Get Real About Sex - Alldred, Pam 2007-07-01

Up-to-date and accessible, this book manages to be both theoretically subtle and attuned to the realities of classroom practice. Dr Rachel Thomson, The Open University "[This] book is a great success and provides a wealth of insights into the realities of teaching and being taught about sex and relationships." Michael Reiss, Institute of Education What are the different values and perspectives on sex and relationship education within a single secondary school? How do young people think sex education should be taught? What are the challenges facing the provision of good sex and relationship education at the classroom level and at the political level? Young people often receive mixed messages about gender and sexual relationships. When providing sex education lessons, schools should take into account different ideas and values, including the general British embarrassment over intimate matters and differing political and personal views about sex education. This book combines young people's views of sex education, schooling and parenthood, with those of teachers, school nurses and head-teachers. It brings together these varied perspectives and considers how they reveal different values, aims and agendas. The authors highlight the potential conflict between approaches to education and health, and reveal the complexity of dealing with sexuality and gender in real-life situations. Focusing on young people's identities in the

classroom, contemporary theoretical approaches in the social sciences are employed to explore how gender is enacted and experienced by individuals, and how social pressures and government agendas operate at the level of the individual. This book contains original, first-hand empirical material from a detailed study of all the schools in one English city, and offers a critical analysis of broader political and cultural ideas and values. *Get Real About Sex* is key reading for students and professionals in education, health and the sociology of gender and sexuality.

**Relationships and Sex Education 3-11** - Sacha Mason 2019-03-21

'Where do babies come from?' The prospect of this age-old question is one that causes significant apprehension for many professionals working with children, but this isn't where the anxiety ends. This book argues that it is essential to have clear strategies to support children's questions about relationships, growing up and sex so that they are enabled to develop positive and confident views about themselves and those around them. It examines important concerns such as the role of media in children's lives in shaping their views on relationships and explores how issues of gender and sexuality are considered more fluidly. Whether working in an academy, free schools,

faith schools, the independent sector or elsewhere this book supports you to help children to deal with a wide range of relationships issues, meeting the requirements of the new legislation on relationships education for primary aged children as a foundation for relationships and sex education. Drawing on research with teachers about their apprehensions about teaching the subject and children's experience of its delivery, the authors give a full picture of common concerns and difficulties and how to successfully meet them and support children from 3-11, and the transition to secondary school. Topics covered include platonic friendships, developing self-respect and respect for others, and enabling personal choice and safety. Sacha Mason and Richard Woolley explore issues surrounding notions of age and stage development. They discuss how children develop at different rates and that each child is unique in relation to learning in this area. They outline a distinct pedagogical approach to managing children's individual needs for relationships and sex education. They also look at supporting children with SEND when considering how to implement relationships education in primary schools. This second edition includes new chapters on children's development and needs, and developing inclusive relationships education. The book has been updated throughout with summaries of the latest research, case studies, ideas for developing practice and signposts to key websites and resources. The chapters provide all the support you need to confidently promote children's healthy development.

[Relationships and Sex Education for Secondary Schools \(2020\)](#) - Jonathan Glazzard 2020-06-05

This book enables and supports teachers to deliver the content of the new statutory guidance for relationships and sex education (RSE) in secondary schools, operational from 2020. It is case study rich and provides clear and practical advice for teaching the topics of the new framework, including addressing controversial and critical issues such as parental right to withdraw and how to tackle relationships and sex education in faith schools. There is an emphasis throughout on inclusion and pupil well-being and on the importance of partnerships with parents.

[Sex and Sex Education](#) - Hisham Altalib 2014-06  
What are children being taught about sex? What are they learning from peers, television, movies, magazines, computer games, pop music, popular culture? Most parents are rightly alarmed by the increasingly controversial nature of the information being fed to children and how age-appropriate it actually is. This publication makes it easy for parents to understand and broach the sensitive topic of sex education. Originally forming chapter thirteen of *Parent-Child Relations: A Guide to Raising Children*, it charts a way forward, helping parents to educate their children in a manner they feel appropriate and which maintains a sense of the sacred. The authors use a holistic approach to include what morality requires of humanity in this regard, and also focus on the issues of healthy relationships, responsibility, emotional wellbeing, and good physical health. The publication is intended to give parents practical advice, using clear and precise information, to address some of the most common issues parents are likely to encounter and questions they are likely to face.

**Education and the Good Life** - Bertrand Russell 2023-07-19

There must be in the world many parents who, like the present author, have young children whom they are anxious to educate as well as possible, but reluctant to expose to the evils of most existing educational institutions. The difficulties of such parents are not soluble by any effort on the part of isolated individuals. It is of course possible to bring up children at home by means of governesses and tutors, but this plan deprives them of the companionship which their nature craves, and without which some essential elements of education must be lacking. Moreover it is extremely bad for a boy or girl to be made to feel "odd" and different from other boys and girls: this feeling, when traced to parents as its cause, is almost certain to rouse resentment against them, leading to a love of all that they most dislike. The conscientious parent may be driven by these considerations to send his boys and girls to schools in which he sees grave defects, merely because no existing schools seem to him satisfactory — or, if any are satisfactory, they are not in his neighbourhood. Thus the cause of educational reform is forced upon conscientious parents, not only for the

good of the community, but also for the good of their own children. If the parents are well-to-do, it is not necessary to the solution of their private problem that all schools should be good, but only that there should be some good school geographically available. But for wage-earning parents nothing suffices except reform in the elementary schools. As one parent will object to the reforms which another parent desires, nothing will serve except an energetic educational propaganda, which is not likely to prove effective until long after the reformer's children are grown up. Thus from love for our own children we are driven, step by step, into the wider sphere of politics and philosophy. From this wider sphere I desire, in the following pages, to remain aloof as far as possible. The greater part of what I have to say will not be dependent upon the views that I may happen to hold as regards the major controversies of our age. But complete independence in this regard is impossible. The education we desire for our children must depend upon our ideals of human character, and our hopes as to the part they are to play in the community. A pacifist will not desire for his children the education which seems good to a militarist; the educational outlook of a communist will not be the same as that of an individualist. To come to a more fundamental cleavage: there can be no agreement between those who regard education as a means of instilling certain definite beliefs and those who think that it should produce the power of independent judgment. Where such issues are relevant, it would be idle to shirk them. At the same time, there is a considerable body of new knowledge in psychology and pedagogy which is independent of these ultimate questions, and has an intimate bearing on education. Already it has produced very important results, but a great deal remains to be done before its teachings have been fully assimilated. This is especially true of the first five years of life; these have been found to have an importance far greater than that formerly attributed to them, which involves a corresponding increase in the educational importance of parents. My aim and purpose, wherever possible, will be to avoid controversial issues. Polemical writing is necessary in some spheres; but in addressing parents one may

assume a sincere desire for the welfare of their offspring, and this alone, in conjunction with modern knowledge, suffices to decide a very large number of educational problems. What I have to say is the outcome of perplexities in regard to my own children; it is therefore not remote or theoretical, and may, I hope, help to clarify the thoughts of other parents faced with a like perplexity, whether in the way of agreement with my conclusions or the opposite. The opinions of parents are immensely important, because, for lack of expert knowledge, parents are too often a drag upon the best educationists. If parents desire a good education for their children, there will, I am convinced, be no lack of teachers willing and able to give it. I propose, in what follows, to consider first the aims of education: the kind of individuals, and the kind of community, that we may reasonably hope to see produced by education applied to raw material of the present quality. I ignore the question of the improvement of the breed, whether by eugenics or by any other process, natural or artificial, since this is essentially outside the problems of education. But I attach great weight to modern psychological discoveries which tend to show that character is determined by early education to a much greater extent than was thought by the most enthusiastic educationists of former generations. I distinguish between education of character and education in knowledge, which may be called instruction in the strict sense. The distinction is useful, though not ultimate: some virtues are required in a pupil who is to become instructed, and much knowledge is required for the successful practice of many important virtues. For purposes of discussion, however, instruction can be kept apart from education of character. I shall deal first with education of character, because it is especially important in early years; but I shall carry it through to adolescence, and deal, under this head, with the important question of sex education. Finally, I shall discuss intellectual education, its aims, its curriculum, and its possibilities, from the first lessons in reading and writing to the end of the university years. The further education which men and women derive from life and the world I shall regard as lying outside my scope; but to make men and women capable of learning from

experience should be one of the aims which early education should keep most prominently in view...FROM THE BOOKS.

Sexuality Explained - Louise Kirk 2013-02  
Sexuality Explained: a guide for parents and children underpins parents in their role as first educators of their children. It draws on the latest knowledge of the human body to show how mind, heart and body interplay in our sexual makeup, and how the life-giving and love-making aspects of the sexual act are each designed for permanence. The Guide works at many levels. By drawing the reader into a succession of conversations between a mother and her daughter, her father and her brother, a full picture of the biology of reproduction is created in a friendly way. The stories give parents ideas on how they might converse with their own children. The text is necessarily comprehensive, to answer possible questions, and to make sure that the parents know more than what is now taught in school biology, which can be checked for accuracy. Children vary enormously in their maturity, which is one reason why it is best that they are taught about sex and sexuality individually and, if possible, by members of their own family who know and love them. The age range set against each chapter is for guidance only. Parents may use the Guide in a variety of ways. They can let the Guide do most of the work for them, reading it out loud with their children. They can give a chapter to older children to read on their own, being ready for questions. Or they can absorb ideas to speak in their own words as occasion arises. To aid discussion and to give a framework for homemade lessons, each chapter ends with a glossary and a list of points to remember. The hand-drawn biological drawings, all of which have been specially commissioned, have been reproduced at the back of the book to be cut out and arranged in any order. The Guide is principally designed for parents, but it can also be read by young people on their own, and later chapters might be used by teachers and youth leaders for student workshops. There is no religious teaching but the Guide starts from the premise that all human life is of equal dignity and worthy of respect.

**Help For Parents! Maximized Parenting, 112 Solutions to the Parenting Problems of Today** - Francis Edo Olotu 2014-02-24

Effective parenting is about raising well-adjusted children who are assets to society; Maximized Parenting is a book which promotes effective parenting through equipping parents with the knowledge that fosters proper foundation for parenting. According to Partnership for 21st Century Skills [2006] and American Management Association's [AMA] 2010 Survey, many employers believe that higher education is failing in its role to adequately develop needed skills in students. Parents with the help of this book can bridge the knowledge gap between what higher education provides and what the employment industry requires. The book is for parents who consider parenting as one of their most important responsibilities in life. One of the greatest assets a child could have is dutiful parents from whom he/she learns the act of parenting. Parents without this privilege are large in number and to them parenting is a dark continent which they find difficult to navigate. This book is written to inform, inspire and impart knowledge about parenting in the 21st century. The book would enable parents interact with their children in a way that would motivate them to be outstanding persons in life. In this information age, you cannot limit your child to how you were brought up or what you know because he/she was born in another era. The gamut of issues covered in this book will equip you to bring up your child to be successful in life. Issues treated in this book will help you

know healthy parenting methods that are best for your child. The book contains a very broad mix of issues a parent would encounter at every stage of a child's life. It is written from the perspective that a parent's job is for life and as such parents need help to sustain their long term commitment to their children. Issues covered include character building, instilling moral values into children, basic life skills at every stage of life, sexuality education and handling children with special needs. While the information in this book is specifically for parents, the information would be useful to fathers' groups, men's groups, women's groups, grandparents, extended family members and childcare providers that have opportunities to relate to children. Research now and again has shown that a family is more important to a child's school success than how much money the family makes or how much education the parents have. No parent who has read this book should ever ask "How can I make my child a success in life." The social commentator Michael Novak wrote on the importance of family, "One unforgettable law has been learned through all the disasters and injustices of the last thousand years: if things go well with the family, life is worth living; when the family falters, life falls apart". The goal of Maximized Parenting is to fill the knowledge gap in you that will make you a better parent as well as an inspiration to other parents of the 21st century. Choose to be an intentional parent who will put in the needed time, energy and efforts to raise successful children. Know that expensive toys and vacations are a poor substitute for the valuable time you need to spend with your children. Refuse to outsource your parenting duties to care givers and boarding schools and you will be a stakeholder in the next generations through your children who will pass on your legacies. Remember, when a parent dies, one thing that cannot be buried with him/her is his/her impact on the lives of his/her children, those things become a living memorial in his/her children.

**The Focus on the Family® Guide to Talking with Your Kids about Sex** - J. Fitch 2013-10-15

Sexual images saturate today's culture--and children will learn about sex somewhere. But research shows that they want to learn from the parents they trust. Talking about sex doesn't

have to be a fear-filled challenge. The Focus on the Family® Guide to Talking with Your Kids about Sex shows parents how to talk with confidence to their kids about sex and sexuality. This candid resource is full of the latest information, practical insights, and age-appropriate answers to the questions parents and children ask about sex. Focus on the Family's Physicians Resource Council, along with research from The Medical Institute for Sexual Health provides parents with the tools and empowering encouragement they need in order to communicate more effectively and biblically about sex, self-control, and self-respect at every stage of a child's development.

[A Parent Toolkit for Success with Children](#) - T. Lee Burnham 1999-01-01

Based on the notion that parents want their children to do well in school but may not realize how much their home life influences their children academically, this document comprises a test of the home learning environment for parents and a "toolkit" for effective parenting. The test is a series of true-false statements designed to identify family characteristics with regard to communication, productivity, nurturance and affection, stable family organization, and achievement by example. The toolkit is presented in eight sections, each including self-evaluations and skill building exercises or practical suggestions for parents. Section 1 of the toolkit discusses the challenges of parenting and the importance of a positive emotional climate, and provides suggestions for improving parenting effectiveness. Section 2 deals with communication, including basic and advanced principles, skill exercises, and individual evaluations. Section 3 addresses competition and cooperation, including basic values, sports, coaching, and how parents can enhance the development of cooperation. Section 4 discusses discipline as a structure for growth, responsibility as an element of discipline, and discipline as a learning experience. Section 5 addresses the process of building self-esteem. Section 6 discusses sex education at home, including basic values, levels of understanding, and sex and intimacy. Section 7 deals with the special challenges of parenting teenagers, while section 8 provides a series of structured problem solving exercises to help a

group of teenagers learn how to talk to one another and solve problems effectively in preparation for working out problems with family members. (KB)

Parenting That Works (eBook) - Arnold Mol  
2007-01-01

All parents want their children to be confident, intelligent, attractive and well behaved. However, most parents are of the opinion that they will never succeed! For them in particular there is good news: parenting is not that difficult! The author looks at the building blocks for successful parenting: a healthy self-image, appropriate discipline, development of the child's potential, a healthy attitude to physical appearance and abilities, the correct handling of the teenager stage and your child and their relationship with God. Yes, parenting can work. And with your heavenly Father as the perfect example and His power at your disposal, how can you fail?

**SEX EDUCATION for 8-12 Year Olds Kids BOOK for GOOD PARENTS** - Ana Leblanc  
2017-09-10

Parents ought to be the first source of sex education for their children. Don't think that because children can learn about human sexuality in school, your responsibility to teach them about sex has been removed. Especially now that there is confusion as to how to teach human sexuality in school, the parents must be ready to assume the role to educate their children in everything they need to know to understand their sexuality. This book serves as a guide for parents and guardians to educate their children on the issue of sex so they can understand the myths and facts about this important topic. PREFACE CHAPTER 1 - SEX EDUCATION CAN BE EASY CHAPTER 2 - EDUCATING YOUR CHILDREN ON DONOR CONCEPTION CHAPTER 3 - PROTECTING YOUR CHILD FROM CHILD ABUSE CHAPTER 4 - DON'T KEEP THEM WONDERING, HOW MUMMY AND DADDY DO IT CHAPTER 5 - YOUR CHILD SEXUAL DEVELOPMENT CONCLUSION SEX EDUCATION for 8-12 year olds kids BOOK FOR GOOD PARENTS Sex education has never been an issue with my children. The most important thing you need to know is to look for the everyday opportunities that present themselves and act

upon them. I can remember once being in a car with one of my sons. He was only 8 years old at the time, but was sitting beside a lady friend of mine who was very large breasted. My son said to me, "hey mum, look at this", and opened his mouth like he was going to suck on the lady's breast (as he had seen me breast feed three babies by then). I was mortified and said to David, "that's not the right thing to do, David". I didn't say anything else at the time as it wasn't appropriate. Luckily my friend was very understanding about the incident. Later on when we were at home I said to him, "so you noticed that my friend has large breasts?" I know that he was only 8 years old but he had noticed something and didn't need to be ignored. Admittedly he went about things the wrong way but he was only eight years old. So I took the opportunity to say to him, "David as you grow older you are going to notice that many of your girlfriends will start to grow breasts. It's just a normal part of growing up. And it is important for you to make sure that when talk to girls you look at their faces and not at their breasts". We had a great conversation and I didn't make a big deal of it. But I did answer all of his questions. **Train Up a Child** - Nancy L. Van Pelt 1984

*Me, My Kids and Sex Education* - Ogoo Tony Muonagor 2023-02

This book; *Me, My Kids and Sex Education* was born out of the desire to help educate parents on the high level of child sexual abuse molestation and defilement out there and the dangers children face every waking day. Many parents complain that when it comes to sex education they are unable to do the needful, most don't know what to do and they blame the school for not teaching the kids sex education. Dear parents, it is a system dysfunctional mentality to believe that schools have the right to impact morals into your children. As a school owner we offer weekly moral instructions in school to augment. This once-a-week dose cannot be exhaustive. Bear it in mind that good moral upbringing begins from the home as a parent if you don't nurture your children and teach them morals you will definitely lose them to the society in which they grow. Some of the children don't have support from home, they lack follow-up and love. As a parent, when last did you ask

vital questions about the kind of friends your child keeps? - When last did you attend to the moral needs of your children? -When last did you sit your child down and teach him or her sex education? You can't blame the school for your own in discipline in parenting. Some of these children are being molested from home and the environment they live in. Some of them are going through emotional trauma and dying in silence and yet there's nobody to attend to them from home. With this book; *Me, My Kids and Sex Education* in your hands, 95% of the parenting job will be done. This book is a simple, very educative and effective way to communicate to your youngster what sex education is. It is always a dreaded topic and an awkward moment for parents when it comes to teaching their kids sex education. Many parents pray and wish their kids don't get molested, many more shift the responsibility of teaching sex education to the school. Many don't know what to say or how to say it and many more don't even know how to start the conversation of public and private body part education. With this book; *Me, My Kids and Sex Education*, you can comfortably sit down with your precious kids and flow with the most dreaded conversation. God bless you all and happy reading.
