Foundations for Couples' Therapy - Jennifer Fitzgerald 2017-02-03

As a quality resource that examines the psychological, neurobiological, cultural, and spiritual considerations that undergird optimal couple care, *Foundations for Couples' Therapy* teaches readers to conduct sensitive and comprehensive therapy with a diverse range of couples. Experts from social work, clinical psychotherapy, neuroscience, social psychology, and health respond to one of seven central case examples to help readers understand the dynamics within each partner, as well as within the couple as a system and within a broader cultural context. Presented within a Problem-Based Learning approach (PBL), these cases ground the text in clinical reality. Contributors cover critical and emerging topics like cybersex, emotional well-being, forgiveness, military couples, developmental trauma, and more, making it a must-have for practitioners as well as graduate students.

Love, Romance, Sexual Interaction - Nathaniel Pallone 2018-01-16

This volume brings together in a single resource fourteen empirical studies examining a variety of emotions and behaviors covering many aspects of love, romance, and sexual interaction from recent issues of *Current Psychology*. Scholars from universities and research centers bring under the empiricist's microscope a variety of emotions and behaviors, ranging from dating relationships, criteria for the ideal mate held by both men and women, the relationship between perceptions of parents and partners in a direct test of psychoanalytic conceptualizations of mate selection, how the media influence perceptions about love and romance, sources of marital conflict, gender differences in responses to infidelity, and even the attitudes of "consumers" toward prostitution. Contributors and topics of discussion include: Albert Mehrabian and Jeffrey

S. Blum, "Physical Appearance, Attractiveness, and the Mediating Effect of Emotions"; Gordon L. Flett, Paul L. Hewitt, Brenley Shapiro, and Jill Rayman, "Perfectionism, Beliefs, and Adjustment in Dating Relationships"; Robert Ervin Cramer, Jeffrey T. Schaefer, and Suzanne Reid, "Identifying the Ideal Mate: More Evidence for Male-Female Convergence"; Glenn Geher, "Perceived and Actual Characteristics of Parents and Partners: A Freudian Model of Mate Selection"; Claudia J. Romantic Love - Susan S. Hendrick 1992-06-10
Is love a uniquely human endeavor? Is romantic love universally felt ... or is it a cultural phenomenon? Can we control it? Love is of concern to nearly everyone--yet it is rarely understood. Drawing material from history, psychology, sociobiology, sociology, philosophy, family studies, and other disciplines, the authors provide an overview to aid readers in understanding the complexity--and ultimate elusiveness--of romantic love. Chapters in this fascinating volume encompass a wide range of material, covering the history of love; theories and research on love; and an explanation of the meaning of love as we practice it in our everyday lives. Romantic Love will benefit students, researchers and professionals by presenting the most recent empirical work on the topic and pointing the way toward more exciting research

and applications. "This engagingly written little volume presents a social psychological approach to romantic love, but also brings to bear important facts and concepts from sociobiology, philosophy, history, family studies, and sociology. It is part of a series of short-focused volumes dealing with aspects of close relationships and would make excellent supplementary reading for undergraduate courses in marriage and the family, close relationships, social psychology, or human sexual behavior."--Journal of Marriage & The Family.

Positive Approaches to Optimal Relationship Development - C. Raymond Knee 2016-04-08

How can we get the most out of our close relationships? Research in the area of personal relationships continues to grow, but most prior work has emphasized how to overcome negative aspects. This volume demonstrates that a good relationship is more than simply the absence of a bad relationship, and that establishing and maintaining optimal relationships entails enacting a set of processes that are distinct from merely avoiding negative or harmful behaviors. Drawing on recent relationship science to explore issues such as intimacy, attachment, passion, sacrifice, and compassionate goals, the essays in this volume emphasize the positive features that allow relationships to flourish. In doing so, they integrate several theoretical perspectives, concepts, and mechanisms that produce optimal relationships. The volume also includes a section on intensive and abbreviated interventions that have been empirically validated to be effective in promoting the positive features of close relationships.

—PSYCCRIQUES In the mental health and human service professions, taking a social

history assessment marks the start of most therapeutic interventions. *Social History Assessment* is the first resource to offer practical guidance about interpreting the social history. Author Arlene Bowers Andrews provides rich resources to assist helping professionals as they gather and—most importantly—interpret information about social relationships in the lives of individuals.

International Handbook of Love - Claude-Hélène Mayer 2021-05-04

This handbook includes state-of-the-art research on love in classical, modern and postmodern perspectives. It expands on previous literature and explores topics around love from new cultural, intercultural and transcultural approaches and across disciplines. It provides insights into various love concepts, like romantic love, agape, and eros in their cultural embeddedness, and their changes and developments in specific cultural contexts. It also includes discussions on postmodern aspects with regard to love and love relationships, such as digitalisation, globalisation and the fourth industrial revolution. The handbook covers a vast range of topics in relation to love: aging, health, special needs, sexual preferences, spiritual practice, subcultures, family and other relationships, and so on. The chapters look at love not only in terms of the universal concept and in private, intimate relationships, but apply a broad concept of love which can also, for example, be referred to in postmodern workplaces. This volume is of interest to a wide readership, including researchers, practitioners and students of the social sciences, humanities and behavioural sciences. In the 1970s through the 90s, I was told that globalization was homogenizing cultures into a worldwide monoculture. This volume, as risky and profound as the many adventures of love across our multiplying cultures are, proves otherwise. The authors' revolutionary and courageous work will challenge our sensibilities and expand the boundaries of what we understand what love is. But that's what love does: It communicates what is; offers what can be; and pleads for what must be. I know you'll enjoy this wonderful book as much as I do! Jeffrey Ady, Associate Professor (retired), Public Administration Program, University of Hawaii at Manoa, Founding Fellow,

International Academy for Intercultural Research The International Handbook of Love is far more than a traditional compendium. It is a breath-taking attempt to synthesize our anthropological and sociological knowledge on love. It illuminates topics as diverse as Chinese love, one-night stands, teen romance or love of leaders and many more. This is a definitive reference in the field of love studies. Eva Illouz, author of *The End of Love: A sociology of Negative relationships*. Oxford University Press. "This is not a volume to be read in a single sitting (though I almost did, due to a protracted hospital stay), nor is it romantic or inspirational reading (though, in some cases, I had hoped for more narrative examples and case studies. Rather it is a highly diverse scholarly effort, a massive resource collection of research papers on love in a variety of contexts, personal and professional settings, and cultures. The work is well referenced providing a large number of resources for deeper exploration. We owe our thanks to the authors and editors of this "handbook" for work well done, though that word in the title should not lead readers to suspect that, enlightening as it is, this book is a vade mecum or practical tour guide that provides ready solutions to the vicissitudes and challenges of our love lives!" Sexuality in Close Relationships - Kathleen McKinney 2014-05-22

This is one of the first volumes to examine the interface between research undertaken in sexuality and that in close relationships from a social psychological perspective. Experts from several different disciplines offer chapters that contain theory, extant literature, and their own original research on such topics as jealousy, extradyadic sexuality, communication, love, and sexual coercion. Aimed at a fairly wide audience, this book will be of interest to students, faculty, and other professionals in social psychology, sociology, communication, and family and women's studies. It is also a valuable source of information for teachers, researchers, and clinicians working in the areas of human sexuality and/or close relationships.

The Oxford Handbook of Entertainment Theory - Peter Vorderer 2021

"This chapter offers some historical and conceptual orientation to readers of the Oxford Handbook of Entertainment Theory. Departing from a brief review of ancient roots and 20th century pioneer works, we elaborate on the state and challenges of contemporary entertainment theory and research. This includes the need to develop a more explicit understanding of interrelationships among similar terms and concepts (e.g., presence and transportation), the need to reflect more explicitly on epistemological foundations of entertainment theories (e.g., neo-behaviorism), and the need to reach back to past, even historical reasoning in communication that may be just as informative as the consideration of recent theoretical innovations from neighboring fields such as social psychology. Finally, we offer some reflections on programmatic perspectives for future entertainment theory, which should try to harmonize views from the social sciences and critical thinking, span cultural differences in entertainment processes, and keep track of the rapid technological progress of entertainment media"--
