

# Aids Sex And Culture Global Politics And Survival In Southern Africa

## **AIDS, Sex, and Culture** - Ida Susser

2011-09-09

AIDS, Sex, and Culture is a revealing examination of the impact the AIDS epidemic in Africa has had on women, based on the author's own extensive ethnographic research. based on the author's own story growing up in South Africa looks at the impact of social conservatism in the US on AIDS prevention programs discussion of the experiences of women in areas ranging from Durban in KwaZulu Natal to rural settlements in Namibia and Botswana includes a chapter written by Sibongile Mkhize at the University of KwaZulu Natal who tells the story of her own family's struggle with AIDS

Preventing and Mitigating AIDS in Sub-Saharan Africa - National Research Council 1996-03-28

The AIDS epidemic in Sub-Saharan Africa continues to affect all facets of life throughout the subcontinent. Deaths related to AIDS have driven down the life expectancy rate of residents in Zambia, Kenya, and Uganda with far-reaching implications. This book details the current state of the AIDS epidemic in Africa and what is known about the behaviors that contribute to the transmission of the HIV infection. It lays out what research is needed and what is necessary to design more effective prevention programs.

**Perspectives on Africa** - Roy Richard Grinker 2010-05-17

The second edition of Perspectives on Africa: A Reader in Culture, History, and Representation is both an introduction to the cultures of Africa and a history of the interpretations of those cultures. Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field. Explores the dynamic processes by and through which scholars have described and understood African history and culture Includes selections from anthropologists, historians, philosophers, and critics who collectively reveal the interpenetration of ideas and concepts within

and across disciplines, regions, and historical periods Offers a combined focus on ethnography and theory, giving students the means to link theory with data and perspective with practice Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections: Conflict and Violent Transformations; and Development, Governance and Globalization

The African AIDS Epidemic - John Iliffe 2005-02-15

This history of the African AIDS epidemic is a much-needed, accessibly written historical account of the most serious epidemiological catastrophe of modern times. The African AIDS Epidemic: A History answers President Thabo Mbeki's provocative question as to why Africa has suffered this terrible epidemic. While Mbeki attributed the causes to poverty and exploitation, others have looked to distinctive sexual systems practiced in African cultures and communities. John Iliffe stresses historical sequence. He argues that Africa has had the worst epidemic because the disease was established in the general population before anyone knew the disease existed. HIV evolved with extraordinary speed and complexity, and because that evolution took place under the eyes of modern medical research scientists, Iliffe has been able to write a history of the virus itself that is probably unique among accounts of human epidemic diseases. In giving the African experience a historical shape, Iliffe has written one of the most important books of our time. The African experience of AIDS has taught the world much of what it knows about HIV/AIDS, and this fascinating book brings into focus many aspects of the epidemic in the longer context of massive demographic growth, urbanization, and social change in Africa during the latter half of the twentieth century. The African AIDS Epidemic: A History is a brilliant introduction to the many aspects of the epidemic and the distinctive

character of the virus.

**Love in the Time of AIDS** - Mark Hunter  
2010-10-25

In some parts of South Africa, more than one in three people are HIV positive. *Love in the Time of AIDS* explores transformations in notions of gender and intimacy to try to understand the roots of this virulent epidemic. By living in an informal settlement and collecting love letters, cell phone text messages, oral histories, and archival materials, Mark Hunter details the everyday social inequalities that have resulted in untimely deaths. Hunter shows how first apartheid and then chronic unemployment have become entangled with ideas about femininity, masculinity, love, and sex and have created an economy of exchange that perpetuates the transmission of HIV/AIDS. This sobering ethnography challenges conventional understandings of HIV/AIDS in South Africa.

*From Outrage to Courage* - Anne Firth Murray  
2013

From half a million women who die in pregnancy and childbirth to one out of three women suffering domestic violence worldwide, from 90 million girls who do not go to school to HIV/AIDS spreading fastest among adolescent girls, women around the world face unique health challenges. In this searing cradle-to-grave review, Anne Firth Murray tackles health issues from sex selective abortion and unequal access to food and health care to the challenges faced by aging women. Murray makes clear that the issues are social, ethical, and political much more than they are medical, and she goes further to provide hope that positive change can happen.

*Holding On* - Alyson O'Daniel 2016-06-01

In *Holding On* anthropologist Alyson O'Daniel analyzes the abstract debates about health policy for the sickest and most vulnerable Americans as well as the services designated to help them by taking readers into the daily lives of poor African American women living with HIV at the advent of the 2006 Treatment Modernization Act. At a time when social support resources were in decline and publicly funded HIV/AIDS care programs were being re-prioritized, women's daily struggles with chronic poverty, drug addiction, mental health, and neighborhood violence influenced women's lives

in sometimes unexpected ways. An ethnographic portrait of HIV-positive black women and their interaction with the U.S. healthcare system, *Holding On* reveals how gradients of poverty and social difference shape women's health care outcomes and, by extension, women's experience of health policy reform. Set among the realities of poverty, addiction, incarceration, and mental illness, the case studies in *Holding On* illustrate how subtle details of daily life affect health and how overlooking them when formulating public health policy has fostered social inequality anew and undermined health in a variety of ways.

*Technologies of Sexuality, Identity and Sexual Health* - Lenore Manderson 2012

*Technologies of Sexuality, Identity and Sexual Health* highlights the complex ways in which sexuality is expressed and enacted through local ideologies, global identities and material cultures, and their influence on people's sexual health and well-being. Its impetus is the renewed interest in technology and the 'social life of things,' including pharmaceuticals, expanded sexual and related surgery, the growing exploitation of markets for sexual and contraceptive products, and the impact of these on sexual and health practices and outcomes. Organised loosely into three parts, the opening chapters concentrate on female contraception, its availability, and the varied cultural significance attached to the ability to control its use, exploring the politics of reproductive health and birth control, and the ties between technology and power. The middle section turns its attention to men, and the impact of traditional and contemporary concerns about masculinity, and the social and sexual roles of men. The final chapters look at the commonalities across cultural borders and sexual gendered identities - how products and procedures travel, not only through the formal channels of globalisation, but also informally, carried by individuals across cultural and social boundaries through sexual, social and commercial interactions. The volume brings together anthropologists, sociologists and cultural studies scholars, both senior and emerging, from around the globe. Offering an important and topical contribution to the developing global literature on sexuality, sexual

identity, culture and health, it is of interest to researchers and advanced students in these areas.

*AIDS and Masculinity in the African City* -

Robert Wyrod 2016-07-05

"AIDS has been a devastating plague in much of Sub-Saharan Africa, yet the long-term implications for gender and sexuality are just emerging. This book examines how AIDS has altered the ways masculinity is lived in Uganda, a country known as Africa's great AIDS success story. Based on extensive ethnographic research in an urban slum community called Bwaise, this book reveals the persistence of masculine privilege in the age of AIDS and the implications such privilege has for men's and women's health and wellbeing in Uganda and beyond"--

**Sizonqoba! Outliving AIDS in Southern Africa** - Ngcaweni, Busani 2017-04-11

The aim of this book is to better understand the phenomenon of HIV in a country that has faced the fullest might of the disease and yet, after first faltering, has made more progress than any other country in the world in its response to HIV. It aims to reflect the complexity of this narrative and the range of widely differing insights by featuring what is likely the largest number of contributors in a single publication on the subject in South Africa, as well as a full spectrum of specialised areas, ranging from high-end science to personal reflections.

**A Companion to Medical Anthropology** - Merrill Singer 2011-05-02

A Companion to Medical Anthropology examines the current issues, controversies, and state of the field in medical anthropology today. Provides an expert view of the major topics and themes to concern the discipline since its founding in the 1960s Written by leading international scholars in medical anthropology Covers environmental health, global health, biotechnology, syndemics, nutrition, substance abuse, infectious disease, and sexuality and reproductive health, and other topics

**Changing Narratives of Sexuality** -

Charmaine Pereira 2014-04-10

Changing Narratives of Sexuality examines the tensions and contradictions in constructions of gender, sexuality and women's empowerment in the various narrations of sexuality told by and about women. From storytelling to women's

engagement with state institutions, stories of unmarried women and ageing women, a sex scandal and narrations of religious influence on women's subjectivities and sexualities, this impressive collection explores sexuality in a wide range of national contexts in the global South. The authors analyse what scope exists for women to subvert repressive norms and conceptions of heterosexuality, interweaving rich, contextual detail with theoretical concerns. International Security, Conflict, and Gender - Hakan Seckinelgin 2012

This book challenges the conventional security-based international policy frameworks that have developed for dealing with HIV/AIDS during and after conflicts, and examines first-hand evidence and experiences of conflict and HIV/AIDS. Since the turn of the century international policy agenda on security have focused on HIV/AIDS only as a concern for national and international security, ignoring people's particular experiences, vulnerabilities and needs in conflict and post-conflict contexts. Developing a gender-based framework for HIV/AIDS-conflict analysis, this book draws on research conducted in Burundi to understand the implications of post-conflict demobilization and reintegration policies on women and men and their vulnerability to HIV/AIDS. By centring the argument on personal reflections, this work provides a critical alternative method to engage with conflict and HIV/AIDS, and a much richer understanding of the relationship between the two. International Security, Conflict and Gender will be of interest to students and scholars of healthcare politics, security and governance.

HIV/AIDS and the South African State -

Annamarie Bindenagel Šehović 2016-04-22

For three decades post-apartheid, the HIV/AIDS epidemic from first acknowledgement to its management as a chronic disease, demanded unparalleled attention. This was nowhere more evident than in South Africa. This book explores how the state responded to its responsibilities to defend and protect (human) security. Linking this to the role of the state as sovereign protector and provider of security, it applies the findings to the broader re-interpretation of sovereign responsibility in the 21st Century. This book does not seek to absolve the South African state of its responsibility to respond. Moreover,

it argues that although the state, the government, before, during, and after the transition to democracy, was aware of and acknowledged the threat - political, economic and social - posed by the epidemic, it nonetheless chose not to make the epidemic a priority policy issue. As a result, it argues that the South African HIV/AIDS case illustrates the tension inherent between a state's ultimate sovereign responsibility to respond and its tactical dependence on external contributors to meet the demands of all of its constituents.

*Funeral Culture* - Casey Golomski 2018-06-04  
Introduction. Funeral culture: dignity, work, and cultural change -- Reckoning life: dying from AIDS to living with HIV -- Religious healing and resurrection: "Faith without work is dead"--The secrets of life insurance: saving, care, and the witch -- Grounded: body politics of burial and cremation -- Life in a takeaway box: mobility and purity in funeral feasts -- Commemoration and cultural change: memento radicalis -- Conclusion. The afterlives of work

*Sexuality in World History* - Peter N. Stearns 2017-02-14

This book examines sexuality in the past, and explores how it helps explain sexuality in the present. The subject of sexuality is often a controversial one, and exploring it through a world history perspective emphasizes the extent to which societies, including our own, are still reacting to historical change through contemporary sexual behaviors, values, and debates. The study uses a clear chronological structure to focus on major patterns and changes in sexuality—both sexual culture and sexual behaviors—in the main periods of world history, covering topics including: • The sexual implications of the transition from hunting and gathering economies to agricultural economies; • Sexuality in classical societies; • The postclassical period and the spread of the world religions; • Sex in an age of trade and colonies; • Changes in sexual behaviors and sexual attitudes between 1750 and 1950; • Sex in contemporary world history. This new edition examines these issues on a global scale, with attention to anthropological insights on sexuality and their relationship to history, the dynamics between sexuality and imperialism, sexuality in industrial society, and trends and conflicts surrounding

views of sex and sexuality in the contemporary world.

*Sustaining Life* - Theodore Powers 2020-03-20  
From the historical roots of AIDS activism in the struggle for African liberation to the everyday work of community education in Khayelitsha, *Sustaining Life* tells the story of how the rights-based South African AIDS movement successfully transformed public health institutions, enabled access to HIV/AIDS treatment, and sustained the lives of people living with the disease. Typical accounts of the South African epidemic have focused on the political conflict surrounding it, Theodore Powers observes, but have yet to examine the process by which the national HIV/AIDS treatment program achieved near-universal access. In *Sustaining Life*, Powers demonstrates the ways in which non-state actors, from caregivers to activists, worked within the state to transform policy and state-based institutions in order to improve health-based outcomes. He shows how advocates in the South African AIDS movement channeled the everyday experiences of poor and working-class people living with HIV/AIDS into tangible policy changes at varying institutional levels, revealing the primacy of local action for expanding treatment access. In his analysis of the transformation of the state health system, Powers addresses three key questions: How were the activists of the movement able to overcome an AIDS-dissident faction that was backed by government power? How were state health institutions and HIV/AIDS policy transformed to increase public sector access to treatment? Finally, how should the South African campaign for treatment access inform academic debates on social movements, transnationalism, and the state? Based on extended participant observation and in-depth interviews with members of the South African AIDS movement, *Sustaining Life* traces how the political principles of the anti-apartheid movement were leveraged to build a broad coalition that changed national HIV/AIDS policy norms and highlights how changes in state-society relations can be produced by local activism.

*Half the Sky* - Nicholas D. Kristof 2010-06-01  
#1 NATIONAL BESTSELLER • A passionate call to arms against our era's most pervasive human

rights violation—the oppression of women and girls in the developing world. From the bestselling authors of *Tightrope*, two of our most fiercely moral voices With Pulitzer Prize winners Nicholas D. Kristof and Sheryl WuDunn as our guides, we undertake an odyssey through Africa and Asia to meet the extraordinary women struggling there, among them a Cambodian teenager sold into sex slavery and an Ethiopian woman who suffered devastating injuries in childbirth. Drawing on the breadth of their combined reporting experience, Kristof and WuDunn depict our world with anger, sadness, clarity, and, ultimately, hope. They show how a little help can transform the lives of women and girls abroad. That Cambodian girl eventually escaped from her brothel and, with assistance from an aid group, built a thriving retail business that supports her family. The Ethiopian woman had her injuries repaired and in time became a surgeon. A Zimbabwean mother of five, counseled to return to school, earned her doctorate and became an expert on AIDS. Through these stories, Kristof and WuDunn help us see that the key to economic progress lies in unleashing women’s potential. They make clear how so many people have helped to do just that, and how we can each do our part. Throughout much of the world, the greatest unexploited economic resource is the female half of the

population. Countries such as China have prospered precisely because they emancipated women and brought them into the formal economy. Unleashing that process globally is not only the right thing to do; it’s also the best strategy for fighting poverty. Deeply felt, pragmatic, and inspirational, *Half the Sky* is essential reading for every global citizen.

**Understanding Global Sexualities** - Peter Aggleton 2012

This theory-building book explores some of the areas in which there is major and continuing debate in the field of sexuality. With contributions from leading and new scholars and activists from across the globe, this book highlights tensions or 'flash-points' in contemporary debate, and offers some innovative ways forward in terms of thinking about sexuality.

[South African AIDS Activism and Global Health Politics](#) - M. Mbali 2013-03-29

South Africa has the world's largest number of people living with HIV. This book offers a history of AIDS activism in South Africa from its origins in gay and anti-apartheid activism to the formation and consolidation of the Treatment Action Campaign (TAC), including its central role in the global HIV treatment access movement.
