Sub: My Years Underground in America's Schools - Tom Gallagher 2015-02-09

"As a substitute teacher in the schools of San Francisco and South San Francisco since some time in the last millennium (and in Boston before that), Tom Gallagher sees kids on their worst behavior five days a week -- that's when business is good. Once a member of the Massachusetts House of Representatives, where he was affectionately known as Tommy the Commie and sat on the Joint Committee on Education, Gallagher currently holds the line against academic entropy in everything from pre-Kindergarten through 12th Grade, from Physics to Phys Ed. The fundamental stance of *Sub: My Years Underground in America's Schools* is wry -- it dares raise questions like why the guy who invented middle schools was never prosecuted for crimes against humanity. At the same

time, Gallagher finds much of the current national debate on education misplaced: the system works just fine for some, while for others schools are asked to solve problems in children's lives that are far beyond their scope"--Back cover.

**Far From Simple: Life After Being Not Your Average Teen** - Brittany Krystantos 2017-11-14

*Far From Simple: Life After Being "Not Your Average Teen"* written by 20 year old Canadian author, Brittany Krystantos, recalls the ever-so common high school struggles with self identity, friendships and lack-thereof, popularity and stereotypes, and continues into young adulthood consisting of the terrible tinder dates including the time her date told her they'd have cute babies on their first date... run, oh yes! Britt shares with us her awful attempt at friends-with-benefits or should we say FWB, and heartbreak from the time her boyfriend broke up with her over text. Maybe, the heart healed from eating the entire jar of chocolate ice cream or maybe not; but it sure felt better in the moment. In this narrative nonfiction, she describes that "kind of girl" that is within all of us: ambitious, different, free spirited, wild, adventurous, yet innocent at the heart of things. She has gone through pain and hardship and dug her way out of the darkness to become enlightened by her soul's calling; a life purpose to be different, and far from simple. 20 years of life, what up!

The richness of the personal stories of these students and how their experiences can shape the future for students like them offers teachable moments for professors and preservice teachers to use in classrooms. *Advising Preservice Teachers Through Narratives From Students With Disabilities* heralds the stories of students with disabilities as they trace their journey from the PK-12 setting into university and adult life and addresses aspects that any new teacher must know in order to meet the needs of today's PK-12 classrooms. Covering topics such as social justice, virtual learning, and faculty convenience, it is ideal for preservice teachers, practicing teachers, administrators, professors, researchers, academicians, and students.

[Out-of-School-Time STEM Programs for Females](#) - Lynda R. Wiest 2021-01-01

Vol. II: Short-Term Programs features eight OST STEM programs for females from across the United States that run one to three days in length, in most cases, a single day. In this book, the chapter authors describe their programs, the effectiveness of those programs, and practical implications of their program evaluation data. This book series is the first of its kind to offer researchers, educators, school administrators, policy makers, and others detailed insight into the promise and practice of out-of-school-time STEM programs for females. Science, technology, engineering, and mathematics (STEM) disciplines play a pivotal role in societal progress and economic prosperity, in addition to enhancing individual lives. However, U.S. students lack strong STEM performance in an international context. The pool of STEM-proficient workers is thus insufficient to fuel the nation, with females being one group that is noticeably absent. Out-of-school-time (OST) programs, which are on the rise, are increasingly suggested as a way to support and encourage underrepresented groups in STEM. Participants in OST programs have shown improved achievement, interest, and confidence in STEM, as well as greater awareness of STEM role models and careers.

[The White Fence](#) - Jacqueline White 2013-05-03

Tracy couldn't have imagined a worse start to her freshman year. The weekend before she's supposed to start school at the recently integrated Mason High in Bakersfield, Alabama, a fatal car accident threatens the fragile peace her town has experienced since it was forced to desegregate. Maybe it's an omen, but Tracy is determined not to let it slow her down. With segregation slowly dying across the South, she sees change happening and is determined to use it to her advantage. Tracy dreams of making it to Harvard, and she won't let anything stop her from becoming an Ivy League-trained lawyer. Aware of the amount of

dedication and personal sacrifice it will take to achieve this goal, she is willing to give up weekends out, and is prepared for her teachers, friends, and even family to stand in her way. What she hasn't counted on, however, is falling in love. Derek doesn't know what he wants from the future. Lacking ambition, and happily settled in Bakersfield, the only thing the two of them seem to have in common is their dislike for each other. When a high school project forces them to work together, Tracy finds herself falling for him. But in her quest to achieve the impossible, there's no room for deviation or compromise—and there's certainly no room for love. As Tracy struggles with her developing feelings, she realizes that in life, it's never as simple as black and white.

This is a book for personal growth, a tool for deepening relationships, a lively conversation starter for the family dinner table, a fun way to pass the time in the car. It poses over 300 questions that invite people to explore the most fascinating of subjects: themselves and how they really feel about the world. The revised edition includes more than 100 all-new questions that delve into such topics as the disappearing border between man and machine—How would you react if you learned that a sad and beautiful poem that touched you deeply had been written by a computer? The challenges of being a parent—Would you completely rewrite your child's college-application essays if it would help him get into a better school? The never-endingly interesting topic of sex—Would you be willing to give up sex for a year if you knew it would give you a much deeper sense of peace than you now have? And of course the meaning of it all—If you were handed an envelope with the date of your death inside, and you knew you could do nothing to alter your fate, would you look? *The Book of Questions* may be the only publication that challenges—and even changes—the way you view the world, without offering a single opinion of its own.

[Speak Up!](#) - Halley Bondy 2019-08-01
