Sex Ed Robert T. Eberwein 1999 In a 1914 movie, *Damaged Goods*, a doctor shows a character the horrific effects of venereal disease. In contrast, many of today's sex ed videos encourage viewers to realize their sexuality more fully as a source of pleasure. In *Sex Ed*, Robert Eberwein demonstrates how films and videos used for sex education have provided a complex ideological framework in which questions of sexuality, gender, and race are compellingly foregrounded. Eberwein starts his investigation in the silent and early sound eras with educational films used both to warn audiences about venereal disease and to provide basic contraception information. World War II movies, he states, waged their own war against venereal disease-in the armed services and at home. Newer works deal with birth control and focus in particular on AIDS. *Sex Ed* also highlights the classroom. Eberwein draws connections between the earliest and most recent examples of educational films as he analyzes their ideological complexity. He concludes by examining marriage-manual films of the early 1970s and very recent videos for couples and individuals seeking instruction in sexual techniques to increase pleasure.

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those

Modern Art in Eastern Europe S. A. Mansbach 2001-02-05 This pioneering and award-winning study provides the world with the first coherent narrative of Eastern European contributions to the modern art movement. Analyzing an enormous range of works, from art centers such as Prague, Warsaw and Budapest, (many published here for the first time), S.A. Mansbach shows that any understanding of Modernism is essentially incomplete without the full consideration of vital Eastern European creative output. He argues that Cubism, Expressionism and Constructivism, along with other great modernist styles, were merged with deeply rooted, Eastern European visual traditions. The art that emerged was vital modernist art that expressed the most pressing concerns of the day, political as well as aesthetic. Mansbach examines the critical reaction of the contemporary artistic culture and political state. A major groundbreaking interpretation of Modernism, *Modern Art in Eastern Europe* completes any full assessment of twentieth-century art, as well as its history. *Modern Art in Eastern Europe* is the recipient of the 1997 C.I.N.O.A. Prize, awarded by La Confédération Internationale de Négociants en Oeuvres d'Art. The prize is awarded to defray the costs of publication in order to encourage publishers to produce manuscripts of particular merit and the works of younger art historians.

Every Nation for Itself Ian Bremmer 2012 G-Zero -n.A world order in which no single country or durable alliance of countries can meet the challenges of global leadership. Come the worst - a rogue nuclear state, a pandemic, complete financial meltdown - where would the world look for leadership? A generation ago Europe, the US and Japan were the world's powerhouses; the free-market democracies that propelled the global economy. Today they struggle just to stay on their feet, and there appears to be nobody to step into their shoes. Acclaimed geopolitical analyst Ian Bremmer argues that the world is facing a leadership vacuum- our need for cooperation has never been greater, but the G20 members are poised for uncertainty and open conflict. Yet all is not lost. Bremmer shows where positive sources of power can still be found, and how they can be exercised for the common good.
