*Chaldean-Americans* - Mary C. Sengstock 1982

Chaldean Americans in Detroit, Michigan, a growing community of Roman Catholic immigrants from Iraq, are the focus of this study. A description is given of the Detroit Chaldean community centers around three key institutions, namely the church, the family, and the ethnic occupation or community economic enterprise, and of how these institutions have been affected by the migration experience and by contact with the new culture. An analysis of the social setting of migration examines religious and economic determinants of migration to America,

migration effects on the Detroit community, and Chaldeans' relationships with other social groups in Detroit. An exploration of Chaldeans' adaptation to their new setting considers assimilation and acculturation processes, changes in social structure and values, creation of a balance between old country patterns and new practices, and the development of an ethnic identity and a sense of nationalism. Ethnic conflicts and accommodation processes that arise from efforts to achieve the balance between old and new are explored, and it is suggested that family and friendship ties will offset the divisive effects of conflict and American liberalism and keep the Chaldean community from disintegrating. Finally, an exploration of the future direction of American ethnicity points to the need for unity in a culturally diverse society.

a plan to keep himself free from the town's marriage-minded society mothers. He pretends to be engaged to the lovely Daphne Bridgerton. After all, it isn't as if the brooding rogue has any real plans to marry - though there is something about the alluring Miss Bridgerton that sets Simon's heart beating a bit faster. And as for Daphne, surely the clever debutante will attract some very worthy suitors now that it seems a duke has declared her desirable. But as Daphne waltzes across ballroom after ballroom with Simon, she soon forgets that their courtship is a complete sham. And now she has to do the impossible and keep herself from losing her heart and soul completely to the handsome hell-raiser who has sworn off marriage forever!

*Multiword expressions -  
Manfred Sailer*

Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the

application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar. Cohen 2014-02-15

Biomedical Natural Language Processing is a comprehensive tour through the classic and current work in the field. It discusses all subjects from both a rule-based and a machine learning approach, and also describes each subject from the perspective of both biological science and clinical medicine. The intended audience is readers who already have a background in natural language processing, but a clear introduction makes it accessible to readers from the fields of bioinformatics and computational biology, as well. The book is suitable as a reference, as well as a text for advanced courses in biomedical natural language processing and text mining.

. This book is great, from start to finish." --Hypable Get ready for one deadly weekend in this twisting thriller for fans of Pretty Little Liars and One of Us is Lying that explores just how far the elite at an English boarding school will go. Greer MacDonald has just started as a scholarship student at the

exclusive St. Aidan the Great boarding school, known to its privileged pupils as STAGS. STAGS is a place where new things--and new people--are to be avoided. And in her first days there, Greer is ignored at best and mocked at worst by the school's most admired circle of friends, the Medievals. So, naturally, Greer is taken by surprise when the Medievals send her an invitation to a sought-after weekend retreat at the private family estate of their unofficial leader, Henry de Warlencourt. It's billed as a weekend of "huntin' shootin' fishin'." As the weekend begins to take shape, it becomes apparent that beyond the luxurious trappings, predators are lurking, and they're out for blood. [Dictionary of Louisiana French](#) - Albert Valdman 2009 The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides

the most complete information available for each entry.

Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane .

This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers. Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process, from annotation scheme design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types, including

morpho-syntactic tagging, syntactic analyses, a range of semantic analyses (semantic roles, named entities, sentiment and opinion), time and event and spatial analyses, and discourse level analyses including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.
