**The Well of Loneliness** Radclyffe Hall 2015-04-23 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

**Rehabilitation Medicine for Elderly Patients** Stefano Masiero 2017-09-04 This book clearly explains when and how different rehabilitation techniques should be applied in the aging patient, thereby enabling readers to identify and apply those rehabilitation strategies that will maximize quality of life and functional independence in individual cases. It is specifically designed for ease of consultation and rapid retrieval of the information most relevant to clinical practice. Prominence is given to the benefits of a multidisciplinary approach to rehabilitation, with discussion of a very wide range of aspects of rehabilitation in different disease settings. The breadth of coverage is illustrated by the attention paid to less commonly addressed topics such as visual and hearing rehabilitation, the role of robotics and 3D imaging techniques, variations in approach among health care systems, and rehabilitation in end-of-life care. The authors are international academic experts in their fields, guaranteeing a high scientific standard throughout. This manual will be an invaluable tool and source of knowledge for geriatricians and physiatrists but will also appeal to a wider range of clinicians, practitioners, and students.

**The Transformation of Intimacy** Anthony Giddens 2013-04-23 The sexual revolution: an evocative term, but what meaning can be given to it today? How does 'sexuality' come into being and what connections does it have with the changes that have affected personal life on a more general plane? In answering these questions, Anthony Giddens disputes many of the dominant interpretations of the role of sexuality in modern culture. The emergence of what the author calls plastic sexuality - sexuality freed from its intrinsic relation to reproduction - is analysed in terms of the long-term development of the modern social order and social influences of the last few decades. Giddens argues that the transformation of intimacy, in which women have played the major part, holds out the possibility of a radical democratization of the personal sphere. This book will appeal to a large general audience as well as being essential reading for students and professionals.

**Intersexualization** Lena Eckert 2016-12-08 Since the 1970s, research into 'Intersex' has been a central fascination for feminist theorists seeking to make arguments about how men and women are created as social/gender categories. *Intersexualization: The Clinic and the Colony* takes the case of Olympic runner Caster Semenya as a starting point to explore the issue of determining sex, and the ways in which intersexuality is a 'threat' to the distinction between men/women, homosexuality/heterosexuality and white/black. By focusing on the 1950s and the 40 years after, Eckert shows how what she calls intersexualization began in psycho-medical research at the Johns Hopkins Hospital in Baltimore and UCLA, and has from there spread into cross-cultural anthropological accounts conducted in Papua New Guinea and the Dominican Republic. With cross-cultural intersexualization having been largely neglected in recent literature on intersex, this timely volume describes how such intersexualization derives from the combination of medicalization and pathologization through two crucial parts. The first part, "The Clinic," describes historical psycho-medical material engaging with hermaphroditism ranging from Greek Mythology up to today. This is followed by "The Colony," which analyzes, in several close-readings, cross-cultural anthropological, sexological and psychoanalytical accounts contributing to cross-cultural intersexualization. Enclosing a wide range of inter- and transdisciplinary approaches to heteronormative and dichotomously organized frames of knowledge and organization, this volume is essential reading for upper-undergraduate and post-graduate students within the fields of gender studies, social studies of medicine, anthropology, science and technology studies, cultural studies, sociology, and history of medicine.

**Irreversible Damage** Abigail Shrier 2020-06-30 NAMED A BOOK OF THE YEAR BY THE ECONOMIST AND ONE OF THE BEST BOOKS OF 2021 BY THE TIMES AND THE SUNDAY TIMES "Irreversible Damage . . . has caused a storm. Abigail Shrier, a Wall Street Journal writer, does something simple yet devastating: she rigorously lays out the facts." —Janice Turner, *The Times of London* Until just a few years ago, gender dysphoria—severe discomfort in one's biological sex—was vanishingly rare. It was typically found in less than .01 percent of the population, emerged in early childhood, and afflicted males almost exclusively. But today whole groups of female friends in colleges, high schools, and even middle schools across the country are coming out as "transgender." These are girls who had never experienced any discomfort in their biological sex until they heard a coming-out story from a speaker at a school assembly or discovered the internet community of trans "influencers." Unsuspecting parents are awakening to find their daughters in thrall to hip trans YouTube stars and "gender-affirming" educators and therapists who push life-changing interventions on young girls—including medically unnecessary double mastectomies and puberty blockers that can cause permanent infertility. Abigail Shrier, a writer for the Wall Street Journal, has dug deep into the trans epidemic, talking to the girls, their agonized parents, and the counselors and doctors who enable gender transitions, as well as to "detransitioners"—young women who bitterly regret what they have done to themselves. Coming out as transgender immediately boosts these girls' social status, Shrier finds, but once they take the first steps of transition, it is not easy to walk back. She offers urgently needed advice about how parents can protect their daughters. A generation of girls is at risk. Abigail Shrier's essential book will help you understand what the trans craze is and how you can inoculate your child against it—or how to retrieve her from this dangerous path.

**The Shattered Mirror** María Elena de Valdés 1998 Popular images of women in Mexico—conveyed through literature and, more recently, film and television—were long restricted to either the stereotypically submissive wife and mother or the demonized fallen woman. But new representations of women and their roles in Mexican society have shattered the ideological mirrors that reflected these images. This book explores this major change in the literary representation of women in Mexico. María Elena de Valdés enters into a selective and hard-hitting examination of literary representation in its social context and a contestatory engagement of both the literary text and its place in the social reality of Mexico. Some of the topics she considers are Carlos Fuentes and the subversion of the social codes for women; the poetic ties between Sor Juana Inés de la Cruz and Octavio Paz;

questions of female identity in the writings of Rosario Castellanos, Luisa Josefina Hernández, María Luisa Puga, and Elena Poniatowska; the Chicana writing of Sandra Cisneros; and the postmodern celebration—without reprobation—of being a woman in Laura Esquivel's *Like Water for Chocolate*. [The Muslimah Sex Manual](#) Umm Muladhat 2017-07-02 Two years ago, I was congratulating a young Muslimah on her engagement. She was thrilled about starting married life and you could see the happiness emanating from her as everyone gave her their best wishes. A few months later, I could tell something was wrong. After some cajoling, she shyly admitted the truth. Her sex life was horrible. In fact, it was fast becoming non-existent. She had been a model Muslimah her entire life. Before marriage, she had never so much as held a non-mahram's hand, let alone become physically intimate with one. She had eagerly looked forward to marriage as a chance to finally indulging in all the physical intimacy she had postponed for the sake of Allah. But it wasn't working. Coming from the medical field, she knew all the relevant biology. She could draw and label all the parts of male and female anatomy. She had taken fiqh classes and knew the legal rulings of menstruation and intercourse. But she didn't know sex. Oh, she knew the mechanics. Insert penis into vagina. Climax. Withdraw. But she didn't know how to make her husband yearn for her in bed. She didn't know what he liked. She didn't even know what she liked! They had begun eagerly but after a few weeks, realized that neither of them was truly enjoying having sex with each other. And so began my impromptu sex skills workshop. I threw at her all the information I'd gathered over years of marriage. Things I'd learned from experience, tidbits I'd gleaned from friends, tips I'd picked up from magazine articles. One thing here, two things there. All those bits had accumulated into a very healthy and robust sex life between me and my husband. I gave her everything, fervently hoping that it would help her in her marital life. A month later, I saw her again. This time she had a gigantic smile on her face. "Please, write this down and share it with other Muslim girls. No one teaches this. We're thrown into marriage and only know the fiqh and the biology." I wrote down everything I told her on a Word document and emailed it to her. She shared it with her friends who were newly married. They shared it with their friends. Before long, word trickled back to me that people were asking me to write a book on the subject. So here it is.

[Literature and Justice in Mid-Twentieth-Century Britain](#) Victoria Stewart 2023-02-23 Literature and Justice in Mid Twentieth Century Britain: Crime and War Crimes examines how ideas about crime, criminality, and judicial procedure that had developed in a domestic context influenced the representation and understanding of war crimes trials, victims of war crimes, and war criminals in post-Second World War Britain. The representation of Belsen concentration camp and the subsequent British-run trial of its personnel are a particular focal point. Drawing on a range of source material including life-writing, journalism, and detective fiction, as well as criminological and sociological works from this period, this book explains why the fate of the Jews and other victims of the Nazis was sometimes brought starkly into focus and sometimes marginalised in public discourse at this period. What remain are glimpses of the events now called the Holocaust, but glimpses that can be as powerful and as meaningful as more direct or explicit representations.

**Assessment of Long-Term Health Effects of Antimalarial Drugs When Used for Prophylaxis** National Academies of Sciences, Engineering, and Medicine 2020-04-24 Among the many who serve in the United States Armed Forces and who are deployed to distant locations around the world, myriad health threats are encountered. In addition to those associated with the disruption of their home life and potential for combat, they may face distinctive disease threats that are specific to the locations to which they are deployed. U.S. forces have been deployed many times over the years to areas in which malaria is endemic, including in parts of Afghanistan and Iraq. Department of Defense (DoD) policy requires that antimalarial drugs be issued and regimens adhered to for deployments to malaria-endemic areas. Policies directing which should be used as first and as second-line agents have evolved over time based on new data regarding adverse events or precautions for specific underlying health conditions, areas of deployment, and other operational factors. At the request of the Veterans Administration, Assessment of Long-Term Health Effects of Antimalarial Drugs When Used for Prophylaxis assesses the scientific evidence regarding the potential for long-term health effects resulting from the use of antimalarial drugs that were approved by FDA or used by U.S. service members for malaria prophylaxis, with a focus on mefloquine, tafenoquine, and other antimalarial drugs that have been used by DoD in the past 25 years. This report offers conclusions based on available evidence regarding associations of persistent or latent adverse events.

**Our Lady of Alice Bhatti** Mohammed Hanif 2011-10-01 Alice Bhatti has just come out of prison and is looking for a second chance. She's hungry, tough, and full of fight, but being a Catholic choohra in Karachi means she also needs good luck. A lot of it. Alice's prayers are answered when she gets a job as Junior Nurse at the Sacred Heart Hospital, a squalid public hospital full of shoot-out victims and homeless drug addicts. There she meets Teddy Butt, a trigger happy, ex-body builder, and a part-time goon for the police. The two could not be further apart and that's why they fall in love—Teddy with sudden violence, Alice in cautious hope. How will their unlikely romance end? In *A Case of Exploding Mangoes*, Mohammed Hanif tore into the corruption of the army and General Zia's dictatorship; in this novel he draws a dark and compelling portrait of Pakistan today where killers fall in love and lovers are forced to make impossible choices. Written with savage humour and in sizzling prose, *Our Lady of Alice Bhatti* is a tour de force from one of the most brilliant young writers today.

[Maya Angelou's I Know why the Caged Bird Sings](#) Joanne M. Braxton 1999 With the continued expansion of the literary canon, multicultural works of modern literary fiction and autobiography have assumed an increasing importance for students and scholars of American literature. This exciting new series assembles key documents and criticism concerning these works that have so recently become central components of the American literature curriculum. Each casebook will reprint documents relating to the work's historical context and reception, present the best in critical essays, and when possible, feature an interview of the author. The series will provide, for the first time, an accessible forum in which readers can come to a fuller understanding of these contemporary masterpieces and the unique aspects of American ethnic, racial, or cultural experience that they so ably portray. Perhaps more than any other single text, Maya Angelou's *I Know Why the Caged Bird Sings* helped to establish the "mainstream" status of the renaissance in black women's writing. This casebook presents a variety of critical approaches to this classic autobiography, along with an exclusive interview with Angelou conducted specially for this volume and a unique drawing of her childhood surroundings in Stamps, Arkansas, drawn by Angelou herself.

**Consolidated Guideline on Sexual and Reproductive Health and Rights of Women Living with HIV** World Health Organization 2017-02-20 The starting point for this guideline is the point at which a woman has learnt that she is living with HIV and it therefore covers key issues for providing

comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities as well as from the health-care institutions where they seek care particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan develop and monitor programmes and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living with HIV taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights.

**Violence Against Women 2014** "Violence against women undermines women's core fundamental rights such as dignity, access to justice and gender equality. For example, one in three women has experienced physical and/or sexual violence since the age of 15; one in five women has experienced stalking; every second woman has been confronted with one or more forms of sexual harassment. What emerges is a picture of extensive abuse that affects many women's lives but is systematically underreported to the authorities. The scale of violence against women is therefore not reflected by official data. This FRA survey is the first of its kind on violence against women across the 28 Member States of the European Union (EU). It is based on interviews with 42,000 women across the EU, who were asked about their experiences of physical, sexual and psychological violence, including incidents of intimate partner violence ('domestic violence'). The survey also included questions on stalking, sexual harassment, and the role played by new technologies in women's experiences of abuse. In addition, it asked about their experiences of violence in childhood. Based on the detailed findings, FRA suggests courses of action in different areas that are touched by violence against women and go beyond the narrow confines of criminal law, ranging from employment and health to the medium of new technologies."--Editor.

**The Case for Marriage** Linda Waite 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. *The Case for Marriage* is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced—physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. *The Case for Marriage* combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. *The Case for Marriage* is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of *The Book of Virtues* "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- *The Wall Street Journal* [www.broadwaybooks.com](http://www.broadwaybooks.com)

Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine 2017-10-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
