Winner of two 1997 AJN Book of the Year awards in its previous edition, this comprehensive and readable text addresses questions regarding the law and legal/ethical issues affecting nurses. It explains what the law is, how the law works, and how it applies to nursing practice. It provides the knowledge needed to respond appropriately to a broad range of situations. Updated ethics chapter covering traditional and contemporary perspectives on bioethics, including the ethics of care and institutional ethics Presents and analyses key cases in a unique annotated format to show how law has been applied to particular health care situations. Each chapter begins with Key Principles and ends with Summary of Principles and Applications to facilitate comprehension and review The unique "Ethics Connection" feature integrates ethical issues throughout the text and addresses major topics of current interest, including violence against nurses, short staffing, impaired nursing staff and more Expanded content on quality assessment, managed care, assisted suicide, and community health nursing areas

Medical-Legal Evaluation of Hearing Loss, Third Edition - Robert A. Dobie 2015-07-15

Medical-Legal Evaluation of Hearing Loss, Third Edition includes the most accurate and current

developments in the field with more than 250 new references. A comprehensive guide on hearing loss and the law, it examines claims, court cases, and the evolution of hearing conservation. This text addresses age-related hearing loss, genetics of hearing loss, and noise-induced hearing loss (NIHL) - with a newly revised international standard (ISO-1999, 2013) that presents a comprehensive predictive model for NIHL, critical in medical-legal evaluation. Also examined is hearing loss due to toxins, trauma, and disease, as well as the effects of cardiovascular risk factors, race, and socioeconomic status. Furthermore, included tutorial discussions of acoustics, hearing, and hearing testing will be valuable to attorneys and other nonclinicians. New or expanded topics include: The relationship of hearing loss to brain disorders Job fitness Accommodations under the Americans with Disabilities Act Blast injury Recreational music and hearing loss Hypothesis of progressive NIHL after noise cessation Solvent ototoxicity Appropriate exchange rate for predicting noise hazard The American Medical Association's method of measurement of hearing disability This new edition provides practical guidance for expert witnesses and legal practitioners and is essential for otolaryngologists, audiologists, occupational physicians, attorneys handling hearing loss claims, and claims management professionals.

Restoring Humane Values to Medicine - John Miles Little 2003

Does reading poetry make you a better clinician? Can euthanasia be understood in terms of the meaning of a life? What is the moral and existential significance of life-threatening experiences? Australian surgeon, poet, philosopher and humanist, Miles Little addresses these and other fascinating questions in this collection of papers. Miles Little is one of the most original and engaging voices in contemporary medical

ethics and philosophy. He ranges across the sciences and the humanities, creating hybrid fields of inquiry ("ethnomics"), interrogating orthodoxies and engaging different fields of human knowledge and experience. The papers in this collection were chosen by his readers, who also engage here with Miles Little's work in a short commentary that follows each paper. The range of the commentators reflects the breadth of Little's appeal and influence: academics and clinicians, philosophers and ethicists, novelists, public health practitioners and cancer survivors - each reflects, agrees or disagrees. Like Little's work itself, this Reader is an open and unfolding dialogue that includes many different perspectives. Commentators include: Murray Bail, Robin Downie, Nancy Dubler, Stan Goulston, Jill Gordon, Paul Komesaroff, Steve Leeder, Paul McNeill, Gavin Mooney and Bernadette Tobin
