Sexuality and Gender at Home - Brent Pilkey 2020-05-27

Sexuality and Gender at Home is the first book to explore the meanings and experiences of home through the framework of sexuality. Looking at a broad spectrum of sexuality, gender and domesticity, it examines the many ways in which home is constructed, performed and experienced in relation to sexuality and gender. Considering identity issues such as age, class, ethnicity and gender, the authors problematize intimacy and question conventional ways of thinking about allegedly 'private' home space. Comprehensive introductions to each of the book's three sections - on Intimacy and Home, Queering Home, Beyond Home - provide a coherent overview of the existing literature as well as additional historical and cultural context. Fourteen chapters present ground-breaking research and insights into sexuality, gender and home across culture, time and space. Written by academics from a range of subject disciplines, chapters are based on research covering countries including Australia, France, Sweden, the UK, the USA, Guyana, Israel, and Singapore. This highly original text is the ideal starting point for anyone wishing to get to grips with the emerging field of sexuality, gender and home and will particularly appeal to researchers and students in anthropology, architecture, gender studies, sociology, and human geography.

Sex and Buildings - Richard J. Williams 2013-07-15

Massive modern skyscrapers, obelisks, towers—all are structures that, thanks to their phallic shape, are often associated with sex. But other buildings are more subtly connected, as they provide the frameworks for our sexual lives and act as reminders of our sexual memories. This

relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century, when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life. Part architectural history, part cultural history, and part travelogue, *Sex and Buildings* explores how progressive sexual attitudes manifest themselves in architecture, asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings' attempts to reflect it. In search of structures that reflect the sexual mores of their inhabitants, Richard J. Williams visits modernist buildings in Southern California, the Westin Bonaventure Hotel, the Playboy Mansion in Chicago, the Seagram in New York, communes from the 1960s, and more. A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention, *Sex and Buildings* will change the way we look at the buildings around us.

Gender Space Architecture - Iain Borden 2002-09-11

This significant reader brings together for the first time the most important essays concerning the intersecting subjects of gender, space and architecture. Carefully structured and with numerous introductory essays, it guides the reader through theoretical and multi-disciplinary texts to direct considerations of gender in relation to particular architectural sites, projects and ideas. This collection marks a seminal point in gender and architecture, both summarizing core debates and pointing toward new directions and discussions for the future.

Queer Space - Aaron Betsky 1997-03-19

In *Building Sex*, architecture critic and curator Aaron Betsky looked at how traditional gender roles have influenced architecture. In *Queer Space*, he examines how same-sex desire is creating an entirely new architecture. Gay men and women are in the forefront of architectural innovation, reclaiming abandoned neighborhoods, redefining urban spaces, and creating liberating interiors out of hostile environments.

Queer spaces have arisen out of the experiences of homosexuals in a straight culture. Often forced to hide their true nature, gay men and women have turned inward, playing with the norms of interior space and creating environments of stagecraft and celebration where they can define themselves with out fear. Their experiments point the way to an architecture that can free us all from the imprisoning structures and spaces of the modern city.

Sex in Architecture - Oscar A. Perez 1980

Building Sex - Aaron Betsky 1995

Buildings have always been an expression of human sexuality. In this book, architecture critic and curator Aaron Betsky takes a look at the man-made world and concludes that it is just that: made by men and not women. The structure of buildings and the layout of cities in the modern world have almost always been determined by men, and the abstract and alien order of grids and columns that has resulted imprisons us in a way of living based on repression and, in some cases, oppression. By contrast, it is women who create the interior spaces within these man-created environments. Comfortable, beautiful, seductive, and logical, these interiors act as areas of escape, self-definition, and sometimes even revelation. Drawing on a wide range of architectural examples, from African mud huts to modern apartment complexes, Betsky explores what effects this division of architectural labor has had on our sensibilities

and, indeed, on how we relate to one another as men and women. He believes that although it has always been thus, we do not have to live within this dichotomy between the exterior and the interior, the made and the lived, the masculine and the feminine, forever. It is possible, says Betsky, to create "spaces of liberation, spaces in which we can reconstruct our selves and our world".

Sex And Sex Worship - Otto Augustus Wall 2014-06-03

Sex is at the very heart of life, and this classic illustrated study of sex, its nature and function, and its influence on art, science, architecture and religion contains a wealth of information on sex beliefs, practices and worship in other cultures and periods of history stretching back to ancient times. Drawing on a wide range of sources including private collections of erotica, Wall shows how people in other times and places have dealt with the timeless themes of sexuality, male, female, love, passion, lust, desire and worship, dealing with sex as a private practice and also as public celebration. This edition first published in 2006. Routledge is an imprint of Taylor & Francis, an informa company.

Design and Feminism - Joan Rothschild 1999

The distinction between the spaces considered public and private or work and home is becoming more blurred. Our streets, parks, dwellings and tools are designed to a "one-size-fits-all" standard, and the responses of the design community to meet diverse needs have been mixed at best. Design and Feminism offers feminist critiques of these inadequate design

standards, and suggest ideas, projects, and programs for change.

Sex of Architecture - Diana Agrest 1996-09

This book brings together 24 provocative texts that collectively express the power and diversity of women's views on architecture today. This volume presents a dialogue among women historians, practitioners, theorists, and others concerned with critical issues in architecture and urbanism.

The Pursuit of Pleasure - Jane Rendell 2002

Drawing on critical theory, geography and philosophy, this text extends and critiques the discipline of architectural theory from a feminist perspective.

Archisutra - Miguel Bolivar 2019-01-03

Redesign your sex life with this tongue-in-cheek architecture and design-themed take on the Kama Sutra. 'Truss Me', 'Eames it in' and 'Get an Eiffel' are just some of the sexual positions listed in this architecture- and design-themed take on the Kama Sutra, the ancient Indian Hindu guide to love and sex. Le Corbusier coined the phrase 'machines for living' in his book, *Towards an Architecture* in 1923. Sex plays a large role in society and everyday life. So why is it so often overlooked when an architect designs a building? Miguel Bolivar's tongue-in-cheek sex manual uses witty descriptions and annotated scale drawings to demonstrate various sexual positions, all inspired by iconic buildings and often incorporating surprising uses for designer furniture. The Archisutra builds on the work of Vitruvius, da Vinci and Le Corbusier in pushing the idea that buildings should be designed around human life.
