Broken Idols of the English Reformation - Margaret Aston 2015-11-26

Why were so many religious images and objects broken and damaged in the course of the Reformation? Margaret Aston's magisterial new book charts the conflicting imperatives of destruction and rebuilding throughout the English Reformation from the desecration of images, rails and screens to bells, organs and stained glass windows. She explores the motivations of those who smashed images of the crucifixion in

stained glass windows and who pulled down crosses and defaced symbols of the Trinity. She shows that destruction was part of a methodology of religious revolution designed to change people as well as places and to forge in the long term new generations of new believers. Beyond blanked walls and whited windows were beliefs and minds impregnated by new modes of religious learning. Idol-breaking with its emphasis on the treacheries of images fundamentally transformed not only Anglican ways of worship but also of seeing, hearing and remembering.

No Time Like Forever - Zoe York

Brand new release in the erotic romance small town series by NYT and USA Today bestselling author Zoe York! It started with a kiss... Mari Beadie needed a boyfriend, and former NHL hockey star Chase Miller happened to be in the right place at the right time. The kiss that followed wasn't necessary, strictly speaking, but it sure was hot. Hot enough that when the tables are turned, Chase knows just the pretty bartender to ask to be his pretend girlfriend. Only this time, it's not a one-time deal. **** The pub was slammed, strange for a Sunday night, but it was one of the last weekends of the summer. The tips would make up for the sore feet. Mari was pouring a tray of pints when the phone rang. She hopped over and stuck the ancient handset under her ear, pinning it in place as she pulled the long cord back to the taps with her. "Danny's." "You sound busy." Her heart didn't leap a little at the sound of his voice. No, it didn't. "Yep." "What time do you get off?" "We close at ten tonight, then I need to do some clean up. Probably ten thirty, but I'm not sure." "Okay. See you later." She frowned as she hung up the phone. Two hours later, she was still confused when he sauntered in after last call. Instead of taking his regular stool, he started straightening chairs. "What are you doing?" "Helping you." "Why?" "Because that's what boyfriends do?" She looked around. They were alone. "Uhm..." "Because that's what friends do?" He shrugged. "Don't overthink it. I actually just wanted to give you my cell phone number, but when I called you sounded swamped, so I thought it would be easier to stop by. And I'm not going to watch you sweep, that would be a dick move." "You watch me tend bar almost every day." "That's different." "How?" "I don't know. Give me that." He took the broom from her hand, and she ignored the little thrill she got at the brief, hot press of his fingers against hers. *** The Wardham Series: Between Then and Now What Once Was Perfect Where Their Hearts Collide When They Weren't Looking Beyond Love and Hate Perfect No Matter What No Time Like Forever Beneath These Bright Stars (February 2015) If you like Wardham, you'll love Pine Harbour! Autonomous Driving - Markus Maurer 2016-05-21

This book takes a look at fully automated, autonomous vehicles and discusses many open questions: How

can autonomous vehicles be integrated into the current transportation system with diverse users and human drivers? Where do automated vehicles fall under current legal frameworks? What risks are associated with automation and how will society respond to these risks? How will the marketplace react to automated vehicles and what changes may be necessary for companies? Experts from Germany and the United States define key societal, engineering, and mobility issues related to the automation of vehicles. They discuss the decisions programmers of automated vehicles must make to enable vehicles to perceive their environment, interact with other road users, and choose actions that may have ethical consequences. The authors further identify expectations and concerns that will form the basis for individual and societal acceptance of autonomous driving. While the safety benefits of such vehicles are tremendous, the authors demonstrate that these benefits will only be achieved if vehicles have an appropriate safety concept at the heart of their design. Realizing the potential of automated vehicles to reorganize traffic and transform mobility of people and goods requires similar care in the design of vehicles and networks. By covering all of these topics, the book aims to provide a current, comprehensive, and scientifically sound treatment of the emerging field of "autonomous driving".

Fifteen years ago, seventeen-year-old Vanessa Moran fell in love and lost her virginity but not to the same boy. Pregnant, desperate, and humiliated, she fled friends and family and Whisper Beach, New Jersey, never breathing a word about her secret to anyone. She hasn’t been back since. Now a professional Manhattan organizer, she returns to the funeral of her best friend’s husband. She intends on just paying her respects and leaving—though she can’t deny she also wants the town to see how far she’s come as a successful business woman. But her plans to make this a short visit fall by the wayside when her girlfriends have other ideas. Dorie, the owner of the pier’s Blue Crab Restaurant where Van and her friends worked as teenagers, needs help. Dorie’s roving husband spends every penny they make and now their restaurant is failing. Joe, the boy Van left behind without an explanation, has never stopped loving her. While he’s wary of getting hurt again, he also can’t help wondering what would happen if they took up where they left off. As the summer progresses and the restaurant takes on a new look, trouble comes from unexpected sources. For Van, this summer will test the meaning of friendship and trust—and how far love can bend before it breaks.
