Regional Trading Blocs in the Global Economy May T. Yeung 1999-01-01 The Asia-Pacific Rim is still potentially one of the most dynamic areas of the global economy, and the European Union (EU) is the world's most prosperous market. The development of relations between the EU and Association of South East Asian Nations (ASEAN) is vitally important for the future economic evolution of both regions. This book traces the relationship between the EU and ASEAN, considering the current and future position of trade relations.

New Challenges and Opportunities in European-Asian Relations Bibek Chand 2021-05-20 This book highlights the emerging bidirectional interactions between Europe—primarily the EU—and Asia in the fields of political economy, development, environmental policy, security, diplomacy, and inter-institutional relations within the context of two recent global trends: the rise of China and the growing withdrawal of the U.S. from multilateral commitments. The volume incorporates nine different aspects and dimensions of Asian-European relations. In recent decades, Asia has (re-)gained rising importance on the world stage, which also entails closer interconnections with Europe. In an age of receding American global leadership and reduced commitments to its European allies, the EU and its member states have increasingly become more open to seeking and considering new partnerships. The rising economic prowess of Asia has made it of particular interest for European states. The book's focus lies on potential challenges and opportunities in the bidirectional interactions between European and Asian states and institutions.

EU-ASEAN Economic Relations Suthiphand Chirathivat 2000

The EU and its Relations with Eastern Europe de Deugd, Nienke 2022-02-15 The politico-economic relations between the European Union (EU) and Eastern Europe are currently entering a new phase, which some scholars qualify as a revival of the Cold War. This insightful book seeks to explain whether and why a Cold War Europe has returned and discusses underlying factors that clarify the relations between East and West since the Second World War.

Europe-Asia Interregional Relations Bart Gaens 2016-04-29 This book examines the interregional relations of the European Union with East Asia through the prism of the Asia-Europe Meeting (ASEM). ASEM currently brings together 16 Asian countries, the 27 member states of the European Union, as well as the ASEAN Secretariat and the European Commission. ASEM's ten-year anniversary and the Sixth Summit in Helsinki prompted reflection on the forum's accomplishments in three dimensions of interaction, its working methods, democratic involvement, public awareness and global strategic potential. The volume provides an in-depth evaluation of ASEM's first decade from a European perspective, including the achievements of the ASEM6 Summit and its implications for the future of the process. It also analyzes the role of interregional interaction as a tool for EU foreign policy.

Asia-Europe Cooperation After the 1997-1998 Asian Turbulence Chyungly Lee 2017-11-01 This title was first published in 2000: When the second Asia-Europe meeting took place in London in April 1998, the EU's economic motivation of building strong links with Asia was challenged by the ongoing Asian economic crises that broke out in mid-1997. The political and social turmoil that ensued in many East Asian economies not only urges the re-examination of the East Asian economic miracle, but also reprioritizes the regional agenda and thus embarks on a new environment for Asia-Europe co-operation. The impact of this Asian turbulence on the establishment of the long-term Asia-Europe

equal partnership in general and the ASEM process in particular are addressed in this book, based on the conclusions of the 1998 Asia-Europe Co-operation Forum. The aim of this book is to examine the background causes, responses, prospects and lessons of the first wave of financial crisis in Southeast Asia, and to then move on to an analysis of developments in Asia-Europe co-operative relations after the onset of the crisis. It examines the importance of continued interregional economic co-operation between ASEAN and the EU, looks at the economic impact of the 1997/98 East Asian financial crisis on the EU and analyzes the economic fabric of ASEM. In the final chapter, the book explores how the ASEM process has furthered the development of interregionalism in world affairs and discusses how the crisis has led to uncertainty for the organization's future development.

The European Union, China and Central Asia Fabienne Bossuyt 2021-10-04 This book examines the involvement of the European Union (EU) and China in Central Asia and critically assesses the implications this has for the region as a whole. The volume adopts a comprehensive, interdisciplinary approach, combining insights from International Relations, EU Studies, International Economics, International Law, Sinology, and History. It concentrates on three thematic levels: (1) historical and contextual, (2) geopolitical and geo-economic, and (3) socio-cultural and institutional. Paying particular attention to the role of the EU and the factors driving the EU's and China's relations with Central Asia, it looks at how the Central Asian countries position themselves vis-à-vis China's growing influence, and how the balance of power between China, Russia, and the EU plays out. Contributors also explore the important historical context of the 'Silk Routes', as well as of the erstwhile connection of the Central Asian states with the Soviet Union. Critically analysing the potential areas for collaboration and synergy between the EU and China, the book also discusses

the extent to which they share a common ground in Central Asia that could serve as a basis for long-term cooperation. It will be of interest to all scholars and students of International Relations, Economics, Sinology, and History.

Responding to China's Rise Vinod K. Aggarwal 2014-10-29 In this edited volume, a set of issue and country experts tackle questions regarding China's current rise to power within the current international economic and political order. The current international system is governed by a "Western" conception of order and based on the primacy of post-World War II rules, drawn from liberal models of capitalism and democracy practiced in the US and in Western Europe. In this context, the most important and most uncertain questions facing the West over the next decade concern how the EU and the US will respond to China's rapid growth. Will the transatlantic relationship hold and become stronger, faced with this new economic and geopolitical challenge? Or will the US and the EU—an increasingly prominent global player—compete for economic and political advantage? After a brief introduction laying out the circumstances of China's economic and political rise and the challenges that this poses to the existing international order, the book proceeds in three sections. The first section provides competing theoretical perspectives on China's rise in a historical context. The second section provides a distinctly Chinese perspective on China's current rise. The third section looks at responses from the United States and the European Union, focusing on both economic and security issues as well as the implications of China's rise for US-EU relations. This book is relevant to both scholars and policymakers concerned with Chinese domestic politics and foreign policy, US foreign policy, EU foreign policy, China-US relations, China-EU relations, international security, international political economy and emerging markets.

2017-10-02 Relations between the EU and East Asia have consistently expanded in recent years, particularly between the EU and Japan. Against the background of negotiations on an economic and strategic partnership agreement, the EU-Japan relationship is set to become the single most comprehensive 'region-to-state' relationship the world has known today, accounting for more than a third of world GDP and a combined population of more than 600 million people. This book addresses the potential role of the EU, in cooperation with Japan, to craft a stable and prosperous mode of governance in the Asian region. In today's globalized world seemingly defined by waxing Chinese power and waning American power, the book reflects the lack of appreciation for an EU-Japan concert in maintaining and developing multilateral principles. It aims towards fortifying this relationship by acknowledging that in order to enhance the credibility and capabilities of such an alliance, it is necessary to take stock of where the partnership stands today, what kind of obstacles still need to be overcome and which options have been left untouched. By introducing state-of-the-art empirical research in multiple fields, this book will be of key interest to students and scholars of international relations, comparative regionalism, the European Union and Japanese politics.

Australia, the European Union and the New Trade Agenda Annmarie Elijah 2017-06-20 Australia (together with New Zealand) is one of the few Organisation for Economic Co-operation and Development (OECD) countries with which the EU does not have a comprehensive trade agreement. Australia and the EU are entering a new phase in the bilateral relationship, and the push towards a potential trade agreement has been steadily gaining momentum. This collection brings together diverse and deeply practical contributions to the forthcoming policy debate on the Australia-EU Free Trade Agreement (FTA), highlighting potential points of difficulty and possible gains from the agreement. This book makes two further contributions: it adds to the body of work reappraising the

contemporary Australia-EU relationship; and provides a snapshot of current issues in trade policy—the ‘new trade agenda’—which is more complex and politically visible than ever. The issues confronting Australia and the EU in forthcoming negotiations are those confronting policy makers around the globe. They are testing public tolerance of decisions once viewed as dull and technocratic, and are redefining the academic treatment of trade policy. ‘... this book is especially important because it is talking about a very different type of trade agreement than the ones Australia has concluded recently with our major trading partners in East Asia. An agreement with the EU inevitably will focus on issues like services, investment, government procurement, and competition policy. These are major issues in their own right, are key parts of the new trade agenda, and are critical to Australia’s successful transition to a prosperous post-mining boom economy. In the absence of generalisable unilateral economic reform in this country, trade policy hopefully will provide an external source of pressure for reform. If this book adds to that pressure while also suggesting some of the tools needed for reform, it will have made a major contribution.’ Dr Mike Adams, Partner, Trading Nation Consulting

The Eurasian Space Wim Stokhof 2004 The Asia-Europe Meeting (ASEM), officially established in 1996, is an inter-regional forum consisting of the 15 member states of the European Union and the European Commission, 7 member of the 10 states of ASEAN and China, Japan and South Korea. The Economic Relations Between the European Union and East Asia Jie Zhang 1997

Globalization and Regional Dynamics Wolfgang Klenner 2012-12-06 The writings by Japanese and German economists presented here originated against the backdrop of ongoing globalization processes and notable fluctuations in regional economic dynamics observable at the same time, primarily in the East and South East Asian area. They provided the occasion for these writers to come to terms with globalization processes, and in particular with the stabilizing and destabilizing elements at work in them. This is the basis for their investigation of the options provided by economics and economic policy for stabilizing an ever more tightly interwoven world economy. The regional focal points of the contributions are the East Asian realm and the European Union, and the points of view are in every case both from the Japanese and the German side. Questions of international competition and mechanisms of the spread of the crisis in the wake of globalization processes lie at the centre of the analyses by Hisashi Watanabe and Willy Kraus. Hisashi Watanabe focusses on the relationship, an especially important one from the Japanese perspective, between Japan and South Korea and takes up the problem of South Korea's demand that Japan should energetically promote its own transition to a service-sector-oriented society and withdraw from certain areas of manufacturing. This, it is argued, will grant Japan's Asian neighbours better chances for development and make a positive contribution to the economic stabilization of the region.

International Economic Integration and Asia Michael G. Plummer 2006 Regional economic integration has become a key force in international commercial policy in the 2000s. Europe has traditionally embraced regionalism; the United States became actively involved in preferential trading arrangements only in the 1980s. While Asia has been late in accepting formal regional economic integration accords, all Asian countries are now in the process of creating various free-trade areas and other forms of economic integration programs, and some are already in place. This volume analyzes the regionalism trend from an Asian perspective. It considers the lessons from, and the economic implications of, various economic integration programs in the OECD (mostly the EU but also NAFTA), as well as the proposals for closer economic integration in the region itself. Chapters deal with both real and financial integration issues. Sample Chapter(s). Chapter 1: East Asian Economic Regionalism: Progress and Challenges (1,660 KB). The European Union and East Asia Christopher M. Dent 1999 This text analyses the economic relationship that has evolved between the European Union and East Asia, and its future prospects, especially in the wake of the financial crisis that shook East Asia.

A New Beginning or More of the Same? Michael Reilly 2021-01-09 The EU's interest in and engagement with North East Asia has grown massively over the last three decades, the shaping and implementation of its policy influenced heavily by the UK and its historical links with East Asia. Brexit therefore raises questions about the future of this engagement and comes against a background of wider threats to the liberal world order, especially rising tensions between the USA and China. Worried that they may be forced to choose sides in their hitherto carefully managed relationships with the two, China's neighbours are therefore watching with interest to see how the EU and the UK respond and manage their future relations with the region. This book goes beyond the traditional trade links to consider diplomatic and security perspectives, as well as wider issues such as the possible impact on educational and research links. It will be of interest to diplomats, scholars, and economists.

nation-state has been steadily eroding for decades under the pressure of multilateral organizations such as the United Nations and multiregional organizations such as the European Union. The increasing prominence of non-governmental organizations such as Greenpeace and Human Rights Watch in times of crisis has also contributed, since the problems such groups address often extend beyond national borders and are thus difficult for national governments to manage alone. Multiregionalism and Multilateralism investigates these forces as they factor into political and economic relations between Asia and Europe.

The Implications of Brexit for East Asia David W.F. Huang 2018-06-28 This book is the first comprehensive exploration of the impact Brexit might have on both Britain's and the EU's role in a rising East Asia. From the internationalization of the renminbi to Hong Kong's fraught political status quo, and from former British colonies exploring their place in the world to America's place in East Asia in the Trump era, the EU plays an influential role in Asia today. However, much of this derives from Britain's role and interests, even as Asian models were explicitly cited as models for post-Brexit Britain, particularly the Singaporean model. This book will be of value to scholars, policymakers, and journalists seeking to understand what role the EU and Britain will play in the Asian century.

units of international society never before observed. In the "second wave" of regionalism that became active in the 1980s, a new regionalism, which differed qualitatively from the old regionalism, expanded globally. This "new regionalism" is characterized by multi-dimensionality, complexity, fluidity, and non-conformity, and within it we cannot overlook the fact that spaces on a new scale, such as sub-regions, are being formed in various parts of the world. The sovereign state system that has continued unbroken since the Westphalia Treaty is being transformed, and within this context, the increase in the number of sub-regions as new social units adds to the sense that we have arrived at a post-Westphalian international order. This book focuses on sub-region as a new social unit of international society. It is based on the findings obtained through meticulous fieldwork and joint studies conducted over the past 10 years by about 20 researchers, primarily from Japanese universities and Chiang Mai University, Thailand. The sub-regions described here are mostly international cross-border spaces or units in the interior of a certain region, which include: multiple states, states and parts of states, or more than two parts of states (often referred to as micro-regions). Such sub-regions have been formed in various parts of the world since the end of the Cold War. However, studies on sub-regions remain unexplored in the existing studies of regionalism. The few studies that do exist mainly focus on the economic aspects of sub-regions. In contrast, this book will specifically examine the sub-regions in Asia (especially the Mekong region and Europe) as main cases from a political science and international relations perspective, aiming to establish a new/alternative international relations by carving out a political angle of sub-region as a new social unit of international society and attempting to shift the paradigm of conventional international relations. To understand the political dimension of a sub-region, this book will mainly focus on three aspects: sub-regions and state strategies, bottom-up dimension of sub-regions, and sub-regions and

The EU as a Global Player Fredrik Soderbaum 2013-09-13 A new look at the European Union's role as a global actor, with special focus on the theme of interregionalism in its relations with key regions around the world: Africa, Asia, South America, North America and Central-Eastern Europe. This new collection clearly shows how, since the end of the Cold War, the European Union has gradually expanded its external relations and foreign policies and become a global actor in world politics. During the last decade interregionalism has become a key component of the EU's external relations and foreign policies. In fact, the EU has quickly become the hub of a large number of interregional arrangements with a number of regions around the world. Promoting regional and interregional relations not only justifies and enhances the EU's own existence and efficiency as a global 'player', the strategy also promotes the legitimacy and status of other regions, giving rise to a deepening of cross-cutting interregional relations in trade and economic relations, political dialogue,

The volume examines the emergence of China and India as global powers and the implications for the EU's common policies and strategies. China, the European Union and the Restructuring of Global Governance Tanguy De Wilde

2012-05-01 China, the European Union and Global Governance examines the key determinants of European and Chinese approaches to the restructuring of global governance systems. Using a multidisciplinary method, this collection of chapters analyses four distinct fields that are key for both China and the EU and in the development of their relations and future cooperation: the global trading system, the international monetary system, climate and energy policy and international security. In the context of China's growing role in global governance and of EU-China cooperation, these contributions emphasize strategies, prospects and objectives of both actors. They outline possible avenues for an enhanced partnership in light of the changing global order, which implies a rethinking of the existing multilateral structures. This interdisciplinary study will appeal to researchers and scholars interested in global governance, European foreign policy, Chinese foreign policy, EU-China relations, as well as trade, the international economy and climate change policies. Postgraduate students in international relations, international political economy, European studies and Chinese studies, as well as policymakers in the areas of external relations and EU-China relations, will also find much to interest them in this book.

The role of the divergent cultural expectations, intellectual traditions, and political concerns are emphasized, especially in their impact on political, economic, social, and cultural linkages. Remaking Global Order Nicola Casarini 2009-09-03 Relations between the European Union and China have grown at a sustained pace across the board in recent times, transforming the relationship from one of previous neglect into a matter of global strategic significance. This book offers an examination of the evolution of contemporary EU-China relations in the economic, technological and high politics dimensions, including implications of the high-tech and security-related elements of the relationship (space and satellite navigation cooperation; advanced technology transfers; arms sales, including the proposal to lift the EU arms embargo on China) for the United States and its East Asian allies. The analysis of EU-China relations is placed in the context of evolving dynamics in transatlantic relations on the one hand, and East Asia's major powers' changing security perceptions on the other. With this approach, this study intends to provide the reader with a better understanding of the global significance acquired by Sino-European relations, while also raising the question as to whether, and to what extent, the promotion of EU space and defence interests in China has made the EU a novel strategic factor in East Asia. This book contributes to current debates on the emerging global order, including discussions of how European and Chinese policy makers would perceive the post-Cold War international system, evaluate the place and role of their countries in it, and appraise the policies to be adopted to maintain global competitiveness in key strategic industrial sectors and increase political autonomy
