Keeping Foster Children Safe Online John DeGarmo 2014-04-21 Foster children are more likely than other children to be involved in risky activities online due to backgrounds of neglect and abuse, an absence of supportive adults, lower self-esteem, and greater exposure to drugs and alcohol. Covering all the dangers of online technology that your foster child might encounter, from cyberbullying and "sexting", to child grooming and online hoaxes, this book pays particular attention to dangers unique to foster families, such as the difficulties internet access poses for maintaining formal arrangements for contact with birth families. DeGarmo equips foster parents and professionals with strategies to keep foster children safe online, giving tips on establishing expectations for internet usage, advice on how to prevent inappropriate contact and protect personal information, and explaining the importance of "netiquette". An indispensable guide to negotiating online dangers, this is required reading for all foster families as well as residential child care workers, social workers and other professionals working with children in care.

Cyberbullying, Sexting and the Law 2015 This study was commissioned to meet the following aims and objectives : To bring together legal, educational and socio-cultural stakeholders and students, To inform consideration of the issues, actions, challenges and gaps in knowledge associated with cyberbullying, sexting and the law; To inform policy, curriculum and leadership practices; and To link with any previous studies. To that end key stakeholders and students were invited to participate in interviews, focus groups, or online surveys. Whilst other studies on sexting have been undertaken interstate (e.g. Albury et al, 2013; Svantesson, 2010; Tallon et al, 2012; Walker et al., 2013;) none to our knowledge have been directly to advise a Minister of Education, and none have explicitly engaged with culturally and linguistically diverse young people. This then, is a landmark study in the national and South Australian context and has provided an evidence-base from which to make recommendations about cyberbullying, sexting and the law. It will strongly position the Department for Education and Child Development to support the safety and wellbeing of young people in its care. This report builds upon an established record of successful collaboration with academics and key stakeholders through such initiatives as the Coalition to Decrease Bullying, Harassment and Violence in SA Schools, and the Advisory Committee on Sexting. [Executive summary, ed].

The Happiness Effect Donna Freitas 2017-01-31 Sexting. Cyberbullying. Narcissism. Social media has become the dominant force in young people's lives, and each day seems to bring another shocking tale of private pictures getting into the wrong hands, or a lament that young people feel compelled to share their each and every thought with the entire world. Have smartphones and social media created a generation of self-obsessed egomaniacs? Absolutely not, Donna Freitas argues in this provocative book. And, she says, these alarmist fears are drawing attention away from the real issues that young adults are facing. Drawing on a large-scale survey and interviews with students on thirteen college campuses, Freitas finds that what young people are overwhelmingly concerned with--what they really want to talk about--is happiness. They face enormous pressure to look perfect online--not just happy, but blissful, ecstatic, and fabulously successful. Unable to achieve this impossible standard, they are anxious about letting the less-than-perfect parts of themselves become public. Far from wanting to share everything, they are brutally selective when it comes to curating their personal profiles, and worry obsessively that they might unwittingly post something that could come back to haunt them later in life. Through candid conversations with young people from diverse backgrounds, Freitas reveals how even the most well-adjusted individuals can be stricken by self-doubt when they compare their experiences with the vast collective utopia that they see online. And sometimes, as on anonymous platforms like Yik Yak, what they see instead is a depressing cesspool of racism and misogyny. Yet young people are also extremely attached to their smartphones and

apps, which sometimes bring them great pleasure. It is very much a love-hate relationship. While much of the public's attention has been focused on headline-grabbing stories, the everyday struggles and joys of young people have remained under the radar. Freitas brings their feelings to the fore, in the words of young people themselves. The Happiness Effect is an eye-opening window into their first-hand experiences of social media and its impact on them.

Readers explore some of this modern technology and are provided with a guide to navigating texts and the Internet safely, from avoiding misunderstanding to larger legal issues that can arise from careless texting.

Cyberbullying and Sexting Elizabeth Agnew 2024-02-08 Drawing on two empirical studies and influential theoretical frameworks, this book provides a critical overview of the key regulatory challenges concerning cyberbullying and sexting behaviours among young people (persons under 18 years). The author explores issues ranging from conceptualising the behaviours, examining the prevailing presence of sexism, myths and stereotypes surrounding gender roles and identity, and the limitations of criminal law as an effective regulatory tool. In doing so, identifying peer-based sexting behaviours as part of a continuum of sexual behaviour is promoted alongside the need to consider interventions beyond the legal landscape and in line with the United Nations Convention on the Rights of the Child. In the main, priority is given to non-legal responses and the need for more effective and comprehensive gender-sensitive education programmes. The book therefore provides a more developed conceptual understanding of sexting and cyberbullying behaviours among young people.

Children as 'Risk' Anne-Marie McAlinden 2018-10-31 This book critically examines socio-political constructions of risk related to sexual offending behaviour by and among children and young people and charts the rise of harmful sexual or exploitative behaviour among peers, drawing on a range of theoretical frameworks and primary research. Discussion of these behaviours is exhibited against a backdrop of the premature cultural sexualisation of contemporary childhood, which challenges traditional conceptions of childhood, victimhood and gendered sexual identities more broadly. It examines the complexities of peer-based sexual behaviours in a range of settings, including within organisational contexts such as schools and care homes, within families and peer-based relationships, as well as online contexts including sexting and cyberbullying. It draws out the myriad legal, practical and policy challenges of negotiating the boundaries between normal/experimental, risky/problematic and harmful sexual behaviour, and in particular the demarcation between coercion and consent, both for professionals as well as children and young people themselves.

Cybercrime and its victims Elena Martellozzo 2017-06-26 The last twenty years have seen an explosion in the development of information technology, to the point that people spend a major portion of waking life in online spaces. While there are enormous benefits associated with this technology, there are also risks that can affect the most vulnerable in our society but also the most confident. Cybercrime and its victims explores the social construction of violence and victimisation in online spaces and brings together scholars from many areas of inquiry, including criminology, sociology, and cultural, media, and gender studies. The book is organised thematically into five

parts. Part one addresses some broad conceptual and theoretical issues. Part two is concerned with issues relating to sexual violence, abuse, and exploitation, as well as to sexual expression online. Part three addresses issues related to race and culture. Part four addresses concerns around cyberbullying and online suicide, grouped together as 'social violence'. The final part argues that victims of cybercrime are, in general, neglected and not receiving the recognition and support they need and deserve. It concludes that in the volatile and complex world of cyberspace continued awareness-raising is essential for bringing attention to the plight of victims. It also argues that there needs to be more support of all kinds for victims, as well as an increase in the exposure and punishment of perpetrators. Drawing on a range of pressing contemporary issues such as online grooming, sexting, cyber-hate, cyber-bullying and online radicalization, this book examines how cyberspace makes us more vulnerable to crime and violence, how it gives rise to new forms of surveillance and social control and how cybercrime can be prevented.

The Happiness Effect Donna Freitas 2019 Sexting. Cyberbullying. Narcissism. People—and especially the media—are consumed by fears about the effect of social media on young people. We hear constantly about the dangers that lurk online, and about young people's seemingly pathological desire to share anything and everything about themselves with the entire world. Donna Freitas has traveled the country, talking to college students about what's really happening on social media. What she finds is that, while we focus on the problems that make headlines, we are ignoring the seemingly mundane, but much more widespread, problems that occur every day. Young people, she shows, feel enormous pressure to look happy all the time—and not just basically content, but blissful, ecstatic, inspiring and successful in their personal, professional, and academic lives—regardless of how they actually feel. Of course, these young adults are not that happy, at least not all of the time, and the constant exposure to the seemingly perfect lives of other people on social media only makes them feel worse. What's more, far from wanting to share everything about themselves, they are terrified of sharing something that will come back to haunt them later in life. The rise of social media has brought about a dramatic cultural shift: the need to curate a perfect identity online that often has little to do with reality. The consequences, Freitas shows, can be very real. Drawing on an online survey and in-person interviews with students from thirteen campuses around the U.S., Freitas offers a window into the social media generation and how they use Facebook, Snapchat, and Twitter, and other online platforms. She presents fascinating insights about how these people are

consciously creating alternate identities for themselves, while also suffering from the belief that the other people they encounter online really are as perfect as their profiles appear. This is an eye-opening look at the real world of social media today.

Risk and Harm in Youth Sexting Emily Setty 2020-05-01 This book explores young people's perspectives on risk and harm in youth sexting, specifically privacy violations and unwanted, pressured and coerced sexting. This book engages with key debates, academic literature and evidence, as well as findings of a study into young people's perceptions of, attitudes toward and experiences of sexting. It challenges predominant assumptions that youth sexting is inherently risky and deviant and sets out the specific contexts in which privacy violations and unwanted sexting occur. It explores the sociocultural contexts underpinning harm, including gender, sexism, sexuality, status and power, and associated constructs of risk and shame, as well as broader youth cultural contexts that create and give meaning to sexters and sexting practices, particularly related to victim-blaming, social shaming, bullying, harassment and abuse. Finally, it discusses young people's attitudes and beliefs about interventions to reduce the prevalence of youth sexting. In doing so, the book critically engages with young people's perspectives in order to make practical recommendations for encouraging a 'digital sexual ethics' based on rights to bodily and sexual expression, autonomy and integrity, positive bystander intervention, and anti-victim blaming and abuse messages. This book will be of great interest to scholars and students of criminology, education, social care, sociology and health. It will also be a valuable resource for those working in educational and social care settings such as sex educators, youth and social workers, youth counsellors and mental health professionals.

Narratives in Research and Interventions on Cyberbullying among Young People Heidi Vandebosch 2019-01-23 This book describes innovative ways to do research about, and design interventions for, cyberbullying by children and adolescents. It does this by taking a narrative approach. How can narrative research methods complement the mostly quantitative methods (e.g. surveys, experiments, ...) in cyberbullying research ? And how can stories be used to inform young people about the issue and empower them? Throughout the book, special attention is paid to new information and communication technologies, and the opportunities ICTs provide for narrative research (e.g. as a source of naturally occurring stories on cyberbullying), and for narrative health interventions (e.g. via Influencers). The book thus integrates research and insights from the fields of cyberbullying, narrative methods, narrative health communication, and new information and communication technologies.

Sexting and Revenge Pornography Andy Phippen 2020-12-06 This book considers the rapidly

evolving, both legally and socially, nature of image-based abuse, for both minors and adults. Drawing mainly from UK data, legislation and case studies, it presents a thesis that the law is, at best, struggling to keep up with some fundamental issues around image based abuse, such as the sexual nature of the crimes and the long term impact on victims, and at worst, in the case of supporting minors, not fit for purpose. It shows, through empirical and legislative analysis, that the dearth of education around this topic, coupled with cultural norms, creates a victim blaming culture that extends into adulthood. It proposes both legislative developments and need for wider stakeholder engagement to understand and support victims, and the impact the non-consensual sharing of intimate images can have on their long-term mental health and life in general. The book is of interest to scholar of law, criminology, sociology, police and socio-technical studies, and is also to those who practice law, law enforcement or wider social care role in both child and adult safeguarding.

iRules Janell Burley Hofmann 2014-05-06 As Janell Burley Hofmann, mother of five, wrapped her 13-year-old's iPhone on Christmas Eve, she was overwhelmed by questions: "Will my children learn to sit and wonder without Googling? Should I know their passwords for online accounts? Will they experience the value of personal connection without technology?" To address her concerns, she outlined boundaries and expectations in a contract for her son to sign upon receiving his first cell phone. When Hofmann's editor at The Huffington Post posted the contract, now known as iRules, it resonated on a massive scale and went viral, resulting in a tsunami of media coverage and requests. It quickly became apparent that people across the country were hungry for more. In iRules, Hofmann provides families with the tools they need to find a balance between technology and human interaction through a philosophy she calls Slow Tech Parenting. In the book, she educates parents about the online culture tweens and teens enter the minute they go online, exploring issues like cyberbullying, friend fail, and sexting, as well as helping parents create their own iRules contracts to fit their families' needs. As funny and readable as it is prescriptive, iRules will help parents figure out when to unplug and how to stay in sync with the changing world of technology, while teaching their children self-respect, integrity, and responsibility.
