**Viagra (sildenafil Citrate)** - Larry Katzenstein 2001

Manipulating Science for the Promotion of Viagra - Evidence from - Dominika A. Boczula 2008-03-26

Medical treatment is by definition an invested business - its basic design presumes financial investment and gains coupled with patients seen as nothing more than customers. This book's core argument is that the unprecedented success of Viagra worldwide is not the result of an exciting, compassionate scientific breakthrough bringing relief to the desperate or dying. Rather, commercial interests have created a socially desirable but medically limited product -ironically, by denying the fundamentally social nature of sex. By reducing sex to penile performance, then equating penile performance with masculine identity, a man's self-worth and social worth are reduced to the hardness and sustainability of his erections. The book's approach is the clear illustration of the medicalization of discontent facilitated by the passage of legislation permitting direct-to-consumer drug advertising, online drug sales, and the entanglement of health professionals and drug marketers.

**Viagra** - Susan C. Vaughan 1998

Viagra is a medicine that you can use for treating the sexual erectile dysfunction problems in men. This medicine was initially formulated to address the people with high blood pressure as it lowers the blood pressure. But now, Viagra is one of the highly used and popular medicines for increasing sex drive in bed. Viagra is a branded medicine for sildenafil citrate. Viagra's competitors are Cialis (Tadalafil) and Levitra (vardenafil). Men face the problem of erectile dysfunction due to blocked blood flow to the penile area and hence experience low sex drive. There can be many reasons for the blocked blood flow. Your lifestyle, your diet, smoking, alcohol, side effects of certain medicines, stress, or other reasons can cause erectile dysfunction/low sex drive. Whatever is the reason, the PDE5 enzyme in the body stops the blood flow, and hence, man will not be able to get an erection for sex pleasure and suffer from erectile dysfunction. Viagra acts an inhibitor of PDE5 enzyme and then the blood flow to the penile area gets normal and the muscles around the penile area also get relaxed. So, make it easy for the man to get an erection. But one important thing to remember when you are taking Viagra is you need to be sexually active. If you are not sexually stimulated, then Viagra does not work on your body and erectile dysfunction will not be treated.
