

A Sexual Profile Of Men In Power

Why Black Men Love White Women - Rajen Persaud 2008-01-12
THE IRREVERENT, EYE-OPENING, AND HILARIOUS BOOK THAT DARES TO ASK... Why do so many high-profile black men date and marry the most ordinary white women? Why do so many other black men desire and covet the company of white women? And why does this subject deeply touch so many people of both races? Are these provocative questions matters of love, sex, revenge, power, or politics? All of the above, asserts Rajen Persaud in this illuminating, no-holds-barred book that will have you laughing with recognition while fundamentally changing the way you see just about everything -- from sex and marriage to your own gender and race in all its foibles, pretensions, and ultimate possibilities. Challenging every one of our preconceptions about mixed-race relationships, Rajen Persaud's commentary lights up a topic that has only deepened in intensity and relevance in the decades since Sidney Poitier asked the world "Guess who's coming to dinner?" The answers, so deeply ingrained in our fabric as a nation and even grounded in our past, force us to look at ourselves and our culture with new eyes while pondering matters of CELEBRITY: From Michael Jordan to Bryant Gumbel to Tiger Woods, high-profile affairs and marriages with no shortage of controversy. SEX: Are black men choosing white women -- or rejecting black women? RACE: How white male insecurity is the key to understanding racism. RELATIONSHIPS: Is it more than love that brings the races together? POLITICS: How fear is used to gain power, from sexual politics to global war. MEDIA: How movies and television keep black men running to white women. ...and much more. Get ready for Why Black Men Love White Women -- and finally understand the relationship phenomenon of our times.

Masochism and the Self - Roy F. Baumeister 2014-02-04

This volume provides an integrative theory firmly grounded in current psychology of the self, and offers a fresh, compelling account of one of psychology's most enigmatic behavior patterns. Professor Baumeister provides comprehensive coverage of historical and cross-cultural theories and empirical data on masochism and presents recent, original data drawn from a large data set of anonymous masochistic scripts of fantasies and favorite experiences. Drawn from the latest social psychological research and theories, Professor Baumeister returns the emphasis to the original and proto-typical form of masochism -- sexual masochism -- and explains these phenomena as a means of releasing the individual from the burden of self-awareness. It is the first volume to present a psychological theory compatible with the mounting evidence that most masochists are not mentally ill nor does masochism derive from sadism. Instead, Professor Baumeister finds that masochism emerges as an escapist response to the problematic nature of selfhood and he attempts to foster an understanding of sexual masochism that emphasizes both "escape from self" and "construction of meaning" hypotheses. The book is directed at all those interested in the self and identity in paradoxical behavior patterns and in the construction of meaning, presenting specific clinical recommendations.

Modern Ego Psychology and Human Sexual Experience - Eric R. Marcus 2022-10-21

This text examines human sexuality through psychoanalytic theory and modern ego psychology, which looks at emotional meaning and its organization in symbolic representations of affect as organized by the ego. It starts with an exploration of how symbolic representations are applied to the sensory experience of the body in human sexuality, both in reality and in fantasy. Next, the author delves into the phenomenon of romance as an important self-state in human growth and development. The book concludes with an examination of fetishes and fetish enactments, followed by a discussion of relevant treatments. With its original and fulsome insights into the workings of human sexuality, this book will prove vital for psychoanalysts and psychotherapists in training and in practice, as well as all those seeking to understand human sexual experiences in greater depth.

Why Just Her - Montgomery Blair Sibley 2009

"Why Just Her" identifies the external and internal demons that drove the D.C. Madam, Deborah Jeane Palfrey, from an initially defiant woman willing to fight the government to a woman so despairing as to take her own life prior to sentencing upon her conviction for Prostitution Racketeering. Starting with the execution of search on her home and

seizure warrants for her bank accounts in October 2006 through her death on May 1, 2008, the book traces Jeane's final 20 months as the judicial system time and again failed to live up to its promise to insure 'justice'. Instead, unwittingly sitting atop a client list of the most powerful men in the world, that system made sure that Jeane's story would never be fully told.

Palmistry - Nathaniel Altman 2009

The key to your future—and your present and past—is in the palm of your hand! Nathaniel Altman, best-selling author of *The Little Giant Encyclopedia of Palmistry*, gathers the wisdom he has obtained from decades of practice to produce this comprehensive volume. He answers such questions as: How can the features of the hand tell palm readers as much as the lines on its surface? In what ways can you use a palm reading to change the course of your own future? There's information on using palmistry to explore relationships and sexuality, spiritual fulfillment, and even health. Plus, there are solid technical details on the art and practice of reading palms for others. For experienced and beginning palm readers alike, this is an authoritative collection of thoughts from a master.

The Price of Sex - Belinda Brooks-Gordon 2013-06-17

As a society we are buying more sex than ever before. Adult sex shops now take their place amongst retailers in the high street and lap dancing clubs compete for an increased share of the leisure economy; hotel chains offer sexually explicit films as part of their standard service, the party selling of adult toys to women in their homes has become a mainstream activity; and at the traditional end of the sexual service economy, prostitution has experienced new growth. Along with this has come new legal measures and attempts to regulate the sexual leisure economy, and far more comprehensive plans than ever before to regulate prostitution, in particular in the form of the new Sex Offences Act. This book seeks to address the range of issues and contemporary debates on the sex industry, including the demand by customers who buy sex, the policing of women who work in the street sex industry, and the violence that pervades prostitution. It shows how these issues have been addressed in policy terms, the problems that have emerged in this, and how a social policy might be formulated to minimize harm and enhance public understanding. Overall the book aims to provide a critical perspective on prostitution policies and the legal chaos and complexities that surround this.

Five Years in Revolutionary Cuba - Carroll English 2010-10

As a young missionary in Cuba during its revolution 50 years ago, Carroll English kept a diary of the events as the revolution closed in upon her and her missionary colleagues in the girl's school where she had been assigned by her church. The text for this book is largely drawn from her diary jottings of the time.

Dominatrix - Danielle J. Lindemann 2012-10-03

Our lives are full of small tensions, our closest relationships full of struggle: between woman and man, artist and customer, purist and commercialist, professional and client—and between the dominant and the submissive. In *Dominatrix*, Danielle Lindemann draws on extensive fieldwork and interviews with professional dominatrices in New York City and San Francisco to offer a sophisticated portrait of these unusual professionals, their work, and their clients. Prior research on sex work has focused primarily on prostitutes and most studies of BDSM absorb pro-domme/client relationships without exploring what makes them unique. Lindemann satisfies our curiosity about these paid encounters, shining a light on one of the most secretive and least understood of personal relationships and unthreading a heretofore unexamined patch of our social tapestry. Upending the idea that these erotic laborers engage in simple exchanges and revealing the therapeutic and analytic nature of their work, Lindemann makes a major contribution to cultural studies, anthropology, and queer studies with her analysis of how gender, power, sexuality, and hierarchy shape all of our social experiences.

Psychology of the Future - Stanislav Grof 2019-03-28

Summarizes Grof's experiences and observations from more than forty years of research into non-ordinary states of consciousness. This accessible and comprehensive overview of the work of Stanislav Grof, one of the founders of transpersonal psychology, was specifically written

to acquaint newcomers with his work. Serving as a summation of his career and previous works, this entirely new book is the source to introduce Grof's enormous contributions to the fields of psychiatry and psychology, especially his central concept of holotropic experience, where holotropic signifies "moving toward wholeness." Grof maintains that the current basic assumptions and concepts of psychology and psychiatry require a radical revision based on the intensive and systematic research of holotropic experience. He suggests that a radical inner transformation of humanity and a rise to a higher level of consciousness might be humankind's only real hope for the future. "It's rare to find a textbook that is both extremely informative and enjoyable to read. Psychology of the Future has to be one of the first ones I've ever come across ... Each chapter brought an entirely new concept, theory, or method that was just as engaging as the previous one." — Dr. Tami Brady, TCM Reviews "This book is by a pioneering genius in consciousness research. It presents the full spectrum of Grof's ideas, from his earliest mappings of using LSD psychotherapy, to his clinical work with people facing death, to his more recent work with holotropic breathing, to his latest thoughts about the cosmological implications of consciousness research and the prospects for dealing with an emerging planetary crisis. Grof has always been one of the most original thinkers in the transpersonal field, and his creativity has kept pace with the maturity of his overall vision." -- Michael Washburn, author of *Transpersonal Psychology in Psychoanalytic Perspective* "Grof offers an outstanding contribution to the ever-growing debate about the nature of human consciousness and about the place of humankind in the cosmos. If more psychiatrists could be persuaded that human consciousness transcends the limitations of the physical brain, and instead is but an aspect of what may best be described as 'cosmic consciousness,' we could not only expect treatment modalities to change, but we could also anticipate the possibility of culture-wide rethinking of the basic presuppositions of modern cosmology, the cosmology that grounds Western institutions, ideologies, and beliefs about the nature of personhood." -- Michael E. Zimmerman, author of *Contesting Earth's Future: Radical Ecology and Postmodernity* Stanislav Grof, MD, is a psychiatrist with more than fifty years of experience in research of non-ordinary states of consciousness. He has been Principal Investigator in a psychedelic research program at the Psychiatric Research Institute in Prague, Czechoslovakia; Chief of Psychiatric Research at the Maryland Psychiatric Research Center; Assistant Professor of Psychiatry at the Johns Hopkins University; and Scholar-in-Residence at the Esalen Institute. He is currently Professor of Psychology at the California Institute of Integral Studies, conducts professional training programs in holotropic breathwork, and gives lectures and seminars worldwide. He is one of the founders and chief theoreticians of transpersonal psychology and the founding president of the International Transpersonal Association (ITA). In 2007, he was granted the prestigious Vision 97 award from the Vaclav and Dagmar Havel Foundation in Prague. He is the author and editor of many books, including *The Adventure of Self-Discovery: Dimensions of Consciousness and New Perspectives in Psychotherapy and Inner Exploration*; *Ancient Wisdom and Modern Science*; *Beyond the Brain: Birth, Death, and Transcendence in Psychotherapy*; *The Cosmic Game: Explorations of the Frontiers of Human Consciousness*; and *Human Survival and Consciousness Evolution*; all published by SUNY Press.

[Catalog of Copyright Entries. Third Series - Library of Congress. Copyright Office 1978](#)

Female Sexual Slavery - Kathleen Barry 1984-12

Examines the nature and extent of female sexual slavery, exploring the psychological foundations of male dominance and surveys the by-products of a patriarchal society--pimps, procurers, rapists, enforced marriages, and polygamous arrangements

An Inquiry Into Human Nature and Other Basic Assumptions - Edward F. Kunin 1991

Challenging basic assumptions about human nature, while considering individual and collective behavioural patterns, this text reflects on ways in which a new world view could end current difficulties, to create a more Utopian society.

Coping - C. R. Snyder 1999-03-25

Most people take the process of coping for granted as they go about their daily activities. In many ways, coping is like breathing, an automatic process requiring no apparent effort. However, when people face truly threatening events--what psychologists call stressors--they become acutely aware of the coping process and respond by consciously applying

their day-to-day coping skills. Coping is a fundamental psychological process, and people's skills are commensurately sophisticated. This volume builds on people's strengths and emphasizes their role as positive copers. It features techniques for preventing psychological problems and breaks from the traditional research approach, which is modeled on medicine and focuses on pathology and treatment. Collecting both award-winning research and new findings, this book may well set the agenda for research on stress and coping for the next century. These provocative and readable essays explore a variety of topics, including reality negotiation, confessing through writing, emotional intelligence, optimism, hope, mastery-oriented thinking, and more. Unlike typical self-help books available at any newsstand, this volume features the work of some of the most eminent researchers in the field. Yet like those books it is written for the general reader, as well as for the specialist, and includes numerous practical suggestions and techniques. It will prove an invaluable tool for a wide range of readers.

A Sexual Profile of Men in Power - Sam Janus 1977-01-01

The Prostitution of Sexuality - Kathleen Barry 1995

Barry (sociology, Pennsylvania State U.) considers sexual exploitation a political condition and thus the foundation of women's subordination and the base from which discrimination against women is constructed. She argues for the need to integrate the struggle against sexual exploitation in prostitution into broader feminist struggles and to place it, as one of several connected issues, in the forefront of the feminist agenda.

Walking Shadows - Ib Johansen 2015-08-25

Walking Shadows focuses on the American fantastic and the American grotesque, attempting in this manner for the first time to establish an overview of and a theoretical approach to two literary modes that have often been regarded as essential to an understanding of the American cultural canon.

Die Mächtigen und der Sex (A sexual profile of men in power, dt. - Übers. v. Lukas Urfeld.) - Sam Janus 1979

Prostitution and Human Trafficking - Andrea Di Nicola 2008-12-10

Andrea Cauduro, Andrea Di Nicola, Marco Lombardi, and Paolo Ruspini Client: Have you ever had a [...] by an Albanian? Researcher: No... Client: You should have one, they're great! "I'll tell you something: between an exploited girl and a 'free' one, I choose the exploited one. Because a girl who's being exploited has to give money to her pimp, otherwise she'll be beaten. The others, when they've earned enough they stop working. The exploited ones no: even they don't want to work, they have to stay there and if they don't pay the pimp they're beaten [...] If you think about it, you notice it is more a help than anything else. We all know they're exploited, so it's better to go with them, otherwise they'll be slaughtered!" These two tough excerpts from interviews with clients of foreign prostitution stress the core point of this work: There seems to be a different view, a different logic that moves these men in their search for commercial sex. This is the focus of the discussion and the main reason for this volume. We have attempted to study the phenomenon of trafficking from a different and innovative perspective: the demand. Trafficking in human beings for sexual exploitation (and not only) has involved all the European Union and more in general Western European countries in the past twenty years.

Beyond the Brain - Stanislav Grof 1985-08-01

Beyond the Brain seriously challenges the existing neurophysiological models of the brain. After three decades of extensive research on those non-ordinary states of consciousness induced by psychedelic drugs and by other means, Grof concludes that our present scientific world view is as inadequate as many of its historical predecessors. In this pioneering work, he proposes a new model of the human psyche that takes account of his findings. Grof includes in his model the recollective level, or the reliving of emotionally relevant memories, a level at which the Freudian framework can be useful. Beyond that is perinatal level in which the human unconscious may be activated to a reliving of biological birth and confrontation with death. How birth experience influences an individual's later development is a central focus of the book. The most serious challenge to contemporary psycho-analytic theory comes from a delineation of the transpersonal level, or the expansion of consciousness beyond the boundaries of time and space. Grof makes a bold argument that understanding of the perinatal and transpersonal levels changes much of how we view both mental illness and mental health. His reinterpretation of some of the most agonizing aspects of human behavior proves thought provoking for both laypersons and professional

therapists.

Acorns: Windows High-Tide Foghat - Joshua Morris 2013-01-23

Acorns delineates the future of humanity as a reunification of intellect with the Deep Self. Having chosen to focus upon ego (established

securely by the time of Christ), much more beta brain wave development will destroy our species and others, which process has already begun.

We create our own realities through beliefs, intents and desires and we were in and out of probabilities constantly. Feelings follow beliefs, not the other way around.
