

Women And The Sexual Division Of Labour In The Caribbean

Women and Work in Developing Countries Parvin Ghorayshi 1994-04-21 Feminist scholars have shown that women have a long history of productive work outside the home, and current research has focussed on the distinct nature of women's work and the role of women in the workforce. While much attention has been given to industrialized nations, this volume provides a comprehensive bibliographic record of books, articles, dissertations, and audiovisual sources on women and work in developing countries. The first chapter of the book provides entries for general works and for works of a theoretical nature, and is divided into sections on the global economy, theoretical considerations, and methodological concerns. Other chapters are devoted to particular geographic areas and include sections on introductory works; the social construction of gender; development policies; work and family issues; women's experience of wage-work; work in rural areas; and the efforts of women to promote change. Each entry is accompanied by a descriptive annotation. The last chapter is on audio-visual resources, and the volume concludes with an appendix of organizations and research institutions.

Women and Development in the Third World Janet Momsen 2008-02-21 For all societies, the common denominator of gender is female subordination. For women of the Third World the effects of this position are worsened by economic crisis, the legacy of colonialism, as well as patriarchal attitudes and economic crises. Feminist critique has introduced the gender factor to development theory, arguing that the equal distribution of the benefits of economic development can only be achieved through a radical restructuring of the process of development. This important new book reviews both policy and practice in Latin America, Africa and Asia and raises thought-provoking questions concerning the role of development planning and the empowerment of women.

Women, Labour and Politics in Trinidad and Tobago Rhoda Reddock 1994-08 Ranging from the time of slavery and indentureship, to national independence in 1962 and the present day, this book shows how gender inequalities have been perpetuated for the benefit of exploitative systems from slavery to the present day. The book explores women's roles and activities both in colonial ideology and in reality.

Women's Labor in the Global Economy Sharon Harley 2007-06-05 Globalization is not a new phenomenon; women throughout the world have been dealing with the circumstances and consequences of an international economy long before the advent of the transnational corporate conglomerate. However, in a mercenary example of the tried cliché "the more things change, the more they stay the same," women—particularly those of color—continue to be relegated to the lowest rung of the occupational ladder, where their indispensable contributions to global market capitalism are downplayed or invalidated completely through the perpetuation of stereotypes and the denial of access to better job opportunities and resources. How women of color around the world adapt and challenge the economic, political, and social effects of globalization is the subject of this broad-minded and incisive anthology. From Mexico, Jamaica, Ghana, Zimbabwe, and Sri Lanka, to immigrant and non-immigrant communities in the United States—the women documented in these essays are agricultural and factory workers, artists and entrepreneurs, mothers and activists. Their stories bear stark witness to how globalization continues to develop new sites and forms of exploitation, while its apparent victims continue to be women, men, and children of color.

Feminism/ Postmodernism/ Development Marianne H Marchand 2003-09-02 In a world where global restructuring is leading to both integration and fragmentation, the meaning and practice of development are increasingly contested. New voices from the South are challenging Northern control over development. *Feminism/Postmodernism/Development* is a comprehensive study of this power struggle. It examines new issues, "voices", and dilemmas in development theory and practice. Drawing on the experiences of women from Africa, Latin America, and Asia, as well as women of

colour, this collection questions established development practices and suggests the need to incorporate issues such as identity, representation, indigenous knowledge, and political action. Feminism/Postmodernism/Development acknowledges the importance of Third World and minority women's experiences. It acknowledges their importance for development and suggests that postmodernist insights can enhance their quest for empowerment.

Women in the Third World Lynne Brydon 1989 *Women in the Third World* provides an up-to-date general account and review of research on the roles and status of women in contemporary Third World societies. The book focuses on four major themes of underdevelopment which have particular relevance for gender roles and relations: the household, production, reproduction and policy. These issues are illustrated with material from rural and urban areas in all parts of the Third World. The book summarizes significant ideas and findings. Lynne Brydon and Sylvia Chang have avoided a narrow focus on particular regions and countries to provide a synoptic overview. In addition to being a valuable source of reference for scholars interested in gender and development in the Third World, the book also attempts to pinpoint fundamental aspects of gender inequality which apply to women everywhere. The overriding conclusion of the book is that women's experiences of development are generally negative and that intervention is urgently required to prevent their positions relative to men's deteriorating still further.

Gender and Development Janet Henshall Momsen 2004-02-24 In third world countries gender roles are different from those in western countries. This reality is of utmost interest for development policy makers, planners and project designers from donor countries. More often than not, development projects, sponsored and implemented by western organizations, reflect ethnocentric biases about the sexual division of labour, rights and responsibilities, based on standards from the

donor country. Too many projects have failed or not had the intended beneficial effect on those in need, because they were administered with very little insight into gender relations. This volume deals with the importance of gender relations in crucial areas of development such as agriculture, employment, housing, transport, health and household management, and it underlines the necessity of having statistical materials that realistically reflect gender differentials.

Researching Women In Latin America And The Caribbean Edna Acosta-belen 2019-06-04 This volume represents more than just a collection of chapters and bibliographic sources. For us, it provides another example of collective solidarity, hard work, and a relentless commitment to contribute to the process of advancing and transforming knowledge about women's condition. It attempts to update and assess how scholarship on women has impacted different disciplines and fields and examines the multivariate conditions and responses to immediate and long-term realities generated by women from different Latin American and Caribbean countries. The editors hope that this publication, modest as it may be, will be a useful tool to other researchers, educators, and students in their efforts at pursuing and expanding the knowledge and visions that will make our different societies more just and liberating for all their citizens.

Inside Babylon Winston James 1993 "The varied experience of the Caribbean diaspora in Britain, with its difficult and fractured history, is reflected in this distinctive and lively collection. The contributors to Inside Babylon show how employers and police, psychiatrists and welfare services, help to channel black people into residential and occupational ghettos. Clive Harris, Bob Carter and Shirley Joshi analyse the economic destiny of Afro-Caribbeans in Britain. Going beyond the familiar prisms of race relations and reductionist class analysis they illuminate the radicalizing dynamic of British capitalism in the postwar period. Errol Francis provides a shocking account of the experience of black people at the hands of psychiatrists in Britain. Cecil Gutzmore finds the Notting Hill carnival to be a litmus test of racist formations in both the media and the state, as well as evidence of the resilience of the black community. Amina Mama and Claudette Williams explore the position of women in black communities while Gail Lewis focuses on their characteristic patterns of employment. In a powerful concluding essay Winston James charts the unfolding of a new Afro-Caribbean identity in Britain and debunks the notion that racist structures by themselves create a homogeneous black community."--Publisher.

Women and Change in the Caribbean Janet Momsen 1993-09-22 Recent discussion of postmodern culture describes a movement from center to periphery, privileging cultures that were formerly marginalized. Women and Change in the Caribbean, a study of women marginalized by both gender and race in a region such as the Caribbean—itsself marginalized in global

terms—attempts to extract insights relevant both within and beyond geographical confines. This volume offers a feminist interpretation of a multicultural society emerging from colonialism and in the process of change and restructuring. The nineteen chapters include case studies of fifteen different Caribbean territories including Jamaica, Trinidad, Barbados, Puerto Rico, Grenada, and Guyana. The book is divided into two sections: the first looks at women's status and gender relations in the private and public spheres; the second looks at women's economic activity. Taking a broad pan-Caribbean comparative view contributors discuss territories with American, British, Dutch, Danish, French, and Spanish colonial traditions and current political links. The contributors come from a range of disciplinary backgrounds including agriculture, anthropology, economics, geography, history, sociology, and women's studies.

Defining Women Rosemary Pringle 1992-04-08 *Defining Women* is a major in-depth analysis of the social, economic and political position of women in contemporary societies. It explores the ways in which social institutions, practices and discourse define women and their position in present-day societies. The book examines the essential debates about the social construction of gender divisions in and by the key institutions of the labour market and the state. Focussing on notions of power, dependence and equality, it addresses questions of the differences between women and men, and between women themselves, in the economy and civil society. Women's political struggles to challenge their subordinate position are also assessed. The recognition of the diverse interests of women currently poses a real challenge to the central project of feminism, but *Defining Women* confidently argues for its future. This book will be widely used as a text book in feminism and women's studies and will have a broad interdisciplinary appeal.

Rewriting the Sexual Contract Dench Geoff 2018-04-24 This book brings together a wide selection of viewpoints on what is happening to relations between the sexes and the sexual division of labor in contemporary society. The contributors look at the ways in which gender relationships are changing, the consequences of these changes for family life and society generally, and the part the state should play in future developments. *Rewriting the Sexual Contract* encompasses the views of people with widely differing orientations, stretching across the moral and political spectrum. The contributors provide varied interpretations of what the recent sexual revolution means and where it may be leading us. The questions discussed include: Are the life-styles of men and women converging or polarizing? Do men and women place the same value on family life? Do most mothers want to work full-time while their children are young? Are families strengthened by a sense of differentiation and interdependence between the sexes? Does social policy need to recognize sexual differences in order to maximize social equality? The contributors represent a wide range of viewpoints, but are all

The Silver Women Joan Flores-Villalobos 2023-01-31 The construction of the Panama Canal is typically viewed as a marvel of American ingenuity. What is less visible, and less understood, is the project's dependence on the labor of Black migrant women. *The Silver Women* shifts the focus of this monumental endeavor to the West Indian women who travelled to Panama, inviting readers to place women's intimate lives, choices, grief, and ambition at the center of the economic and geopolitical transformation created by the construction of the Panama Canal and U.S. imperial expansion. Joan Flores-Villalobos argues that Black West Indian women made the canal construction possible by providing the indispensable everyday labor of social reproduction. West Indian women built a provisioning economy that fed, housed, and cared for the segregated Black West Indian labor force, in effect subsidizing the construction effort and the racial calculus that separated pay in silver for Black workers and gold for white Americans. But while also subject to racial discrimination and segregation, West Indian women mostly worked outside the umbrella of U.S. canal authorities. They did not hold contracts, had little access to official services and wages, and received pay in both silver and gold. From this position, they found ways to skirt, and at times subvert, the legal, moral, and economic parameters imperial authorities sought to impose on the migrant workforce. West Indian

women developed important strategies of claims-making, kinship, community building, and market adaptation that helped them navigate the contradictions and violence of U.S. empire. In the meantime, these strategies of social reproduction nurtured further West Indian migrations, linking Panama to places like Harlem and Santiago de Cuba. The Silver Women is thus a history of Black women's labor of social reproduction as integral to U.S. imperial infrastructure, the global Caribbean diaspora, and women's own survival.

High Tech and High Heels in the Global Economy Carla Freeman 2000-03-15 High Tech and High Heels in the Global Economy is an ethnography of globalization positioned at the intersection between political economy and cultural studies. Carla Freeman's fieldwork in Barbados grounds the processes of transnational capitalism—production, consumption, and the crafting of modern identities—in the lives of Afro-Caribbean women working in a new high-tech industry called “informatics.” It places gender at the center of transnational analysis, and local Caribbean culture and history at the center of global studies. Freeman examines the expansion of the global assembly line into the realm of computer-based work, and focuses specifically on the incorporation of young Barbadian women into these high-tech informatics jobs. As such, Caribbean women are seen as integral not simply to the workings of globalization but as helping to shape its very form. Through the enactment of “professionalism” in both appearances and labor practices, and by insisting that motherhood and work go hand in hand, they re-define the companies' profile of “ideal” workers and create their own “pink-collar” identities. Through new modes of dress and imagemaking, the informatics workers seek to distinguish themselves from factory workers, and to achieve these new modes of consumption, they engage in a wide array of extra income earning activities. Freeman argues that for the new Barbadian pink-collar workers, the globalization of production cannot be

viewed apart from the globalization of consumption. In doing so, she shows the connections between formal and informal economies, and challenges long-standing oppositions between first world consumers and third world producers, as well as white-collar and blue-collar labor. Written in a style that allows the voices of the pink-collar workers to demonstrate the simultaneous burdens and pleasures of their work, *High Tech and High Heels in the Global Economy* will appeal to scholars and students in a wide range of disciplines, including anthropology, cultural studies, sociology, women's studies, political economy, and Caribbean studies, as well as labor and postcolonial studies.

Women Plantation Workers Shobita Jain 2020-08-25 This pioneering collection of essays brings together a description and analysis of women workers and the socio-economic systems of plantations world-wide. The plantation remains a formidable force in many areas of the world and new trends towards tree farming call for further examination of its agriculture. Women have, in the past, constituted a considerable percentage of the work force in this milieu, and continue to do so. Using

specific case studies of historical and contemporary plantations, an account is given of the history of female labour, focusing on the colonial and post-colonial eras. The essays examine reasons for women's degraded status and emphasize, in particular, issues relating to migrant workers. The gradual move away from traditional family roles is, to some extent, reflected in variations in the position of the female plantation worker. However, where inequalities in class and status continue to characterize plantation life, capitalist and patriarchal control prevails. Both chilling and bracing, the sufferings of plantation labourers may seem remote to most of us, but they are still very much part of the contemporary world. Providing a close insight into the lives of the female protagonists, these essays have given an opportunity for their stories to be heard.

Women and Credit in Pre-Industrial and Developing Societies William Chester Jordan 2016-11-11

The active role of women in the labor force is not limited to recent decades, or even to the last century. As William Chester Jordan amply demonstrates in *Women and Credit in Pre-Industrial and Developing Societies*, women in premodern times played an integral part both as a source of labor and as participants in lending and borrowing. In this wide-ranging and provocative study, the author assesses the overall significance of women's work in medieval and early modern Europe, and in colonial and postcolonial societies. While earlier studies have concentrated on women in agriculture or craftwork, Jordan investigates consumption lending and borrowing among women in the European Middle Ages, female investment in early modern Europe, and, in a final section, the role of African and Caribbean marketwomen and their provision of and access to credit. By viewing the historical situation, Jordan sheds light on contemporary concerns about commercialization, the transformation of rural society, and industrialization. He provides a historical and comparative

context for some of the current issues that plague the twentieth-century female work force. By understanding the role of gender in such an important aspect of traditional life as credit relationships, Jordan advances an ongoing reexamination of the issue in general. This work will be of interest to students and scholars of medieval and early modern European, African, and Caribbean history; anthropology; and women's studies.

Rereading Women in Latin America and the Caribbean Jennifer Abbassi 2002-03-26 This indispensable text reader provides a broad-ranging and thoughtfully organized feminist introduction to the ongoing controversies of development in Latin America and the Caribbean. Designed for use in a variety of college courses, the volume collects an influential group of essays first published in *Latin American Perspectives*. Each part is organized into thematic sections that focus on work, politics, and culture, and each includes substantive introductions that identify key issues in the scholarly literature on women and gender in the region. Demonstrating the rich, multidisciplinary nature of Latin American studies, these essays promote critical thinking about women's place and power, about theory and research strategies, and about contemporary economic, political, and social conditions. They convincingly show why women have become an increasingly important subject of research, acknowledge their gains and struggles over time, and explore the contributions that feminist theory has made toward the recognition of gender as a relevant—indeed essential—category for analyzing the political economy of development.
