Sentencing (a New Sentencing Framework) - South African Law Commission 2000

The South African sentencing system faces certain problems. There is a perception that like cases are not being treated alike; that sentencers do not give enough weight to certain serious offences; that South African restorative alternatives are not being provided for offenders being sent to prison for less serious offences; that sufficient attention is not being paid to the concerns of victims of crime; and that, largely because of overcrowding, sentenced prisoners are being released too readily. The Commission has accepted that there is substance to this criticism of the sentencing system and proposes a framework that in its view can remedy these problems to the greatest extent possible.

Reconciliation After Violent Conflict - David Bloomfield 2003

How does a newly democratized nation constructively address the past to move from a divided history to a shared future? How do people rebuild coexistence after violence? The International IDEA Handbook on Reconciliation after Violent Conflict presents a range of tools that can be, and have been, employed in the design and implementation of reconciliation processes. Most of them draw on the experience of people grappling with the problems of past violence and injustice. There is no "right answer" to the challenge of reconciliation, and so the Handbook prescribes no single approach. Instead, it presents the options and methods, with their strengths and weaknesses evaluated, so that practitioners and policy-makers can adopt or adapt them, as best suits each specific context. Also available in a French language version.

The Autism Spectrum, Sexuality and the Law - Nick Dubin 2014-07-21

Based on Nick Dubin's own experience, and drawing on the extensive knowledge of Dr Tony Attwood and Dr Isabelle Hénault, this important

book addresses the issues surrounding the autism spectrum, sexuality and the law. The complex world of sex and appropriate sexual behaviour can be extremely challenging for people with autism spectrum disorder (ASD) and, without guidance, many find themselves in vulnerable situations. This book examines how the ASD profile typically affects sexuality and how sexual development differs between the general population and those with ASD. It explains the legalities of sexual behaviour, how laws differ from country to country, and the possibility for adjustment of existing laws as they are applied to the ASD population. With advice on how to help people with autism spectrum disorder gain a better understanding of sexuality and a comprehensive list of resources, the book highlights the need for a more informed societal approach to the psychosexual development of people with ASD. A ground-breaking and honest account, this book will be an invaluable addition to the shelves of parents of children with ASD, mental health and legal professionals, teachers, carers and other professionals working with individuals on the spectrum.

[The Sociopath Next Door](#) - Martha Stout 2011-07-08

WHO IS THE DEVIL YOU KNOW? Is it your lying, cheating ex-husband? Your sadistic high school gym teacher? Your boss who loves to humiliate people in meetings? The colleague who stole your idea and passed it off as her own? In the pages of *The Sociopath Next Door*, you will realize that your ex was not just misunderstood. He's a sociopath. And your boss, teacher, and colleague? They may be sociopaths too. We are accustomed to think of sociopaths as violent criminals, but in *The Sociopath Next Door*, Harvard psychologist Martha Stout reveals that a shocking 4 percent of ordinary people- 1 in 25 - has an often undetected mental disorder, the chief symptom of which is that that person

possesses no conscience. He or she has no ability whatsoever to feel shame, guilt, or remorse. One in 25 everyday people, therefore, is secretly a sociopath. They could be your colleague, your neighbour, even family. And they can do literally anything at all and feel absolutely no guilt. How do we recognize the remorseless? One of their chief characteristics is a kind of glow or charisma that makes sociopaths more charming or interesting than the other people around them. They're more spontaneous, more intense, more complex, or even sexier than everyone else, making them tricky to identify and leaving us easily seduced. Fundamentally, sociopaths are different because they cannot love. Sociopaths learn early on to show sham emotion, but underneath they are indifferent to others' suffering. They live to dominate and thrill to win. The fact is, we all almost certainly know at least one or more sociopaths already. Part of the urgency in reading *The Sociopath Next Door* is the moment when we suddenly recognize that someone we know - someone we worked for, or were involved with, or voted for - is a sociopath. But what do we do with that knowledge? To arm us against the sociopath, Dr Stout teaches us to question authority, suspect flattery, and beware the pity play. Above all, she writes, when a sociopath is beckoning, do not join the game. It is the ruthless versus the rest of us, and *The Sociopath Next Door* will show you how to recognize and defeat the devil you know.

[Child Protective Services](#) - Diane DePanfilis 2003

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS

caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Correcting the Scholarly Record for Research Integrity - M. V. Dougherty 2018-11-09

This volume is the first book-length study on post-publication responses to academic plagiarism in humanities disciplines. It demonstrates that the correction of the scholarly literature for plagiarism is not a task for editors and publishers alone; each member of the research community has an indispensable role in maintaining the integrity of the published literature in the aftermath of plagiarism. If untreated, academic

plagiarism damages the integrity of the scholarly record, corrupts the surrounding academic enterprise, and creates inefficiencies across all levels of knowledge production. By providing case studies from the field of philosophy and related disciplines, the volume exhibits that current post-publication responses to academic plagiarism are insufficient. It catalogues how humanities disciplines fall short in comparison with the natural and biomedical sciences for ensuring the integrity of the body of published research. This volume provides clarity about how to conceptualize the scholarly record, surveys the traditional methods for correcting it, and argues for new interventions to improve the reliability of the body of published research. The book is valuable not only to those in the field of philosophy and other humanities disciplines, but also to those interested in research ethics, meta-science, and the sociology of research.

Archives in Liquid Times - Frans Smit 2017

Archives in Liquid Times aims to broaden and deepen the thinking about archives in today's digital environment. It is a book that tries to fuel the debate about archives in different fields of research. It shows that in these liquid times, archives need and deserve to be considered from different angles. Archives in Liquid Times is a publication in which archival science is linked to philosophy (of information) and data science. Not only do the contributors try to open windows to new concepts and

perspectives, but also to new uses of existing concepts concerning archives. The articles in this book contain philosophical reflections, speculative essays and presentations of new models and concepts alongside well-known topics in archival theory. Among the contributors are scholars from different fields of research, like Anne Gilliland, Wolfgang Ernst, Geoffrey Yeo, Martijn van Otterlo, Charles Jeurgens and Geert-Jan van Bussel. Filthy Rich - James Patterson 2016

"Jeffrey Epstein rose from humble origins to the rarefied heights of New York City's financial elite. A college dropout with an instinct for numbers--and for people--Epstein amassed his wealth through a combination of access and skill. But even after he had it all, Epstein wanted more. And that unceasing desire--especially a taste for young girls--resulted in his stunning fall from grace. From Epstein himself, to the girls he employed as masseuses at his home, to the cops investigating the appalling charges against him, *Filthy Rich* examines all sides of a case that scandalized one of America's richest communities."--Amazon.com.

Speaking Faithfully - Rebecca Wilson 2012-11-01

A down-to-earth guide that syncs theology with technology. Today Sunday morning worship competes with youth soccer, Starbucks, Facebook, and the allure of being "spiritual but not religious." To share the gospel in a world like this, Christians need to reach beyond the boundaries of concrete and virtual communities to become evangelists. That takes faith. It also requires skill with public relations, social media, traditional print materials and other techniques to increase church visibility. The authors, both recognized experts and consultants, walk readers through the theology of church communications and introduce steps to help us deliver clutter-busting messages to reach our technologically sophisticated and faith-challenged world.

American Psychiatric Association Practice Guidelines - American Psychiatric Association 1996

The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

A Stolen Life - Jaycee Dugard 2011-07-12

A raw and powerful memoir of Jaycee Lee Dugard's own story of being kidnapped as an 11-year-old and held captive for over 18 years. On 10 June 1991, eleven-year-old Jaycee Dugard was abducted from a school bus stop within sight of her home in Tahoe, California. It was the last her family and friends saw of her for over eighteen years. On 26 August 2009, Dugard, her daughters, and Phillip Craig Garrido appeared in the office of her kidnapper's parole officer in California. Their unusual behaviour sparked an investigation that led to the positive identification of Jaycee Lee Dugard, living in a tent behind Garrido's home. During her time in captivity, at the age of fourteen and seventeen, she gave birth to two daughters, both fathered by Garrido. Dugard's memoir is written by the 30-year-old herself and covers the period from the time of her abduction in 1991 up until the present. In her stark, utterly honest and unflinching narrative, Jaycee opens up about what she experienced, including how she feels now, a year after being found. Garrido and his wife Nancy have since pleaded guilty to their crimes.

Caught in the Web of the Criminal Justice System - Lawrence A. Dubin, J.D. 2017-06-21

Increasing numbers of people with autism and other developmental disabilities are being convicted of sex offences, resulting in draconian and public punishment. Yet even when evidence shows that people with these conditions often pose little threat to society, or lack a core

understanding as to why their actions break the law, the "sex offender legal regime" doesn't allow any room to take the disability into account. This ground-breaking book offers a multi-disciplinary examination of how unjust sex offense laws trap vulnerable groups such as those with developmental disabilities. Drawing on research, empirical evidence and including case studies, experts from the fields of law, ethics, psychology and sociology explore what steps should be taken in order to ensure that laws are just and take into consideration factors such as the vulnerability of the perpetrators. Investigating the consequences caused by public hysteria over sex offenses, this book highlights the judicial failure to protect defendants with developmental disabilities in the context of the unjust and hyper-punishment of all those charged with sex offenses. Proposing a new way forward based on research and evidence-based sentencing for sex offenses, and elimination of the sex offender registry, this book offers an informed and compassionate view that is essential for all professionals working in this field.
