A Cultural History of Theatre in Antiquity - Martin Revermann 2019-08-08

Theatre was at the very heart of culture in Graeco-Roman civilizations and its influence permeated across social and class boundaries. The theatrical genres of tragedy, comedy, satyr play, mime and pantomime operate in Antiquity alongside the conception of theatre as both an entertainment for the masses and a vehicle for intellectual, political and artistic expression. Drawing together contributions from scholars in Classics and Theatre Studies, this volume uniquely examines the Greek and Roman cultural spheres in conjunction with one another rather than in isolation. Each chapter takes a different theme as its focus: institutional frameworks; social functions; sexuality and gender; the environment of theatre; circulation; interpretations; communities of production; repertoire and genres; technologies of performance; and knowledge transmission.

Two Treatises of Government - John Locke 1821
Two Treatises of Government by John Locke.
Suggested reading for Randolph High School Summer Reading.

Linkages in the Landscape - Andrew F. Bennett 2003

The loss and fragmentation of natural habitats is one of the major issues in wildlife management and conservation. Habitat "corridors" are sometimes proposed as an important element within a conservation strategy. Examples are given of corridors both as pathways and as habitats in their own right. Includes detailed reviews of principles relevant to the design and management of corridors, their place in regional approaches to conservation planning, and recommendations for research and management.

[The Origins of Asset Management from 1700 to 1960](#) - Nigel Edward Morecroft 2017-04-22

This book explores the origins and development

of the asset management profession in Britain as a distinct activity within financial services, independent of banks and stockbrokers. Specifically, it identifies the main individuals and institutions after 1868 who established the profession. The book draws a distinction between banks (short-term deposit-taking) and asset management (an investment service with longer-term objectives). It explains why some banks fail but asset management businesses generally do not. It argues that asset management has been socially useful and has had a beneficial impact on the development of securities markets by offering choices to savers as an alternative to banks, improving the efficiency of capital allocation, re-cycling excess savings productively and enabling a range of investors - from institutions to individuals - to benefit from thoughtful, long-term investing.

[Guidelines for the Routine Collection of Capture Fishery Data](#) - Food and Agriculture Organization of the United Nations 1999

"These guidelines aim to help those who design routine data collection programmes, focusing on the relationship between typical questions asked by policy-makers and managers, and the data required for providing reliable answers. Fisheries policy and management objectives, particularly under the precautionary approach, need to be based upon analyses of reliable data. Data are needed to make rational decisions, evaluate the fisheries performance in relation to management activities and fulfil regional requirements. These objectives are achieved using fishery performance indicators. Indicators are used to measure the state of the resource, the performance of fishing controls, economic efficiency, socio-economic performance and social continuity. The primary factor in choosing what data to collect is the link between the necessary operational, biological, economic and socio-cultural indicators and their associated variables. The way in which different data

variables are collected needs to be tailored to the structure of the fishery. The strategy will be strongly influenced by the budget and personnel available, and the degree to which fishers and others co-operate. The programme must identify which variables should be collected through complete enumeration and which can be sampled. Collection methods are influenced by the variable itself, the strategy, collection point and the skill of the enumerator. Once collected, fishery data must be stored securely, but made easily available for analysis, which is achieved through a computer-based data management system, following the basic data processing principles. The implementation of a data collection programme should follow a normal project cycle, developing a new legal and institutional framework as appropriate"--
Abstract.

Weekly Record - 1978

Working with Customary Justice Systems - Erica Harper 2011

"Working with Customary Justice Systems: Post-conflict and Fragile States is a collection of articles from the 'Legal Empowerment and Customary Law Research Grants' program, where seven bursaries were awarded to scholar-practitioners to develop and conduct empirically grounded and evidence-based research programs to evaluate the impact of an empowerment-based initiative involving customary justice. The case studies illustrate that what is effective is situation-specific and contingent upon a variety of factors including, among others, social norms, the presence and strength of a rule of law culture, socioeconomic realities and national and geo-politics"--Provided by publisher.

Human Reasoning and Cognitive Science - Keith Stenning 2012-01-13

A new proposal for integrating the employment of formal and empirical methods in the study of human reasoning. In *Human Reasoning and Cognitive Science*, Keith Stenning and Michiel van Lambalgen—a cognitive scientist and a logician—argue for the indispensability of modern mathematical logic to the study of human reasoning. Logic and cognition were once closely connected, they write, but were “divorced” in the past century; the psychology of

deduction went from being central to the cognitive revolution to being the subject of widespread skepticism about whether human reasoning really happens outside the academy. Stenning and van Lambalgen argue that logic and reasoning have been separated because of a series of unwarranted assumptions about logic. Stenning and van Lambalgen contend that psychology cannot ignore processes of interpretation in which people, wittingly or unwittingly, frame problems for subsequent reasoning. The authors employ a neurally implementable defeasible logic for modeling part of this framing process, and show how it can be used to guide the design of experiments and interpret results.

With contributions by numerous experts
An Introduction to Forensic Linguistics - Malcolm Coulthard 2007-11-28

Overview of the interface of language and the law, illustrated with authentic data and contemporary case studies. Topics include collection of evidence, discourse, courtroom interaction, legal language, comprehension and forensic phonetics.

The Manuscript Inventories and the Catalogs of Manuscripts, Books, and Periodicals - Arthur and Elizabeth Schlesinger Library on the History of Women in America 1984

Pre-Historical Language Contact in Peruvian Amazonia - Luis Miguel Rojas-Berscia 2021-05-27

South America was populated relatively recently, probably around 15,000 years ago. Yet, instead of finding a relatively small number of language families, we find some 118 genealogical units. So far, the historical processes that underlie the current picture are not yet fully understood. This book represents a preliminary attempt at understanding the socio-historical dynamics behind language diversification in the region, focusing on the Kawapanan languages, particularly on Shawi. The book provides an introduction to the ideas behind the flux approach of Dynamic linguistics and later

concentrates on prehistorical language contact, specifically in the northern Peruvian Andean sphere. The number of studies presented shed light on a layered picture in which a number of Kawapangan lects were used in non-polyglossic multilingual settings. The book explores the potential contact relationships between Kawapangan languages, Quechuan, Aymaran, Chachapuya, Cholón-Hibito, Arawak, Carib and Puelche. The analysis draws on data collected in the field over a period of eight years (2012-2020) with both Shawi and Shiwilu speakers and includes the first comprehensive grammar sketch of Shawi.

The Structures of the Film Experience by Jean-Pierre Meunier - Julian Hanich 2019

For the first time this volume makes Jean-Pierre Meunier's insightful thoughts on the film experience available for an English-speaking readership. Introduced and commented by specialists in film studies and philosophy, Meunier's intricate phenomenological descriptions of the spectator's engagement with fiction films, documentaries and home movies can reach the wide audience they have deserved ever since their publication in French in 1969.

Global Health Diplomacy - Ilona Kickbusch

2012-12-09

The world's problems are indeed world problems: social and environmental crises, global trade and politics, and major epidemics are making public health a pressing global concern. From this constantly changing scenario, global health diplomacy has evolved, at the intersection of public health, international relations, law, economics, and management—a new discipline with transformative potential. Global Health Diplomacy situates this concept firmly within the human rights dialogue and provides a solid framework for understanding global health issues and their negotiation. This up-to-the-minute guide sets out defining principles and the current agenda of the field, and examines key relationships such as between trade and health diplomacy, and between global health and environmental issues. The processes of global governance are detailed as the UN, WHO, and other multinational actors work to address health inequalities among the world's peoples. And to ensure maximum usefulness, the text includes plentiful examples, discussion questions, reading lists, and a glossary. Featured topics include: The legal basis of global health agreements and negotiations. Global public goods as a foundation for global health diplomacy. Global health: a human security perspective. Health issues and foreign policy at the UN. National strategies for global health. South-south cooperation and other new models of development. A volume of immediate utility with a potent vision for the future, Global Health Diplomacy is an essential text for public health experts and diplomats as well as schools of public health and international affairs.
