A Human Error Approach to Aviation Accident Analysis - Douglas A.

Wiegmann 2017-12-22

Human error is implicated in nearly all aviation accidents, yet most investigation and prevention programs are not designed around any theoretical framework of human error. Appropriate for all levels of expertise, the book provides the knowledge and tools required to conduct a human error analysis of accidents, regardless of operational setting (i.e. military, commercial, or general aviation). The book contains a complete description of the Human Factors Analysis and Classification System (HFACS), which incorporates James Reason's model of latent and active failures as a foundation. Widely disseminated among military and civilian organizations, HFACS encompasses all aspects of human error, including the conditions of operators and elements of supervisory and organizational failure. It attracts a very broad readership. Specifically, the book serves as the main textbook for a course in aviation accident investigation taught by one of the authors at the University of Illinois. This book will also be used in courses designed for military safety officers and flight surgeons in the U.S. Navy, Army and the Canadian Defense Force, who currently utilize the HFACS system during aviation accident investigations. Additionally, the book has been incorporated into the popular workshop on accident analysis and prevention provided by the authors at several professional conferences world-wide. The book is also targeted for students attending Embry-Riddle Aeronautical University which has satellite campuses throughout the world and offers a course in human factors accident investigation for many of its majors. In addition, the book will be incorporated into courses offered by Transportation Safety International and the Southern California Safety Institute. Finally, this book serves as an excellent reference guide for many safety professionals and investigators already in the field.

The Financial Crisis Inquiry Report - Financial Crisis Inquiry Commission 2011-05-01

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout

and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film *In Debt We Trust* warned of the economic meltdown in 2006. He has since written three books on the subject including *Plunder: Investigating Our Economic Calamity* (Cosimo Books, 2008), and *The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail* (Disinfo Books, 2011), a companion to his latest film *Plunder The Crime Of Our Time*. Psychovertical - Andy Kirkpatrick 2012-08-27

CLICK HERE to download the first chapter from *Psychovertical*
Psychovertical is the story of what happens to a nice lower-class kid with dyslexia who gains control over his circumstances by clinging to giant stone faces, thousands of feet in the air, for days at a time. In this case, Kirkpatrick uses his 12-day solo climb of the Reticent Wall on California's El Capitan as the experience that helps him understand how growing up poor and struggling with dyslexia and low self-confidence set him on a path of extreme adventure. Kirkpatrick's writing is gripping and highly entertaining -- even non-climbers will enjoy his raw intensity, gallows humor, and honest, self-deprecating storytelling style. This book is a Boardman-Tasker Prize winner, which is recognition given for outstanding mountaineering literature. From the judges' remarks: "The book is very cleverly structured....The cuts from scene to scene and climb to climb work wonderfully well -- a sort of mountaineering Day of The Jackal -- as Kirkpatrick comes closer and closer to his nemesis on Reticent Wall. And it is this climb, the running narrative of the book, that grips the most: 14 pitches of aid climbing, unrelieved by conversation with a partner other than himself, should by rights be boring. But it grips the heart further and further."
