[Traumatic Brain Injury](#) - Jennie Ponsford 2012
Research into the rehabilitation of individuals following Traumatic Brain Injury (TBI) in the past 15 years has resulted in greater understanding of the condition. The second edition of this book provides an updated guide for health professionals working with individuals recovering from TBI. Its uniquely clinical focus provides both comprehensive background information, and practical strategies for dealing with common problems with thinking, memory, communication, behaviour and emotional adjustment in both adults and children. The book addresses a wide range of challenges, from those which begin with impairment of consciousness, to those occurring for many years after injury, and presents strategies for maximising participation in all aspects of community life. The book will be of use to practising clinicians, students in health disciplines relevant to neurorehabilitation, and also to the families of individuals with traumatic brain injury.

[The Behavioural and Emotional Complications of Traumatic Brain Injury](#) - Simon F. Crowe
2012-09-10

It is difficult to imagine what it must be like for someone following the personal crisis and catastrophe that ensues as a result of a serious traumatic brain injury (TBI). The individual is confronted with a huge range of alterations in his or her normal functioning, operating at the biological, psychological and social levels. All of these changes are also occurring to an individual who has just had a near-death experience, culminating not too surprisingly in the reflections "Who am I?" and "Why am I here?" As a result, these individuals can develop a wide range of behavioural, emotional, and psychiatric conditions following the injury, including depression, bipolar disorder, secondary mania, psychotic states, posttraumatic stress disorder, obsessive-compulsive disorder, phobic disorders,

and generalized anxiety disorders, to name a few. In addition, these individuals can also be subject to a number of neuropsychiatric syndromes, including disorders of drive, disorders of impulse control, and disturbance of neurovegetative functioning. This book presents the current state of our knowledge of the behavioural and emotional effects that can occur as sequelae of TBI, and addresses issues associated with their differential diagnosis and the neurobiological mechanisms by which these might occur. The book will prove an excellent resource not only for clinicians who practice as psychiatrists, behavioural neurologists, clinical neuropsychologists and clinical psychologists, but also for psychologists in advanced training and for anyone who is involved in caring for or working with individuals with TBI.

[Sex Appeal](#) - Paul Abramson 2010-02-02

An epidemic of sexually-transmitted infections and sexual violence is upon us. Political interests are overriding sexual freedom in the name of morality. Marriages are just as likely to fail as they are to succeed. Why, in a time of unprecedented personal liberties and medical knowledge, are so many Americans so uncertain about what constitutes ethical sexual behavior? Sex Appeal is neither a moralistic screed nor a self-indulgent guide to sexual utopia. Instead, it charts a thoughtful course between extremes to present six ethical principles for sexual health and happiness: do no harm, celebrate sex, be careful, know yourself, speak up and speak out, and throw no stones. Sex Appeal elaborates upon each of these principles, asserting that sex can be fun, safe, and life-enhancing if approached in the right spirit and with the information necessary to make wise sexual choices. Providing clear guidelines for individuals seeking answers to their own personal questions about sex, the book also connects these questions to larger issues, such as how we as a society can reduce levels of

sexual harm and sexually-transmitted infections, and how everyday individual choices can support this effort. Persuasive and eminently readable, Sex Appeal offers a welcome dose of clarity and common sense to today's most pressing sexual issues.

A Certain Appeal - Vanessa King 2021-11-02
A sparkling contemporary retelling of Pride and Prejudice set in the tantalizing world of New York City burlesque, perfect for fans of The Kiss Quotient and The Roommate. After a betrayal derailed her interior design career, Liz Bennet found a fresh start in New York. Now an executive assistant by day and stage kitten by night, she's discovered a second home with the performers at Meryton, Manhattan's top-tier burlesque venue. Love's the last thing on her mind when she locks eyes with Will Darcy across the crowded club, yet the spark between them is undeniable—that is, until she overhears the uptight wealth manager call her merely “tolerable.” Bennet is determined to write Darcy off, but once their besties fall head-over-heels, they're thrown into each other's orbit again and again. Each encounter begins to feel more heated than the last, but is their chemistry enough to topple that terrible first impression? What's more, when a charming newcomer arrives on the scene with accusations against Darcy, and a sudden development leaves Meryton's fate in jeopardy, Bennet will have to decide who to trust in time to salvage her design dreams, her heart, and the stage she shares with her found family...

The Tao of Male Sex Appeal - Jim Cabeceiras 2004-07

'The Tao of Male Sex Appeal' is the first book to explain in simple terms why and how women are attracted to men. Based on a twenty year study of highly successful dominant men, Jim Carrera and Sean Marsh observed and documented the instinctive behavior in men that women are attracted to. The common denominators of dominant male behavior are given to you in a simple, step by step format in this book, along with the role of personality and language and why they are secondary for a man's success with women. Whether you are shy or outgoing by nature, or just simply average in appearance, the principles of dominant behavior, if applied, will make you more desirable by women who typically would not give you a second look. The 'Tao of Male Sex Appeal' is the foundation for any man on the road to success and dominance in life as well as love.

Consumer neuroscience has become an expanding area of both research and conduct - spanning from academic interests in the brain bases of consumption choices to commercial application of neuroscience tools and metrics. However, many of these advances are still criticized for low applicability, scattered publication records, conceptual vagueness, and a lack of proper scientific and commercial validation. To make matters worse, there is now a host of proposed commercial applications of both the insights from neuroscience and the application of neuroscience and neurophysiology tools to test consumer responses. While many of these approaches may be valid, many other approaches are either not properly validated, or may be flawed, misguided, or even outright lies. As a discipline, there is a need for both the basic and applied research in consumer neuroscience to become aligned. The purpose of this Research Topic is to provide this much-needed platform for such an industrial alignment. In doing so, this Research Topic will provide perspectives on three main areas: 1. distinctions between basic, translational and applied consumer neuroscience research 2. conceptual clarification on key concepts relevant to the science and application of consumer neuroscience 3. validation of consumer neuroscience methods and how they relate to commercially relevant cases. For this Research Topic, we therefore welcome submissions that combine academic and commercial research, all in the vein of making advances in establishing a valid, applicable consumer neuroscience.

Biopsychosocial Approaches in

Neurorehabilitation - Huw Williams 2005-11-17

There has been significant progress in the field
 of neurorehabilitation over the past twenty
 years, particularly in the assessment and
 management of cognitive impairment. More
 recently, the stakeholders in neurorehabilitation
 - clinicians, researchers, purchasers of services

and clients - have become aware of the need to
 develop systems and services for managing the
 wide ranging psycho-social sequelae of acquired
 brain injury (ABI). Mood, behavioural and
 neuropsychiatric conditions have been found to
 be highly prevalent. Such disorders, at clinical
 or sub-clinical levels, are disturbing for clients
 themselves, and for their families, and present a
 challenge for enabling survivors to regain social
 roles. Many individuals also experience
 difficulties in related areas, such as pain
 management, drug and alcohol misuse, and in
 maintaining relationships. Given the wide-
 ranging psychological, psychiatric, health and
 social sequelae of ABI, rehabilitation services
 are often responding to people whose needs are
 complex and for which the evidence base for
 practice may be limited. In this Special Issue of
 Neuropsychological Rehabilitation, leading
 international experts provide reviews of current
 thinking on mood, behaviour and
 neuropsychiatric conditions, along with issues of
 drug and alcohol use, pain, sexuality and
 relationships after brain injury. Assessment and
 management issues are addressed, along with
 implications for service delivery in developed
 and in developing world contexts. This Special
 Issue will be invaluable to a wide range of
 neurorehabilitation professionals including
 clinical psychologists, neuropsychologists,
 speech and language therapists, occupational
 therapists, neurologists, neuropsychiatrists,
 clinical nurse specialists, physiotherapists, and
 case managers. The volume will also be of
 benefit to those planning or purchasing brain
 injury rehabilitation services.
