

New Sociologies Of Sex Work

Dr Kate Hardy

National minimum wage -

Low Pay Commission

2011-04-07

The Low Pay Commission was again asked to monitor and evaluate the impact of the minimum wage and to consider its effect on different groups of workers. Additionally the Commission reviews the Apprentice Rate. The Commission recommends that: the adult rate of the National Minimum Wage be increased by 15 pence to £6.08 an hour from 1 October 2011; the accommodation offset should increase from £4.61 to £4.73 per day from 1 October 2011; the Youth Development Rate be increased by 6p to £4.98 an hour and that the 16-17 year old rate be increased by 4p to £3.68 an hour from 1 October 2011; and that the Apprentice Rate be increased by 10p to

£2.60 an hour

Internet Sex Work -

Teela Sanders 2017-09-18

This book takes readers behind the screen to uncover how digital technologies have affected the UK sex industry. The authors use extensive new datasets to explore the working practices, safety and regulation of the sex industry, for female, male and trans sex workers primarily working in the UK. Insights are given as to how sex workers use the internet in their everyday working lives, appropriating social media, private online spaces and marketing strategies to manage their profiles, businesses and careers. Internet Sex Work also explores safety strategies in response to new forms of crimes experienced by sex workers, as well as policing

responses. The book will be of interest to students and scholars across a range of social science disciplines, including gender studies, sociological studies, criminology and sociology.

Social Theory and Social

Structure - Robert King

Merton 1968

This new printing is not a newly revised edition, only an enlarged one. The revised edition of 1957 remains intact except that its short introduction has been greatly expanded to appear here as Chapters I and II. The only other changes are technical and minor ones: the correction of typographical errors and amended indexes of subjects and names.

Reframing Prostitution - N.

Persak 2014-07-07

Prostitution has always fascinated the public and bewildered policy makers. Reframing Prostitution explores several aspects of this multidimensional phenomenon, examining different ways in which prostitution is and was being practised in different

places and different times, best practices in the regulation of prostitution as well as wider social and psychological issues, such as the construction of prostitution as incivility or of prostitutes as a socially problematic group or as victimised individuals. The book also addresses normative questions with respect to policy making, unmasking the purposes behind certain societal reactions towards prostitution as well as proposing innovative solutions that could reconcile societal fears of exploitation and abuse while meeting the rights and needs of individuals voluntarily involved in prostitution. With contributions across social science disciplines, this international collection presents a valuable discussion on the importance of empirical studies in various segments of prostitution, highlights social contexts around it and challenges regulatory responses that frame our thinking about prostitution, promoting fresh debate about future policy directions in this

area.

Prostitution - Teela Sanders
2009-09-01

This imaginative and comprehensive introduction to the sex industry is as welcome as it is timely.... This is a rewarding and topical book that I would urge all interested parties to consult. Graham Scambler, Professor of Medical Sociology, University College London. A remarkably thorough analysis of prostitution in contemporary society. Situating sex work at the intersection of economy, occupation, and emotion, the authors illuminate the complex forces that shape prostitution within an emerging global order. Bringing their analysis full circle, they close with a helpful exploration of the methods by which researchers are able to investigate an area of such danger and controversy. All in all, a courageous and important book. Jeff Ferrell, Visiting Professor of Criminology, University of Kent, UK, and Professor of Sociology, Texas Christian University, USA. This

excellent text fills a gap in the market as it explores the full range of issues covering sex work, policy and politics....A fascinating and informative text which will become the leading handbook in this area. Dr Louise Westmarland, Senior Lecturer in Criminology, The Open University Many commentators have attempted to analyze and explain the nature of prostitution. However, this is the first textbook to offer a complete overview of the way it operates within contemporary society, its characteristics, organizational structures and cultural contexts. The book also explores how criminal, social and health policies have sought to regulate and control the selling of sex. This introduction to the sociology and criminology of sex work is: " comprehensive - covering all key areas common to the study of the female sex industry and also includes male and transgender sex work, and the sexual exploitation of young people " interdisciplinary - combining sociological

approaches with criminology, criminal justice studies, social policy, health research and sexuality studies " comparative - including the international context of the sex industry, drawing on European and other examples of law, regulation and systems that govern the sex industry " student-focused - offering a lively writing style, case studies, summaries of relevant legislation, study questions and guidance on further reading " accessible - assisting student learning and aiding lecturers in their teaching. Written by leading experts with over 20 years' experience in researching and teaching in the field, this is a must for all criminology, criminal justice and sociology students taking modules in sex industry and prostitution studies. It will also appeal to those in gender studies and social policy.

Building Better Schools with Evidence-based Policy -

Kelly-Ann Allen 2021-04-29

Building Better Schools with

Evidence-based Policy: Adaptable Policy for Teachers and School Leaders provides an extensive set of free-to-use policies for building better schools. The policies included in this book cover a broad range of popular topics for schools that are not readily accessible, and each policy is built on theory, driven by research, and created by experts. Each policy is based on substantial evidence, and this is ensured through the inclusion of contributors who are active and highly reputable in their respective field. Most schools are obliged to write and maintain policy, and not all school leaders have the required skills, time, or expertise to do this effectively. Building Better Schools with Evidence-based Policy: Adaptable Policy for Teachers and School Leaders is a time-saving resource for schools. It aims to address the reported research-to-practice gap in education by delivering accessible evidence-based practice in a ready-to-use adaptable format. All policies

within this book are designed to be adapted and tailored to the unique diversity and needs of each school as reflected by the context and the people that make up the school community. This book is relevant to every person who works in a school – worldwide. Users of this book can rest assured that each policy has been carefully formulated from the current understandings of best practice. This is a practical innovation and an example of how schools can use research evidence in their day-to-day practices. Folklore and the Internet -

Trevor J. Blank 2009-09-15
A pioneering examination of the folkloric qualities of the World Wide Web, e-mail, and related digital media. These studies show that folk culture, sustained by a new and evolving vernacular, has been a key, since the Internet's

beginnings, to language, practice, and interaction online. Users of many sorts continue to develop the Internet as a significant medium for generating, transmitting, documenting, and preserving folklore. In a set of new, insightful essays, contributors Trevor J. Blank, Simon J. Bronner, Robert Dobler, Russell Frank, Gregory Hansen, Robert Glenn Howard, Lynne S. McNeill, Elizabeth Tucker, and William Westerman showcase ways the Internet both shapes and is shaped by folklore

Should prostitution be legalised? The oppression paradigm versus the empowerment paradigm -
Julius T. Jaesen, II 2018-06-26
Essay from the year 2018 in the subject Sociology - Gender Studies, grade: 1, , course: Gender Sexuality, language: English, abstract: Prostitution is defined as a form of non-marital sexual activity characterized by financial reward and absence of long-term fidelity between two parties. Prostitution has been

Downloaded from
legacy.opendemocracy.net

widely debated, condemned for its immoral and degrading nature. On the other hand, there are liberal feminists who have counter argued saying that prostitution is very empowering. The controversy surrounding prostitution has divided feminists worldwide. Radical feminists are of the opinion that prostitution is an institution of male dominance that exploits economically vulnerable and emotionally damaged women for the sake of male pleasure. In this regard, prostitutes become involuntary victims of patriarchy or conscious participants in the degradation of women. This therefore has impacts on all women as a group as prostitution continually affirms and reinforces patriarchal definitions of women as having a primary function to serve men sexually. Conversely, liberal feminists find in prostitution a practice of women's resistance to and sexual liberation from norms and traditional moral precepts of sexuality that have long

served to control and subordinate women. Others see prostitution as a means of wrestling patriarchal control over women's sexuality that women should be at liberty to do. Prostitution therefore raises moral and legal questions. The legal question is should the practice be criminalized? In addition, the moral question is, is it wrong to sell or buy sex? These are questions I will endeavor to answer which are informed by the lived realities of women who make their living through prostitution. Prostitution or the selling of sex is, as some would call it, one of the oldest professions in the world as it has been there since time immemorial. Criminalizing prostitution seems to be a futile exercise as it is failing to achieve the intended results that of deterring other possible perpetrators; instead it just frustrates the women who engage in it as they are essentially constantly harassed by the police without any prosecution. Why are there double standards as regards

prostitution; why is it that it is only the sellers and not the buyers who are penalized? Criminalization creates a culture permitting violence against sex workers and sanctions violence and discrimination against them. Sex workers are also afraid to report crimes against them, knowing that police may arrest them or may not take their claims seriously.

Sociology, Science, and the End of Philosophy - Sal Restivo
2017-07-06

This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations (in particular about maths, logic, the gene, the brain, god, and robots) perpetuate the false reality that values and politics are separate from scientific knowledge and its applications. These ideas are reinforced by cultural myths about free will and individualism. Restivo makes a compelling case for a synchronistic approach in the study of these notoriously 'hard' cases, arguing that their

significance reaches far beyond the realms of science and technology, and that their sociological and political ramifications are of paramount importance in our global society. This innovative work deals with perennial problems in the social sciences, philosophy, and the history of science and religion, and will be of special interest to professionals in these fields, as well as scholars of science and technology studies.

A-Z Guide to Modern Social and Political Theorists - Professor Stuart Sim
2014-06-03

The A-Z Guide to Modern Social and Political Theories is a companion volume to the already published A-Z Guide to Modern Literary and Cultural Theorists. It ranges widely through the social sciences and related areas to identify thinkers who have had a major impact on the development of modern social and political theory and given clear, accessible summaries of their work. While the accent is on the later twentieth century,

several up-and-coming theorists are included to ensure a contemporary edge to the volume, classic names in the field from the earlier twentieth century are not neglected, and the collection also delves back into the nineteenth century for such founding figures of the social sciences as Marx and Comte. The volume is therefore both up-to-date and mindful of the sources of modern debates.

Common Prostitutes and Ordinary Citizens - J. Laite
2011-12-02

Between 1885 and 1960, laws and policies designed to repress prostitution dramatically shaped London's commercial sex industry. This book examines how laws translated into street-level reality, explores how women who sold sex experienced criminalization, and charts the complex dimensions of the underground sexual economy in the modern metropolis.

Paying for Pleasure - Teela Sanders
2013-05-13

Drawing on original empirical data with men who buy sex,

this book takes a fresh look at the relationships clients have with female sex workers. The core questions that form the backbone of the research are not only the expected inquiry into 'why men buy sex', but also into the sociological and psychological processes that men encounter in order to enter an assumed 'deviant' sexual behaviour as part of their everyday lives. These sociological processes of finding, negotiating and buying sexual services are complicated by the stigma directed towards men who buy sex. Exactly how do men behave with sex workers; what are their relationships like; what emotions are involved and can intimacy be bought?

Questioning the dichotomy made between commercial and non-commercial relationships, the data suggests that intimacy and commerce are compatible. Managing secrecy, stigma and the consumption of intimacy takes this book into some of the more challenging theoretical areas of masculinity and emotional consumption in

contemporary society. Drawing some parallels from the author's earlier book *Sex Work: A Risky Business*, the book offers insights into why engagement in commercial sex is prolific as sexual culture is transformed in late modernity.

New Sociologies of Sex Work - Dr Kate Hardy

2012-12-28

Sex work studies have seen an expansion in publications over the past decade, drawing together disciplines from across the social sciences, namely sociology, criminology and social policy. There has, however, been a tendency for research and writing to focus on the more obvious aspect of the sex industry - the visible elements of female street prostitution and those features which attract media attention such as the criminalised aspects of the sex trade. The sex industry is diverse in terms of its organisation, presentation, participants and how it is located in the broader context of globalisation and regulation; there is a need for publications which

demonstrate this breadth. This book makes an outstanding contribution to the sociology of sex work through advancing theoretical, policy, methodological and empirical ideas as each chapter pushes the boundaries of a specific area by offering new and critical research as well as commentary.

[Queer Methods and Methodologies](#) - Catherine J. Nash 2016-04-15

Queer Methods and Methodologies provides the first systematic consideration of the implications of a queer perspective in the pursuit of social scientific research. This volume grapples with key contemporary questions regarding the methodological implications for social science research undertaken from diverse queer perspectives, and explores the limitations and potentials of queer engagements with social science research techniques and methodologies. With contributors based in the UK, USA, Canada, Sweden, New Zealand and Australia, this

truly international volume will appeal to anyone pursuing research at the intersections between social scientific research and queer perspectives, as well as those engaging with methodological considerations in social science research more broadly.

Experience and Identity - Anna Lindberg 2001

Uncertain Vision - Georgina Born 2011-10-31

The BBC is the world's most famous and powerful cultural institution. Throughout its 75 year existence it has attracted criticism, controversy and political bullying, as well as epitomising globally the heights to which public, non-commercial broadcasting can aspire. It remains the model for public broadcasters around the world. *Uncertain Vision* is a unique and fascinating portrait of this venerable institution in changing and uncertain times. It is based on the most extensive independent research ever conducted inside the BBC, during which Georgina Born was allowed

unprecedented access to employees from all ranks of the organisation and gives an extraordinary portrait of the corporation during the later 1990s, the last years of the regime of the former director general John Birt. Its insight into the workings and problems of the BBC is unparalleled and it does not flinch from criticising the destructive policies of the Birt period. It promises to be a stimulating, controversial and definitive portrait of the most fascinating period in the history of the greatest broadcasting organisation in the world.

Prostitution - James Elias 1998

How did whoring and hustling begin? Can one enjoy the work? Why do people pay for sex? What is prostitution like in other countries? What is the future of prostitution? This collection breaks new ground on a sensitive topic by bringing scholars, therapists, and sex workers together to study not only the profession but those who seek such services. Illustrated.

Intimate Labors - Eileen Boris
2010-06-22

This book advances debates over the relationship between care and economy through the concept of intimate labor—care, domestic, and sex work—and thus charts relations of race, class, gender, sexuality, and citizenship in the context of global economic transformations.
