Josh and Hazel's Guide to Not Dating - Christina Lauren
2018-09-04

'Josh and Hazel's Guide to Not Dating is pure joy' Sally Thorne, author of The Hating Game 'Christina Lauren is my go-to when I'm feeling sad' Beth O'Leary, author of The Flatshare Just friends. Just friends. JUST FRIENDS. If they repeat it enough, maybe it'll be true . . . Hazel knows she's a lot to take - and frankly, most men aren't up to the challenge. If her army of pets and taste for the absurd don't send them running, her lack of filter and

tendency to say exactly the wrong thing will. Their loss. Not everyone can handle a Hazel. Josh has known Hazel since college. From the first night they met - when she gracelessly threw up on his shoes - to when she sent him an unintelligible email while in a post-surgical haze, Josh has always thought of Hazel more as a spectacle than a peer. But now, ten years later, after a cheating girlfriend has turned his life upside down, going out with Hazel is a breath of fresh air. Not that Josh and Hazel date. At least, not each other. Because setting each other up on progressively terrible double blind dates means there's nothing between them . . . right? New York Times bestselling author Christina Lauren tells the laugh-out-loud, uplifting story of two people who are completely wrong for each other - in all the right ways. Find out why readers LOVE Christina Lauren: 'Pure, irresistible magic from start to finish' Emily Henry 'Witty and downright hilarious . . . perfect feel-good romantic comedy'

Modern Romance - Aziz Ansari
2015-06-16

The #1 New York Times Bestseller "An engaging look at the often head-scratching, frequently infuriating mating behaviors that shape our love lives." —Refinery 29 A hilarious, thoughtful, and in-depth exploration of the pleasures and perils of modern romance from Aziz Ansari, the star of Master of None and one of this generation's sharpest comedic voices At some point, every one of us embarks on a journey to find love. We meet people, date, get into and out of relationships, all with the hope of finding someone with whom we share a deep connection. This seems

standard now, but it's wildly different from what people did even just decades ago. Single people today have more romantic options than at any point in human history. With technology, our abilities to connect with and sort through these options are staggering. So why are so many people frustrated? Some of our problems are unique to our time. "Why did this guy just text me an emoji of a pizza?" "Should I go out with this girl even though she listed Combos as one of her favorite snack foods? Combos?!" "My girlfriend just got a message from some dude named Nathan. Who's Nathan? Did he just send her a photo of his penis? Should I check just to be sure?" But the transformation of our romantic lives can't be explained by technology alone. In a short period of time, the whole culture of finding love has changed dramatically. A few decades ago, people would find a decent person who lived in their neighborhood. Their families would meet and, after deciding neither party seemed

like a murderer, they would get married and soon have a kid, all by the time they were twenty-four. Today, people marry later than ever and spend years of their lives on a quest to find the perfect person, a soul mate. For years, Aziz Ansari has been aiming his comic insight at modern romance, but for *Modern Romance*, the book, he decided he needed to take things to another level. He teamed up with NYU sociologist Eric Klinenberg and designed a massive research project, including hundreds of interviews and focus groups conducted everywhere from Tokyo to Buenos Aires to Wichita. They analyzed behavioral data and surveys and created their own online research forum on Reddit, which drew thousands of messages. They enlisted the world's leading social scientists, including Andrew Cherlin, Eli Finkel, Helen Fisher, Sheena Iyengar, Barry Schwartz, Sherry Turkle, and Robb Willer. The result is unlike any social science or

humor book we've seen before. In *Modern Romance*, Ansari combines his irreverent humor with cutting-edge social science to give us an unforgettable tour of our new romantic world. **Love in the Time of Serial Killers** - Alicia Thompson 2022-08-16 One of *Cosmopolitan's* Best Romance Novels Ever Turns out that reading nothing but true crime isn't exactly conducive to modern dating—and one woman is going to have to learn how to give love a chance when she's used to suspecting the worst. PhD candidate Phoebe Walsh has always been obsessed with true crime. She's even analyzing the genre in her dissertation—if she can manage to finish writing it. It's hard to find the time while she spends the summer in Florida, cleaning out her childhood home, dealing with her obnoxiously good-natured younger brother, and grappling with the complicated feelings of mourning a father she hadn't had a relationship with for

years. It doesn't help that she's low-key convinced that her new neighbor, Sam Dennings, is a serial killer (he may dress business casual by day, but at night he's clearly up to something). It's not long before Phoebe realizes that Sam might be something much scarier—a genuinely nice guy who can pierce her armor to reach her vulnerable heart.

Data, a Love Story - Amy Webb 2014-01-28

“Amy Webb found her true love after a search that's both charmingly romantic and relentlessly data-driven. Anyone who uses online dating sites must read her funny, fascinating book.”—Gretchen Rubin, #1 New York Times bestselling author of The Happiness Project After yet another disastrous date, Amy Webb was preparing to cancel

her JDate membership when an epiphany struck: her standards weren't too high, she just wasn't approaching the process the right way. Using her gift for data strategy, she found which keywords were digital-man magnets, analyzed photos, and then adjusted her (female) profile to make the most of that intel. Then began the deluge—dozens of men who actually met her own stringent requirements wanted to meet her. Among them: her future husband, now the father of her child.

The Couple and Family Technology Framework -

Katherine M. Hertlein
2013-07-18

Couples and families worldwide have a constant electronic connection to others, a fact that is influencing the

concerns and issues they bring to therapy. The authors of this resource help mental health practitioners to better deal with concerns such as online infidelity, online dating, internet addictions, cyber bullying, and many more by introducing the Couple and Family Technology (CFT) framework, a multi-theoretical approach that doesn't require clinicians to change their preferred clinical approach. The CFT framework acknowledges the ways in which couples navigate their relationship with technology and a partner simultaneously, and it attends to, and in some cases incorporates the role of technology in therapeutic ways. Included in the authors' discussion of how different technologies affect relationships is • a survey of what individuals' motivations of usage are • an examination of the specific issues that emerge in treatment • a study of the risks particularly relevant to intimate relationships, and • an introduction of the first-ever technology-based genogram.

They also examine technological usage across different developmental points in a couple's lifespan, with attention given throughout to people from various cultural backgrounds. Along with the CFT framework, the authors also introduce a new discipline of family research: Couple and Family Technology. This discipline integrates three broad perspectives in family science and helps therapists maintain a systemic focus in assessing and treating couples where issues of the Internet and new media are problematic. Online resources can be accessed by purchasers of the book and include videos, additional case studies, glossary, and forms.
