[The Female Body Blueprint](#) - Josh Rubin 2015-02-10

Hormones Gone Haywire? There is a crisis in women's health today. The average age for puberty has dropped abruptly to 10 years of age. Endometriosis, one of the top three causes of female infertility, affects more than 5.5 million women. 75% of all women suffer with some premenstrual syndrome symptoms. 80% of all women have uterine fibroids (which lead to 170,000-300,000 hysterectomies annually). And dysmenorrhea-menstrual pain that interferes with day-to-day activities-affects approximately 40-70% of women of reproductive age. If you've visited your doctor for any of these reasons, it's likely you've been given birth control pills to "even things out" or hormone replacement therapy. But is this really a solution? The Solution Isn't More Birth Control Pills It's likely that hormonal treatments will only mask the symptoms, if not make things worse. So what is the solution? Is PMS to be normal and expected every month? Is infertility unable to be treated without invasive therapies? Are hot flashes simply a symptom of getting older? Luckily, the answer is no to all of these questions. There is a solution, and it doesn't involve drugs or invasive therapies. The solution lies in hormonal balance. A Total System for Female Health "The Female Body Blueprint" by Josh and Jeanne Rubin takes the complex subject of hormonal balance and breaks it down into easy to digest information and action steps. By naturally decreasing the amount of estrogen in your body, increasing the amount of progesterone, and healing your metabolism, you'll be well on your way to hormonal health at any age. Get back in balance by learning how to eat, sleep, exercise, and de-stress. They don't teach this stuff in school...or likely in your doctor's office. But these are the vital foundations that will make this women's health crisis a thing of the past. Follow this blueprint and take back control of your health once and for all.

The Hormone Shift - Dawn M. Cutillo 2012

Would you like to lose five pounds, stop your hot flashes and sleep better, THIS WEEK? These results are attainable when your hormones get into balance. The author explains how natural, safe solutions can bring fast results that last. From her twenty-three years of experience in the health field, and after helping thousands of women at her Lancaster, Pa. health center, she has noted growing trends that ALL stem from a simple hormone imbalance: The inability for women to lose weight efficiently after the age of 35 due to a slowed metabolism. The increased use of strong mood medications for depression/anxiety that do not improve mood satisfactorily for most women and also cause unpleasant side effects. The increase in fatigue experienced by women and the increased use of synthetic thyroid medication that does not satisfactorily resolve all the woman's symptoms. The increased use of the birth control pill for heavy, painful periods and menstrual irregularity that temporarily solves the problem but will cause health issues over time. The increased number of ablations, hysterectomies and other invasive procedures performed for cysts, fibroids, endometriosis. Women still fear breast cancer due to not knowing its true cause. CONCLUSION: Frustration is rising due to NOT getting validation about concerns or answers on these issues from the medical field or health/nutrition industry! Are Your Hormones Imbalanced? Perhaps your hormones have "shifted" a bit due to stress, age, pregnancy or menopause. Are you left feeling frustrated from trying to deal with many issues that do not seem to respond to diet, exercise, herbs, medication or even surgical procedures? Learn the ONE MAIN hormonal "shift" that occurs in almost all American women, starting at puberty and peaking around menopause along with its ONE MAIN origin. The author will give you simple steps on how to reverse this hormonal "shift" so that within a month you can be: Losing weight quickly (even if NOTHING worked up until now) Relieving your hot flashes/night sweats Deepening your sleep Easing your anxiety/irritability and mood swings Seeing your depression lift Regulating your menstrual cycle - easing symptoms of PMS Decreasing your chance of female-related cancers Reversing your other

PMS/menopausal symptoms or conditions that affect your overall health. You will understand that when hormones are balanced you will look and feel your best while preventing female-related cancers...and slowing the aging process as an extra benefit! If you are one of the many women saying.... These constant hot flashes are driving me crazy! Is everyone around me trying to get on my last nerve? I'm counting FLOCKS of sheep and still can't sleep! I'm working out, eating like a bird and can't lose a single pound! Sex? Are you kidding? I'd rather be sleeping or eating. My thyroid medicine just doesn't seem like it's helping me lose weight. Depressed? That's an understatement, nothing is really fun anymore. This book is a must-read!

Period Power - Maisie Hill 2019-07-02

Period Power is the handbook to periods and hormones that will leave you wondering why the hell nobody told you this sooner. The hormones of the menstrual cycle profoundly influence our energy, mood and behaviour, but all too often we're taught that our hormones make us unreliable, moody bitches, or that it's our lot in life to put up with 'women's problems'. Maisie Hill, a women's health practitioner, knows the power of working with the menstrual cycle and refuses to accept this theory. Instead, Maisie believes that our hormones are there to serve us and, if utilized correctly, can be used to help you get what you want out of life. Yes, we are hormonal, and that's a very good thing. This revolutionary book reveals everything you need to know about taking control of your menstrual cycle and outlines The Cycle Strategy to help us perform at our best, throughout our cycle. Period Power is a no-nonsense guide with all the tools you need to improve your menstrual health.

[Progesterone the Ultimate Women's Feel Good Hormone](#) - Dan Purser 2009-07-31

Progesterone The Ultimate Women's Feel Good Hormone answers why you're having those miserable hot flashes, why you're having those horrible night/day/all the DANG TIME sweats. Educates you on the REAL reasons you're having "hormonal" migraines (and it's not a Lortab(c) deficiency as most physicians think). Sleep better, feel sexier and wake up happier. Reduce your risk of breast cancer, heart attacks and strokes, and feel great doing it. Endometriosis is addressed in detail and how it's either a problem with low progesterone, or progesterone resistance (progesterone receptor problem) - NOT lack of a "laser ablation" or hysterectomy Everything's fully referenced, nothing's made up, so you can defend your position with your own doctor, and quote the articles and studies and literature. If that doesn't work (and your doctor won't listen) Dr. Purser tells you how you can find a doctor to help you with getting natural progesterone or how to even find some over the counter. Dr. Purser lectures about progesterone all over the world and educates physicians on it and the public -- he knows of which he speaks and this book makes it simple to see why. If you're suffering and feeling like garbage from your peri-menopause, get this book NOW and save yourself more sleepless sweaty miserable nights. A female hormone guide book written by a top preventive medicine and endocrine MD/physician researcher. [Hormones, Health, and Happiness](#) - Steven F. Hotze 2013

Do you want to maintain your health and energy level as you age? If so, then it is essential that you replenish your declining hormones. In Hormones, Health, and Happiness, Dr. Steven Hotze reveals how restoring hormones to optimal levels using natural, bioidentical hormones enables women and men to

regain their vitality. Dr. Hotze discusses the frequently overlooked problem of hypothyroidism, which commonly affects women in midlife. Too often, women with all the signs of low thyroid are told that their blood results are normal. Find out why women should believe what their bodies are telling them rather than the results of a blood test. The conventional medical approach treats symptoms with "anti" drugs, such as antidepressants, antihistamines, antispasmodics, anti-arthritics, and others, rather than discovering and correcting the underlying problems of these symptoms. In *Hormones, Health, and Happiness*, Dr. Hotze discusses symptoms of women and men in midlife, which include fatigue, weight gain, headaches, depression, insomnia, hot flashes, joint and muscle pain, brain fog, loss of interest in sex, allergies, and recurrent infections, to name a few, and addresses their solutions. His comprehensive eight-point wellness program will help you strengthen your immune system, balance your hormones, and increase your energy level. This program encompasses:

- Treatment of low thyroid
- Treatment of hormonal decline and imbalance
- Treatment of adrenal fatigue
- Treatment of yeast overgrowth
- Treatment of airborne allergies
- Treatment of food allergies
- Vitamin and mineral supplementation
- Nutritionally balanced eating program

Dr. Hotze demonstrates how many health problems can be solved safely, effectively, and naturally without drugs. If you are sick and tired of being sick and tired, then it's time to take charge of your health and get your life back. By following Dr. Hotze's recommendations you can begin your journey down a life-long path of health and happiness.

Estrogen - Quinn Spencer 2018-06-15

Would it help to understand your female hormones better? Estrogen, along with two other hormones, greatly affects fertility, blood pressure, temperature, the reproductive system, emotions, and sexual desires. When you think about it for a moment, it is unbelievable that billions of women go through life with all these fluctuating hormones in their bodies without ever coming to an understanding of what they do to them. They may find themselves having mood swings, hot flashes, or get a burst of lust without realizing where those things are coming from or how to control them. Understanding estrogen is crucial, and men would also greatly benefit from understanding the women they work with, including their own mothers, daughters, or wives. What if you could influence your estrogen levels, so that you could be more in control, minimize negative symptoms or sudden urges and emotions, or understand yourself better (and therefore, blame yourself less for mistakes you make)? Wouldn't this change your life? In this clear, concise guide to understanding the impact and effects of estrogen levels, you will learn more about essential subtopics, such as: The main ways how estrogen affects your body, your other hormones, your health, and your emotions. Important facts about male and female fertility (and infertility). The reason why estrogen dominance can speed up the aging process. Crucial foods that help reduce estrogen dominance. What you should know about the menopause, and how to handle it the best way. How to prevent hair loss and breast cancer by avoiding chemical estrogens. How to increase women's desire for sex significantly. Knowing about estrogen and what it does, is huge! Everyone should learn more about it, and yet, so many people don't. Get smarter. Learn more about yourself and others. This hormone is flowing through your body. It is part of who you are. It would be better for you to understand what is going on inside of you. Add this book to your cart. You won't regret it.

International Differences in Mortality at Older Ages - National Research Council 2011-02-27

In 1950 men and women in the United States had a combined life expectancy of 68.9 years, the 12th highest life expectancy at birth in the world. Today, life expectancy is up to 79.2 years, yet the country is

now 28th on the list, behind the United Kingdom, Korea, Canada, and France, among others. The United States does have higher rates of infant mortality and violent deaths than in other developed countries, but these factors do not fully account for the country's relatively poor ranking in life expectancy. *International Differences in Mortality at Older Ages: Dimensions and Sources* examines patterns in international differences in life expectancy above age 50 and assesses the evidence and arguments that have been advanced to explain the poor position of the United States relative to other countries. The papers in this deeply researched volume identify gaps in measurement, data, theory, and research design and pinpoint areas for future high-priority research in this area. In addition to examining the differences in mortality around the world, the papers in *International Differences in Mortality at Older Ages* look at health factors and life-style choices commonly believed to contribute to the observed international differences in life expectancy. They also identify strategic opportunities for health-related interventions. This book offers a wide variety of disciplinary and scholarly perspectives to the study of mortality, and it offers in-depth analyses that can serve health professionals, policy makers, statisticians, and researchers.

Outliving Your Ovaries - Marina Johnson 2012-07-28

(BP 710) - Marina Johnson MD is a board-certified Endocrinologist and Pharmacist. In 2011, she was honored to be invited as one of twelve speakers at the Cleveland HeartLab Annual Symposium. Her program, "Seven Strategies For Prescribing HRT & Cardiovascular Implications", represented AMA Category 1 Continuing Medical Education (CME) for keeping physicians up-to-date on the very latest evidence-based research and methods. Dr. Johnson is the Medical Director of the Institute of Endocrinology and Preventive Medicine in Irving, Texas. In her 30 years of practice, she has managed over 100,000 female patient visits. She has no financial ties with any pharmaceutical company. Her book provides break-through research explaining why topical bioidentical hormones, in the form of pharmaceutical patches, gels and mist products are safer and more reliable than oral synthetic and compounded hormones. (27.25-7-16) REVIEWS "I've been a patient of Dr. Johnson's for 4 years now. Lousy quality of life, fat and miserable when I found her, she has changed my life. I now love living, have lost 40 pounds, feel and look 30 years younger and only intend to get better. You owe it to yourself and the women in your life to read this book. Following her program is not easy or quick, but it's well worth the time and effort you spend. I'll never go back to the way I was. There are two most important women in my life: my mother, who gave me life; and Dr. Marina Johnson, who made it worth living again." Celia Trimble Attorney "An absolute must read for all adult females. Her Johnson Menopause Method is evidence-based and backed up by 30 years of continuing clinical experience. From a medical standpoint, her method contains excellent concepts which are all too

often missing in current clinical medicine. It is refreshing to read a book that is obviously divorced from medical industry bias. Her willingness to share her wealth of knowledge is commendable. Her book empowers women with essential information that will allow them to take responsibility for their own well being. Healthcare providers who deliver hormone replacement therapy should be required to read this book." Dr. Bradley F. Bale Co-Founder of the Bale/Doneen Method Clinical Professor Texas Tech School of Medicine "Outliving Your Ovaries is a must read for every woman. Not only because it demystifies so many controversial and conflicting views in treating menopause, but mostly because one can put that book down and feel absolutely empowered. Women can now have the intelligent and informed conversation with their doctors about their bodies that so many of us have struggled to have. Dr. Johnson helps us to understand - with honesty, and decades of research - the real risks and real benefits of how you treat your body during your child-bearing and menopausal years. It's not that this book goes out of its way to criticize or put down others' work, conclusions or opinions. It's that Outliving Your Ovaries gives women a FAIR view, one that isn't backed by a pharmaceutical company, Hollywood cult phenomenon, or other financial directive. And because Dr. Johnson speaks on our behalf without that pressure, I personally find her word trustworthy. But trust is not the only reason to listen, Dr. Johnson's credentials also speak for themselves. She is a trained pharmacist and endocrinologist, giving her unique perspective on risk and benefit of Hormone Replacement Therapy valuable weight. I have read and re-read this work since it was first published, discussed it with my doctor, and with confidence, taken an active role in my health and treatment. Get Lean After 40 Hormone Reset Diet: Kick Start Metabolism - Jouly M. Dectors 2019-09-06

Menopause is a natural passage in the life of every woman: the term means "last menstruation" and refers therefore to the end of the menstrual cycle and female reproductive life. At the age of 40s, the body and the skin need more attention. We need to consider a radical change in lifestyle. After the age of 40, our metabolism slows down by 5% every 10 years. The hormone replacement therapy seems to be an effective remedy to relieve ailments of menopause in general, including hot flashes. However, there are some natural remedies that can be effective to counteract this annoying menopausal symptom. In this book, you'll learn about:- Women's menopause - What are the signs of menopause starting? - Hormonal treatment for menopause - Treatment for menopause hot flashes - Kick start metabolism after 40 - Foods you should eat after age 40 to stay in shape - How to balance hormones to lose weight - Low glycemic carbs list Estrogen Rich Foods

Everything You Need to Know About the Menopause (but were too afraid to ask) - Kate Muir 2022-01-20

An eye-opening, no-holds-barred guide to the perimenopause and menopause written by campaigner, journalist and documentary-maker Kate Muir. Everything You Need to Know About the Menopause (and were too afraid to ask) is the thinking woman's guide to the menopause, bringing you answers to all those questions that have been hidden behind a veneer of misplaced shame, bad science and centuries of patriarchy. · What's the perimenopause and when will it strike? (It's sooner than you think) · What's happening to my body - and my mind? · Why can't I stop thinking about sex in perimenopause? · How do I get my sex drive back after menopause? · How do I look after my body and brain when my hormones disappear? Muir draws on interviews with the leading medical experts in the field, interlaced with her own tumultuous journey through the menopause and the personal stories of women from all walks of life, sharing their varied experiences and hard-earned wisdom. Muir also questions why the current medical establishment is getting the menopause so wrong, as she debunks the myths that surround hormone replacement therapy and exposes the sloppy science and hysterical headlines that have had a negative impact on women's health for the last twenty years. It's essential that we understand the biology of our own bodies during this critical period that will define the latter half of our lives. With the help of a panel of doctors, scientists and health experts, Muir unpacks the science behind hormones and ageing, and takes a close look at the different options available for treating both body and mind during the profound changes that take us into midlife and beyond. What she discovers is that both symptoms and treatment are far more extensive and diverse than we might expect. The menopause is the whole package, and the treatment needs

to be too, with impacts as wide ranging as preventing Alzheimer's, boosting sex drive and protecting mental health. This ground-breaking guide is a social, cultural and scientific exploration into a criminally overlooked and under-discussed phenomenon that will affect one billion of us by 2025. And it is a manifesto for change, calling for equality in healthcare and an entirely new approach to women's health.

The Menopause Answer Book - Marsha Lynn Speller 2004-05-01

Estrogen is a powerful female hormone that protects women from many health risks. In menopause, estrogen levels decline and its protective qualities decline as well. At the same time, a lifetime of bad habits may begin to catch up with us, and our genetic predispositions to disease begin to surface. All this leads to a plethora of symptoms, some temporary, some chronic and some life-threatening. The Menopause Answer Book allows women to carefully assess their own symptoms and then seek out the information and treatments that will be tailored to their own specific needs: -- Find out if you're at risk for diseases associated with menopause -- Develop your Menopause Action Plan -- Assess the pros and cons of Hormone Replacement Therapy -- Find out what tests to request from your doctor -- Find out how to get the attention and treatment that you need -- Learn about important lifestyle changes to make right now Women dealing with menopause and perimenopause are bombarded with information but often have a hard time figuring out what applies to them and how to choose between conflicting advice. The Menopause Answer Book is the must-have companion to the top-selling menopause books, which are informational but don't help women tailor their treatment.

The Secret Female Hormone - Kathy C. Maupin, M.D. 2014-03-03

"The Secret Female Hormone is a must read for women today! Hormones should always be evaluated in unity, and testosterone is almost always overlooked. The authors tell the truth about how hormone imbalances truly affect women - not only their energy, their vitality and their libido but also their family relationships and self-esteem. This book will be a resource for women for years to come!" - Marcelle Pick, author of *Is It Me or My Hormones?* and *The Core Balance Diet* Leading experts show why testosterone hormone imbalance could be the vital connecting factor in a wide variety of health issues for women in midlife. You know the experiences all too well. You can't sleep, so you start your day feeling exhausted. Seemingly overnight, you can't remember names, places, appointments—things you could previously recite at the drop of a hat. You want to be more active, but you have zero energy for that. And sex? Forget it! By now, you've probably been told this is "normal," or that it's the "natural" course of aging. And you might even believe it, because so many women approaching midlife have the exact same symptoms. In fact, millions of women worldwide are undiagnosed and untreated for hormone imbalance deficiency. As one of the country's leading experts on hormonal balance—and as a woman who experienced these symptoms herself—Dr. Kathy Maupin has identified a debilitating and overlooked health condition: testosterone deficiency syndrome, or TDS. Most people associate testosterone with men, but it's one of the most vital hormones in women, and one of the first hormones that women begin to lose as they enter their 40s. And Dr. Maupin's own research has shown that the symptoms of aging—fatigue, memory loss, moodiness, low libido, and so much more—are initiated and accelerated by testosterone loss. In this book, Dr. Maupin and therapist Brett Newcomb show how testosterone replacement can radically improve your life. They share the history and background of hormone replacement therapy, the latest research on treatment options, as well as: • Tips for dealing with mood swings, changes in sex drive, and maintaining healthy relationships • Surprising information on the long-term effects and health risks of testosterone loss • Common myths and misconceptions regarding estrogen and testosterone replacement therapy • Questionnaires to help you determine your individual hormone deficiencies • Real stories and personal experiences Dr. Maupin's patients share clear, practical, and easy-to-use, this authoritative guide sheds light on the importance of testosterone and will help you reclaim your physical, mental, emotional, and spiritual health.
