Not in My Family - Roger Frie 2017

Roger Frie explores what it means to discover his family's legacy of a Nazi past. Using the narrative of his grandfather as a starting point, he shows how the transfer of memory from one German generation to the next keeps the forbidding reality of the Holocaust at bay.

Betrayed as Boys - Richard B. Gartner 2001-01-03

More than one in six boys in the United States is sexually victimized by the age of 16. Yet in the growing professional literature on child sexual abuse, few books focus specifically on the experience of victimized boys and men. This much-needed volume examines how sexual betrayal affects boys and the ways they carry this hurt into adulthood. Blending psychoanalytic understanding with insights from trauma-oriented theory and practice, Richard B. Gartner presents effective strategies for meeting the unique therapeutic needs of men with sexual abuse histories. Filled with evocative clinical material, the book draws readers into the direct

experience of these clients, the therapists who work with them, and the constantly shifting relational world they inhabit.

Beyond Betrayal - Richard B. Gartner 2005-04
Providing empowering action steps and written specifically for survivors of male sexual abuse as well as their spouses, partners, and loved ones, *Beyond Betrayal* is based on Richard Gartner's decades of experience as a psychologist, psychoanalyst, and advocate for sexually abused men. Covering both male and female abuse of boys and young men, Dr. Gartner explores the different types of abuse, from sexual abuse with and without touch to covert abuse to trauma, revealing the profound impact of sexual betrayal by such caretakers as clergy, family, teachers, babysitters, and health professionals. Gartner explains how as a child one trusts out of necessity and how the betrayal of that trust ravages one's self-concept as a man while also wreaking havoc on one's relationships.

Treatment of Complex Trauma - Christine A.

Courtois 2012-01-01

This insightful guide provides a pragmatic roadmap for treating adult survivors of complex psychological trauma. Christine Courtois and Julian Ford present their effective, research-based approach for helping clients move through three clearly defined phases of posttraumatic recovery. Two detailed case examples run throughout the book, illustrating how to plan and implement strengths-based interventions that use a secure therapeutic alliance as a catalyst for change. Essential topics include managing crises, treating severe affect dysregulation and dissociation, and dealing with the emotional impact of this type of work. The companion Web page offers downloadable reflection questions for clinicians and extensive listings of professional and self-help resources. See also Drs. Courtois and Ford's edited volumes, *Treating Complex Traumatic Stress Disorders (Adults)* and *Treating Complex Traumatic Stress Disorders in Children and*

Adolescents, which present research on the nature of complex trauma and review evidence-based treatment models.

Soul Murder Revisited - Leonard Shengold
2000-09-10

Annotation A decade after the publication of his highly acclaimed book *Soul Murder*, Dr. Leonard Shengold reflects anew on the circumstances and the consequences of willful abuse and neglect of children. With compelling examples from literature and from clinical cases, Dr. Shengold describes techniques of adaptation and denial by victims, the psychopathology of soul murder, and therapy techniques for restoring the capacity to love.

Standing in the Spaces - Philip M. Bromberg
2014-03-05

Early in these essays, Bromberg contemplates how one might engage schizoid detachment within an interpersonal perspective. To his surprise, he finds that the road to the patient's disavowed experiences most frequently passes

through the analyst's internal conversation, as multiple configurations of self-other interaction, previously dissociated, are set loose first in the analyst and then played out in the interpersonal field. This insight leads to other discoveries. Beneath the dissociative structures seen in schizoid patients, and also in other personality disorders, Bromberg regularly finds traumatic experience -- even in patients not otherwise viewed as traumatized. This discovery allows interpersonal notions of psychic structure to emerge in a new light, as Bromberg arrives at the view that all severe character pathology masks dissociative defenses erected to ward off the internal experience of trauma and to keep the external world at bay to avoid retraumatization. These insights, in turn, open to a new understanding of dissociative processes as intrinsic to the therapeutic process per se. For Bromberg, it is the unanticipated eruption of the patient's relational world, with its push-pull impact on the analyst's effort to maintain a

therapeutic stance, that makes possible the deepest and most therapeutically fruitful type of analytic experience. Bromberg's essays are delightfully unpredictable, as they strive to keep the reader continually abreast of how words can and cannot capture the subtle shifts in relatedness that characterize the clinical process. Indeed, at times Bromberg's writing seems vividly to recreate the alternating states of mind of the relational analyst at work. Stirring evocative in character and radiating clinical wisdom infused with compassion and wit, *Standing in the Spaces* is a classic destined to be read and reread by analysts and therapists for decades to come.

Group Therapy for Adult Survivors of Childhood Abuse - LORRAINE. MCCOLGAN 2022-03-18
This book presents the therapist with a reflective and robust framework for group treatment that promotes an end to the shame and secrecy so frequently experienced by survivors. Through a series of tools such as visualisations and art

exercises, the practitioner is guided through the process of establishing and running a group in this modality. The synthesis of both an educational and a process-based model is imbued with a sense of warmth and a deep understanding of this client group. Themes such as self-soothing, boundaries, inner-child work, endings, and ways forward drive this therapeutic approach. Taking group work as the optimum matrix for change with this client population, this model provides a convincing rationale for the establishment of said work as best practice in the institutions that provide for their care. Practicing therapists and mental health nurses will find this new model of therapy an instrumental resource in their approach to treatment for survivors of trauma and abuse.

Treating Adult Survivors of Childhood Emotional

Abuse and Neglect - Elizabeth K. Hopper
2021-08-09

"Component-based psychotherapy for childhood abuse is not a sequenced model, but it deliberately attends to the following four components: (1) relational, focused on client and therapist attachment styles and relational patterns with the intent of building a secure attachment as the context of the remaining work; (2) self-regulation, not only of emotions but of cognitions and behavior; (3) dissociative parts of self and their identification and elicitation; and (4) narrative construction of a coherent self. CPB does so in a way that is client-centered, flexible, and fluid, yet it is also systematic and has a structure. Each chapter offers observations of false starts, missed opportunities, pivotal interactions, and alternate approaches in response to particular exchanges between therapist and client, and highlights and builds upon interactions and interpretations perceived to bear promise"--

The Supervisory Relationship - Mary Gail

Frawley-O'Dea 2012-02-21

In the past two decades, many psychodynamic therapists have begun to view the relational processes taking place between patient and therapist as a central source of transformation. Yet traditional paradigms of clinical supervision, focusing primarily on didactic teaching, have limitations for training therapists to work in these new ways. This groundbreaking volume is the first to elaborate a comprehensive contemporary model of supervision. Using a wealth of examples and vignettes, the authors show how working within the vicissitudes of the supervisory relationship can allow the supervisee to gain a deeper understanding of the treatment method being taught. Key topics discussed include issues of power and authority, regression in the supervisory relationship, rethinking the "teach/treat" question, parallel process as a relational phenomenon, working with group process in case conference, and the

role of the organization in supporting training.

This is a richly informative resource for psychologists, psychiatrists, social workers, psychoanalysts, and others involved in clinical supervision and training. It also will serve as a text for courses in supervision and organizational psychology.

Trauma and Countertrauma, Resilience and

Counterresilience - Richard B. Gartner

2016-11-18

Treating traumatized patients takes its toll on the treating clinician, giving rise over time to what Richard B. Gartner terms countertrauma in the psychoanalyst or therapist. Paradoxically, a clinician may also be imbued with a sense of optimism, or counterresilience, after learning how often the human spirit can triumph over heartbreakingly tragic experiences. *Trauma and Countertrauma, Resilience and Counterresilience* brings together a distinguished group of seasoned clinicians, both trauma specialists and psychoanalysts. Their

personal reflections show what clinicians all too rarely dare to reveal: their personal traumatic material. They then discuss how they develop models for acknowledging, articulating, and synthesizing the countertrauma that arises from long-term exposure to patients' often-harrowing trauma. Writing openly, using viscerally affecting language, the contributors to this exceptional collection share subjective and sometimes intimate material, shedding light on the inner lives of people who work to heal the wounds of psychic trauma. By the same token, many of these clinicians describe how working intimately with traumatized individuals can affect the listener positively, recounting how patients' resilience evokes counterresilience in the therapist, allowing the clinician to benefit from ongoing contact with patients who deal bravely with horrific adversity. Paradoxically, a clinician may be imbued with a sense of optimism after learning how often the human spirit can triumph over heartbreakingly tragic

experiences. Trauma and Countertrauma, Resilience and Counterresilience will appeal to psychoanalysts, psychoanalytic psychotherapists, and trauma experts, offering a valuable resource to those beginning their careers in mental health work, to teachers and supervisors of trauma therapists, to experienced clinicians struggling with burnout, and to anyone who wants to understand the psychotherapeutic process or indeed the human condition.

Dare to Be Human - Michael Shoshani

Rosenbaum 2013-05-13

Daniel is 35, successful, a high level professional and an accomplished academic - yet he is also a virgin, who fears that he will spend the rest of his life alone. More importantly, Daniel has existed in an emotional bubble all of his life, and has had no intimate friendships. In other words, he is not fully alive, and seeks psychotherapy because he is haunted by not understanding what is wrong with him. He is attractive to women, yet as soon as a woman tries to get close to him, he runs away. Lacking an inner foundation, he fears that women will annihilate him, like his overbearing mother who abused him as a child. Quite simply, this book is an unprecedented achievement, taking the reader into actual psychoanalytic sessions and sharing with the reader Michael Shoshani Rosenbaum's dialogues with Daniel, vividly illustrating his pain and struggle to transcend his existential plight. Furthermore, as the author of two sections of the book, Daniel himself provides a

rare, insightful view from the other side of the couch, illuminating the challenge and change experienced within the other half of the therapeutic relationship. It is a compelling psychological adventure, fusing together the intimacy of the therapy with an account of the revolutionary changes that have occurred in the practice of psychotherapy and psychoanalysis over the last decades. Daniel is like no one else, and yet he is everyone, making this book a must for every person searching for self-knowledge, allowing the reader to identify with Daniel and his struggle to become human.

The Dissociative Mind - Elizabeth F. Howell
2013-05-13

Drawing on the pioneering work of Janet, Freud, Sullivan, and Fairbairn and making extensive use of recent literature, Elizabeth Howell develops a comprehensive model of the dissociative mind. Dissociation, for her, suffuses everyday life; it is a relationally structured survival strategy that arises out of the mind's

need to allow interaction with frightening but still urgently needed others. For therapists dissociated self-states are among the everyday fare of clinical work and gain expression in dreams, projective identifications, and enactments. Pathological dissociation, on the other hand, results when the psyche is overwhelmed by trauma and signals the collapse of relationality and an addictive clinging to dissociative solutions. Howell examines the relationship of segregated models of attachment, disorganized attachment, mentalization, and defensive exclusion to dissociative processes in general and to particular kinds of dissociative solutions. Enactments are reframed as unconscious procedural ways of being with others that often result in segregated systems of attachment. Clinical phenomena associated with splitting are assigned to a model of “attachment-based dissociation” in which alternating dissociated self-states develop along an axis of relational trauma. Later chapters of the book

examine dissociation in relation to pathological narcissism; the creation and reproduction of gender; and psychopathy. Elegant in conception, thoughtful in tone, broad and deep in clinical applications, Howell takes the reader from neurophysiology to attachment theory to the clinical remediation of trauma states to the reality of evil. It provides a masterful overview of a literature that extends forward to the writings of Bromberg, Stern, Ryle, and others. The capstone of contemporary understandings of dissociation in relation to development and psychopathology, *The Dissociative Mind* will be an adventure and an education for its many clinical readers.

Psychoanalysis and Society's Neglect of the Sexual Abuse of Children, Youth and Adults - Arnold Wm. Rachman 2021-11-15

This book takes a comprehensive look at the understanding and treatment of child sexual abuse in psychoanalytic theory and practice, and in society as a whole. This book demonstrates how prophetic Ferenczi's ideas about sexual abuse and trauma were, and how relevant they are for contemporary psychoanalysis and society. Sexual abuse, its traumatic effect, and

the harm caused to children, youth, and adults will be described in the neglect of confronting sexual abuse by psychoanalysis and society. This neglect will be discussed in chapters about the abuse of children by religious leaders, students by teachers, youth in sports by coaches, and aspiring actors by authorities in the entertainment industry. It covers key topics such as why there has been silence about abuse in psychoanalysis, psychoanalytic theories, and practices that can be counterproductive or even harmful, case studies of abuse in the wider community, and how psychoanalysis as a profession can do better in its understanding and treatment of child sexual abuse both in psychoanalytic treatment and in its interaction with other parts of society. This book appeals to all psychoanalysts and psychoanalytic psychotherapists, as well as scholars interested in the history of psychoanalysis.
