women always love with their mind... In my book, "Texting Women", I give you the right tips, quick and simple, to learn everything there is to know about texting a woman, and especially to understand how to get the timing right. In your opinion, what's every man's main goal when texting a woman he likes? Easy! That she always texts him back - the sooner the better - and eagerly! But clearly, to be able get there one must study the method and train hard - as if it were a physical activity - and put all of the following steps into practice: Mindset: work on yourself. Remember how as a child you were told to always be yourself? Well, forget that! Unless you want to die alone... The thing is, there is no "self". Which self? There can be many different selves, you can be whatever you want, you can improve: To manipulate girls, first you must be able to manipulate yourself. Skills: The main skill consists in figuring out who is the girl you're writing to, what she likes, what language frequencies she

travels on. By doing that, you will be able to become the mirror in which she sees herself, and in you and in your texts she will recognize a part of herself and of her mind. Techniques: The right techniques allow you to seduce girls by doing nothing, you have to get to the point where, whatever you write them, they start answering with long messages, as if they were talking about themselves with a psychologist. This way girls feel like they're seducing themselves with their own mind and will increasingly feel the need to answer your texts. Secrets: once you have completed all the previous steps, you should not be in a hurry to meet or see them, enjoy the moment and let them stew in their own juice. Raise the conversation's level by talking about spicy stuff, that's when they'll go crazy, and that's how when you'll see them in person they will already be completely obsessed with you and they will be yours. In the end it's going to be you the one not texting

them back.

Everyday Information - William Aspray 2011-03-04

An intimate, everyday perspective on information-seeking behavior, reaching into the social context of American history and American homes. All day, every day, Americans seek information. We research major purchases. We check news and sports. We visit government Web sites for public information and turn to friends for advice about our everyday lives. Although the Internet influences our information-seeking behavior, we gather information from many sources: family and friends, television and radio, books and magazines, experts and community leaders. Patterns of information seeking have evolved throughout American history and are shaped by a number of forces,

including war, modern media, the state of the economy, and government regulation. This book examines the evolution of information seeking in nine areas of everyday American life. Chapters offer an information perspective on car buying, from the days of the Model T to the present; philanthropic and charitable activities; airline travel and the complex layers of information available to passengers; genealogy, from the family Bible to Ancestry.com; sports statistics, as well as fantasy sports leagues and their fans' obsession with them; the multimedia universe of gourmet cooking; governmental and publicly available information; reading, sharing, and creating comics; and text messaging among young people as a way to exchange information and manage relationships. Taken together, these case studies provide a fascinating window on the importance of information in the past century of American life.
