Sex Education: The Road Trip - Katy Birchall 2021-09-28

The only official *Sex Education* novel. When the screen binge is over, return to the world of Moordale with a brand-new story featuring the show's most popular characters. Maeve gets an unexpected call from her brother Sean. It's no surprise to her that he is in trouble again. But she's the only family he's got, so she must saddle up and ride to the rescue. Or at least, scrounge a lift from Aimee and drive there. . . . Otis and Eric insist they can help, and Maeve's mission becomes a summer holiday road trip. Sean's been partying with a group of decadent rich kids who have no accused him of a crime. The evidence against him is pretty damning. Trying to clear his name, Maeve and friends integrate themselves into the rich kids' circle—it's time to go undercover. Thanks to Eric's dance floor moves, Aimee's easy charm, and Otis's ability to offer good advice, they get to know the group. And they soon discover that Sean is not the only one with a motive for getting even with beautiful party girl Tabitha. This standalone YA/crossover story has everything fans love about the show: favorite characters with real emotional depth, no-holds-barred honesty about teenage relationships, brilliant humor, and a great new storyline, plus a compelling whodunit at its heart.

With wit, wisdom, and savvy, Deborah Roffman translates her experiences gleaned from decades of teaching kids and parents, and as a mom, into strategies to help parents navigate this tricky terrain. *Talk to Me First* is for any parent who wants to become and remain the most credible and influential resource about sexuality in their children's lives.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Psychosocial Processes and Health - Andrew Steptoe 1994-11-24

Understanding the links between the social environment, emotion, behaviour and illness is a growing theme in medical and health education. The development of the field is reflected in the growth of disciplines such as health psychology, psychosocial epidemiology, and behavioural medicine. The basic literature is however awkwardly dispersed across medical and social science journals. This book makes available within a single volume some of the most important articles that have been published over the past thirty years. The thirty-one articles are grouped round six themes: life stress, social support and health; psychophysiological processes in disease; personality, behaviour patterns and health; health practices and the modification of health risk behaviour; coping with illness and disability; behavioural interventions in medicine. Each is prefaced by a state-of-the-art review of the theme by the editors. These readings will serve as a most valuable resource for psychology and health science teachers and students alike.
