Child Pornography and Sexual Grooming - Suzanne Ost 2009-05-28

Child pornography and sexual grooming provide case study exemplars of problems that society and law have sought to tackle to avoid both actual and potential harm to children. Yet despite the considerable legal, political and societal concern that these critical phenomena attract, they have not, thus far, been subjected to detailed socio-legal and theoretical scrutiny. How do society and law construct the harms of child pornography and grooming? What impact do constructions of the child have upon legal and societal responses to these phenomena? What has been the impetus behind the expanding criminalisation of behaviour in these areas? Suzanne Ost addresses these and other important questions, exploring the critical tensions within legal and social discourses which must be tackled to discourage moral panic reactions towards child pornography and grooming, and advocating a new, more rational approach towards combating these forms of exploitation.

Sex Offenders and the Internet - Dennis Howitt 2009-09-28

Online, the opportunity to commit a crime is never more than a few clicks away. *Sex Offenders and the Internet* explores the nature of online sex offenders in order to help practitioners understand and treat this new category of client. Kerry Sheldon and Dennis Howitt examine the research base by reviewing case studies and psychological profiles, with a particular focus on paedophilic Internet sex offenders. Issues covered include child pornography, the often overlooked 'excuses' for paedophilia, and how we can move forward. The result is a book that comprehensively details the nature of Internet sex offenders, bringing together the relevant research into one essential volume.

Sex Offenders - Fabian M. Saleh 2021

"In his annual lecture to second year medical students, Dr. Fred Berlin describes an interview he had, early in his career, with a man whom he was evaluating following the man's arrest for child sexual abuse. Halfway through the interview, the arrested man interrupted Dr. Berlin's questions and said, You know, Doctor, your society takes a newborn baby boy; gathers family and friends, takes a knife and without any anaesthesia cuts skin off the tip of his penis. This is accepted as a religious act. I

bend over and kiss that same penis, and I am arrested as a child sexual abuser. Can you explain that to me? (Berlin, 2000)"--

Online Child Sexual Abuse - Elena Martellozzo 2013-06-17

Online Child Sexual Abuse: Grooming, Policing and Child Protection in a Multi-Media World addresses the complex, multi-faceted and, at times, counter-intuitive relationships between online grooming behaviours, risk assessment, police practices, and the actual danger of subsequent abuse in the physical world. Online child sexual abuse has become a high profile and important issue in public life. When children are victims, there is clearly intense public and political interest and concern. Sex offenders are society's most reviled deviants and the object of seemingly undifferentiated public fear and loathing. This may be evidenced in ongoing efforts to advance legislation, develop police tactics and to educate children and their carers to engage with multi-media and the internet safely. Understanding how sex offenders use the internet and how the police and the government are responding to their behaviour is central to the development of preventative measures. Based on extensive ethnographic research conducted with the police and a specialist paedophile unit, here Elena Marellozzo presents an informed analysis of online child sexual abuse: of the patterns and characteristics of online grooming, and of the challenges and techniques that characterize its policing. Connecting theory, research and practice in the field of policing, social policy, victimology and criminology, this book adds significantly to our understanding and knowledge of the problem of online child sexual abuse, the way in which victims are targeted and how this phenomenon is, and might be, policed.

Internet Child Abuse: Current Research and Policy - Julia Davidson 2010-09-13

Internet Child Abuse: Current Research and Policy provides a timely overview of international policy, legislation and offender management and treatment practice in the area of Internet child abuse. Internet use has grown considerably over the last five years, and information technology now forms a core part of the formal education system in many countries. There is however, increasing evidence that the Internet is used by some adults to access children and young people in order to 'groom' them for the purposes of sexual abuse; as well as to produce and distribute indecent illegal images of children. This book presents and assesses the most recent and current research on internet child abuse, addressing: its nature, the behaviour and treatment of its perpetrators, international policy, legislation and protection, and policing. It will be required reading for an international audience of academics, researchers, policy-makers and criminal justice practitioners with interests in this area.

Sex Crimes and Sex Offenders - Donna Vandiver 2016-12-08

Sex Crimes and Sex Offenders: Research and Realities provides an overview of social scientific theory and research on sex crimes and sex offenders. Most other books on the market are focused on a single issue—such as treatment, rape, pedophilia, theory, etc. This book is unique in that it covers the most current theory and research along with individual cases of sex crimes (e.g., Kobe Bryant, Jerry Sandusky, and other case studies), effectively linking theory and research with the realities of sex crimes and sex offenders as well as their victims. Vandiver, Braithwaite, and Stafford are careful to dispel myths and to focus on the heterogeneity of sex crimes and sex offenders, and not on any one issue or population or theory. Instead, they weave a framework using a full range of theoretical concepts and research data to integrate their discussions of crimes, offenders, victims, treatments, and policy implications. The result is a valuable resource for students and early-stage researchers investigating sex crimes or offenders.

Child Sexual Abuse - Julia Davidson 2008-05-07

Child Sexual Abuse critically evaluates the development of policy and legislative measures to control sex offenders. The last fifteen years has seen increasing concern on the part of the government, criminal justice agencies, the media and the public, regarding child sexual abuse. This concern has been prompted by a series of events including cases inviting media attention and involving the abduction, sexual abuse and murder of young children. The response to this wave of child sexual abuse

revelation has been to introduce increasingly punitive legislation regarding the punishment and control of sex offenders (sex offenders are the only group of offenders in British legal history to have their own act), both in custody and in the community. But this response, it is argued here, has developed in a reactionary way to media and public anxiety regarding the punishment and control of sex offenders (who have abused children) and the perceived threat of such offenders in the community.

Skills and strategies for successful engagement with offenders are a key focus of the book, as well as improving understanding of underpinning factors associated with offending and desistance. This volume, which is derived from well-received presentations hosted by the UK's National Organisation for the Treatment of Abusers (NOTA) over a number of years, also offers a detailed examination of individual, organisational and societal roles in relation to identifying and preventing sexual abuse in our communities. Using case examples throughout, Working with Sex Offenders will be essential reading for all professionals involved in the management and treatment of sex offenders.

Suicide Among Child Sex Offenders - Tia A. Hoffer 2013-01-09

By providing empirical data and multidisciplinary considerations, the book increases awareness of child sex offender suicide among the various entities which come into contact with this population of offenders. This book attempts to bring awareness of this potentially high risk population to better inform the law enforcement, corrections, and mental health communities of the unique risk factors for suicide among CSOs and provide a more effective crisis response. The Federal Bureau of Investigation (FBI) Behavioral Analysis Unit III- Crimes Against Children reviewed and analyzed 106 male Child Sex Offenders (CSO) who committed suicide during the course of a child sex crime

investigation. Of the 106 CSOs, 79% were child pornography traders/collectors, 43% were child molesters, 21% were travelers, and 18% were child pornography producers. Analyses also revealed that nearly all were Caucasian and the majority were married, employed, and died via self-inflicted gunshot wound. Of particular interest was that in 26% of the cases, the offender killed himself within 48 hours of his awareness of the investigation; and in nearly half of the known cases, the offender had past/current military service and a criminal history. In addition, 68% left a suicide note, which is substantially higher than the general suicide population. Analysis of the notes revealed common aspects and themes including cognitive distortions, burdensomeness, shame, and self-blame. The most frequently cited reason for the suicide in the note was the child sex crime investigation.

THE CYBERCRIME HANDBOOK FOR COMMUNITY

CORRECTIONS - Art Bowker 2012-03-01

In the early 1990s, professionals began to question how to address offender computer use while on supervision, but in the past ten years, tools emerged that were specifically developed for triage and field forensics. As these were rapidly embraced, it was still unclear what professionals could look for, how to look for it, and how to interpret what they found. This unique book resolves those issues. The book provides a clear outline of what can and should be done regarding the management of offender computer use. Not only does the text help community corrections professionals understand how to monitor computer use, but it helps realize how information gained during monitoring can assist in overall case management. The book takes the reader through all the paces of managing offender cyber-risk and is meant specifically for pretrial, probation, parole, and community sanction officers. The chapters are organized by major areas, such as community corrections and cyberspace, understanding the options, condition legality,

operational legality, accessing cyber-risk, computer education, principles of effective computer monitoring, search and seizure, deploying monitoring software, and online investigations. Additionally, numerous appendices provide a wealth of information regarding model forms, questionnaires, and worksheets. This book moves the reader toward a more informed use of the technology that is now readily available to effectively manage offenders' digital behavior.
