*Decadence and Literature* Jane Desmarais 2019-08-22 Decadence and Literature explains how the concept of decadence developed since Roman times into a major cultural trope with broad explanatory power. No longer just a term of opprobrium for mannered art or immoral behaviour, decadence today describes complex cultural and social responses to modernity in all its forms. From the Roman emperor's indulgence in luxurious excess as both personal vice and political control, to the Enlightenment libertine's rational pursuit of hedonism, to the nineteenth-century dandy's simultaneous delight and distaste with modern urban life, decadence has emerged as a way of taking cultural stock of major social changes. These changes include the role of women in forms of artistic expression and social participation formerly reserved for men, as well as the increasing acceptance of LGBTQ+ relationships, a development with a direct relationship to decadence. Today, decadence seems more important than ever to an informed understanding of contemporary anxieties and uncertainties.

**The Accidental Universe** Alan Lightman 2014-01-14 In *The Accidental Universe*, physicist and novelist Alan Lightman explores the emotional and philosophical questions raised by discoveries in science, focusing most intently on the human condition and the needs of humankind. Here, in a collection of exhilarating essays, Lightman shows us our own universe from a series of fascinating and diverse perspectives. He takes on the difficult dialogue between science and religion; the conflict between our human desire for permanence and the impermanence of nature; the possibility that our universe is simply an accident; the manner in which modern technology has divorced us from enjoying a direct experience of the world; and our resistance to the view that our bodies and minds can be explained by scientific logic and laws alone. With his customary passion, precision, lyricism and imagination, in *The Accidental Universe* Alan Lightman leaves us with the suggestion - heady and humbling - that what we see and understand of the world and ourselves is only a tiny piece of the extraordinary, perhaps unfathomable whole. Praise for Alan Lightman: '...a gem of a novel that is strange witty erudite and alive with Lightman's playful genius.' Junot Diaz. 'It would not seem possible for Alan Lightman to match his earlier tour de force, *Einstein's Dreams*, but in *Mr g* he has done so - with wit, imagination, and transcendent beauty.' Anita Desai.

*Epistemologies of the South* Boaventura de Sousa Santos 2015-11-17 This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. *Epistemologies of the South* outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

**Historical Painting Techniques, Materials, and Studio Practice** Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well

as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

*Comparative Perspectives on the Rise of the Brazilian Novel* Ana Cláudia Suriani da Silva 2020-05-14 Comparative Perspectives on the Rise of the Brazilian Novel presents a framework of comparative literature based on a systemic and empirical approach to the study of the novel and applies that framework to the analysis of key nineteenth-century Brazilian novels. The works under examination were published during the period in which the forms and procedures of the novel were acclimatized as the genre established and consolidated itself in Brazil.

**The Absence of Myth** Georges Bataille 1994 For Bataille, 'the absence of myth' had itself become the myth of the modern age. In a world that had 'lost the secret of its cohesion', Bataille saw surrealism as both a symptom and the beginning of an attempt to address this loss. His writings on this theme are the result of profound reflection in the wake of World War Two. The Absence of Myth is the most incisive study yet made of surrealism, insisting on its importance as a cultural and social phenomenon with far-reaching consequences. Clarifying Bataille's links with the surrealist movement, and throwing revealing light on his complex and greatly misunderstood relationship with Andre Breton, The Absence of Myth shows Bataille to be a much more radical figure than his postmodernist devotees would have us believe: a man who continually tried to extend Marxist social theory; a pessimistic thinker, but one as far removed from nihilism as can be. Introduced and translated by Michael Richardson.

How It Ends: From You to the Universe Chris Impey 2011-04-11 "Remarkably upbeat, and imbued with wit, wisdom and a palpable sense of awe over our universe."—Tucson Weekly Most of us are aware of our own mortality, but few among us know what science, with insights yielded from groundbreaking new research, has to say about endings on a larger scale. Enter astronomer Chris Impey, who chronicles the death of the whole shebang: individual, species, bio- sphere, Earth, Sun, Milky Way, and, finally, the entire universe. With a healthy dose of humor, How It Ends illuminates everything from the technologies of human life extension and the evolutionary arms race between microbes and men to the inescapable dimming of the Sun and the ultimate "big rip," giving us a rare glimpse into a universe without us.

**A Century of Artists Books** Riva Castleman 1997-09 Published to accompany the 1994 exhibition at The Museum of Modern Art, New York, this book constitutes the most extensive survey of modern illustrated books to be offered in many years. *The Culture of Cities* Lewis Mumford 1981-01-01

*Anti-Oedipus* Gilles Deleuze 2004-09-01 'A major philosophical work by perhaps the most brilliant philosophical mind at work in France today.'

Fredric Jameson Gilles Deleuze (1925-1995) was Professor of Philosophy at the University of Paris VIII. He was a key figure in poststructuralism, and one of the most influential philosophers of the twentieth century. Félix Guattari (1930-1992) was a psychoanalyst at the la Borde Clinic, as well as being a major social theorist and radical activist. Anti-Oedipus is part of Deleuze and Guattari's landmark philosophical project, Capitalism and Schizophrenia - a project that still sets the terms of contemporary philosophical debate. Anti-Oedipus is a radical philosophical analysis of desire that shows how we can combat the compulsion to dominate ourselves and others. As Michel Foucault says in his Preface it is an 'Introduction to Non-Fascist Living'. Preface by Michel Foucault. Translated by Robert Hurley, Mark Seem, and Helen R. Lane

**The Satires of Juvenal** Decio Junio Juvenal 1739

**Tomorrow Now** Bruce Sterling 2008-12-10 "Nobody knows better than Bruce Sterling how thin the membrane between science fiction and real life

has become, a state he correctly depicts as both thrilling and terrifying in this frisky, literate, clear-eyed sketch of the next half-century. Like all of the most interesting futurists, Sterling isn't just talking about machines and biochemistry: what he really cares about are the interstices of technology with culture and human history." -Kurt Andersen, author of Turn of the Century Visionary author Bruce Sterling views the future like no other writer. In his first nonfiction book since his classic *The Hacker Crackdown*, Sterling describes the world our children might be living in over the next fifty years and what to expect next in culture, geopolitics, and business. Time calls Bruce Sterling "one of America's best-known science fiction writers and perhaps the sharpest observer of our media-choked culture working today in any genre." *Tomorrow Now* is, as Sterling wryly describes it, "an ambitious, sprawling effort in thundering futurist punditry, in the pulsing vein of the futurists I've read and admired over the years: H. G. Wells, Arthur C. Clarke, and Alvin Toffler; Lewis Mumford, Reyner Banham, Peter Drucker, and Michael Dertouzos. This book asks the future two questions: What does it mean? and How does it feel?" Taking a cue from one of William Shakespeare's greatest soliloquies, Sterling devotes one chapter to each of the seven stages of humanity: birth, school, love, war, politics, business, and old age. As our children progress through Sterling's Shakespearean life cycle, they will encounter new products; new weapons; new crimes; new moral conundrums, such as cloning and genetic alteration; and new political movements, which will augur the way wars of the future will be fought. Here are some of the author's predictions: • Human clone babies will grow into the bitterest and surliest adolescents ever. • Microbes will be more important than the family farm. • Consumer items will look more and more like cuddly, squeezable pets. • Tomorrow's kids will learn more from randomly clicking the Internet than they ever will from their textbooks. • Enemy governments will be nice to you and will badly want your tourist money, but global outlaws will scheme to kill you, loudly and publicly, on their Jihad TVs. • The future of politics is blandness punctuated with insanity. The future of activism belongs to a sophisticated, urbane global network that can make money—the Disney World version of Al Qaeda. *Tomorrow Now* will change the way you think about the future and our place in it. From the Hardcover edition.

Always, Rachel Rachel Carson 2022-03-08 These letters between the pioneering environmentalist and her beloved friend reveal "a vibrant, caring woman behind the scientist" (Los Angeles Times). "Rachel Carson, author of *The Silent Spring*, has been celebrated as the pioneer of the modern environmental movement. Although she wrote no autobiography, she did leave letters, and those she exchanged—sometimes daily—with Dorothy Freeman, some 750 of which are collected here, are perhaps more satisfying than an account of her own life. In 1953, Carson became Freeman's summer neighbor on Southport Island, ME. The two discovered a shared love for the natural world—their descriptions of the arrival of spring or the song of a hermit thrush are lyrical—but their friendship quickly blossomed, as each realized she had found in the other a kindred spirit. To read this collection is like eavesdropping on an extended conversation that mixes the mundane events of the two women's family lives with details of Carson's research and writing and, later, her breast cancer. . . . Few who read these letters will forget these remarkable women and their even more remarkable bond." —Publishers Weekly "Darting, fresh, sensuous, pleasingly elliptical at times, these letters also serve to tether the increasingly

deified Carson firmly to earth—just where she'd want to be.” —Kirkus Reviews (starred review) “It is not often that a collection of letters reveals character, emotional depth, personality, indeed intellect and talent, as well as a full biography might; these letters do all that.” —The New York Times Book Review “Provides insight into the creative process and a look into the daily lives of two intelligent, perceptive women whose family responsibilities were, at times, almost crushing.” —Library Journal “Dotted with vivid observations of the natural world and perceptive commentary on friendship, family, fame, and life itself, Always, Rachel will appeal to readers interested in biography and women’s studies as well as those drawn to nature writing and the history of the environmental movement.” —Booklist Online

**Life Ascending** Nick Lane 2010-10-01 Winner of the 2010 Royal Society Prize for science books Powerful new research methods are providing fresh and vivid insights into the makeup of life. Comparing gene sequences, examining the atomic structure of proteins and looking into the geochemistry of rocks have all helped to explain creation and evolution in more detail than ever before. Nick Lane uses the full extent of this new knowledge to describe the ten greatest inventions of life, based on their historical impact, role in living organisms today and relevance to current controversies. DNA, sex, sight and consciousnesses are just four examples. Lane also explains how these findings have come about, and the extent to which they can be relied upon. The result is a gripping and lucid account of the ingenuity of nature, and a book which is essential reading for anyone who has ever questioned the science behind the glories of everyday life.

**The Equation that Couldn't Be Solved** Mario Livio 2005-09-19 What do Bach's compositions, Rubik's Cube, the way we choose our mates, and the physics of subatomic particles have in common? All are governed by the laws of symmetry, which elegantly unify scientific and artistic principles. Yet the mathematical language of symmetry-known as group theory-did not emerge from the study of symmetry at all, but from an equation that couldn't be solved. For thousands of years mathematicians solved progressively more difficult algebraic equations, until they encountered the quintic equation, which resisted solution for three centuries. Working independently, two great prodigies ultimately proved that the quintic cannot be solved by a simple formula. These geniuses, a Norwegian named Niels Henrik Abel and a romantic Frenchman named Évariste Galois, both died tragically young. Their incredible labor, however, produced the origins of group theory. The first extensive, popular account of the mathematics of symmetry and order, *The Equation That Couldn't Be Solved* is told not through abstract formulas but in a beautifully written and dramatic account of the lives and work of some of the greatest and most intriguing mathematicians in history.

*Sex on Earth* Jules Howard 2014-10-23 A journey of discovery through the ins and outs of reproduction in the animal kingdom 'Written with Bill Bryson-like wit' Booklist 'A writer who blends professional expertise in zoology with charm, wit, and a cockeyed sense of humor. What better guide through nature's red-light district could one ask for?' Natural History Magazine 1,000 million years ago, a sexual revolution occurred on Earth. Sex happened for the first time; from this moment the world became ever more colourful and bizarre, ringing with elaborate songs and dances, epic battles, and rallying cries as the desires of males and females collided, generation after generation. All of your ancestors took part and succeeded – an unbroken chain of sex right back to the dawn of complex life on Earth. Well done you. Well done everything. The world in which we live rings, bleeds, and howls with sex. It's everywhere. Right now warring hordes are locking horns, preening feathers, rampaging lustfully across the savanna, questioning the fidelity of the ones they love. Birds are singing, flowers bloom. A million females choose; a billion penises ejaculate (or snap off); a trillion sperm battle, block and tackle. Written in a brilliantly engaging style by biologist Jules Howard, this fascinating and highly readable work covers the how and why of sex on Earth, in all its diversity. From sperm wars to cuckoldry, hermaphrodites and virgin births, spent males, racy harems, clitoral births, hips, breasts and birdsong, penis-percussion, and those riskiest and most elusive of all traits, monogamy and true love, all this and more is discussed in *Sex on Earth*, as Jules takes us on a voyage of discovery of the ins and outs of animal reproduction.

Wonder, Horror, Mystery Morgan Meis 2021-12-22 Wonder, Horror, Mystery is a dialogue between two friends, both notable arts critics, that takes the form of a series of letters about movies and religion. One of the friends, J.M. Tyree, is a film critic, creative writer, and agnostic, while the other, Morgan Meis, is a philosophy PhD, art critic, and practicing Catholic. The question of cinema is raised here in a spirit of friendly friction that binds the personal with the critical and the spiritual. What is film? What's it for? What does it do? Why do we so intensely love or hate films that dare to broach the subjects of the divine and the diabolical? These questions stimulate further thoughts about life, meaning, philosophy, absurdity, friendship, tragedy, humor, death, and God. The letters focus on three filmmakers who challenged secular assumptions in the late 20th century and early 21st century through various modes of cinematic re-enchantment: Terrence Malick, Lars von Trier, and Krzysztof Kieślowski. The book works backwards in time, giving intensive analysis to Malick's *To The Wonder* (2012), Von Trier's *Antichrist* (2009), and Kieślowski's *Dekalog* (1988), respectively, in each of the book's three sections. Meis and Tyree discuss the filmmakers and films as well as related ideas about philosophy, theology, and film theory in an accessible but illuminating way. The discussion ranges from the shamelessly intellectual to the embarrassingly personal. Spoiler alert: No conclusions are reached either about God or the movies. Nonetheless, it is a fun ride.

Art in History/History in Art David Freedberg 1996-07-11 Historians and art historians provide a critique of existing methodologies and an interdisciplinary inquiry into seventeenth-century Dutch art and culture.

**Getting Off** Robert Jensen 2007 Does porn make the man?

**Animation** Paul Wells 2019-07-25 *Animation: Genre and Authorship* explores the distinctive language of animation, its production processes, and the particular questions about who makes it, under what conditions, and with what purpose. In this first study to look specifically at the ways in which animation displays unique models of 'auteurism' and how it revises generic categories, Paul Wells challenges the prominence of live-action moviemaking as the first form of contemporary cinema and visual culture. The book also includes interviews with Ray Harryhausen and Caroline Leaf, and a full timeline of the history of animation.

EBOOK: A Sociology of Mental Health and Illness Anne Rogers 2014-05-16 How do we understand mental health problems in their social context? A former BMA Medical Book of the Year award winner, this book provides a sociological analysis of major areas of mental health and illness. The book considers contemporary and historical aspects of sociology, social psychiatry, policy and therapeutic law to help students develop an in-depth and critical approach to this complex subject. New developments for the fifth edition include: Brand new chapter on prisons, criminal justice and mental health Expanded coverage of stigma, class and social networks Updated material on the Mental Capacity Act, Mental Health Act and the Deprivation of Liberty A classic in its field, this well established textbook offers a rich and well-crafted overview of mental health and illness unrivalled by competitors and is essential reading for students and professionals studying a range of medical sociology and health-related courses. It is also highly suitable for trainee mental health workers in the fields of social work, nursing, clinical psychology and psychiatry. "Rogers and Pilgrim go from strength to strength! This fifth edition of their classic text is not only a sociology but also a psychology, a philosophy, a history and a polity. It combines rigorous scholarship with radical argument to produce incisive perspectives on the major contemporary questions concerning mental health and illness. The authors admirably balance judicious presentation of the range of available understandings with clear articulation of their own positions on key issues. This book is essential reading for everyone involved in mental health work." Christopher Dowrick, Professor of Primary Medical Care, University of Liverpool, UK "Pilgrim and Rogers have for the last twenty years given us the key text in the sociology of mental health and illness. Each edition has captured the multi-layered and ever changing landscape of theory and practice around psychiatry and mental health,

providing an essential tool for teachers and researchers, and much loved by students for the dexterity in combining scope and accessibility. This latest volume, with its focus on community mental health, user movements criminal justice and the need for inter-agency working, alongside the more classical sociological critiques around social theories and social inequalities, demonstrates more than ever that sociological perspectives are crucial in the understanding and explanation of mental and emotional healthcare and practice, hence its audience extends across the related disciplines to everyone who is involved in this highly controversial and socially relevant arena." Gillian Bendelow, School of Law Politics and Sociology, University of Sussex, UK "From the classic bedrock studies to contemporary sociological perspectives on the current controversy over which scientific organizations will define diagnosis, Rogers and Pilgrim provide a comprehensive, readable and elegant overview of how social factors shape the onset and response to mental health and mental illness. Their sociological vision embraces historical, professional and socio-cultural context and processes as they shape the lives of those in the community and those who provide care; the organizations mandated to deliver services and those that have ended up becoming unsuitable substitutes; and the successful and unsuccessful efforts to improve the lives through science, challenge and law." Bernice Pescosolido, Distinguished Professor of Sociology, Indiana University, USA

No Future Lee Edelman 2004-12-06 In this searing polemic, Lee Edelman outlines a radically uncompromising new ethics of queer theory. His main target is the all-pervasive figure of the child, which he reads as the linchpin of our universal politics of "reproductive futurism." Edelman argues that the child, understood as innocence in need of protection, represents the possibility of the future against which the queer is positioned as the embodiment of a relentlessly narcissistic, antisocial, and future-negating drive. He boldly insists that the efficacy of queerness lies in its very willingness to embrace this refusal of the social and political order. In *No Future*, Edelman urges queers to abandon the stance of accommodation and accede to their status as figures for the force of a negativity that he links with irony, jouissance, and, ultimately, the death drive itself. Closely engaging with literary texts, Edelman makes a compelling case for imagining Scrooge without Tiny Tim and Silas Marner without little Eppie. Looking to Alfred Hitchcock's films, he embraces two of the director's most notorious creations: the sadistic Leonard of North by Northwest, who steps on the hand that holds the couple precariously above the abyss, and the terrifying title figures of *The Birds*, with their predilection for children. Edelman enlarges the reach of contemporary psychoanalytic theory as he brings it to bear not only on works of literature and film but also on such current political flashpoints as gay marriage and gay parenting. Throwing down the theoretical gauntlet, *No Future* reimagines queerness with a passion certain to spark an equally impassioned debate among its readers.

**Botticelli Past and Present** Ana DeBenedetti 2019-01-08 The recent exhibitions dedicated to Botticelli around the world show, more than ever, the significant and continued debate about the artist. *Botticelli Past and Present* engages with this debate. The book comprises four thematic parts, spanning four centuries of Botticelli's artistic fame and reception from the fifteenth century. Each part comprises a number of essays and includes a short introduction which positions them within the wider scholarly literature on Botticelli. The parts are organised chronologically beginning with discussion of the artist and his working practice in his own time, moving onto the progressive rediscovery of his work from the late eighteenth to the turn of the twentieth century, through to his enduring impact on contemporary art and design. Expertly written by researchers and eminent art historians and richly illustrated throughout, the broad range of essays in this book make a valuable contribution to Botticelli studies.

Death on Earth Jules Howard 2017-07-18 Shortlisted for the Royal Society of Biology's 2016 General Biology Book Prize, *Death on Earth* is a groundbreaking exploration of death and its role in evolution.

Playing the Waves Jan Simons 2007 *Dogma 95*, the avant-garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors, was launched in 1995 at an elite cinema conference in Paris—when von Trier was called upon to speak about the future of film but

instead showered the audience with pamphlets announcing the new movement and its manifesto. A refreshingly original critical commentary on the director and his practice, *Playing the Waves* is a paramount addition to one of new media's most provocative genres: games and gaming. *Playing the Waves* cleverly puns on the title of one of von Trier's most famous features and argues that *Dogma 95*, like much of the director's low-budget realist productions, is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules. Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule-bound activity, and stipulates the forms and structures of games von Trier brings to bear on his films, as well as the sobering lessons he draws from economic and evolutionary game theory. Much like the director's films, this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory.

**Living Earth Community: Multiple Ways of Being and Knowing** Sam Mickey 2020-05-18 *Living Earth Community: Multiple Ways of Being and Knowing* is a celebration of the diversity of ways in which humans can relate to the world around them, and an invitation to its readers to partake in planetary coexistence. Innovative, informative, and highly accessible, this interdisciplinary anthology of essays brings together scholars, writers and educators across the sciences and humanities, in a collaborative effort to illuminate the different ways of being in the world and the different kinds of knowledge they entail - from the ecological knowledge of Indigenous communities, to the scientific knowledge of a biologist and the embodied knowledge communicated through storytelling. This anthology examines the interplay between Nature and Culture in the setting of our current age of ecological crisis, stressing the importance of addressing these ecological crises occurring around the planet through multiple perspectives. These perspectives are exemplified through diverse case studies - from the political and ethical implications of thinking with forests, to the capacity of storytelling to motivate action, to the worldview of the Indigenous Okanagan community in British Columbia. *Living Earth Community: Multiple Ways of Being and Knowing* synthesizes insights from across a range of academic fields, and highlights the potential for synergy between disciplinary approaches and inquiries. This anthology is essential reading not only for researchers and students, but for anyone interested in the ways in which humans interact with the community of life on Earth, especially during this current period of environmental emergency.

**Jackson Pollock** Jackson Pollock 1999 Published to accompany the exhibition Jackson Pollock held the Museum of Modern Art, New York, from 1 November 1998 to 2 February 1999.

**Musicology and Dance** Davinia Caddy 2020-08-27 Long treated as peripheral to music history, dance has become prominent within musicological research, as a prime and popular subject for an increasing number of books, articles, conference papers and special symposiums. Despite this growing interest, there remains no thorough-going critical examination of the ways in which musicologists might engage with dance, thinking not only about specific repertoires or genres, but about fundamental commonalities between the two, including embodiment, agency, subjectivity and consciousness. This volume begins to fill this gap. Ten chapters illustrate a range of conceptual, historical and interpretive approaches that advance the interdisciplinary study of music and dance. This methodological eclecticism is a defining feature of the volume, integrating insights from critical theory, film and cultural studies, the visual arts, phenomenology, cultural anthropology and literary criticism into the study of music and dance.

On Diary Philippe Lejeune 2009-04-30 *On Diary* is the second collection in English of the groundbreaking and profoundly influential work of one of the best-known and provocative theorists of autobiography and diary. Ranging from the diary's historical origins to its pervasive presence on the Internet, from the spiritual journey of the sixteenth century to the diary of Anne Frank, and from the materials and methods of diary writing to the question of how diaries end, these essays display Philippe Lejeune's expertise, eloquence, passion, and humor as a commentator on the functions, practices, and significance of keeping or reading a diary. Lejeune is a leading European critic and theorist of diary and autobiography. His landmark essay, "The Autobiographical Pact," has shaped life writing studies for more than thirty years, and his many books and essays have repeatedly opened up new vistas for scholarship. As Michael Riffaterre notes, "Lejeune's work on autobiography is the most original, powerful, effective approach to a difficult subject. . . . His style is very personal, lively. It grabs the reader as scholarship rarely does. Lejeune's erudition and methodology are impeccable." Two substantial introductory essays by Jeremy Popkin and Julie Rak place Lejeune's work within its critical and theoretical traditions and comment on his central importance within the fields of life writing, literary genetic studies, and cultural studies.

**Furry Nation** Joe Strike 2017-10-03 Winner of the 2017 Ursa Major Award for Best Non-Fiction Work! Furry fandom is a recent phenomenon, but anthropomorphism is an instinct hard-wired into the human mind: the desire to see animals on a more equal footing with people. It's existed since the beginning of time in prehistoric cave paintings, ancient gods and tribal rituals. It lives on today—not just in the sports mascots and cartoon characters we see everywhere, but in stage plays, art galleries, serious literature, performance art—and among furry fans who bring their make-believe characters to life digitally, on paper, or in the carefully crafted fursuits they wear to become the animals of their imagination. In *Furry Nation*, author Joe Strike shares the very human story of the people who created furry fandom, the many forms it takes—from the joyfully public to the deeply personal— and how Furry transformed his own life.

*Countersexual Manifesto* Paul B. Preciado 2018-12-18 *Countersexual Manifesto* is an outrageous yet rigorous work of trans theory, a performative literary text, and an insistent call to action. Seeking to overthrow all constraints on what can be done with and to the body, Paul B. Preciado offers a

provocative challenge to even the most radical claims about gender, sexuality, and desire. Preciado lays out mock constitutional principles for a countersexual revolution that will recognize genitalia as technological objects and offers step-by-step illustrated instructions for dismantling the heterocentric social contract. He calls theorists such as Derrida, Foucault, Butler, and Haraway to task for not going nearly far enough in their attempts to deconstruct the naturalization of normative identities and behaviors. Preciado's claim that the dildo precedes the penis—that artifice, not nature, comes first in the history of sexuality—forms the basis of his demand for new practices of sexual emancipation. He calls for a world of sexual plasticity and fabrication, of bio-printers and “dildonics,” and he invokes countersexuality's roots in the history of sex toys, pornography, and drag in order to rupture the supposedly biological foundations of the heterocentric regime. His claims are extreme, but supported through meticulous readings of philosophy and theory, as well as popular culture. The Manifesto is now available in English translation for its twentieth anniversary, with a new introduction by Preciado. Countersexual Manifesto will disrupt feminism and queer theory and scandalize us all with its hyperbolic but deadly serious defiance of everything we've been told about sex.
