

Ask Her For Adderall

Looking for Information - Donald O. Case
2016-04-29

The 4th edition of this popular text presents a comprehensive review of over a century of research on information behavior. It is intended for students in information studies and disciplines interested in research on information activities. Now co-authored, this new text includes significant structural and content changes from earlier editions.

Bipolar for Psychotherapists and Their Clients - C. Raymond Lake 2023-11-06

This unique book is needed because it aims to improve the care of Bipolar clients while strengthening the clinical practices of non-MD psychotherapists. What is different is the proposal that psychotherapists manage the overall care of Bipolar clients. The increased number of publications about Bipolar over the past decades has enhanced the recognition of Bipolar. As many as 16 million individuals in the US may have a Bipolar episode at some point. Psychiatrists have traditionally managed Bipolar clients but there are not enough psychiatrists and they generally spend only 10 to 15 minutes every one to six months with their clients—often not enough time to recognize oncoming Bipolar episodes. Therapeutic strategy has changed from treating acute episodes to postponing next episodes. Psychotherapists see their clients for 50 minutes every week and are in a better position to recognize developing episodes. Psychotherapists do not prescribe and medicines are usually needed along with psychotherapy for best results. This book encourages psychotherapists to vet and collaborate with prescribers in caring for the therapists' Bipolar clients. Lacking in the psychotherapists' armamentarium for treating Bipolar clients is education regarding diagnostic signs, symptoms, and treatment including the most productive medications. This book provides therapists and clients the needed information and encourages academic departments and other psychotherapy programs to institute training about Bipolar

Disorders.

Drug Dealer, MD - Anna Lembke 2016-11-15

The disturbing connection between well-meaning physicians and the prescription drug epidemic. Three out of four people addicted to heroin probably started on a prescription opioid, according to the director of the Centers for Disease Control and Prevention. In the United States alone, 16,000 people die each year as a result of prescription opioid overdose. But perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well-meaning doctors treating patients with real problems. In *Drug Dealer, MD*, Dr. Anna Lembke uncovers the unseen forces driving opioid addiction nationwide. Combining case studies from her own practice with vital statistics drawn from public policy, cultural anthropology, and neuroscience, she explores the complex relationship between doctors and patients, the science of addiction, and the barriers to successfully addressing drug dependence and addiction. Even when addiction is recognized by doctors and their patients, she argues, many doctors don't know how to treat it, connections to treatment are lacking, and insurance companies won't pay for rehab. Full of extensive interviews—with health care providers, pharmacists, social workers, hospital administrators, insurance company executives, journalists, economists, advocates, and patients and their families—*Drug Dealer, MD*, is for anyone whose life has been touched in some way by addiction to prescription drugs. Dr. Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction: cultural narratives that promote pills as quick fixes, pharmaceutical corporations in cahoots with organized medicine, and a new medical bureaucracy focused on the bottom line that favors pills, procedures, and patient satisfaction over wellness. Dr. Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system, the

solution for which lies in rethinking how health care is delivered.

The Attention Deficit Answer Book - Alan Wachtel 1998-01-01

Over one million children have been diagnosed with ADHD and Ritalin is the most commonly prescribed drug used to combat the problem. While Dr. Wachtel advocates the use of appropriate medications, including Ritalin, Dexedrine, and anti-depressants, he also believes ADHD is more than a biological problem, affecting a child's self-esteem, social life, and the ability to perform well in school. In this comprehensive book, readers will discover: —How to get an accurate diagnosis —Other disorders can mimic ADHD —How to select a specialist —The three classes of medication used and how to determine which one will work best for their child —The use of behavior modification —What to do when a child is resistant to treatment —How to enlist the support of the child's teacher

The Attention Deficit Answer Book expertly guides readers step-by-step through the process of deciding how to best handle their child's particular case. The success of related books such as *The Myth of the A.D.D. Child* shows there is interest in ADHD and its treatment. *The Attention Deficit Answer Book* is accessible, written in a question-and-answer format.

How to Raise a Drug-Free Kid - Joseph A. Califano 2014-09-09

The highly acclaimed comprehensive guide to getting your child through the formative pre-teen, teen, and college years drug-free—now completely revised and updated. Nearly every child will be offered drugs or alcohol before graduating high school, and excessive drinking is common at most colleges. But the good news is that a child who gets to age twenty-one without smoking, using illegal drugs, or abusing alcohol or prescription drugs is virtually certain never to do so. Drawing on more than two decades of research at The National Center on Addiction and Substance Abuse at Columbia University (CASA Columbia), founder Joseph A. Califano, Jr., presents a clear, common-sense guide to helping kids stay drug-free. All parents dream of a healthy, productive, and fulfilling future for their children; Califano shows which specific actions work and what parents can do to

teach, protect, and empower their children to have the greatest chance of making that future come true. Teenagers who learn about the risks of drugs from their parents are twice as likely never to try them, and this book provides the tools parents need to prepare their children for those crucial decision-making moments. In this revised and updated edition, Califano tackles some of the newest obstacles standing between our kids and a drug-free life—from social media sites and cell phone apps to the explosion in prescription and over-the-counter drug abuse and the increased dangers and addictive power of marijuana. He reveals what teens can't or won't tell their parents about their thoughts on drugs and alcohol, and combines the latest research with his discussions with thousands of parents and teens about the challenges that widespread access to drugs and alcohol present, and how parents can instill in their teens the will and skills to choose not to use. Califano's insightful and lively guide is as readable as it is informative.

Our Love Affair with Drugs - Jerrold Winter 2019-11-25

Prescription, illicit, and recreational drugs touch all of our lives yet a basic understanding of these chemicals is largely absent among Americans. Jerrold Winter offers a comprehensive account of psychoactive drugs, chemicals which influence our brains in myriad ways. Manifestations of their influence on the brain are quite varied. There may be the comfort provided by opioids to those who are dying or in pain or, in everyday life, the surge of contentment for the users of caffeine, nicotine, heroin, alcohol, or marijuana upon the taking of their drug of choice. Turning to the more exotic, a drug such as LSD may alter the way the world looks to us; it may even inspire thoughts of God. Adding to the purely scientific questions which confront us are the ways in which our society chooses to respond to the presence of psychoactive drugs. Should they be banned and their users sent to prison, tolerated as a reflection of man's eternal search for an escape from anxiety, pain, and the monotony of daily life, or celebrated as therapeutically useful agents? *Our Love Affair with Drugs* is written for experts and novices alike. There are stories of, for example, how Timothy Leary caused the

repeal of the Marijuana Tax Act of 1937. Readers will learn of the transformation by Sir Charles Locock of a drug intended to dampen female sexual activity into the first effective drug for the treatment of the ancient disease of epilepsy. Alexander Shulgin's love of psychoactive drugs and his unconventional research practices illuminate the story of methylenedioxymethamphetamine, a.k.a. Ecstasy, a drug now likely to find value in treating veterans and others suffering post-traumatic distress disorder. Winter links the excitement of drug discovery with the very practical matter of balancing the benefits and risks of these drugs.

Jeffrey's Journey - Debbie Jeffries 2005

From birth, it was clear that Jeffrey was not a typical child. By age three he exhibited such severe behavioral problems he was considered a danger to other children. No daycare would take him, and doctors were more stymied than helpful about his extreme aggressiveness and compulsiveness. Threatened with institutionalization for her six-year-old son, Debbie Jeffries resorted to an unusual therapy: marijuana. A conservative Christian, she had no experience with the drug, but extensive research convinced her this might be her last hope. This book powerfully describes the desperate journey of a family toward a semblance of normalcy, including the court battle defending Jeffrey's right to this unconventional treatment, the family's exposure on "48 Hours," and the threat to Jeffrey's ongoing care by federal raids on California's medical marijuana dispensaries. The book also features a special resource section, plus commentary by Michael Alcalay, the pediatrician who recommended and supervised Jeffrey's marijuana therapy; Valerie Corral, who helped design his marijuana regimen; and ethicist Peter S. Clark, Ph.D.

The Bipolar Disorder Survival Guide, Third Edition - David J. Miklowitz 2019-02-21

Bipolar disorder is a lifelong challenge--but it doesn't have to rule your life. Find the science-based information you need in the revised third edition of this indispensable guide. Trusted authority Dr. David J. Miklowitz shares proven strategies for managing your illness or supporting a loved one with the disorder. Learn specific steps to cope with mood episodes,

reduce recurrences, avoid misdiagnosis, get the most out of treatment, resolve family conflicts, and make lifestyle changes to stay well. Updated throughout, the third edition has a new chapter on kids and teens; the latest facts on medications and therapy, including important advances in personalized care; and expanded coverage of the bipolar II subtype. It features boxes on complementary and alternative treatments and provides downloadable practical tools.

Working Mother - 2005-09

The magazine that helps career moms balance their personal and professional lives.

Neverworld Wake - Marisha Pessl 2018-06-07

A compulsive, read-in-one-sitting suspense novel: page-turning, perfectly paced with a trust-no-one cast of characters and a high stakes death-cheating dilemma. Five friends. Only one can survive the Neverworld Wake. Who would you choose?

Hope in the Age of Addiction - Chip Dodd 2020-08-04

Between alcohol, illegal drugs, prescription drugs, pornography, gambling, and eating disorders, fully 25% of the population of the United States is addicted to something. Those addictions are taking a massive physical, emotional, spiritual, and financial toll on individuals, families, and communities. The problem can feel insurmountable. But there is a solution, at once ancient and supported by the latest in neuroscientific research. With an honest assessment of the facts, yet always reaching out toward hopeful solutions, counselors Chip Dodd and Stephen James explain what addiction really is, how it works, and why it is so damaging to our hearts, souls, minds, and relationships. They then take us beyond mere coping techniques that allow us to function to the real solution--restoring our broken relationship with our Creator so that we can rediscover how to live fully the way we were created to live. Each chapter includes the personal story of a recovering addict, told from the addict's point of view. The authors also include a list of books, organizations, workshops, and treatment centers people can turn to for help along the road to lasting recovery.

TEEN-MD - Pascal LaRuffa 2011-01-06

This book deals with Mind, Body, and Spirit. It
Downloaded from
legacy.opendemocracy.net on 2019-02-11
by guest

follows my career path from Boston to Dallas; then, to suburban Philadelphia. It tells 27 stories based on fact - each about a teenager or young adult with overwhelming problems, and how they were resolved. Patients eventually bared their anguish, anxiety, and fears - often related to moral issues. In spite of this, humor frequently provided welcome relief. This uncommon interaction makes the book a page turner. The dialogue is captivating.

The Harvest - D D M Dahl 2021-07-18

A series of gruesome murders has brought together law enforcement officials from two countries as they try desperately to find a ruthless killer before he strikes again. With the help of a forensic pathologist, the pair close in on the perpetrator, paving the way for the emotional unraveling of one of the detectives. For Captain Mark Nolan, the fight has become personal. With over 30 years of service and retirement just around the corner, these murders are the only unsolved crimes in his normally peaceful jurisdiction, and the most disturbing by far. A country away, Detective Bryce-Jones has followed the same trail of murders, noting a haunting similarity with cold cases that have kept her up at night for the past six years. As the pair unite seeking justice, exhumations of the bodies of the cold cases in Canada are ordered revealing more consistencies as well as clear evidence of a cover-up. The victims are missing organs, removed with a surgeon's precision yet the incisions are closed by what appears to be a child's hand. Exploring the field of forensic pathology by delving into autopsy methodology and body decomposition, *The Harvest* brings crime and medicine together across jurisdictions. With relatable characters and a story intertwined with shocking twists and raw emotionality, *The Harvest* is a captivating crime novel.

Trolls, Snakes and Shadow People - Elsbeth Renee O'Lea 2014-06-12

Trolls, Snakes and Shadow People details an adoptive mother's journey through the frustration of dealing with the mental health networks and eventually through the CPS and Juvenile court system. Throughout the process the mother leans on God for support and guidance and grows in her relationship with

God.

Working Mother - 2005-06

The magazine that helps career moms balance their personal and professional lives.

After Perfect - Christina McDowell 2016-04-19

Christina McDowell was born Christina Prousalis. She had to change her name to be legally extricated from the trail of chaos her father, Tom Prousalis, left in the wake of his arrest and subsequent imprisonment as one of the guilty players sucked into the collateral fallout of Jordan Belfort (the "Wolf of Wall Street"). Christina worshipped her father and the seemingly perfect life they lived...a life she finds out was built on lies. Christina's family, as is typically the case, had no idea what was going on. Nineteen-year-old Christina drove her father to jail while her mother dissolved in denial. Since then, Christina's life has been decimated. As her family floundered in rehab, depression, homelessness, and loss, Christina succumbed to the grip of alcohol, drugs, and promiscuity before finding catharsis in the most unlikely of places. From the bucolic affluence of suburban Washington, DC, to the A-list clubs and seedy underbelly of Los Angeles, this provocative memoir unflinchingly describes the harsh realities of a fall from grace.

Working Mother - 2005-07

The magazine that helps career moms balance their personal and professional lives.

Small Animal Toxicology Essentials - Robert H. Poppenga 2011-05-31

Providing a ready reference for the initial triage, collection of diagnostic samples, and management of a poisoning case, *Small Animal Toxicology Essentials* focuses on the most common poisons encountered by companion animals. From prevention to evaluation, monitoring, and treatment, the book is a guide for veterinary technicians to differentiate between significant and insignificant exposures and effectively manage animal poisonings. Emphasizing clinical signs, differential diagnoses, and case management, the book begins with the principles of veterinary toxicology, such as terminology, history-taking, and decontamination. The second half of the book is devoted to specific toxicants, including plants, metals, drugs, and household poisons. A companion website at

www.wiley.com/go/poppenga provides review questions in Word and color images available for download into PowerPoint. Small Animal Toxicology Essentials is a useful resource for veterinary technicians, especially those with an interest in emergency and critical care, and veterinary technician students, as well as practicing veterinarians looking for an introduction to toxicology.

People - 2005-07

The Adderall Diaries - Stephen Elliott 2010-05

In the spring of 2007, a brilliant computer programmer named Hans Reiser stands accused of murdering his estranged wife, Nina. Despite a mountain of circumstantial evidence against him, he proclaims his innocence. The case takes a twist when Nina's former lover, and Hans's former best friend, Sean Sturgeon, confesses to eight unrelated murders that no one has ever

heard of. At the time of Sturgeon's confession, Stephen Elliot is paralyzed by writer's block, in the thrall of Adderall dependency, and despondent over the state of his romantic life. But he is fascinated by Sturgeon, whose path he has often crossed in San Francisco's underground S&M scene. What kind of person, he wonders, confesses to a murder he likely did not commit? One answer is, perhaps, a man like Elliott's own father. So begins a riveting journey through a neon landscape of false confessions, self-medication, and torturous sex. Set against the backdrop of a nation at war, in the declining years of the Silicon Valley tech boom and the dawn of Paris Hilton's celebrity, The Adderall Diaries is at once a gripping account of a murder trial and a scorching investigation of the self. Tough, tender, and unflinchingly honest, it is the breakout book by one of the most daring writers of his generation.
