections indicate that if current laws and policies remain in place, deficits for the next two years will remain above \$400 billion, or about 3 percent of gross domestic product (GDP). Over the longer term, the fiscal outlook continues to depend mostly on the future course of health care costs as well as on the effects of a growing elderly population.

**World Bank East Asia and Pacific Economic Update, October 2019** World Bank 2019-10-09 Growth in the developing East Asia and Pacific region slowed in the first half of 2019 given weakening global demand and heightened policy uncertainty amid ongoing trade tensions. Steady consumption growth helped to partly offset the effects of weakening exports and investment on

growth. The region's growth prospects face intensified downside risks, including further escalation of trade disputes, a sharper-than-expected slowdown in China, the United States and the Euro Area, along with a disorderly Brexit, and an abrupt change in global financing conditions. In some countries, rising indebtedness and other vulnerabilities, such as the constrained capacity for foreign debt rollover, could amplify the negative effects of external shocks. The regional growth moderation underscores the need to address key vulnerabilities and preserve economic dynamism among developing East Asia and Pacific economies. In the short run, countries with sufficient policy space should use available policy tools to stimulate domestic activities. Better quality spending, together with prudent debt management, is needed to safeguard fiscal sustainability. Deepening regional integration would help offset the negative impact of global protectionism. In the medium to long term, pursuing structural reforms that raise competitiveness, support trade and investment, and encourage innovation is critical to boosting productivity and growth.

**Asian Development Outlook 2012 Update** Asian Development Bank 2012-10-01 According to the findings in the Asian Development Outlook 2012 Update, dimming global growth prospects and soft domestic demand in the region's two largest economies are slowing the pace of developing Asia's expansion. Growth is now expected to slide from 7.2% in 2011 to 6.1% in 2012, with a bounce back to 6.7% in 2013. The possibility of a shock emanating from the unresolved euro area sovereign debt crisis or a sharp fiscal contraction in the United States pose the biggest downside risks to the economy. Fortunately, most developing Asian economies have room to counteract such shocks with fiscal and monetary policy. However, there is currently no regionwide need for countercyclical policy intervention.

**Europe and Central Asia Economic Update, Fall 2020** World Bank 2020-10-07 The COVID-19 pandemic has hit human capital directly in Europe and Central Asia, adversely affecting both education and health. School closures may lead to learning losses equivalent to a third to a full year of schooling, and they are likely to exacerbate inequalities, by disproportionately affecting students from disadvantaged backgrounds. The disease has already killed thousands of people, and some patients who survive will suffer long-term damage to their health. Recovery from the pandemic will thus require strong investment in education and health. This update examines human capital outcomes in the region and the ways in which the pandemic is likely to affect them. A focus on the quality of tertiary education and health risk factors of obesity, smoking, and heavy drinking

highlights the challenges that are particularly important for the region. Post-COVID 19 policy initiatives to improve education and health will need to recognize the challenges posed by increased reliance on remote learning and the importance of being prepared for future pandemics, given the vulnerability of the region's aging societies and the large number of people with underlying health risks.

**East Asia and Pacific Economic Update April 2014** World Bank World Bank 2014-05-13

Developing countries in the East Asia Pacific region will see stable economic growth this year, bolstered by a recovery in high-income economies and the market's modest response so far to the Federal Reserve's tapering of its quantitative easing, according to the East Asia Pacific Economic Update. Developing East Asia will grow by 7.1 percent this year, largely unchanged from 2013, the report says. As a result, East Asia remains the fastest growing region in the world, despite a slowdown from the average growth rate of 8.0 percent from 2009 to 2013. In China, growth will ease slightly, to 7.6 percent this year from 7.7 percent in 2013. Excluding China, the developing countries in the region will grow by 5.0 percent, slightly down from 5.2 percent last year.
