Semiotic Approach to the Theology of Inculturation - Cyril Orji 2017-08-31

A Semiotic Approach to the Theology of Inculturation argues that though it is a difficult and delicate task, inculturation is still a requisite demand of a World Church and that without it the Church is unrecognisable and unsustainable. The book also suggests that the past failures of inculturation experiments in Africa can be overcome only by critically applying the science of semiotics, which can serve as an antidote to the nature of human knowing and reductionism that characterised earlier attempts to make Christianity African to the African. Drawing from the semiotic works of C.S. Peirce, Clifford Geertz, and Bernard Lonergan, Cyril Orji shows why semiotics is best suited to an African theology of inculturation and offers ten pinpointed precepts, identified as 'Habits', which underline the attentiveness, reasonableness, and responsibility required in a semiotic approach to a theology of inculturation. The 'Habits' are also akin to the imperatives inherent in the notion of catholicity - that catholicity is not identified with uniformity but with reconciled diversity, and also that catholicity demands different forms in different places, times, and cultural settings.

[The Nomads of Mykonos](#) - Pola Bousiou 2008-04-30

This is the ethnography of the Mykoniot d'élection, a 'gang' of romantic adventurers who have been visiting the island of Mykonos for the last thirty-five years and have formed a community of dispersed friends. Their constant return to and insistence on working, acting and creating in a tourist space, offers them an extreme identity, which in turn is aesthetically marked by the transient cultural properties of Mykonos. Drawing semiotically from its ancient counterpart Delos, whose myth of emergence entails a spatial restlessness, contemporary Mykonos also acquires an idiosyncratic fluidity. In mythology Delos, the island of Apollo, was

condemned by the gods to be an island in constant movement. Mykonos, as a signifier of a new form of ontological nomadism, semiotically shares such assumptions. The Nomads of Mykonos keep returning to a series of alternative affective groups largely in order to heal a split: between their desire for autonomy, rebellion and aloneness and their need to affectively belong to a collectivity. Mykonos for the Mykoniot d'élection is their permanent 'stopover'; their regular comings and goings discursively project onto Mykonos' space an allegorical (discordant) notion of 'home'.

Learning the City - Hari Sacré 2016-10-11

This book explores a cultural understanding of cities and processes of civic learning by scrutinizing urban educational topics from a cultural studies perspective. This book approaches the city as a cultural fabric that consists of social, material and symbolic dimensions, and describes how civic learning is not an accidental outcome of cities but an essential component through which citizens coproduce the city. Through a combination of theoretical development and methodological reflection the chapters in the book explore three interrelated questions addressing the relationships between culture, learning and the city: How does civic learning appear in urban spaces? How does civic learning take place through urban spaces? How are urban spaces created as a result of civic learning?

Sociological Impressionism (Routledge Revivals) - David Frisby 2013-09-13

When Sociological Impressionism was first published in 1981, it was the first comprehensive study on Simmel's social theory to appear in English since 1925. A pioneering work, it did much to bring about the rediscovery of Georg Simmel as one of the key sociologists of the twentieth century. David Frisby provides a provocative introduction to aspects of Simmel's social theory, seriously challenging many

interpretations of his work, most notably the view that Simmel produced a formal sociology. By drawing on many little-known essays and pieces by Simmel and his contemporaries, the book locates him within the social and intellectual milieu in which he was working. This is a reissue of the second edition, published in 1992, which includes a new afterword confronting critical responses to the first edition. This is an important work, which will be of interest to students of sociology and social philosophy in Germany in the late nineteenth and early twentieth century.

Fascist Spectacle - Simonetta Falasca-Zamponi
2000-08-31

"An excellent and timely book. The idea of studying Italian fascism as a 'society of the spectacle' that used symbols, rituals, and a cult of the leader to create itself as it unfolded is a brilliant stroke."—Walter L. Adamson, author of *Avant-Garde Florence: From Modernism to Fascism*

Love Your Curves: Dr Dukan Says Lose Weight, Not Shape - Dr Pierre Dukan
2012-07-19

In *Love Your Curves* Dr Pierre Dukan looks at why men and women are different shapes. Many women are in a perpetual quest for thinness, convinced that is the key to happiness and the best way to attract a partner. However, Dr Dukan provides scientific evidence to demonstrate that, although society and the media often makes us feel otherwise, curves are natural and much more appealing. Told with humour, *Love Your Curves* is Dr Dukan's personal message that we should lose weight, not shape. Dr Pierre Dukan is a French medical doctor who has spent his career helping people to lose weight permanently. The Dukan Diet is the culmination of thirty-five years' clinical experience. Beyond its immense success in France, The Dukan Diet has been adopted by 20 countries and translated into 10 languages. Many international observers agree that this is the method most likely to put a stop to the

world's weight problems.

Studies in Religious Imagination and Symbolism
- Albert D'Souza 2005-01-01

Philosophy in a New Key - Susanne K. Langer
2009-07-01

Modern theories of meaning usually culminate in a critique of science. This book presents a study of human intelligence beginning with a semantic theory and leading into a critique of music. By implication it sets up a theory of all the arts; the transference of its basic concepts to other arts than music is not developed, but it is sketched, mainly in the chapter on artistic import.

Thoughtful readers of the original edition discovered these far-reaching ideas quickly enough as the career of the book shows: it is as applicable to literature, art and music as to the field of philosophy itself. The topics it deals with are many: language, sacrament, myth, music, abstraction, fact, knowledge--to name only the main ones. But through them all goes the principal theme, symbolic transformation as the essential activity of human minds. This central idea, emphasizing as it does the notion of symbolism, brings Mrs. Langer's book into line with the prevailing interest in semantics. All profound issues of our age seem to center around the basic concepts of symbolism and meaning. The formative, creative, articulating power of symbols is the tonic chord which thinkers of all schools and many diverse fields are unmistakably striking; the surprising, far-reaching implications of this new fundamental conception constitute what Mrs. Langer has called philosophy in a new key. Mrs. Langer's book brings the discussion of symbolism into a wider general use than criticism of word meaning. Her volume is vigorous, effective, and well written and will appeal to everyone interested in the contemporary problems of philosophy.

From Imagination to Faerie - Yannick Imbert
2022-06-23

Tolkien is one of our most beloved fantasy writers. Such was the power of his imagination that much has been written on his invented world, languages, and myth. This book is an invitation to tread the paths of Tolkien's realm, exploring three regions of his work: language, myth, and imagination. We will be looking for a

path leading to a summit from where we can view Tolkien's whole realm. Yannick Imbert argues that we can gain such a view only if we understand Tolkien's philosophical theology, his Thomism. To attain this vantage point and better understand the genius of his Middle Earth, readers journey with Tolkien through his academic, personal, and theological milieu, which together formed his Thomistic imagination.

The Semblance of Self - Maureen Feder 1980

Derrida - Benoit Peeters 2013-08-27

This biography of Jacques Derrida (1930-2004) tells the story of a Jewish boy from Algiers, excluded from school at the age of twelve, who went on to become the most widely translated French philosopher in the world - a vulnerable, tormented man who, throughout his life, continued to see himself as unwelcome in the French university system. We are plunged into the different worlds in which Derrida lived and worked: pre-independence Algeria, the microcosm of the École Normale Supérieure, the

cluster of structuralist thinkers, and the turbulent events of 1968 and after. We meet the remarkable series of leading writers and philosophers with whom Derrida struck up a friendship: Louis Althusser, Emmanuel Levinas, Jean Genet, and Hélène Cixous, among others. We also witness an equally long series of often brutal polemics fought over crucial issues with thinkers such as Michel Foucault, Jacques Lacan, John R. Searle, and Jürgen Habermas, as well as several controversies that went far beyond academia, the best known of which concerned Heidegger and Paul de Man. We follow a series of courageous political commitments in support of Nelson Mandela, illegal immigrants, and gay marriage. And we watch as a concept - deconstruction - takes wing and exerts an extraordinary influence way beyond the philosophical world, on literary studies, architecture, law, theology, feminism, queer theory, and postcolonial studies. In writing this compelling and authoritative biography, Benoît Peeters talked to over a hundred individuals who knew and worked with Derrida. He is also the first person to make use of the huge personal archive built up by Derrida throughout his life and of his extensive correspondence. Peeters' book gives us a new and deeper understanding of the man who will perhaps be seen as the major philosopher of the second half of the twentieth century.

The Future of Luxury Brands - Annamma Joy
2022-02-07

The concepts of artification and sustainability are now both at the heart of luxury brand marketing strategies; artification as an ongoing process of transformation in the world of art and sustainability as an indispensable response to the issues of our times. The Future of Luxury Brands examines three interrelated luxury-marketing segments—the art world, fashion and fine wines including hospitality services—through the dual lenses of sustainability and artification. From safeguarding human and natural resources to upholding labor rights and protecting the environment, sustainability has taken center stage in consumer consciousness, embodying both moral authority and sound business practices. At the same time, artification—the process by which non-art is reconceived as

art—applies the cachet of art to business, affording commercial products the sacred status accorded to works of art. When commercial products enter the realm of aesthetic creation, artification and consumer engagement inevitably increases. This pioneering book examining artification and sustainability as strategic pillars of marketing strategies in the luxury industry will be essential reading for practitioners working in luxury product companies, as also students of luxury brand marketing.

Reviewing the Past - Dr Zoltán Somhegyi 2020-03-10

Though constantly in decay, ruins continue to fascinate the observer. Their still-standing survival is a loud affirmation of their presence, in which we can admire the struggle against the power of Nature aesthetically manifested during the decay. This volume takes a thematic approach to examining the aesthetics of ruins. It looks at the general aspects of architectural decay and its classical forms of admiration and then turns towards ruins from both classical and contemporary periods, from both Western and non-Western areas, and with examples from “high art” as well as popular culture. Combining the methodologies of art history, aesthetics and cultural history, this book opens up new ways of looking at the phenomenon of ruins.

Artifice and Design - Barry Allen 2011-03-15
"As familiar and widely appreciated works of

modern technology, bridges are a good place to study the relationship between the aesthetic and the technical. Fully engaged technical design is at once aesthetic and structural. In the best work (the best design, the most well made), the look and feel of a device (its aesthetic, perceptual interface) is as important a part of the design problem as its mechanism (the interface of parts and systems). We have no idea how to make something that is merely efficient, a rational instrument blindly indifferent to how it appears. No engineer can design such a thing and none has ever been built."—from *Artifice and Design* In an intriguing book about the aesthetics of technological objects and the relationship between technical and artistic accomplishment, Barry Allen develops the philosophical implications of a series of interrelated concepts—knowledge, artifact, design, tool, art, and technology—and uses them to explore parallel questions about artistry in technology and technics in art. This may be seen at the heart of *Artifice and Design* in Allen's discussion of seven bridges: he focuses at length on two New York bridges—the Hell Gate Bridge and the Bayonne Bridge—and makes use of original sources for insight into the designers' ideas about the aesthetic dimensions of their work. Allen starts from the conviction that art and technology must be treated together, as two aspects of a common, technical human nature. The topics covered in *Artifice and Design* are wide-ranging and interdisciplinary, drawing from evolutionary biology, cognitive psychology, and the history and anthropology of art and technology. The book concludes that it is a mistake to think of art as something subjective, or as an arbitrary social representation, and of Technology as an instrumental form of purposive rationality. "By segregating art and technology," Allen writes, "we divide ourselves against ourselves, casting up self-made obstacles to the ingenuity of art and technology."
