

Women And The Sexual Division Of Labor In The Caribbean

Defining Women - Rosemary Pringle 1992-04-08

Defining Women is a major in-depth analysis of the social, economic and political position of women in contemporary societies. It explores the ways in which social institutions, practices and discourse define women and their position in present-day societies. The book examines the essential debates about the social construction of gender divisions in and by the key institutions of the labour market and the state. Focussing on notions of power, dependence and equality, it addresses questions of the differences between women and men, and between women themselves, in the economy and civil society. Women's political struggles to challenge their subordinate position are also assessed. The recognition of the diverse interests of women currently poses a real challenge to the central project of feminism, but Defining Women confidently argues for its future. This book will be widely used as a text book in feminism and women's studies and will have a broad interdisciplinary appeal.

Women and the Sexual Division of Labour in the Caribbean - Keith Hart 1996

Women and the Sexual Division of Labour in the Caribbean is a report of a series of seminars held in 1987. It consists of a broad essay in evolutionary anthropology, a review of labour market theories, an application of general theory to the social history of the sexual division of labour in Trinidad and Tobago, and four case studies of women's work in Jamaica - the country where the original presentations were made.

Gender and Macroeconomic Policy - Raj Nallari 2011-01-05

Mainstream economic analysis has traditionally overlooked gender. The individual the basic category of analysis was regarded as genderless. Neither gender discrimination nor segmentation and segregation within the labor market or within the household was present. Contributions

from development theory, new household economics (NHE), labor economics, and feminist analysis have done much to change this.

Focusing on gender equality by which we mean equality in opportunity, inputs, and outcome has yielded important insights for the growth and development of an economy. But we are still at the cusp. While there have been huge improvements in recognizing gender as an analytical category at the microeconomic level, the macroeconomic implications of gender equality remain undeveloped. Engendering macroeconomics is an important and valid research and policy area. Over the past three decades, economic development has generally affected women differently than men in the developing world. At the same time, gender relations have affected macroeconomic outcomes. This volume examines the research and policy implications of engendering macroeconomic policy.

Engendering Wealth And Well-being - Cathy Rakowski 2018-02-19

The new international division of labor and the imposition of structural adjustment on Third World countries has necessitated a reexamination of development policies and a reevaluation of the role of gender in their success or failure. Although women often bear the heaviest burden under structural adjustment, there is also considerable evidence of women being empowered through their responses to the challenges of economic restructuring. Based on case study material from Eastern Europe, the Islamic nations, Africa, China, and Latin America, this volume explores the significant contributions women make to the wealth and well-being of their families and nations. The contributors argue persuasively that women may hold the key to sustainable development, an increasingly critical issue at a time when policymakers are reconsidering the full costs and benefits of a growth-fixated development model. One of the

first to embody the new “gender and development” paradigm, this book reports on research at the frontiers of knowledge and theory about the gendered outcomes of economic transformation, restructuring, and social change. By incorporating “voices from the South,” it makes a provocative addition to our understanding of the political economy of development and of the relationship between world ecology and the world economy.

Rereading Women in Latin America and the Caribbean - Jennifer Abbassi 2002-03-26

This indispensable text reader provides a broad-ranging and thoughtfully organized feminist introduction to the ongoing controversies of development in Latin America and the Caribbean. Designed for use in a variety of college courses, the volume collects an influential group of essays first published in *Latin American Perspectives*. Each part is organized into thematic sections that focus on work, politics, and culture, and each includes substantive introductions that identify key issues in the scholarly literature on women and gender in the region.

Demonstrating the rich, multidisciplinary nature of Latin American studies, these essays promote critical thinking about women's place and power, about theory and research strategies, and about contemporary economic, political, and social conditions. They convincingly show why women have become an increasingly important subject of research, acknowledge their gains and struggles over time, and explore the contributions that feminist theory has made toward the recognition of gender as a relevant—indeed essential—category for analyzing the political economy of development.

Gender Segregation in the Barbadian Labour Market 1946 and 1980 - Roslyn Lynch 1995

Gender, Women and Development - Fabiola Campillo 1993

Researching Women In Latin America And The Caribbean - Edna Acosta-belen 2019-06-04

This volume represents more than just a collection of chapters and

bibliographic sources. For us, it provides another example of collective solidarity, hard work, and a relentless commitment to contribute to the process of advancing and transforming knowledge about women's condition. It attempts to update and assess how scholarship on women has impacted different disciplines and fields and examines the multivariate conditions and responses to immediate and long-term realities generated by women from different Latin American and Caribbean countries. The editors hope that this publication, modest as it may be, will be a useful tool to other researchers, educators, and students in their efforts at pursuing and expanding the knowledge and visions that will make our different societies more just and liberating for all their citizens.

Women Workers - M. Idris Siddiqui 2004

With special reference to Eritrea.

Feminism/ Postmodernism/ Development - Marianne H Marchand 2003-09-02

In a world where global restructuring is leading to both integration and fragmentation, the meaning and practice of development are increasingly contested. New voices from the South are challenging Northern control over development. *Feminism/Postmodernism/Development* is a comprehensive study of this power struggle. It examines new issues, “voices”, and dilemmas in development theory and practice. Drawing on the experiences of women from Africa, Latin America, and Asia, as well as women of colour, this collection questions established development practices and suggests the need to incorporate issues such as identity, representation, indigenous knowledge, and political action.

Feminism/Postmodernism/Development acknowledges the importance of Third World and minority women's experiences. It acknowledges their importance for development and suggests that postmodernist insights can enhance their quest for empowerment.

Who Pays for the Kids? - Nancy Folbre 1994

“How are the costs of caring for ourselves, our children and other dependents distributed among members of society? These costs are largely paid by women, both inside and outside the money economy.” -

introduction.

Unpacking the Fashion Industry - Annie Phizacklea 2023-01-20

First Published in 1990 *Unpacking the Fashion Industry* spotlights a side of the industry the consumer never sees. What is the fashion clothing industry really like? What lies behind the glamour of the cat-walks and the glossy magazines? Annie Phizacklea focuses on the small firm sector of fashionwear production, based predominantly on ethnic entrepreneurship and cheap female labour and analyses the complex interaction of gender, class and racism in this sector of the industry. This book is a must read for scholars and researchers of sociology, gender studies and social anthropology.

Gendered Realities - Patricia Mohammed 2002

This reader presents an understanding of Caribbean feminist scholarship. The essays deal with diverse topics including the role of women in Caribbean art; the development of "women's history" and "gendered history"; the representation of masculinity in Caribbean feminist thought; and more.

Gender Equality in Peru Towards a Better Sharing of Paid and Unpaid Work - OECD 2022-06-23

The OECD review of Gender Equality in Peru: Towards a Better Sharing of Paid and Unpaid Work is the second of a series focusing on Latin American and the Caribbean countries. It compares gender gaps in labour and educational outcomes in Peru with other countries.

Retrieving Women's History - S. Jay Kleinberg 1988

Gender and Development - Janet Momsen 2009-12-16

Global financial problems, rising food prices, climate change, international migration - increasingly by women - conflict situations in many poor countries, the spread of tropical diseases such as malaria and dengue fever and the increased incidence of HIV/AIDS and TB, and changing patterns of trade have all added new dimensions to gender issues in developing countries. These problems are frequently being brought to public attention in the media and through long-haul tourism. Consequently students' interest in gender and development has grown

considerably in the last few years. This updated second edition provides a concise, accessible introduction to Gender and Development issues in the developing world and in the transition countries of Eastern and Central Europe. The nine chapters include discussions on changes in theoretical approaches, gender complexities and the Millennium Development Goals; social and biological reproduction including differing attitudes to family planning by states and variation in education and access to housing; differences in health and violence at major life stages for women and men and natural disasters and gender roles in rural and urban areas. The penultimate chapter considers the impact of broad economic changes such as the globalization of trade and communications on gender differences in economic activity and the final chapter addresses international progress towards gender equality as measured by the global gender gap. The text is particularly strong on environmental aspects and the new edition builds on this to consider the effects of climate change and declining natural resources illustrated by a case study of changing gender roles in fishing in India. There is also enhanced coverage of topics such as global trade, sport as a development tool, masculinities, and sustainable agriculture. Maps, statistics, references and boxed case studies have been updated throughout and their coverage widened. *Gender and Development* is the only broad based introduction to the topic written specifically for a student audience. It features student friendly items such as chapter learning objectives, discussion questions, annotated guides to further reading and websites. The text is enlivened throughout with examples and case studies drawn from the author's worldwide field research and consultancies with international development agencies over four decades and her experience of teaching the topic to undergraduates and postgraduates in many countries. It will be an essential text for a variety of courses on development, women's studies, sociology, anthropology and geography.

Women and Development in the Third World - Janet Momsen 2008-02-21

For all societies, the common denominator of gender is female subordination. For women of the Third World the effects of this position

are worsened by economic crisis, the legacy of colonialism, as well as patriarchal attitudes and economic crises. Feminist critique has introduced the gender factor to development theory, arguing that the equal distribution of the benefits of economic development can only be achieved through a radical restructuring of the process of development. This important new book reviews both policy and practice in Latin America, Africa and Asia and raises thought-provoking questions concerning the role of development planning and the empowerment of women.

Gender, Ethnicity and the Informal Sector in Trinidad - Robert B. Potter
2018-02-06

This title was first published in 2002. Throughout much of the developing world and especially in Africa and Latin America, the informal employment sector is growing spectacularly. This study focuses on the gender and ethnic aspects of the informal economy in Trinidad.

Women, Men, and the International Division of Labor - June C. Nash
1983-01-01

The last few decades have witnessed a growing integration of the world system of production on the basis of a new relationship between less developed and highly industrialized countries. The effect is a geographical dispersion of the various production stages in the manufacturing process as the large corporations of industrialized □First

World□ countries are attracted by low labor costs, taxes, and relaxed production restrictions available in developing countries. This collection of papers focuses on inequalities among different sectors of the labor force, particularly those related to gender, and how these are affected by the changing international division of labor.

Gender Equality in Peru - Oecd
2022-07-06

The OECD review of Gender Equality in Peru: Towards a Better Sharing of Paid and Unpaid Work is the second of a series focusing on Latin American and the Caribbean countries. It compares gender gaps in labour and educational outcomes in Peru with other countries. Particular attention is put on the uneven distribution of unpaid work, and the extra burden this places on women. It investigates how policies and programmes in Peru can make this distribution more equitable. The first part of the report reviews the evidence on gender gaps and on what causes these, including the role played by attitudes. The second part develops a comprehensive framework to address these challenges, presenting a broad range of options to reduce the unpaid work burden falling on women, and to increase women's labour income. The final part discusses the impact of the COVID-19 crisis and considers how the policy priorities of the government will have to change to address these. An earlier review in the same series has looked at gender equality policies in Chile (2021).
