The Road to Freedom - John W. Morin 2002

A workbook for sex offenders incorporating the latest developments in relapse prevention training. It features the four-path R-P model and invites offenders, in an easy-to-read style, to examine their own approach to offending, addressing the high risk factors that trigger and maintain that approach. This book looks beyond the cognitive and behavioral linchpins of offending to the powerful emotional needs that energize deviant sex. The authors believe that only by learning to meet these needs in healthy ways can offenders attain the positive reinforcements that lead to maintaining important lifestyle changes. Newly-added sections address the role of polygraphy in sex offender treatment and the role of the Internet in sexual compulsivity.

children and adolescents.

Health care providers are in a unique position to provide an empathetic response to children and adolescents who have been sexually abused. Such a response can go a long way in helping survivors recover from the trauma of sexual abuse. WHO has published new clinical guidelines *Responding to Children and Adolescents Who Have Been Sexually Abused* aimed at helping front-line health workers, primarily from

low resource settings, in

providing evidence-based, quality, trauma-informed care to survivors. The guidelines emphasize the importance of promoting safety, offering choices and respecting the wishes and autonomy of children and adolescents. They cover recommendations for post-rape care and mental health; and approaches to minimizing distress in the process of taking medical history, conducting examination and documenting findings.
