

# Making Choices In Sexuality Research And Applications

**Ethics, Sexual Orientation, and Choices about Children** - Timothy F. Murphy 2012

A critical review of the debate over the still-hypothetical possibility of prenatal intervention by parents to select the sexual orientation of their children. Parents routinely turn to prenatal testing to screen for genetic or chromosomal disorders or to learn their child's sex. What if they could use similar prenatal interventions to learn (or change) their child's sexual orientation? Bioethicists have debated the moral implications of this still-hypothetical possibility for several decades. Some commentators fear that any scientific efforts to understand the origins of homosexuality could mean the end of gay and lesbian people, if parents shy away from having homosexual children. Others defend parents' rights to choose the traits of their children in general and see no reason to treat sexual orientation differently. In this book, Timothy Murphy traces the controversy over prenatal selection of sexual orientation, offering a critical review of the literature and presenting his own argument in favor of parents' reproductive liberty. Arguing against commentators who want to restrict the scientific study of sexual orientation or technologies that emerge from that study, Murphy proposes a defense of parents' right to choose. This, he argues, is the only view that helps protect children from hurtful family environments, that is consistent with the increasing powers of prenatal interventions, and that respects human futures as something other than accidents of the genetic lottery.

**Child Mental Health** - John Y Powell 2018-10-24

Use these system-of-care concepts to better serve children with serious emotional problems and their families! Providing services to children with emotional problems and their families continues to be a major challenge for social workers, family therapists, child mental health advocates, and psychologists in the new century. This valuable book addresses that challenge, detailing theory, principles, and application issues from the vantage points of both consumers and service providers. System-of-care values and practices were developed to address these concerns and meet the needs of these children and families, who tend to receive either no services at all or services that are far too restrictive, at a large cost to the organization providing the services. *Child Mental Health: Exploring Systems of Care in the New Millennium* identifies salient issues and offers suggestions for addressing the complexities of providing services for these troubled families. It also provides hope and encouragement for family members and professionals by identifying roles and practices that are effective in building collaborative community-based services. This book takes an incisive look at: the benefits and difficulties of partnering between practitioners and families the need for and benefits of partnering between practitioners of various disciplines within the system of care a working model of a wraparound process (the hallmark of the system of care) barriers that prevent effective wraparound services and what causes them the need to help social workers learn parent partnering skills the roles that families can play in the system of care the need for specialized training so that practitioners can learn to assess, understand, and integrate a family's spiritual beliefs into the system of care the development of an interdisciplinary, collaborative practice course at East Carolina University experiential training and shared-classroom experiences for students *Child Mental Health: Exploring Systems of Care in the New Millennium* is a tool that will aid practitioners and consumers alike as they shift their point of view from the provider-as-expert paradigm to one of building partnerships.

**Transgenderism and Intersexuality in Childhood and Adolescence**

- Peggy T. Cohen-Kettenis 2003-02-14

*Transgenderism and Intersexuality in Childhood and Adolescence: Making Choices* presents an overview of the research, clinical insights, and ethical dilemmas relevant to clinicians who treat intersex youth and their families. Exploring gender development from a cross-cultural perspective, esteemed scholar Peggy T. Cohen-Kettenis and experienced practitioner Friedemann Pfäfflin focus on assessment, diagnosis, and treatment issues. To bridge research and practical application, they include numerous case studies, definitions of relevant terminology, and salient chapter summaries.

[Understanding Sexuality Research](#) - Michael W. Wiederman 2001

With reader-friendly guidance, UNDERSTANDING SEXUALITY RESEARCH uses realistic, hypothetical cases to promote students' critical thinking. The first five chapters present salient issues to consider when evaluating research on human sexuality. The next ten application chapters correspond well with the primary chapters presented in most sexuality texts, making it easy for instructors to integrate the book into the course throughout the semester. Students learn to effectively apply critical thinking skills to human sexuality research and become more critical judges of research conducted by others.

[Understanding Human Behavior and the Social Environment](#) - Charles Zastrow 2004

This best-selling human behavior in the social environment text was the first to offer a balanced look at human lifespan development through the lens of social work theory and practice. The authors use a systems theory framework to cover human development and behavior theories within the context of family, organizational, and community systems. Using a chronological lifespan approach, the authors present separate chapters on biological, psychological, and social impacts at the different lifespan stages. The bio-psycho-social-theoretical content is organized within the authors' Systems Impact Model, which helps students to better understand individual behavior in the various settings.

*Remaking Relapse Prevention with Sex Offenders* - D. Richard Laws 2000-04-19

It is estimated that relapse prevention methods are employed in more

than 90% of all North American sex offender treatment programs (of which there are more than 2,000). Comparable statistics are true in most industrialized countries around the world. Over the last decade a great deal has been learned about the treatment of sexual offenders, and particularly about relapse prevention. This sourcebook provides clinicians with the most current, practical, useable information about working with sex offenders to prevent relapse. It reflects the advances and insights of the past decade since the publication of *Relapse Prevention with Sex Offenders*, focusing on the major reconceptualizations, revisions, and innovations that will chart treatment programs for the first decade of the new millennium.

**Making Choices in Sexuality** - Susan McCammon 1998

Designed to help students make informed choices about this complex aspect of human behavior, this new book centers around the unique theme of choices -- how to make them and how to live with their impact. This briefer version text provides a comprehensive and affordable alternative to longer texts for the course -- without sacrificing depth and detail. The book helps readers broaden their understanding of sexuality by examining it from a variety of perspectives, including psychological, biological, sociological, feminist, historical, and cross-cultural. Without preaching or bias, the authors present cutting-edge information to ensure that students are knowledgeable about critical issues in sexuality. From the latest on HIV/AIDS and sexually-transmitted diseases to coverage of cultural variations in human sexuality, this book is unequalled in its presentation of scholarly -- yet engaging -- subject matter. To demonstrate how the content applies to students, research-based inventories (Self Assessments) taken from sexuality and health literature provide scales students can use to assess their own beliefs, attitudes, and behaviors.

**eHealth Applications** - Seth M. Noar 2012-05-22

*eHealth Applications: Promising Strategies for Behavior Change* provides an overview of technological applications in contemporary health communication research, exploring the history and current uses of eHealth applications in disease prevention and management. This volume focuses on the use of these technology-based interventions for public health promotion and explores the rapid growth of an innovative interdisciplinary field. The chapters in this work discuss key eHealth applications by presenting research examining a variety of technology-based applications. Authors Seth M. Noar and Nancy Grant Harrington summarize the latest in eHealth research, including a range of computer, Internet, and mobile applications, and offer observations and reflections on this growing area, such as dissemination of programs and future directions for the study of interactive health communication and eHealth. Providing a timely and comprehensive review of current tools for health communication, *eHealth Applications* is a must-read for scholars, students, and researchers in health communication, public health, and health education.

**Sexual Decisions** - L. Kris Gowen 2007-03-26

For teens too shy to talk to mom and dad about sex, this book offers good, sound advice on a highly personal level -- filling in some of the blanks in their knowledge about sex and relationships. Designed to help teens aged 16-19 make their own decisions about sexuality, *Making Sexual Decisions* talks not only about the facts of sexual health but also provides them with some things to think about when it comes to the feelings and emotions that surround sex.

**Sexual Teens, Sexual Media** - Jane D. Brown 2001-11

This collection explores the sexual content of U.S. mass media and its influence in the lives of adolescents. Contributors address the topic of sexuality broadly, including evidence not only about physical sex acts, but also about the role the media play in the development of gender roles, standards of beauty, courtship, and relationship norms. Chapters included here present new perspectives on what teens are paying attention to in the media, and offer insight into how teens are understanding and applying what the media present about sex and sexuality. Employing various methodological approaches, the studies also represent a diversity of adolescent audiences and deal with a wide variety of media content, ranging from teens' favorite TV programs to magazines, movies, music, and teen girls' Web pages. Taken as a whole, this volume highlights the significant roles the media play in adolescents' sexual lives. *Sexual Teens, Sexual Media* contributes important evidence to the ongoing debate over media effects, making it essential reading for scholars and students in media studies, as well as social and developmental psychology.

**Judgment and Decision Making** - Baruch Fischhoff 2013-06-17

Behavioral decision research offers a distinctive approach to understanding and improving decision making. It combines theory and method from multiple disciplines (psychology, economics, statistics, decision theory, management science). It employs both empirical methods, to study how decisions are actually made, and analytical ones, to study how decisions should be made and how consequential imperfections are. This book brings together key publications, selected to represent the major topics and approaches used in the field. Put in one place, with integrating commentary, it shows the common elements in a research program that represents the scope of the field, while offering depth in each. Together, they provide a vision for what has become a burgeoning field.

**How to Write a Successful Research Grant Application** - Willo Pequegnat 2013-03-09

The Department of Health and Human Services has identified Acquired Immunodeficiency Syndrome (AIDS) as the foremost public health problem in the United States. The Centers for Disease Control (CDC) report that, as of December 31, 1994, there were 441,528 documented cases of AIDS in this country, and the number is increasing. AIDS is an illness characterized by a defect in natural immunity against disease. Many more individuals are known to be infected with Human Immunodeficiency Virus (HIV) but do not have symptoms or the defining characteristics of AIDS. The incubation period for AIDS may range from 1 to 10 or more years in adults and 6 months to several years in children. Infected persons appear to be capable of transmitting infection indefinitely, even if they remain asymptomatic. In order to increase the number of minority investigators conducting research on HIV infection and AIDS, NIMH conducted a 3h-day technical workshop for minority investigators on July 24-27, 1990, in Fairlakes, Virginia. University-based research programs were asked to nominate investigators who were selected on the basis of a referred 10-page prospectus for a proposed research project. This procedure was used because NIMH wanted to be sure that the prospective investigators were established in a research environment that would pr

**Self-Concept Clarity** - Jennifer Lodi-Smith 2018-01-03

This welcome resource traces the evolution of self-concept clarity and brings together diverse strands of research on this important and still-developing construct. Locating self-concept clarity within current models of personality, identity, and the self, expert contributors define the construct and its critical roles in both individual and collective identity and functioning. The book examines commonly-used measures for assessing clarity, particularly in relation to the more widely understood concept of self-esteem, with recommendations for best practices in assessment. In addition, a wealth of current data highlights the links between self-concept clarity and major areas of mental wellness and dysfunction, from adaptation and leadership to body image issues and schizophrenia. Along the way, it outlines important future directions in research on self-concept clarity. Included in the coverage: Situating self-concept clarity in the landscape of personality. Development of self-concept clarity across the lifespan. Self-concept clarity and romantic relationships. Who am I and why does it matter? Linking personal identity and self-concept clarity. Consequences of self-concept clarity for well-being and motivation. Self-concept clarity and psychopathology.

Self-Concept Clarity fills varied theoretical, empirical, and practical needs across mental health fields, and will enhance the work of academics, psychologists interested in the construct as an area of research, and clinicians working with clients struggling with developing and improving their self-concept clarity.

Terrorism - Jonathan Randall White 2003

Recognized as the most objective, best-selling terrorism text in the market, **TERRORISM: AN INTRODUCTION- 9/11 UPDATE** strives to discuss the most sophisticated theories by the best terrorist analysts in the world, while still focusing on the domestic and international threat of terrorism and the basic security issues surrounding terrorism today. The student-oriented writing style is complemented by rich pedagogy, and there is an adequate amount of research and theoretical discussion to make this an ideal text for both the undergraduate and graduate level courses.

Sexual Orientation and Gender Expression in Social Work Practice -

Deana F. Morrow 2006-02-01

This volume offers an invaluable resource for both social work educators and practitioners working with gay, lesbian, bisexual, and transgender (GLBT) clients and their families. It is the first such work to specifically address issues affecting bisexual and transgender people as well as the larger concerns of the GLBT community. Contributors present specific, practical suggestions for effective knowledge-based and skills-based practice with GLBT clients. Topics include heterosexism and homophobia, identity development, coming out, GLBT adolescents and older adults, health-care concerns, relationships and families, workplace issues, the history of the GLBT civil rights movement, sex reassignment, AIDS, and the role of spirituality in the lives of GLBT individuals. The contributors also consider intragroup issues of race, ethnicity, age, and socioeconomic status.
