[Dismounted Patrolling](#) - United States Army Infantry School. Ranger Department 1981

This manual prescribes fundamentals and techniques for planning, preparing, and conducting reconnaissance and combat patrols.

Telework in the 21st Century - Jon C. Messenger 2019

Technological developments have enabled a dramatic expansion and also an evolution of telework, broadly defined as using ICTs to perform work from outside of an employer's premises. This volume offers a new conceptual framework explaining the evolution of telework over four decades. It reviews national experiences from Argentina, Brazil, India, Japan, the United States, and ten EU countries regarding the development of telework, its various forms and effects. It also analyses large-scale surveys and company case studies regarding the incidence of telework and its effects on working time, work-life balance, occupational health and well-being, and individual and organizational performance.

Melodious Accord - Alice Parker 1991

The Military Prison - Stanley L. Brodsky 1970

The fourteen contributors to this volume all have had experience in military prisons as psychologists, psychiatrists, penologists, educational advisors, or project officers for correction and for research. The importance of their subject can be realized by noting that when the nation is at war the military correctional and confinement system is larger than the entire federal prison system. Psychiatrists and psychologists, as well as students of criminology and penology, will find here much that is relevant to their professional work. But the question of the military prisoner will excite a broader interest. Every thoughtful person at some time confronts the problem of his responsibility for removing great numbers of men from normal civilian pursuits. Events during the last two years have created an urgent need to learn the facts of military imprisonment and the consequences of the widespread military service. This need is now met by publication of this book.

[Theories of Income Distribution](#) - Athanasios Asimakopulos 2012-12-06

This book brings together the work of scholars who have written for it independent essays in their areas of particular expertise in the general

field of income distribution. The first eight chapters provide a review of the major theories of income distribution, while the final two are concerned with problems of empirical estimates and inferences. One of these chapters presents estimates of factor shares in national income in the United States, the United Kingdom and Canada, while the other examines how relationships between the size distribution of income and economic development are being investigated. A convenient way of conveying an understanding of how economic theorists have dealt with the distribution of income is to examine separately each major approach to this subject. Each contributor was thus assigned a particular approach, or a major theorist. No attempt was made to avoid the apparent duplication that occurs when the same references are examined by different contributors. The reader gains by seeing how the same material can be treated by those looking at it from different perspectives. A chapter each has been devoted to Marx and Marshall.

Criminal Interrogation - Arthur S. Aubry 2014-05-14

This is the Third Edition of what has become a paragon among criminal interrogation texts. Chapters have been added on interrogator qualification, legal aspects of confessions, the status of lie detection, and selected Supreme Court decisions from 1971 to 1979. The latter which supplements existing chapters on decisions since 1884, including the paramount Miranda and Escobedo decisions-analyzes 147 pertinent judgments. Equally thorough coverage is afforded psychological and technical considerations. The authors deftly blend all three elements -

law, psychology; technique -and they explain the interrelationships. The text as a whole has been rearranged for a smoother presentation; chapters have been revised and updated wherever necessary. In its review of the previous edition, Law and Order described this as a 'how-to' book and probably one of the best you can find.... This is a book that should be in your police library.

After Liberalism - Immanuel Wallerstein 2010-09-27

In *After Liberalism*, the distinguished historian and political scientist Immanuel Wallerstein examines the process of disintegration of our modern world-system and speculates on the changes that may occur during the next few decades. He explores the historical choices before us and suggests paths for reconstructing our world-system on a more rational and socially equitable basis.
