Victims in Criminal Procedure Douglas E. Beloof 2006 In the new and revised 2005 edition of this outstanding casebook, authors Professor Doug Beloof, Judge Paul Cassell, and victims attorney Stephen Twist review the expanding role of the crime victim in criminal procedure. Crime victims law has been neglected in the education of law students even though it represents the single greatest revolution in criminal procedure in the last twenty years. The book addresses that neglect and provides lively and provocative materials about how victims fit into the contemporary criminal

justice process. The casebook examines the role of the crime victim from the early stages of the criminal process (investigation and charging) through pre-trial discovery, plea bargaining, trial, and sentencing. The book includes not only recent caselaw concerning crime victims' rights, but also law review articles, victim impact statements, and other interesting materials. The authors provides the perfect set of reading materials for a full course on victims law, a seminar style discussion class, or supplemental materials for a conventional criminal procedure course. A teacher's manual will be available.

Raised on the Registry Nicole Pittman 2013 This report details the harm public registration laws cause for youth sex offenders. The laws, which can apply for decades or even a lifetime and are layered on top of time in prison or juvenile detention, require placing offenders' personal information on

online registries, often making them targets for harassment, humiliation, and even violence. The laws also severely restrict where, and with whom, youth sex offenders may live, work, attend school, or even spend time.

Psychiatry in Law/law in Psychiatry: Psychiatry in law Ralph Slovenko 2002 Since c. 1960 the interplay of psychiatry and law has emerged from an elective seminar to a topic of national prominence. In its breadth and coverage, Ralph Slovenko's *Psychiatry and Law/Law in Psychiatry* provides a critical exposition of the many practices and basic premises of law and psychiatry. It is a complete text for psychiatry residents or law students and an invaluable reference for practicing professionals in each field. New approaches for practitioners are provided as well as material to assist them in preparing and documenting their cases. *Psychiatry and Law/Law in Psychiatry* is rooted in Dr. Slovenko's previously published work, *Psychiatry and Law* (Little & Brown 1973), which received the American Psychiatric Association's prestigious Manfred Guttmacher award.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Knowledge as Power Wayne A. Logan 2009-07-21 Societies have long sought security by identifying potentially dangerous individuals in their midst. America is surely no exception. *Knowledge as Power* traces the evolution of a modern technique that has come to enjoy nationwide popularity—criminal registration laws. Registration, which originated in the 1930s as a means of monitoring gangsters, went largely unused for decades before experiencing a dramatic resurgence in the 1990s. Since then it has been complemented by community notification laws which, like the "Wanted" posters of the Frontier West, publicly disclose registrants' identifying information, involving entire communities in the criminal monitoring process. *Knowledge as Power* provides the first in-depth history and analysis of criminal registration and community notification laws, examining the potent forces driving their rapid nationwide proliferation in the 1990s through today, as well as exploring how the laws have affected the nation's law, society, and governance. In doing so, the book provides compelling insights into the manifold ways in which registration and notification reflect and influence life in modern America.

Employment Screening and Non-Conviction Information Terry Thomas 2019-09-14 This book provides a critical overview of the policy frameworks underpinning the contemporary practices of non-conviction information disclosure during pre-employment 'screening'. It questions how a man can walk free from a criminal court as an innocent person only to have all the court details of his acquittal passed to any potential employer. Despite several million 'enhanced' criminal background checks being performed each year, there has been little discussion of these issues within academic literature. Non-conviction information, also known as 'police intelligence', is a less well-known check provided alongside the criminal record check. This book seeks to define what is meant by non-conviction information and to provide a clear and simple explanation of how this decision making process of police disclosure to employers is made. It also considers the extent to which these practices have been subjected to legal challenges within the UK and explores how public protection is balanced against individual rights.

Guide for Implementing Or Enhancing an Endangered Missing Advisory (EMA) Paul Murphy 2011-06-01 There are some cases of missing children that do not meet the threshold for the issuance of an AMBER Alert. The same concern applies to missing persons older than 18, who fall outside AMBER Alert's purview. The EMA was crafted in 2005 to fill this gap. This report describes how a community can establish a task force to create an EMA plan, which creates voluntary partnerships to recover missing persons who do not fit the AMBER Alert criteria but who may be in danger. EMAs help law enforcement notify the general public that someone is missing and ultimately save lives. This guide provides directions for developing, activating, and sustaining an EMA plan and includes sample plans and press releases. A print on demand report.

Handbook of Public Protection Mike Nash 2010-09-27 Public protection has become an increasingly central theme in the work of the criminal justice agencies in many parts of the world in recent years. Its high public profile and consequent political sensitivity means that growing numbers of criminal justice professionals find their daily work load dominated by the assessment and management of high risk of harm offenders. Developments such as sex offender registers and (in the UK) Multi Agency Public Protection Arrangements (Mappa) have made this issue not only a core activity for police, probation and prison services, but to a range of other organizations as well, in particular social work and the health services. Partnership has become central to the concept of public protection. At the same time the concept of public protection has occasioned increased political debate. Protecting the public from high risk or dangerous offenders has become an international issue and has increasingly shaped criminal justice policy. This text brings together leading authorities in the field, providing authoritative coverage of the theory and practice of public protection, both in the UK and internationally. It provides a critical review of contemporary public protection practice as well as up-to-date research and thinking in the field.
