Overview of "Renewing the Mind of the Media, a Statement on Overcoming the Exploitation of Sex and Violence in Communications". - 1998

Confronting a Culture of Violence - United States Catholic Conference 1994

Addresses the need for a moral revolution and a renewed ethic of justice, responsibility, and community. Recognizes impressive examples in dioceses, parishes, and schools across the country.

The Catholic Library World - John M. O'Loughlin 1998

Communicating in a Crisis - Robert DeMartino 2009-02-01

A resource for public officials on the basic tenets of effective communications generally and on working with the news media specifically. Focuses on providing public officials with a brief orientation and perspective on the media and how they think and work, and on the public as the end-recipient of info.; concise presentations of techniques for responding to and cooperating with the media in conveying info. and delivering messages, before, during, and after a public health crisis; a practical guide to the tools of the trade of media relations and public communications; and strategies and tactics for addressing the probable opportunities and the possible challenges that are likely to arise as a consequence of such communication initiatives. Ill.

Overview of Renewing the Mind of the Media - Catholic Church. National Conference of Catholic Bishops 1998

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use

of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The Origin of Consciousness in the Breakdown of the Bicameral Mind - Julian Jaynes 2000-08-15

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—*American Journal of Psychiatry*

Ending Violence Against Children - Unicef 2014-09

Plugged In - Patti M. Valkenburg 2017-04-25

An illuminating study of the complex relationship between children and media in the digital age Now, as never before, young people are surrounded by media—thanks to the sophistication and portability of the technology that puts it literally in the palms of their hands. Drawing on data and empirical research that cross many fields and continents, authors Valkenburg and Piotrowski examine the role of media in the lives of children from birth through adolescence, addressing the complex issues of how media affect the young and what adults can do to encourage responsible use in an age of selfies, Twitter, Facebook, and Instagram. This important study looks at both the sunny and the dark side of media use by today's youth, including why and how their preferences change throughout childhood, whether digital gaming is harmful or helpful, the effects of placing tablets and smartphones in the hands of toddlers, the susceptibility of young people to online advertising, the legitimacy of parental concerns about media multitasking, and more.

Communication Research Trends - 2005

Responsibility, Rehabilitation and Restoration - United States Catholic Conference 2000

In this timely work, the bishops open a new dialogue on crime and justice in the United States.

Bulletin of the Atomic Scientists - 1995-03

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological

developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Renewing the Mind of the Media - United States Catholic Conference 1998

The bishops address the gratuitous violence and misuse of sexuality in the media. Includes suggestions for action.

Digital and Social Media Marketing - Nripendra P. Rana 2019-11-11

This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social

media marketing.

Zeitschrifteninhaltsdienst Theologie - 1999

The Catholic Periodical and Literature Index - 2001

Bulletin of the Atomic Scientists - 1955-04

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Origins - 1998-05

Religious Documents North America Annual - 2000

The Catholic Faith Handbook for Youth - Brian Singer-Towns 2004

Introduces teens to Catholic beliefs, art, culture, and history as expressed in the Catechism of the Catholic Church, discussing Church teachings on social issues of today and providing ideas for putting faith into action.
