Tourism and Citizenship Raoul Bianchi 2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights, the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate. However, despite the fact that cross-border travel implies certain citizenship rights as well as the material capacity to travel, the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature. This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically-informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship, with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel. The text weaves its analysis of citizenship and travel in the context of addressing large-scale societal transformations engendered by globalization, neoliberalism and the geopolitical realignments between states, as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves. By doing so, it focuses on key themes including: tourism and social citizenship rights; race, culture and minority rights; states, markets and the freedom of movement; tourism, peace and geo-politics; consumerism and class; and, ethical tourism, global citizenship and cosmopolitanism. The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity. This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science. The royalties received from this book will be donated to the International Porter Protection Group.

Protecting Children from Sexual Violence Building a Europe for and with Children (Program) 2010-01-01 Protecting children from sexual violence - A comprehensive approach is a collection of highly readable expert papers for both child professionals And The general public. it is divided into five parts, presenting a European overview and covering the existing legal frameworks; abuse prevention and reporting; rehabilitation and social reintegration of victims; sexual violence on the Internet; and public and private partnerships against abuse. it also sheds light on the little-known problem of children who are sexually abusing other children. In addition to providing thorough information on the many facets of this complex subject, this publication also highlights new concepts, facts and recommendations. Foremost is the significant lack of data on the prevalence and nature of sexual violence in Europe, underscoring the need for co-ordinated pan-European research and information gathering, which are vital to effective policy making and programme design. it also sounds the alarm for urgent co-ordinated action in various fields to drastically improve child protection through awareness raising; targeted and specialised training, intervention and therapy programmes; sex education in schools; responsible family attitudes; and justice systems with tighter abuse laws and which take account of children's special needs as reliable witnesses. Protecting children from sexual violence is published as part of the Council of Europe campaign to stop sexual violence against children. The hope is that this publication will inspire judges, The police, educators, governments, The media and legislatures to join the campaign and expose, demythify and take concerted action to combat sexual violence against children, a phenomenon that affects as many as 20% of children in Europe

Research Anthology on Child and Domestic Abuse and Its Prevention Management Association, Information Resources 2022-03-11 Every day, both adults and children are victimized in unhealthy relationships. Domestic and child abuse have surged during the COVID-19 pandemic as potential escapes from abuse at home were stripped away. Abuse is a raging global issue; however, with enough research, policy, and social activism, society can aid in the prevention of child and domestic abuse. The Research Anthology on Child and Domestic Abuse and Its Prevention discusses the prevalence of domestic abuse as well as the exploitation of children both at home and beyond. It further presents emerging practices in technology, social work, and criminology to prevent the further exploitation and victimization of adults and children in abusive situations. Covering topics such as foster children, gender-based violence, and trauma analysis, this major reference work is an indispensable resource for social workers, lawmakers, government organizations, non-profit organizations, psychologists, therapists, sociologists, libraries, students and educators of higher education, criminologists, leaders in law enforcement, researchers, and academicians.

Child Welfare: Child abuse and child protection Nick Frost 2005 This collection focuses on child welfare in its specific sense: welfare and social interventions with children and young people undertaken by State bodies or NGO's. The term 'child welfare' is deployed differently in diverse international settings. In the United Kingdom child welfare tends to refer to individualised programmes for children who have experienced problems in their lives. In India, to take a contrasting example, it can also refer to major housing and nutrition programmes. This collection takes an inclusive approach to international perspectives. The collection is completed by a new general introduction by the editor, individual volume introductions, and a full index. Titles also available in this series include, *Medical Sociology* (November 2004, 4 Volumes, 495) and the forthcoming collection *Health Care Systems* (2005, 3 Volumes, c.395).

Development and Security in Southeast Asia Carolina G. Hernandez 2019-07-15 This title was first published in 2003. This three-volume set examines the relationship between government and civil society in their efforts to define and pursue security. Including the results of an extensive research program, each volume is organized around one of the three principal themes - environment, people and globalization, supplying compelling evidence of the tension between economic change and human well-being. Challenging the conventional wisdom about the beneficial results of economically induced change, this first volume suggests that too often the mismanagement of development jeopardizes the security of individuals, families, communities, and possibly the state, by harming the very environment which is required to sustain both people and their economic existence. Bringing together an international group of scholars from a variety of disciplines, this volume is particularly relevant for academic and general research communities in the areas of social, economic, political and security matters of Southeast Asia.
